

Physics Colloquium, St. Francis Xavier University

9 February 2018, 4pm, PSC 3046

Dr. Raju Mohandas

Ophthalmology, a look through the lens of a practitioner

An overview of ophthalmology as a career with a look at educational requirements and process as well as practice of the specialty. There will also be description of the various tools used in diagnosis and treatment of ocular diseases as well as a discussion of the science involved in these instruments. A question and answer period will be available at the end of the presentation for exploration of topics of interest in this field.
