The St. Francis Xavier University motto is taken from the letter of Paul to the Philippians. The following is an excerpt from the epistle.

*I want you to be happy, always happy in the Lord; I repeat, what I want is your happiness. Let your tolerance be evident to everyone: the Lord is very near. There is no need to worry; but if there is anything you need, pray for it, asking God for it with prayer and thanksgiving, and that peace of God, which is so much greater than we can understand, will guard your hearts and your thoughts, in Christ Jesus. Finally, brothers and sisters, fill your minds with *everything that is true*, everything that is noble, everything that is good and pure, everything that we love and honour, and everything that can be thought virtuous or worthy of praise.*

*Phil. 4: 4-9*
Students and other readers will appreciate that matters dealt with in this Academic Calendar are subject to continuing review. The university reserves the right to alter anything described herein without notice other than through the regular process of the university. Please refer to the online version of this academic calendar for updates. The university cannot accept responsibility or liability to any person or persons who may suffer loss or who may be otherwise adversely affected by such changes. The Academic Calendar takes precedence over all other publications.

In the interpretation of academic regulations, the University Senate is the final authority. The registrar will assist students in interpreting academic regulations; however, it is the responsibility of students to see that their academic programs meet university regulations.

The Board of Governors has final authority on all financial matters. The financial policies will be enforced through the Financial Services, under the direction of the Director of Finance. Notwithstanding any other provision of this calendar, St. Francis Xavier University accepts no responsibility to provide any course of instruction, program or class, residential or other services including the normal range of academic, residential and other services in circumstances of utility interruptions, fire, flood, strikes, work stoppages, labour disputes, war, insurrection, the operation of law or acts of God or any other cause (whether similar or dissimilar to those enumerated) that reasonably prevent their provision.
## CALENDAR OF EVENTS 2015 - 2016

### JUNE 2015

| Mon. 15 | Course registration for the 2015-2016 academic year begins for continuing students |

### JULY

| Wed. 1 | Canada Day, offices closed |
| Thu. 2 | Summer term classes begin |
| Fri. 10 | Final date to apply for degree or diploma to be conferred at Fall Convocation |
| Tue. 14 | Course registration for the 2015-2016 academic year begins for first-year students |

### AUGUST

| Mon. 3 | Civic Holiday, offices closed |

### SEPTEMBER

| Tue. 1 | International Students arrive to attend the welcome program, the full schedule is available at [www.stfx.ca/prospective/international](http://www.stfx.ca/prospective/international) |
| Sat. 5 | New students arrive. Orientation program begins. Students will receive first week schedule of events, times and locations. New students only may check into residence after 9:00 a.m. |
| Mon. 7 | Academic Day Orientation program continues Returning students may check into residence after 9:00 a.m. Xaverian Welcome ceremony for new students in the evening |
| Tue. 8 | Classes begin |
| Sun. 13 | Opening Mass of the Holy Spirit 5 p.m. |
| Tue. 15 | Last day to change first-term or full-year courses Last day to receive full tuition refund for full-year or first-term courses, when applicable |
| Fri. 18 | HKIN Fall Outdoor Camp (session 1) begins |
| Thu. 24 | Last date for approval of senior honours and advanced major thesis topics and supervisors For Fall Convocation, final date for: • seniors to submit senior theses • graduate students to submit theses HKIN Fall Outdoor Camp (session 2) begins |

### OCTOBER

| Tue. 6 | University Senate meeting, 3:45pm |
| Fri. 9 | Final date to apply for degree or diploma to be conferred at Spring Convocation December exam schedule available |
| Mon. 12 | Thanksgiving Day, no classes |
| Tue. 13 | October quiz period begins, ends Oct. 27 |
| Mon. 26 | Final day for partial tuition refunds for first-term courses, when applicable |
| Fri. 30 | Professors to submit October quiz grades by 9 a.m. |

### NOVEMBER

| Mon. 2 | University Senate meeting, 7:30pm |
| Fri. 6 | Last day to drop first-term three-credit courses |
| Wed. 11 | Remembrance Day, no classes |
| Thu. 12 & Fri. 13 | Fall Study Days, no classes |
| Mon. 23 | Final day for partial tuition refunds for full year courses, when applicable |

### DECEMBER

| Tue. 1 | University Senate meeting, 3:45pm |
| Thu. 3 | Feast Day of St. Francis Xavier, Alumni Memorial Mass |
| Fri. 4 | Last day of classes for first term |
| Sat. 5 | Fall Convocation |
| Tue. 8 | Term examinations begin |
| Sat. 19 | Christmas recess begins after last examination |
| Wed. 23 | Professors to submit term grades by 9 a.m. |

### JANUARY 2016

| Mon. 4 | Second term classes begin |
| Mon. 11 | Last day to drop full-year courses or change second-term courses Last day to receive full tuition refund for second-term courses, when applicable |
| Mon. 25 | Final date for submission of application to the B.Ed. program |

### FEBRUARY

| Tue. 2 | University Senate meeting, 3:45pm |
| Mon. 15 | Winter Study Break begins Nova Scotia Heritage Day, offices closed |
| Wed. 17 | Last day for partial tuition refunds for second-term courses, when applicable |
| Fri. 19 | April exam schedule available |
| Mon. 22 | Classes resume |
| Mon. 29 | Last day to drop second-term three-credit courses |

### MARCH

| Mon. 7 | University Senate meeting, 7:30pm |
| Mon. 14 | Formal academic advising period begins |
| Thu. 24 | Student Research Day |
| Fri. 25 | Good Friday, no classes |
| Mon. 28 | For Spring Convocation, final date for: • seniors to submit senior theses • graduate students to submit theses |
| Thu. 31 | Final date for: • BA and BSc sophomores to apply for honours and advanced major programs and declare majors • BBA and BIS sophomores to apply for major |

### APRIL

| Mon. 4 | University Senate meeting, 7:30pm |
| Tue. 5 | Last day of classes |
| Fri. 8 | Final examinations begin |
| Wed. 20 | Last day of examinations |
| Mon. 25 | Professors to submit final grades by 9:00 a.m. for graduation candidates Spring term classes begin |
| Fri. 29 | Spring Convocation list published |

### MAY

| Sun. 1 | Spring Convocation |
| Mon. 2 | Professors to submit final grades for continuing students by 9:00 a.m. |

Refer to section 9.17.1 for Bachelor of Education program dates.
A TRADITION OF EXCELLENCE

St. Francis Xavier University is widely recognized as one of the top post-secondary institutions in Canada. Since its founding in 1853, StFX has helped shape the world in which we live. From its halls have come a prime minister, provincial premiers, Rhodes scholars, scientists and religious and business leaders. Today, StFX continues to offer what so many of Canada’s top students want: a high quality education focused primarily on the undergraduate, in a vibrant residential setting. StFX continues to meet the needs of its students through outstanding teaching, exceptional hands-on research experience, the very best in residential living, and unique opportunities to make a contribution to communities at home and abroad.

St. Francis Xavier University’s Strategic Plan, which represents the ideals for which the university strives, and reflects its proud traditions, emphasizes commitment to the highest standards for its faculty and students. It stresses that excellence in its teaching and research programs is more important than growth in size of the institution. Our niche is to be an excellent, mid-size liberal arts university, with high academic standards and a character attractive to those who hold and respect social and religious values. Through the development of the whole person, we will continue to provide society with the leaders of tomorrow.

The development of the whole person requires attention to the quality of the cultural, spiritual, social, and recreational life of our students and not solely to the teaching and learning process. We look to our students to conduct themselves responsibly and we strive to provide an environment in which they can develop. Whether they are in residence on campus or in the local community, we are concerned about their quality of life.

Today, St. Francis Xavier University is a leading national university with a longstanding tradition of academic excellence, service to society and innovation in teaching. StFX takes pride in the Catholic heritage and character that have formed a vital part in its history and mission, and is dedicated to providing its students with a post-secondary education that is intellectually stimulating and personally enriching within an atmosphere of inclusiveness for students, faculty and staff of diverse backgrounds.

The university brings together over 4,500 full and part-time students from across Canada and around the world for quality programs in the traditional arts and sciences, including professional and applied studies in Business, Education, Engineering, Human Kinetics, Human Nutrition, Information Systems and Nursing, as well as through the world-famous Coady International Institute. StFX students have the opportunity to excel in an intimate learning environment that nurtures the development of the whole person.

The unique StFX brand of education offers small classes, innovative teaching methods and exceptional opportunities for personal growth in a close-knit campus community.

StFX students and faculty are engaged with the world around them. Through international internships, service learning experiences, international research partnerships and community outreach initiatives, our students and professors are making meaningful contributions to communities at home and abroad. It’s all part of an educational experience built on the values of social justice and equality.

Today, StFX is in the midst of a major campus renewal. We are upgrading teaching and research facilities and strengthening the residential campus. This is the most ambitious facilities renewal program for StFX in the past 40 years.

StFX professors rank among Canada’s top teachers and researchers. These exceptional faculty members, most with doctorates and many with teaching awards, inspire students to achieve their potential. Through small classes students get to know their professors - and each other. The result is individual attention, lively classroom discussions, and the opportunity for students to reach their personal best.

Arts

The Arts Faculty includes programs in the social sciences and the humanities. Through their teaching and research, faculty members lead our students on a journey that is intellectually broadening, socially awakening and culturally rich. StFX Arts graduates have an understanding of the world, an appetite for learning and an ability to solve problems. They are prepared to assume leadership roles in our rapidly changing society.
Business
The Faculty of Business is the home of the Gerald Schwartz School of Business. StFX keeps pace with the changing way the world does business by connecting theory with practice as a vital component of the learning process. This is why the Schwartz School offers a variety of hands-on learning experiences, international exchanges and a co-op option. The business and information systems programs uniquely integrate the liberal arts tradition. The information systems department is one of only two Canadian university programs that have official accreditation in management information systems from the Canadian Information Processing Society. Grads of both programs are consistently sought out by major firms and corporations.

Education
StFX’s Faculty of Education believes that learning is a lifelong endeavour. Faculty work hard in building collegial, professional relationships with their students, practicing teachers and those in a variety of educational organizations. A distinguishing feature of the school is that it educates teachers in priority needs areas through specialized cohort programs such as French language, math, and Aboriginal studies.

Science
The Science Faculty includes both the theoretical and applied sciences and professional programs in Engineering, Human Kinetics, Human Nutrition, and in the School of Nursing. The Faculty includes accomplished scientists who conduct teaching and research of the highest standard. In doing so, they provide a solid academic foundation for bright minds that go on to award-winning research, further study and exciting scientific careers. They also make important contributions to scientific discovery in Canada.

History of StFX
StFX traces its origin to a small school of higher studies established by Most Rev. Dr. Colin F. MacKinnon at Arichat in 1853. The previous year, on his consecration to the See of Arichat, Bishop MacKinnon was placed in charge of an extensive diocese with a relatively large but widely dispersed Catholic population. To solve the urgent need for pastoral clergy, he founded an institution of general education. The initial student body numbered only 15. Two years later, in 1855, the institution was relocated in Antigonish with Dr. John Schulte as the first rector, succeeded by Most Rev. Dr. John Cameron.

By 1856, an ambitious curriculum had been developed in nine subjects, taught by six professors to 49 students, and the institution was then known as St. Francis Xavier’s College. The original building stood at the centre of the Antigonish community and served for 25 years as the home of the college. Dr. Cameron’s appointment to the Diocesan See in 1877 spurred further development, including a relocation to the southern boundary of Antigonish and the erection of the first wing of Xavier Hall in 1880. These 100 acres are the university’s home today.

Full university powers were conferred upon the college by an act of the provincial legislature in 1886. A board of governors was appointed and incorporated under another act in 1882. This granted to the board general control over the direction and internal affairs of the institution.

The early graduates of StFX received a Bachelor of Arts degree. This academic program was broadened through the energy of new faculty, well qualified in both the humanities and natural sciences, and encouraged always by Bishop Cameron. A Master of Arts degree was first awarded in 1890 and a Bachelor of Letters was available by 1899. Just prior to the turn of the century, the university had departments of law, commercial studies and a faculty of applied science, the first in Nova Scotia. Bachelor of Science degrees were awarded by 1904.

The foresight of Bishop Cameron led him to invite to Antigonish the Sisters of the Congregation of Notre Dame of Montreal, to staff a school for young women. This St. Bernard’s Academy became affiliated with the university in 1894 as Mount Saint Bernard College. In 1897 St. Francis Xavier became the first Catholic coeducational university in North America to grant degrees to women. Members of the Congregation joined the faculty in later years. Women represented a small fraction of the student body for more than 100 years, but by 1985, they equalled men in numbers.

On the occasion of the university’s golden jubilee, the chancellor, Bishop Cameron, declared, “No multi-millionaire laid its foundations in wealth and built the university’s walls from his own private fortune. But it boasts a more precious and, let me add, a more secure foundation: the loving hearts of a loyal people.” The well-being of StFX lay in the generous hands of the Scots, Irish and Acadians of eastern Nova Scotia. The priest faculty for over 100 years toiled essentially without remuneration. No university owes more to its loyal people, the alumni, than does StFX. The gracious campus, the many academic programs and the research endeavors were possible only through their support, as very little assistance was received from the public, through governments, prior to the 1960s. Today StFX alumni remain dedicated and committed to their alma mater.

Under the inspiration of Dr. Cameron in 1900, the Congregation of the Sisters of St. Martha was founded on the campus. Their specific task was to provide household management of the university. Within a very few years, the sisters’ apostolic mandate broadened to include nursing care, and formal nursing programs at St. Martha’s Hospital were affiliated with the university for 65 years. In the trying years after World War I, and in the depression decade especially, the university would not have survived without the labor of the priest faculty and the unselfish devotion of the Sisters of St. Martha. Today the presence of the Marthas is still felt on campus with the establishment of Wellspring Centre, a homey, relaxing place of welcome and friendship. Staffed by the Sisters of St. Martha, it offers to the university community an environment for interaction and dialogue, quiet reading, reflection and prayer. Wellspring is located on the second floor of Morrison Hall.

A decade after the First World War, influential priest faculty, led by Dr. J.J. Tompkins, became concerned that StFX should relate more closely to the circumstances of ordinary people. Their view was that those outside the formal academic setting could, by study and cooperative action, find the power to solve economic and other problems through social reform. The product of their effort became known as the Antigonish Movement. The formal structure within the movement crystallized as the university’s Extension Department in 1928. Its first director was Dr. M.M. Coady. As a result of this work, by the end of the Second World War, a formidable number of co-operative projects, leadership training programs, consumer, producer and credit co-operatives, and agricultural associations developed, bringing with them a new measure of social and economic vitality. Leaders from the developing world began to come to the university to study in the Extension program. To satisfy this quest for information the Coady International Institute was established in 1959. To date, over 5000 graduates of the institute hold economic and social development positions around the globe.

The rapid growth in student numbers following World War II, especially in the Cape Breton industrial area, prompted the extension of academic programs beyond the home campus. Xavier College was established in Sydney in 1951 to offer the first two years of degree programs. This campus not only grew rapidly over the next two decades, but the demands for technology training prompted both the government of Nova Scotia and the university to amalgamate the Nova Scotia Institute of Technology with Xavier College. The College of Cape Breton was born of this union in 1974 and it granted degrees in affiliation with StFX. These degrees, based on both traditional academic and innovative technological programs, were awarded until 1982. In that year, by provincial act, a charter was awarded to the college creating a wholly separate institution of higher education, the University College of Cape Breton.

Since its founding, StFX has remained true to its commitment to the development of the whole person in service to humanity.
**UNIVERSITY PERSONNEL**

**University Officers**

Kent MacDonald, Ph.D.  President
Leslie A. MacLaren, Ph.D., P.Ag.  Academic Vice-President & Provost
Andrew Beckett, CA  Vice-President, Finance & Administration
Gord Cunningham, MA  Interim Director, Coady International Institute &
                     Vice President International Development
Tim Lang, MA  Vice-President, Advancement
Richard Isnor, D.Phil.  Associate Vice-President Research & Graduate Studies
Richard Nemesvari, Ph.D.  Dean of Arts
Timothy W. Hynes, Ph.D.  Dean of Business
Janice Landry, Ph.D.  Interim Dean of Education
Robert van den Hoogen, Ph.D.  Dean of Science
Tara Buksaitsis, BA, MLIS  Registrar & Director Enrollment Planning
Bob Hale, BBA  Acting Director, Student Life
Susan Cameron, BA, B.Ed., MLIS  Interim University Librarian
Rev. Andrew Gillies, M.Div.  Chaplain
Justin Fox, MA, MLIS  Director, Admissions & Recruitment
Margaret McKinnon, MA, R. Psych  Registrar & Director Enrollment Planning

**BOARD OF GOVERNORS**

**Officers**

1. ADMISSION PROCEDURES AND REQUIREMENTS

1.1 Admission Procedures

Address all applications and inquiries concerning admission to:

Admissions
St. Francis Xavier University
PO Box 5000
Antigonish, NS B2G 2W5
Phone: 1-877-867-7839, 902-867-2219
Fax: 902-867-2329
Email: admit@stfx.ca

Applications for admission should be made on the appropriate form. A non-refundable application fee of $40 (subject to change) is required. All applicants should request their high school counsellor to submit a school transcript. StFX may grant transfer credit equivalency for academic work previously completed at other accredited universities or colleges. Transfer students must submit official university or college transcripts.

The admission procedure is complete when the candidate has returned a confirmation form together with the appropriate fee. Admissions decisions are final.

All information supplied by an applicant may be used by the university in its normal course of business. St. Francis Xavier University (StFX) is required to abide by Freedom of Information and Protection of Privacy legislation (FOIPOP) and the Personal Information Protection and Electronic Documents Act (PIPEDA) as they apply to universities.

Entrance Scholarships
All applicants from high school with superior grades will be considered for entrance scholarships. See section 2.6 for information on university scholarships.

Transfer Students
The university may admit and grant transfer credits to a student who has attended another accredited college or university. Official documents of all previous academic work must be submitted whether or not transfer credits are sought. Failure to supply such documents is considered grounds for subsequent academic dismissal.

Mature Students
Candidates who have not fulfilled the normal admission requirements and who have been out of school at least three years may be considered for admission. Candidates are required to submit transcripts of all previous academic work, letters of reference from employers, and an outline of future plans. Each applicant is considered on an individual basis.

Program for Students with Disabilities
StFX welcomes students with disabilities and offers a student-centered program of support. Students with disabilities are responsible for identifying and providing documentation of their disability to the co-ordinator of the program. Students are encouraged to make contact as soon as possible. For further information, call the Tramble Rooms Centre for Accessible Learning at 902-867-5349.

1.2 ADMISSION TO UNIVERSITY PROGRAMS

The university reserves the right to reject any application for admission on the basis of the applicant’s overall academic record even if the entrance requirements are satisfied.

In special circumstances, a student lacking the specified requirements may be admitted. The university takes into consideration the overall demographics of its constituency.
Senate regulations limit enrolment in some programs. Admission to these programs is competitive and possession of the minimum requirements does not ensure acceptance into the program.

1.3 ADMISSION REQUIREMENTS FROM GRADE 12

a) The requirements for admission from high schools are stated below. The courses required for university programs are specified in the chart on page 3.

Nova Scotia

i) A minimum average of 70 in grade XII, to include English each year; no grade less than 65 in a course required for admission

ii) Credit for five university preparatory courses in each of grade XI and grade XII.

iii) Some programs may require a higher average; contact the Admissions office for more information.

Alberta

Applicants must have grade XII with subject distribution and minimum averages as for Nova Scotia. All five courses must be at the 30 or 31 level.

New Brunswick, Prince Edward Island, Nova Scotia

Applicants must have grade XII with subject distribution and minimum averages as for Nova Scotia.

Newfoundland and Labrador

Applicants must meet the same course requirements and minimum averages as Nova Scotia students. Courses needed to satisfy entrance requirements must be at the 3000 level and students must achieve at least 11 credits.

Ontario

Ontario secondary school students must have a minimum of five grade XII courses of U and M levels (preferable four U level courses) to include the program-specific requirements outlined on page 3, and must have completed the Ontario Secondary School Diploma (OSSD) or equivalent to be considered for admission.

Quebec

Applicants who have completed senior matriculation or one year of CEGEP will be considered for entry into the first year of a four-year program. Students, who have completed more than one year of CEGEP, may be eligible to receive transfer credits for courses in which they have received a passing grade. Only courses that apply to the intended program of study will be transferred.

General Requirements

The following university preparatory subjects are acceptable: English, entrepreneurship, geography, global history, global geography, history, mathematics (algebra, trigonometry, geometry, functions/relations), modern languages, classical languages, economics, biology, chemistry, earth sciences, and physics. Some university preparatory courses may not be listed above. Please contact the Admissions office if you have any questions.

b) In addition to English, all programs require additional grade XII credits as specified in the chart on page 3.

c) Admission to the music program is a two-part process. Students must apply to and be accepted by both the university and the music department.

Candidates must contact the music department to arrange for an audition or receive information regarding a taped audition. Call 902-867-2106 or write to the Department of Music, St. Francis Xavier University, PO Box 5000, Antigonish, NS, B2G 2W5. Only after acceptance to the university and completion of a successful audition are candidates fully enroled in the music program. Successful candidates receive letters of acceptance from both the university and the music department.

d) Students are initially admitted to the Bachelor of Arts (BA) with major undeclared:

i) Majors are offered in anthropology, aquatic resources, Catholic studies, development studies, Celtic studies, computer science, economics, English, French, history, mathematics, statistics, and computer science, music, philosophy, political science, psychology, religious studies, sociology, Spanish, and women’s and gender studies.

ii) Students are expected to declare major and minor subjects by registration for the third year. Students may choose the four-year BA advanced major or honours program during their second year of study.

e) Students are initially admitted to the Bachelor of Business Administration (BBA) and Bachelor of Information Systems (BIS) programs in the Faculty of Business with major undeclared. Students wishing to declare a major do so prior to registering for their third year.

The BBA degree with major or honours is offered in accounting, enterprise development, finance, information systems, leadership in management and marketing. The BIS degree with major and honours is offered in enterprise systems and IT management.

f) The Bachelor of Science (B.Sc.) degree with advanced major or honours is offered in biology, chemistry, computer science, economics, earth sciences, mathematics, physics, and psychology. A B.Sc. major degree is also offered in these subjects and aquatic resources, but not in economics or psychology. Students may choose the B.Sc. advanced major or honours during their second year of study.

g) Students applying for the Bachelor of Science in Nursing (B.Sc.Nursing) have three options: the traditional 4 year option, the post-degree option, or the part-time post RN option. See the chart on page 3 and section 1.7 for program descriptions and entrance requirements. Students accepted into any B.Sc.Nursing option are required to provide proof of: current certification in Health Care Provider (HCP) and Standard first aid; screening through the child abuseregister in their home province (if this service is available in their home province); current (within three months of start of classes) criminal records check completed at their nearest detachment of the RCMP or local police department; current certification in WHMIS (within 12 months); a copy of their birth certificate, valid driver’s license (or provincial health card) and required immunization records (Hepatitis B immunization and tuberculin-two step Mantoux testing is also required). Annual recertification of HCP is mandatory for clinical practice. Students from outside of Nova Scotia will be screened through the Nova Scotia Child Abuse Register during first semester.

h) Advanced Placement (AP): The AP program is accepted for admission on the same basis as Nova Scotia grade 12. Students who have completed courses in the AP program may be eligible for up to 30 transfer credits for selected AP courses with a national exam results of 3, 4 or 5.

i) International Baccalaureate (IB): Students admitted to StFX with a score of 30 or higher on the IB Diploma and who have received a minimum score of 5 on all higher level and standard level courses, will be granted up to 30 transfer credits. Students who have any one minimum score falling below 5, will have their courses individually assessed for possible transfer credits. Students who have completed IB courses but who do not possess the diploma or who scored less than 30 on the IB Diploma may be eligible to receive individual university course credit if they have achieved a grade of 5, 6 or 7 in higher-level courses.

j) Early fall admission: Students who have a grade 11 average of at least 80 may be considered for early fall admission before their first set of grade 12 marks is available. Students applying for early fall admission should include their final grade 11 marks and a school-approved list of courses they are taking in grade 12 (both semesters) with their application. Grade 12 courses must be consistent with the guidelines listed above. Students applying to B.Sc. Nursing must also send first semester grade 12 grades because early admission does not apply to this program. However, students are encouraged to submit their grade 11 grades with a second choice of program if they wish to be considered for a second choice before nursing decisions are processed. For further information, contact the admissions office.

### Four-year programs unless otherwise stated

<table>
<thead>
<tr>
<th>Program</th>
<th>Description</th>
<th>High School Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bachelor of Arts with Major</td>
<td>Offered in anthropology, aquatic resources, Catholic studies, Celtic studies, computer science, development studies, economics, English, French, history, mathematics, music, philosophy, political science, psychology, religious studies, sociology, Spanish, statics, women’s and gender studies. Students may choose the advanced major or honours degree during their second year of study.</td>
<td>English and four university preparatory courses in grade 12. See 1.3 d.</td>
</tr>
<tr>
<td>Bachelor of Arts in Human Kinetics</td>
<td>The study of human movement from an arts (humanities and social sciences) perspective prepares students for a variety of options: employment and careers in health and fitness, or further studies in education, occupational therapy, sport sociology, sport history, sport philosophy or sport psychology. Students must choose a major, advanced major or honours in kinesiology, or a major, advanced major or honours in pre-education during their second year of study.</td>
<td>English; one of math, biology, chemistry or physics; and three other university preparatory courses in grade 12 (grade 11 physics highly recommended). Limited enrolment</td>
</tr>
<tr>
<td>Bachelor of Arts in Music (Jazz Studies) Diploma in Jazz Studies (two years)</td>
<td>Students in the BA in Music often continue their studies in education. This program combines composition, arranging and performance. The diploma is for students who wish to enter the field of commercial music. The first and second years of the Bachelor of Arts in Music, the Bachelor of Music and the Diploma in Jazz follow a common curriculum in jazz studies. Students apply for admission to the Bachelor of Arts in Music with Advanced Major or Honours, or the Bachelor of Music with Honours during their second year of study.</td>
<td>Academic entrance requirements for both music programs are the same as those described above for the BA. Admission depends on the student’s performance during an audition, which may be performed in person or submitted on a CD or tape. See 1.3 c. Limited enrolment</td>
</tr>
</tbody>
</table>

## FACULTY OF BUSINESS

### Four-year programs

<table>
<thead>
<tr>
<th>Program</th>
<th>Description</th>
<th>High School Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bachelor of Business Administration</td>
<td>Students may choose the general degree; the degree with major in accounting, enterprise development, finance, information systems, leadership in management and marketing; honours in accounting, enterprise development, finance, information systems, leadership in management and marketing; or joint honours in business administration and economics. Co-op programs are available.</td>
<td>English, math and three other university preparatory courses in grade 12. Limited enrolment</td>
</tr>
<tr>
<td>Bachelor of Information Systems</td>
<td>Designed to prepare graduates for positions such as systems analyst, applications programmer or information systems specialist. Students may choose the major or honours in enterprise systems, or IT management. Co-op programs are available.</td>
<td>English, math and three other university preparatory courses in grade 12. Limited enrolment</td>
</tr>
</tbody>
</table>

## FACULTY OF EDUCATION

### Two-year program

<table>
<thead>
<tr>
<th>Program</th>
<th>Description</th>
<th>Entrance Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bachelor of Education</td>
<td>A professional degree program that prepares graduates to enter the school system as teachers, at either the elementary or the secondary level.</td>
<td>Completion of an undergraduate degree (BA, B.Sc. or equivalent). Minimum average of 70 in senior year of the undergraduate program. Limited enrolment</td>
</tr>
</tbody>
</table>

## FACULTY OF SCIENCE

### Four-year programs unless otherwise stated

<table>
<thead>
<tr>
<th>Program</th>
<th>Description</th>
<th>High School Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bachelor of Science with Major</td>
<td>Major degree program offered in: aquatic resources, biology, chemistry, computer science, earth sciences, environmental sciences, mathematics, physics, psychology and statistics. During their second year of study, students may choose the advanced major, joint advanced major, honours or joint honours program in the above subjects and in economics and psychology but not aquatic resources.</td>
<td>English; pre-calculus math; two of biology, chemistry or physics; and one other university preparatory course in grade 12. See 1.3 f.</td>
</tr>
<tr>
<td>Bachelor of Science in Human Kinetics</td>
<td>The scientific study of human movement prepares students for a variety of options: employment and careers in the health and fitness sector; studies at the graduate level in biomechanics, motor control, or exercise physiology; and admission to programs such as education, physiotherapy, athletic therapy, or medicine. Students must choose a major, advanced major or honours in kinesiology, with a minor in human nutrition or health sciences, or a major, advanced major or honours in pre-education during their second year of study.</td>
<td>English; two of math, chemistry, biology or physics; and two other university preparatory courses in grade 12 (grade 11 physics highly recommended). Limited enrolment</td>
</tr>
<tr>
<td>Bachelor of Science in Human Nutrition</td>
<td>The program prepares students for a range of career possibilities in the field of nutrition and foods as well as advanced studies. Students may choose the advanced major or honours program during their second year of study. Students may meet the requirements for the Integrated Dietetic Diploma program and for the Graduate Dietetic Internship program.</td>
<td>English; math; two of biology, chemistry or physics (normally biology and chemistry); and one other university preparatory course in grade 12. Limited enrolment</td>
</tr>
<tr>
<td>Bachelor of Science in Nursing (four years plus two spring sessions)</td>
<td>The program prepares nurses to think critically and creatively by providing a sound education in nursing science, related sciences, and the humanities. Students may choose the advanced major or honours program during their second year of study. Graduates practice nursing in acute care or community settings, through teaching and leadership. See 1.7 for other program options.</td>
<td>English, math, chemistry, biology, and one other university preparatory course in grade 12. See 1.3 g. Limited enrolment</td>
</tr>
<tr>
<td>Engineering Diploma (two years)</td>
<td>Upon completion of the diploma, students continue their studies at Dalhousie University, or transfer the credits earned to any other university of their choice, to complete the remaining requirements for the Bachelor of Engineering degree.</td>
<td>English; pre-calculus math; chemistry; physics; and either biology or one other university preparatory course in grade 12. Limited enrolment</td>
</tr>
</tbody>
</table>
1.5 ADMISSION FROM THE UNITED STATES
High school graduates who have completed 16 academic subjects will be considered for admission to a four-year degree. The 16 courses must include four English courses and the program-specific subjects listed in the following chart.

<table>

1.6 ADMISSION FROM OTHER SYSTEMS OF EDUCATION
International applications will be considered on an individual basis.
For applicants from a British system of education, all students must have completed English and four other academic courses with a minimum grade of B at the ordinary level. In addition, two General Certificate of Education (GCE) advanced-level examinations or the equivalent, with grades of A, B, or C, are normally required for admission to any program. SIFX may award university credit for selected GCE A levels completed with a grade of C or better. A student who has successfully completed one year of study in an academic program beyond the GCE at the ordinary level may be considered for admission. English, mathematics, two sciences, and one other academic subject are required for admission to programs in the Faculty of Science. Students may also be granted advanced standing in certain programs.
For applicants whose first language is not English, or whose normal language of instruction has been other than English, a test of English language proficiency may be required. The Test of English as a Foreign Language (TOEFL) or its equivalent is recommended. If TOEFL scores are submitted, then a minimum score of at least 580 on the paper-based test, 236 on the computer-based test or 92 on the IBT (internet based TOEFL) is required. Other acceptable tests and the minimum scores include the MELAB (90), IELTS (6.5), CAEL (70) or PEARSON (59).

1.7 ADMISSION TO THE BACHELOR OF SCIENCE IN NURSING
Besides the traditional four-year degree program described on page 3 for students applying from high school, other students may apply for the post-degree option or the part-time post-RN option. Admission is competitive and enrolment is limited. Students seeking re-admission must contact the Chair, School of Nursing, prior to June 30.

1.8 ADMISSION TO THE BACHELOR OF EDUCATION PROGRAM
Admission to the B.Ed. program is limited. Consideration is given to those who have successfully completed an undergraduate degree, provided references, and had experience related to a career in teaching. Admission is competitive and the possession of minimum requirements does not ensure acceptance into the program. See chapter 6 for admission and program requirements.

1.9 ADMISSION TO GRADUATE PROGRAMS
The requirements for admission to graduate programs are given in chapter 8.

2. GENERAL INFORMATION

2.1 Registration Fees

2.1.1 Tuition Fees
2.1.2 Other Registration Fees
2.1.3 Refunds
2.1.4 Students’ Union Fees
2.1.5 Payment Regulations
2.1.6 Non-Payment of Tuition, Registration, Residence or Meal Plan Fees
2.1.7 Other Undergraduate Fees
2.1.8 Tuition and Fees for Graduate, Distance, Diploma in Adult Education and Diploma in Ministry Programs

2.2 Residence and Meal Plans

2.3 Student Services

2.3.1 Athletic and Recreational Programs
2.3.2 Student Career Centre
2.3.3 Chaplaincy Services
2.3.4 Counselling Services
2.3.5 Financial Aid Office
2.3.6 Health Services
2.3.7 Special Advisors and Contact Persons
2.3.8 Wellspring Centre
2.3.9 Writing Centre

2.4 Human Rights and Equity

2.5 Safety & Security

2.6 University Scholarships and Bursaries

2.7 University Prizes

2.1 UNDERGRADUATE REGISTRATION FEES

2.1.1 Tuition Fees
The tuition fees shown here are for 2014-2015 in Canadian dollars and are subject to change. An addendum to this Academic Calendar will show the fees for 2014-2015. For the most current and up to date information on tuition fees and refunds please refer to the accounting services online resources at http://sites.stfx.ca/financial_services/StudentAccounts
Tuition fees including tuition, laboratories, library, and university health service are:
- Fewer than 24 credits $ 245.83 per credit
- 24 to 30 Credits $6985.00
- Above 30 Credits $6985.00 plus $223.34 per credit
Students with disabilities enrolled in fewer than 30 credits qualify for the per credit rate upon recommendation of the Program for Students with Disabilities.

2.1.2 Other Registration Fees
Up to 18 credits: a pro-rated students’ union fee is assessed at $4.87 per credit hour. For 18 or more credits, the fee is a flat rate of $146.12.
Students registered in 18 or more credits automatically make a contribution of $25.00 to the university’s capital campaign.
Students registered in 18 or more credits are automatically enrolled in the St. Francis Xavier Students’ Union Health and Dental Plans. This plan supplements provincial health care plans, it does not replace them. The fees for 12 months are:
- Canadian students $175.00 (single), $361.80 (family)*
- International students $785.00 (single)*
- Dental Plan $115.00*
*Fees are subject to change from year-to-year dependent on changes to insurance premiums.
If a Canadian student is already covered under an extended health plan (this does not mean a provincial health plan), they may opt out of the students' union health and dental plan(s) and receive a refund for these fees. To opt out of the students' union health and dental plan(s), students can go online to www.studentbenefits.ca and select the SIFX Students' Union logo and follow the steps to complete the opt out process. Students must have a digital copy of their proof of coverage to complete this process. Opt out for students will be open from September 30, 2015.

International students attending SIFX are automatically enrolled in the SIFX students’ union health and dental plans. International students are provided through this plan, the coverage that Canadian students receive provincially, as well as additional health and dental coverage. International students cannot opt out of the health and dental plans. International students with Canadian citizenship are considered international students for the purposes of the health and dental plans.

While a member of the SIFX students’ union health and dental plans, a student’s SIFX ID number, name, gender and date of birth are used by the health and dental plan administrator to determine eligibility for benefits and are used for this purpose only. Personal data is stored securely, and is used only in relation to the health and dental plans. Without this information, a student would still be covered for benefits; however, claims may not be adjudicated. For information on the health and dental plan contact 902-867-2474 or email sryan@stfx.ca

Up to 24 credits, a pro-rated technology fee is assessed at $11.67 per credit. For 24 or more credits, the fee is a flat rate of $350.00.

Students who audit courses (not for credit) are charged one-half of tuition fee. For 24 or more credits, the fee is a flat rate of $6,985.00.

Students who audit courses (not for credit) are charged one-half of tuition and registration fees. Senior citizens (age 65 and over) are not charged tuition or registration fees. Senior citizens must have a digital copy of their StFX ID number, name, gender and date of birth are used by the health and dental plans.

To opt out of the students’ union health and dental plan(s), students can go online to union health and dental plan(s) and receive a refund for these fees. To opt out of the students’ union health and dental plan(s), students must have a digital copy of their proof of coverage to complete this process. Opt out for students will be open from September 30, 2015.

2.1.3 Refunds
For students who drop one or more course(s) or withdraw from the university, refunds are applied according to the date, within the applicable term, on which the drop(s) occur(s) or the student withdraws. The percentage of the refund reduces on a weekly basis until the end of the applicable refund period. The final dates on which students will receive refunds are indicated in the calendar of events at the front of the Academic Calendar, for first term, second term and full year courses.

The refunding process applies the appropriate refund percentages to the credit-hour value of courses that are dropped and then sums all of the student’s credit hours to determine the correct tuition and fee assessment. For examples of refunding, select the links at student accounts, then refunds on the accounts receivable web page at www.stfx.ca/campus/admin/accounting-services/

2.1.4 Students’ Union Fees
The students’ union is the autonomous, democratic student organization at SIFX. The union represents students’ interests and provides a wide variety of academic, social, issue-oriented, and cultural services for students. Fees are collected at the request of the union and are administered by students.

Students’ Union fees fund the following:

<table>
<thead>
<tr>
<th>Description</th>
<th>full-time</th>
<th>part-time</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students’ union general budget</td>
<td>135.12</td>
<td>4.58</td>

<td>4.00</td>
<td>--</td>
</tr>
<tr>
<td></td>
<td>231.12</td>
<td>4.87</td>
</tr>
</tbody>
</table>

The general budget covers: student societies; the student newspaper, radio station, yearbook, and handbook; orientation; the walk-home program, off-campus housing service, and tutoring service; activities and concerts; membership in the Canadian Campus Business Consortium (CCBC); the film and lecture series; lobbying and publicity; issue awareness campaigns; the resource centre; elections; the campus police force; and general operations.

2.1.5 Payment Regulations
St. Francis Xavier University discontinued the mailing of paper statements effective December 1, 2012. Notification of the balance owing on the student account will be sent to the students St. Francis Xavier University e-mail account on a monthly basis. Students can check their student fee account online at http://mesamis.stfx.ca/reports/login.asp by using their student number and PIN to access this information. Refunds on student accounts will reflect the method of payment. Cheques should be made payable to St. Francis Xavier University. All fees are subject to change at any time. Payment can also be made by debit card in person. Students can also pay by telebanking or online banking by setting up St. Francis Xavier University as a payee and the account number is the student ID number. A portion of the fees is due and payable at registration in September and the balance at registration in January. New students are required to pay first-term fees during the orientation session at the Keating Centre in September.

Recipients of university scholarships may deduct one-half the value of their scholarship from fees required in September. The balance of the scholarship is applied to fees due in January. Students should note that no reduction in fees is allowed for late entrance.

Monthly late payment fee: a late payment fee of one percent per month, or 12 percent per annum, will be charged on overdue accounts as of the last banking day of each month. The charge will begin in the first semester at the end of September, and in the second semester at the end of January.

Students are expected to be familiar with and to understand all regulations in the SIFX Academic Calendar, in particular to understand that adding and dropping courses or withdrawing from the university applies a tuition fee account. Students must ensure that tuition fees are paid in full without any notice from the university, and pay the fees regardless of receipt of a bill. A student who for any reason is unable to pay fees by the due dates should contact the business office regarding a possible deferment.

Students whose fees will be paid by an external sponsor must provide proof of funding to the business office prior to the payment deadline dates.

2.1.6 Non-Payment of Tuition, Registration, Residence or Meal Plan Fees
Students with a balance of fees owing from a previous term will not be permitted to register for a subsequent term unless they have made satisfactory arrangements with the business office.
The university reserves the right to cancel the registration of students who fail to pay any fees owing to the university. The university reserves the right to refuse to let students sit for examinations if their fees to the university are overdue. The university will not release a transcript unless arrangements satisfactory to the business office have been made by the student for the payment of any outstanding fees.

A late payment fee of $50 is charged in the first term if payment is delayed beyond September 15, and in the second term if payment is delayed beyond January 15. The university is not responsible for deadlines missed by students who do not pay their fees on time.

The university reserves the right to cancel residence and meal contracts for non-payment of fees.

2.1.7 Other Undergraduate Fees
All fees are subject to revision.

Unwarranted breakage of or damage to StFX University property will be charged to the student responsible.

2.1.8 Tuition and Fees for Graduate, Distance, Diploma in Adult Education and Diploma in Ministry Programs
For information about tuition, fees and refunding policy for graduate studies, distance education, the Diploma in Adult Education and Diploma in Ministry programs, refer to the information available from the applicable program office.

2.2 RESIDENCE AND MEAL PLANS
Students in residence agree to be governed by the StFX University Community Code, the Residence Life Community Standards and the University Alcohol Policy and Residence Contract and to assume responsibility for their own actions or those of their guests, for their room and, along with other residents, for the common areas and assets of their house.

No refunds of fees for residence or food service will be made if students are temporarily absent from residence. This includes absences for academic reasons such as practice teaching. Refunds are processed only after the appropriate paperwork has been completed and room keys have been returned.

All inquiries about residence or meal contracts should be made to Residence Services, Morrison Hall, email: residence@stfx.ca, phone: 902-867-5106.

2.2.1 Application for Residence
New, Re-Entry, Mature, Exchange and Transfer Students
When a student applies to attend StFX, they are given the opportunity to apply for residence. New students direct from high school are guaranteed a space in residence if they confirm their acceptance to the university, submit the residence questionnaire and pay the $400 deposit before May 15. These applications to residence will be placed in a priority queue based on receipt of your academic and residence applications and corresponding deposits. The deposit does not become owing until the student has been accepted to the university. The total deposit is applied toward the student’s residence and board fees. In the case where a student wishes to cancel their residence contract, refer to section 2.2.4 Cancellation of Residence Applications and Contracts.

Returning Students
Returning students may reapply for residence using the online applications according to the dates established by the residence services office. Detailed information on the room assignment process for returning students can be found on the university website under residence services (www.stfx.ca/services/residence). Once a room assignment is offered and the contract is submitted by the student, a cancellation fee will apply if the student wishes to cancel their residence contract. The cancellation fee will be applied to the student’s account according to the fee schedule listed in section 2.2.4 Cancellation of Residence Applications and Contracts.

Students wishing to return to residence must be in good standing with the Community Code and Residence Life Community Standards.

2.2.2 Residence and Meal Fees and Regulations
All students living in residence (with the exception of the apartment-style and Governors Hall residences) are required to participate in a combined room and board plan. Students living in apartment-style and Governors Hall residences must make a minimum commitment to the food service program usually in the form of declining cash balance (DCB), though they have the option of any of the meal plans. Off-campus students may purchase a meal plan and/or DCB or buy meals on a cash basis. Visit the residence website for details www.mystfx.ca/services/residence.

2.2.3 Duration of Residence Occupancy
New, Re-Entry, Mature, Exchange and Transfer Students
The University shall permit the resident to occupy their room from Saturday, September 5, 2015 until 24 hours after their final exam in December or by noon on Sunday, December 20, 2015 whichever date and time is earlier and Sunday, January 3, 2016 until 24 hours after their final exam in April or by noon on Thursday, April 21, 2016 whichever date and time is earlier.

Returning Students
The University shall permit the resident to occupy their room from Monday, September 7, 2015 until 24 hours after their final exam in December or by noon on Sunday, December 20, 2015, whichever date and time is earlier and Sunday, January 3, 2016 until 24 hours after their final exam in April or by noon on Thursday, April 21, 2016 whichever date and time is earlier.

Note: Students may be permitted to occupy their room on dates outside of those identified above; however, they will be required to sign additional contract(s) and may be subject to additional charges.

2.2.4 Cancellation of Residence Application and Contract
Where the resident notifies the university in writing prior to his/her scheduled arrival that he/she does not intend to take their assigned room in residence, the University will process the deposit or cancellation fee according to the following schedule:

<table>
<thead>
<tr>
<th>Cancellation Date</th>
<th>New</th>
<th>Returning</th>
</tr>
</thead>
<tbody>
<tr>
<td>Room Deposit</td>
<td>$400 (non-refundable)</td>
<td>$400</td>
</tr>
<tr>
<td>After August 15</td>
<td>You are responsible for 15% of the room fee for the full academic year</td>
<td>You are responsible for 15% of the room fee for the full academic year</td>
</tr>
</tbody>
</table>

Where the resident notifies the university in writing that they wish to decline their room assignment either after the resident takes up his/her room (this includes an off-campus move) or after the day when the resident was expected to take occupancy (this includes an off-campus move), the following provisions shall apply:

a) The resident assumes full responsibility for room and meal plan fees for the academic year except in the following cases:

i) In the case of an involuntary withdrawal from residence, the University shall credit to the resident 85% of the remaining room and meal plan fees. No credit is given after February 1; or

ii) In the case of the resident withdrawing from the University to and including November 1, they will receive a 85% credit for the remaining room and meal plan fees from the date they vacate the premises. If the resident withdraws in the first term after November 1 they will be charged room and meal plan fees for the first term. If the resident withdraws in the second term up to and including February 1, the resident will receive an 85% credit for the remaining room and meal plan fees from the date the resident vacates the premises. If the resident withdraws in the second term after February 1, the resident will be charged with room and meal plan fees to the end of the academic year according to the St. Francis Xavier University Academic Calendar. Residents are required to vacate their residence within 24 hours of academic withdrawal; or

iii) In the case where the resident is released from this contract due to compassionate or other grounds at the sole discretion of the University.

The university reserves the right to cancel any residence contract on the basis of violation of policies outlined in the Residence Life Community Standards and/or violation of the University Community Code and/or drug policy and/or alcohol policy for residence and dining hall.

2.3 STUDENT SERVICES
The StFX student services department strives to maintain an inclusive and welcoming environment. Along with residence and food service, programs are provided to help students develop their capabilities and interests as fully as possible within the university community. In addition to the services identified below, the student services department works with the students’ union to co-ordinate the first-year orientation program.
2.3.1 Athletic and Recreational Programs
The university has a wide variety of athletic and recreational programs.

The campus recreation program provides all students with opportunities to participate in different forms of physical activity through intramural sports, which offer competitive leagues and tournaments; non-credit instruction in a variety of physical activities; self-directed activities; and sport clubs.

StFX has a long and distinguished record in intercollegiate athletics, offering students with superior athletic ability an opportunity to develop and utilize their talents in competition with students from other universities within the Atlantic University Sport and Canadian Interuniversity Sport organizations. There are women's teams in basketball, cross country, hockey, rugby, soccer and track & field; and men's teams in basketball, cross country, hockey, football, soccer and track & field. StFX Club sports include men's baseball, men's lacrosse, men's rugby, cheerleading, curling, rowing, women's field hockey, swimming and dance.

2.3.2 Student Career Centre
The Student Career Centre (SCC) offers three primary services: career coaching, career information and employment services. Career coaching services are provided on an individual and group basis. The SCC can incorporate the Strong Interest Inventory in students' career decision-making process and further educational opportunities.

Throughout the academic year, the centre offers a variety of events and programs that help students make informed career decisions and develop effective job search strategies. Some examples include workshops on career planning, resume writing, job search, interview skills and job fairs. Employment related services include advertising new graduate, summer and on-campus jobs as well as employer and school information sessions which help students gain an understanding of the skills required in today's workplace.

2.3.3 Chaplaincy Services
In keeping with the university's Catholic Christian character, a university chaplain and an associate chaplain co-ordinate a team ministry which gives interested students an opportunity for religious and spiritual expression. Part-time ministers of the Anglican and United Church co-ordinate activities for students of their denomination.

2.3.4 Counselling Services
The StFX counselling centre provides a variety of services to help students handle the personal challenges of university life. Professional counsellors can work with students on all personal issues which may include homesickness, anxiety, depression, stress, eating disorders, relationship problems, academic struggles and career preparation - any issue big or small.

The counselling centre offers individual and group counselling. Counsellors can make referrals to other services as required. All contact with the counselling centre is strictly confidential, students may self-refer or referrals may be made by others.

The counselling centre is located on 3rd floor Bloomfield Centre (Room 305). To contact us, please visit our website at http://www.sites.stfx.ca/counselling/ or phone (902) 867-2281.

2.3.5 Student Life Office
The student life office works closely with other area on and off campus to enhance student success. The office strives to provide a positive space for all students to feel welcome and included in the wider StFX and Antigonish community. Academic success is always the number one priority while attending university however, a close second is engaging with and being involved in all the things the campus community has to offer.

The office is responsible for non-academic student advising for LGBTQ, Aboriginal, International and African Nova Scotian students as well as the Student Career Centre. The office acts as the primary liaison with the students' union and works collaboratively to offer programming on student leadership, off campus resources and university transition. The student life office is responsible for the administration of the Community Code of Conduct which deals with all matters of non-academic student conduct.

The student life office is located on 3rd floor Bloomfield Centre (Room 306). To contact us, please visit our website at http://www.sites.stfx.ca/student_life or phone (902) 867-3934.

2.3.6 Financial Aid Office
The university maintains a financial aid office to advise students regarding government student loans, help students with financial planning, administer the university bursary program, and provide information on scholarships and awards from sources outside the university. For further information, visit the website at http://sites.stfx.ca/financial_aid/

2.3.7 Health Services
The StFX Health Centre encourages students to take care of their body while expanding their mind. The Health Centre offers holistic health care services that include general physicians, nurses and referrals to alternative health care providers. The nurses provide ongoing residence and off campus consultations as well as health promotion sessions. Students can take advantage of special services like immunization clinics, liquid nitrogen treatment, sexual health information, flu and travel vaccines. StFX student wellness is at the core of a positive student experience.

The Health Centre is located on 3rd floor Bloomfield Centre (Room 305). To contact us please visit our website at www.mystfx.ca/services/healthcentre or phone (902) 867-2263.

2.3.8 Special Advisors and Contact Persons
StFX offers advising which aids students transitioning into and through university and recognizes that students have a variety of needs in the many distinct communities within the broader StFX community. The university aims to foster an environment of cultural competency and diversity through a variety of programs and one-on-one assistance which encourages student academic and personal success. These include LGBTQ, Aboriginal and international and mature student advisors. More information is available at http://sites.stfx.ca/student_life/

2.3.9 Tramble Rooms Centre Accessible Learning
StFX welcomes students with disabilities and offers a student-centered program of support. These supports can include: academic coaching, exam accommodation, registration assistance, assistive technology training, peer support, physical accessibility arrangements, transition workshops, speakers bureau and note taking assistance.

The program is located on the 4th floor of Bloomfield Centre in the Tramble Rooms. Contact us at (902) 867-5349 or visit the website at www.mystfx.ca/campus/stu-serv/counselling/policy.html

2.3.10 Wellspring Centre
The Sisters of St. Martha staff Wellspring Centre, a comfortable, relaxing environment for reflection, interaction, prayer, support, personal and spiritual growth.

2.3.11 Writing Centre
Writing Centre services complement course work by assisting students in developing their academic skills. StFX students can arrange free one-to-one appointments by calling the writing centre at (902) 867-5221. An appointment the Writing Centre instructor and student discuss ways to improve the student's writing. This may be at any stage in the writing process. Writing Centre appointments may also focus on improving other academic skills such as note-taking, time management, oral presentations, and exam preparation.

In addition, the instructors at the centre assist students through the following fee-for-service programs:

exCel: A Success Program for First-Year Students
No matter how well students perform in high school, university presents a new set of challenges. This first-year-experience program introduces entering students to strategies that will help them receive the highest quality university education possible. exCel is not a tutorial service or a remedial program. Instead, it enables students to develop or enhance their skills and become self-directed, responsible learners. The classes are once a week during both terms. In addition, students meet individually with their instructors several times during the academic year. Although exCel is a non-credit program, successful completion of this course will be noted on the student's academic transcript. The course fee and other details are available on the Writing Centre's website.

APEX: Academic Program of Excellence
This is a mandatory university program for students accepted and placed on probation by StFX or another institution and for students re-admitted after suspension or dismissal as a result of a previous year's academic performance. See section 3.12. Students are required to register for and participate in this course. In addition to attending classes, students must meet regularly with their APEX instructor. The one-to-one appointments provide opportunities for students to focus on their specific academic needs.

Students who have completed APEX but have still not met the university's grade requirements must register for APEX-2, a series of one-to-one appointments throughout the academic year. Course fees and other details are available on the Writing Centre’s website. Upon application by a student, the committee on studies of the appropriate faculty may excuse the student from taking APEX.

LEAP: Learning English for Academic Purposes
These interactive classes and practical sessions are designed for students at StFX whose first language is not English and who are now living and studying in English. LEAP is not an English-as-a-second-language (ESL) course; rather, the LEAP...
curriculum concentrates on reading critically, writing analytically, and applying these skills to academic material. Classes provide students with the opportunity to listen, learn, and put their academic skills into practice. LEAP-1 is a four-week intensive course in August; LEAP-2 and LEAP-3 are offered during the fall and winter terms respectively. Course fees and other details are available on the Writing Centre’s website. For detailed information on these courses, refer to the Writing Centre’s website: www.mystfx.ca/resources/writingcentre

2.4 HUMAN RIGHTS & EQUITY
All members of the university including students, staff and faculty have the right to study, work and learn in an environment that promotes equity and that is free from harassment and discrimination on human rights grounds, as described in the Nova Scotia Human Rights Act, 1991. In support of ensuring a campus free of discrimination and harassment, and of creating a collegial study, work and living environment where all individuals are treated with respect and dignity, the SIFX Human Rights & Equity Advisor assists with the resolution of discrimination and harassment issues, including arranging for informal or formal procedures for resolving concerns and complaints. The Human Rights & Equity Advisor also offers education and training on a wide variety of human rights and diversity issues, and advocates for educational and employment equity.

The Human Rights & Equity Advisor is located in the Bloomfield Centre room 313A. To contact Marie Brunelle, the Human Rights & Equity Advisor, phone 867-5306 or 867-3934 for an appointment, or email at mbrunell@stfx.ca.

The Discrimination and Harassment Policy can be found on the human rights' office website at http://www.mystfx.ca/campus/stu-serv/equity/ or the human resources website at http://www.mystfx.ca/administration/hr/policies.

2.5 SAFETY AND SECURITY
Safety & Security Services fosters and safeguards a healthy, safe and welcoming campus community that supports the well-being of students, faculty, staff and guests. Partnerships within the university and active collaboration with local law enforcement and community emergency response teams ensures essential services are in place and ready to respond.

Safety & Security Services provides 24-hour coverage 365 days per year via the Safety & Security Operations Centre (SOC). In addition, our team of dedicated Safety & Security Officers conduct regular vehicle and foot patrols of campus instilling confidence that everyone is able to LIVE, LEARN, WORK and PLAY in a supportive and safe environment.

The Student Safety & Security Services Leadership Team, known as “X-PATROL”, work side by side with Safety & Security Services Officers to provide campus event supervision, evening foot patrols and a walk home service.

2.6 UNIVERSITY SCHOLARSHIPS AND BURSARIES
The purpose of the university scholarship program is to recognize superior scholastic achievement on the part of high school graduates and in-course students. Awards are offered to students selected by the university scholarship awards committee and are tenable only at SIFX University. If a student is eligible for more than one university-nominated scholarship, s/he will receive the largest to which s/he is entitled.

The university gratefully acknowledges the generosity of the persons and organizations whose contributions made possible the following scholarships, awards, and bursaries:

- Adult Education Access Award
- Dr. Louis J. Allain Scholarship
- Daniel W. & Marjorie E. Almon Scholarship
- Alumni Scholarship Endowment
- Ambrose Allen Bursary
- Christopher Amirault Award
- Anderson Environmental Award
- George Anderson Business Award
- George Anderson Leadership X-Ring Award
- Antigonish Diocese CWL Bursary
- Justin Avery Memorial Award
- Bank of Montreal Scholarship
- Rev. R.V. Bannon Scholarship Fund
- Barrick Gold Scholarship
- Holly Bartlett Memorial Bursary
- Bauer Bursary Fund
- A.P. Beaton Scholaric Award
- John Beaton Fellowship Bursary
- Rev. Donald Belland Bursary
- Berggren Credit Union Scholarship
- Lou Bilek Soccer Award
- Rod & Betty Bilodeau Bursary
- Birks Foundation Bursary
- Michelle Birks Memorial Bursary
- Black Student Bursary in Education
- Harry and Martha Bradley Scholarship
- Bishop Bray Foundation Scholarship
- Cecilia Brennan Bursary
- Jacqueline Brougham Award
- Jo M. Brown Scholarship in Nursing
- Claude Brunelle Memorial Scholarship
- CJFX Scholarship
- Rev. J.V. Campbell Bursary
- Cape Breton Scholarship and Bursary Fund
- Dr. J.J. Carroll Scholarship
- Catholic Women’s League Scholarship
- Celtic Travel Bursary
- Central Home Improvement Warehouse Scholarship
- Clarence & Helen Chadwick Bursary
- Chadwick-Hayes Scholastic Award
- Chevrolet High Note Student Bursary
- Dr. Leo P. Chiasson Scholarship
- A.W. (Bill) Chisholm Scholarship
- Donald A. Chisholm Memorial Scholarship
- Rev. J.C. Chisholm Scholarship in Biology
- Rev. John Archie Chisholm Memorial Scholarship in Celtic Studies
- J. Fraser Chisholm Scholarship
- Rev. John W. Chisholm Fund
- Joseph D. Chisholm Scholarship
- Mary Ann Chisholm Nursing Bursary Award
- Rod Chisholm Scholarship
- CIBC Scholastic Award
- Rosemary Landry Clark Memorial Award
- Rev. Dr. E.M. Clarke Scholarship in Pure and Applied Sciences
- Class of 1954 Bursary
- Class of 1955 Bursary
- Class of 1956 Bursary
- Class of 1962 Bursary
- Class of 1963 Scholarship
- Class of 1965 Fund
- Class of 1970 Bursary
- Class of 1971 Scholarship
- Class of 1973 Service to Others Award
- Paul Cogger Memorial Scholarship
- Gerald P. Coleman Q.C. Award
- Louis Connolly Fund
- Jean E. Cooke Bursary
- Daniel Cordeau Scholarship
- Arleen Power Corey Memorial Fund
- Rev. Cornelius B. Collins Scholarship
- Rev. Cornelius J. Connolly Bursary
- Rev. Cornelius J. Connolly Scholarship
- General Romeo Dallaire African Leadership in Education Award
- John & Selena Daly Scholarship
- James E. & Mary D. Deagle Endowment
- Edward P. Delaney Bursary
- Edward P. Delaney Scholarship
- Democracy 250 Leadership Bursary
- Development Studies Internship Bursary
- Alphonse Desjardins Commemorative Scholarship
- L.A. DeWolfe Memorial Scholarship
- Diploma in Ministry Bursary
- Dr. John Dobson Memorial Award in Adult Education
- Rev. John Dougher Bursary
- Alexander Doyle Memorial Scholarship
- Rev. D.A. Doyle Scholarship
- The Sir James Dunn Foundation Internship Scholarship
- Trudy Eagan Women in Business Award
- Faculty Staff Scholaristic Award
- J. Wallace Farrell Memorial Scholarship
- Margaret Martell Farrell Scholarship
- Margaret Martell Farrell B.Ed. Award
- The Audrey Fenwick Memorial Award for Studies in Adult Education
- Rev. Peter Fiset Fund
Kathryn M. MacDonald Scholarship
James M. MacDonald Bursary
Rev. Hugh John MacDonald Memorial Fund
Rev. B.A. MacDonald Scholarship Fund
Danny Gallivan Memorial Scholarship
Wilfred J. Garvin Scholarship
General Motors of Canada Ltd. Women in Science Bursary
General Motors of Canada Ltd. Women in Science Scholarship
Dr. A. Marie Gillan Award in Adult Education
Anne Gillis (of Glen Alpine) Award
Donald and Margaret Gillis (of Glen Alpine) Award
Sister Henrietta Gillis Award for Education
Joseph and Tessie Gillis Fund
Margaret Gillis (of Glen Alpine) Award
Mary Gillis (of Glen Alpine) Award
John and Sarah Gillis-Campbell Award
Mary Margaret Gillis-Campbell Award
Colin and Christine Gillis-Chisholm Award
Joan Gillis-Lang Award
Margaret C. Gillis-MacDonald Award
Mary Ann Gillis-MacIsaac (of Glen Alpine) Award
Glen Sullivan Scholarship
Fred Gormley Scholarship
Jeff Graham Memorial Scholarship
Mary Jane Graham Bursary
Catherine (MacLeod) Grant Scholarship
Daniel and Emeline Grant Scholarship
Rev. J. Edward Grant Bursary
Ray Greening Memorial Scholarship
Shirley (Martindell) Grinnel Scholarship
The Gulf Canada Scholarship
Dr. H.B. Hachey Scholarship
A.G. Hamilton Scholarship

Daniel and Margaret O'Brien Bursary
Nova Scotia Power Scholarships
Paul and Miki Norris Bursary
Nova Scotia Power Scholarships
Daniel and Margaret O'Brien Bursary
Dr. Ed O'Connor Scholarship
2.6.1 Major and Entrance Scholarships

StFX is founded on the values of academic excellence, leadership, and service to others. The StFX National Entrance Scholarship program reflects these qualities. Students’ efforts in achieving a high school average of 85 or greater in their grade 12 year are recognized with a guaranteed minimum award.

All scholarships are awarded on the grade 12 average of either December exams or first-semester final grades in grade 12. Scholarship averages are based on available marks of the five required courses for the program to which the student is applying. The deadline for all scholarship applications is March 1. To be eligible for any guaranteed entrance renewable scholarships you are required to submit the following:

a) An application for admission to the University;
b) A final first term/semester grade 12 high school transcript with an average of 85% or higher;

To apply for any of the major renewal scholarships you are required to submit the following:

a) An application for admission to the University
b) A final first term/semester grade 12 high school transcript with an average of 85% or higher;
c) The “Consideration for Major Scholarships” application which contains a detailed résumé, including a description of extra-curricular activities and awards and two letters of recommendation from high school teachers, one of which must be from the current year.

If a student is eligible for more than one university nominated scholarship, s/he will receive the largest to which s/he is entitled. Students must be enrolled at least 30 credits in the fall/winter terms combined at StFX to maintain scholarship offer.

$32,000 StFX President’s Scholarships

These awards recognize outstanding academic achievement. They are for entering students who demonstrate the qualifications and values honored at StFX: high academic success, leadership, and dedication to service others. These scholarships are based on grade 12 December exams or first-semester grade 12 results. They are renewable for four years at $8,000 per year. The deadline for application is March 1.

$24,000 Philip W. Oland Scholarships and J.P. McCarthy Scholarships

Students with the highest scholastic standing and demonstrated leadership ability are eligible for these scholarships. A nomination letter from their principal or guidance councilor is required for this scholarship. These scholarships are based on grade 12 December exams or first-semester grade 12 results. Philip W. Oland Scholarships are available to students from the Atlantic provinces only while the J. P. McCarthy Scholarships are open to entering students from across Canada. These scholarships are renewable for four years at $6,000 per year. The deadline for application is March 1.

$24,000 StFX Canadian Scholarships

These scholarships are awarded based on academic achievement and the province of origin of the student. Based on grade 12 December exams or first-semester grade 12 results, these scholarships are renewable for four years at $6,000 per year. The application deadline is March 1.

$24,000 StFX International Scholarships

These scholarships are awarded based on academic achievement in the country of origin of the student. Based on grade 12 December exams or first-semester grade 12 results, these scholarships are renewable for four years at $6,000 per year. The application deadline is March 1.

$12,000 StFX Merit Scholarships

These scholarships are awarded to outstanding students in arts, science, or the Gerald Schwartz School of Business. Based on grade 12 December exams or first-semester grade 12 results, these scholarships are renewable for four years at $3,000 per year. The application deadline is March 1.

$7,000 StFX Guaranteed Scholarships

These entrance scholarships are awarded to all applicants with an average of 90% or higher, based on grade 12 December exams or first-semester grade 12 results. These scholarships are renewable for four years at $1,750 per year. The application deadline is March 1.

$5,000 StFX Guaranteed Scholarships

These entrance scholarships are awarded to all applicants with an average of 85 to 89.9 per cent, based on grade 12 December exams or first-semester grade 12 results. These scholarships are renewable for four years at $1,250 per year. The application deadline is March 1.

International Baccalaureate (IB) Scholarships

Students who successfully complete the IB Diploma will be eligible for StFX scholarships. Applicants with 24 points may be awarded an entrance scholarship in the amount of $500. If a student is eligible for more than one university nominated scholarship, s/he will receive the largest to which s/he is entitled.

2.6.2 Major Scholarship Recipients, 2014-2015

Barry O’Leary Scholarship
Christine Kingan, Ottawa, ON
Benedict M. Mulroney Scholarship  
Dana Baxendale, Dalem Lake, NS  
Jeanine Philpott, Lantz, NS

Canadian Scholarship  
Jennifer Anderson, Westmount, NS  
Hilary Brousseau, Dartmouth, NS  
Emily Chaisson, Corner Brook, NL  
Sophie Chisholm, Port Williams, NS  
Jessica Fullerton, Rexton, NB  
Aggie Hennessy, Newtown, NS  
Emily Hogan, Quispamsis, NB  
Sean Rowley, Halifax, NS  
Hannah Stevens, Upper Tantallon, NS  
Megan Walsh, Montague, PE  
Kaleigh Weickert, Fall River, NS

Chadwick-Hayes Scholarship  
Maura Rutherford, Gananoque, ON

Paul Cogger Scholarships  
Suzanne MacKinnon, Tay Creek, NB

Harrison McCain Scholarship  
Kelsey Fisher, Amherst, NS  
Rachel Johns, Annapolis Royal, NS  
Merissa MacNeill, Aylesford, NS

Joan and Douglas MacMaster  
Lewis Lee, Providence, RI

J. P. McCarthy Scholarship  
Carmen Landry, Sydney, NS

Philip W. Oland Scholarship  
Nathaniel Jenkins, Antigonish, NS  
Emma Vossen, Delta, BC

SIFX President’s Scholarship  
Alison Armstrong, New Westminster, BC  
John Michael Jordan MacDonald, O’Leary, PE

2.6.3 University In-Course Scholarships

In-course scholarships are awarded to students who have completed at least one academic year of 30 credits in the fall and winter terms combined towards a first degree. They are awarded on the basis of academic performance at SIFX University. A minimum average of 80 in each scholarship group is required. No application is necessary. The scholarships, ranging in value from $1,000 to $5,000, are awarded for one year.

For the purpose of scholarships, students are grouped by year of study and by degree programs as follows:

- Group A: BA and Music
- Group B: BBA and BIS
- Group C: B.Sc. and Engineering
- Group D: Nursing, Human Nutrition, and Human Kinetics

The following guidelines are used in making these awards:

a) A student ranked first in each scholarship group will qualify for the amount of $5000.

b) A student ranked in top 5% in each scholarship group will qualify for the amount of $2000.

c) A student with average of 80% or higher will qualify for the amount of $1000.

d) If a student is eligible for more than one university nominated scholarship, s/he will receive the largest to which s/he is entitled.

2.6.4 Bursaries

A number of university bursaries are available, usually ranging in value from $250 to $3500. Grants are based on the demonstrated need of the student and the availability of bursary funds. The holder of a bursary is expected to maintain a satisfactory academic record. Bursaries are not automatically renewed; an application must be made each year.

Application forms for university bursaries may be obtained from the financial aid website http://sites.sifx.ca/financial_aid/. Each bursary has a separate due date. The bursary program runs from September to March of each year and can only be applied for once the student has begun classes. Bursaries are based on financial need, satisfactory academic standing, and may be based other criteria as specified by the donor(s).

2.7 University Prizes

The university gratefully acknowledges the generosity of the persons and organizations whose contributions make possible the many prizes awarded at the end of each academic year. Recipients of prizes are normally full-time students in regular attendance in a degree program at SIFX and must have given satisfactory evidence of merit. The university reserves the right not to make an award should there be no suitable candidate. Awards, unless otherwise specified, are tenable only at SIFX.

At convocation the following prizes, listed by associated department, are awarded to graduating students:

- Onex Corporation Gold Medal
- Dr. Leo P. Chiasson Award for Biology to the Outstanding Advanced Major or Honours Student
- Centre for Marine Biology Prize
- Dr. Marguerite Michaud Prize for Canadian Studies
- W. H. Macdonald Memorial Scholarship for Celtic Studies
- Flora MacDonald Prize
- Rev. Malcolm MacDowell Award in Celtic Studies
- Chemistry Industry Merit Award
- Employer's Choice Award for X-cellence in Co-operative Education
- Dr. D.J. MacDonald and Dr. A.B. MacDonald Memorial Prize for Economics
- Engineering Department Medal
- Association of Professional Engineers of Nova Scotia Scholarship
- Association of Professional Engineers of Nova Scotia Award
- J. Wallace Farrell Memorial Award for Engineering
- Nova Scotia Power Centennial Scholarship for Engineering
- English Department Cape Breton Creative Writing Prize
- Margaret MacGillivray-MacDougall Prize for English
- Rev. R.J. MacSween Prize for English
- Ambassador of France Book Prize for French
- Ambassador of Switzerland Book Prize for French
- Jean Babin Prize for Excellence in French
- Consulate of Argentina Prize for Spanish
- Angus Dan Gilles Prize in Gaelic
- Professor Donald J. MacNeil Memorial Award for Earth Sciences
- Mining Society of Nova Scotia Centennial Scholarship Medal
- Dr. Randall F. Cormier Award for Best Thesis in Earth Sciences
- Mary Tramble Memorial Award for Field Earth Sciences
- Ambassador of Germany Book Prize for German
- Ambassador of Austria Book Prize for German
- Ambassador of Switzerland Book Prize for German
- German Consulate General Montreal Prize
- Hogg/Phillips Prize in History
- Rev. A.A. Johnston History Award for Diocesan History
- Iita MacDonald Prize for Canadian History
- Dairy Farmers of Canada Award for Further Study in Dietetics/Nutrition
- Nova Scotia Home Economics Book Award
- Nova Scotia Health Research Foundation Award
- Dr. H. Stanley and Doreen Alley Heaps Prize for Computing Science
- Dr. A.A. MacDonald Prize for Mathematics
- Canadian Academy of Recording Arts and Sciences Award for Music
- Chevrolet High Note Student Bursary
- Paul Groarke Philosophy Prize
- Rev. Charles R. MacDonald Memorial Medal for Philosophy
- Dr. M.S. Gautam Memorial Prize for Physics
- Wallbank/Weingartshofer Prize for Experimental Physics
- Yogi Joshi Prize for Excellence in Physics
- G.P. Brooks History of Psychology Prize
- Craig McDonald Mooney Prize for Psychology
- Walter Kontak Prize in Political Science
- Hon. John B. Stewart Scholarship for Political Science
- John and Mary Fraser Memorial Prize for Senior Religious Studies
- Rev. F. J. Miffen Sociology Prize
- Allard Tobin Travel Endowment Fund Award
- Dr. G.H. Murphy Prize for Proficiency in Pre-medical Studies
- St. Francis Xavier Association of University Teachers Book Prizes
- Nominations to the Kappa Gamma Pi Honour Society
- Katherine Wdowiak Memorial Award in Nursing
- Women’s and Gender Studies Prize

At the end of each academic year the following prizes are awarded to undergraduate students:

- Gaelic Scholarship for Summer Study in Scotland
- Honourable Allan J. MacEachen Fellowship for Celtic Studies
- Rev. Donald M. Rankin Scholarship for Celtic Studies
- Rev. John Archie Chisholm Memorial Award for Celtic Studies
- Cecil MacLean Prize for Achievement in First-Year French
- B.J. Keating Memorial Award for Geology
3.1 Registration and Course Load

a) Students are responsible for the accuracy of their course registrations and for ensuring that the courses they select are appropriate to their degree programs. They are responsible for dropping any second term courses if they have failed or dropped any required prerequisite course(s) in the first term. Students who are uncertain about their course selection are encouraged to seek assistance from the academic advisors or the department chair or program co-ordinators.

b) The regular academic year at StFX runs from September to April and divided into two terms. Fall term runs from early September to mid-December and winter term from early January to late April. A course taught three hours a week for the academic year has a value of six credits and is called a full course. A course taught for three hours a week for one term has a value of three credits and is called a half course.

c) In most programs the normal full load is 30 credits each academic year. Students are advised to maintain a balanced course load between the fall and winter terms, whenever possible. Students enrolled in 60% of a normal full course load, or 18 credits for the academic year are considered to be full-time students.

d) Students are responsible for the accuracy of their course registrations. Students may drop a course on or before the relevant deadline (through the online registration facility in Banner). See the calendar of events for deadline dates for dropping full-year, first-term and second-term courses. A course that is dropped prior to the deadline will receive a grade of DC (dropped course). This grade will appear on the students’ official transcripts but is not used in the calculation of the average. Once the drop deadline has passed, students who stop attending class will receive a final grade based on the course grading components they have completed to date with a zero grade for those components not completed. This final grade will appear on students’ transcripts and is used in the calculation of the average. Students who cannot complete a course due to medical or other extenuating circumstances must contact the dean’s office and provide appropriate documentation. Students must be aware that dropping a course may change their registration status from full to part time, and may have an impact on tuition, refunds, student loans, dean’s list for the next year, in-course scholarships for the next year, athletic eligibility, or a StFX bursary or award.

e) Students who wish to enrol in more than a full course load per term must apply to the registrar. A minimum grade average of 65 is required, either for the previous academic year or for the first term if the application is submitted at the start of the second term. Students may not enrol in more than 36 credits in one academic year (September-April). For spring and summer terms, students may not enrol in more than six credits in either term. Students who wish to enrol in more than this number must apply to the registrar and meet the 65 minimum grade average. The maximum number of credits permitted in either term is nine, however students are reminded that spring and summer courses are offered in a compressed time frame and are advised to carefully consider enrolling in more than the recommended six credits each term. See section 2.1 regarding fees for extra courses.

f) Credit will not be granted for any course in which a student is not formally enrolled.

g) Some courses are cross-listed between two departments and credit will be granted for only one of the two courses. As well, credit will be granted for only one of two courses deemed equivalent; see course descriptions.

h) Courses in business administration, education, engineering, human kinetics, human nutrition, information systems or nursing normally may be applied only to those programs respectively. See the individual faculty regulations for exceptions.

i) A “pair” is 12 credits in one subject with six credits at the 200 level or higher. See glossary definition.

j) Students who wish to audit a course must receive approval from the course instructor. See glossary definition.

3.2 Transfer Credit

a) Transfer credit will be granted for all courses for which credit has been earned at an accredited university, if the associated courses can be used to meet the student’s program requirements at StFX. See section 1.1 for transfer credit from colleges. Minimum grade and average requirements, as specified in the faculty regulations, apply to all transfer courses. Official transcripts from all post-secondary institutions are required at time of admission. Failure to do so could result in academic dismissal upon later disclosure.

b) Restrictions may apply to the transfer of credit for business administration courses at the 300 and 400 level.

c) See section 9.27 regarding French and Spanish immersion courses which may count as open electives only.

d) Normally, transfer credit will not be granted for courses taken 10 years or more before the date of application.

e) Transfer credits may be granted for distance courses in recognized academic disciplines taken at Canadian universities. Transfer credit will not be granted for distance courses if the StFX equivalent has a laboratory component. Unless expressly permitted by the Deans, distance courses may be used only as electives or to meet requirements for pairs. Upon completion of the Coady Diploma in Development Leadership students will be eligible to transfer up to 12 credits as open electives towards a StFX degree.

f) To enrol in any course at another university, students must obtain a letter of permission from the appropriate dean; section 3.1e also applies.

g) Students on probation or in good standing are eligible to enrol in spring or summer courses at StFX or at another university.

3.3 StFX Degree or Diploma Requirements

In order to earn a StFX degree, students must complete four years of study or typically 120 credits. Some degree programs require a greater number of credits. See the appropriate faculty sections for details on specific degree requirement and for details on diploma requirements.
a) Honours Programs:
   i) Normally require four years of study
   ii) The last 60 credits must be completed at StFX
b) Advanced Major, Major, and Four-Year Programs:
   i) Normally require four years of study, unless the student is in the Faculty of Arts and chooses to complete the degree through part-time study
   ii) The last 60 credits must be completed at StFX
c) A student who enrolls in an undergraduate degree program must normally complete the degree requirements within 10 years from the date of initial registration.
d) Students wishing to change degree programs must obtain permission from the appropriate dean.

3.4 RE-ADMISSION TO UNIVERSITY
a) A student whose course of study is interrupted by one or more academic years is bound by any changes made in the curriculum and regulations after his/her first registration.
b) Course requirements for a degree, whether three or four years, must be completed within 10 years of the initial date of registration.
c) Courses taken for credit 10 years before acceptance into a degree program will be assessed by the appropriate dean.
d) A student who has had no course registration at StFX for 12 months or more, or withdraws from StFX (See section 3.7) must re-apply for admission.
e) If a student is suspended or dismissed from the university and is re-admitted, the student will be on probation for up to one year, and be required to enrol in the APEX program. See section 2.3.11. Upon re-admission to the university, students will be eligible to register in courses at StFX and elsewhere during the spring and summer terms preceding their term of re-admission.

3.5 DIRECTED STUDY & SELECTED TOPICS COURSES
a) Directed study courses permit students of exceptional ability and motivation to pursue, on a tutorial basis, individual programs of study in areas not normally offered by a department. Directed study courses are normally restricted to no more than two students. Normally a faculty member may offer no more than two directed study courses per year. A directed study course may earn no more than six credits. To be eligible for a directed study students must have:
   i) completed 12 credits in the department;
   ii) attained a minimum average of 70 in the 12 credits;
   iii) obtained written consent from the department.

Students interested in a directed study course should consult the department chair and the appropriate faculty member before September 1. Formal application must be submitted by the chair to the appropriate dean four weeks before the start of the term in which the course is to be offered.
b) Subject to approval of the appropriate dean, departments may offer selected topics courses in their discipline. A selected topics course may be offered twice before the department must seek regular approval through the appropriate committee on studies and the University Senate. Selected topics courses may be offered in any department or interdisciplinary program at the 100-, 200-, 300- or 400-level and may be offered for three or six credits. The actual course number will be assigned by the registrar’s office.

3.6 STUDENT CLASSIFICATION
Advancement in classification (first year to sophomore to junior to senior) is granted when a student earns 30 credits in the preceding classification.

Students who are six credits short of the next level in a degree program will be placed in the next classification on a conditional basis.

<tr>
<td>Third Year</td>
<td>54, 63 in nursing</td>
</tr>
<tr>
<td>Fourth Year</td>
<td>84, 93 in nursing</td>
</tr>
</tbody>
</table>

3.7 CLASS ATTENDANCE AND WITHDRAWAL
Students are expected to attend all classes and laboratory periods. Following an absence of more than one class, students should contact each professor or instructor. In the case of sudden emergency requiring an absence of more than five days, students should contact the dean’s office. Faculty are required to report to the dean all unexplained absences in excess of three hours over at least two classes in any term.

When a mandatory class, quiz, exam, or class project is scheduled outside normal class hours, provision will be made to enable students to attend scheduled classes and laboratories in their other courses.

Students wishing to withdraw from the university during the full academic year must give formal notice to the appropriate dean in person or through mesAMIS. Formal notice of withdrawal is required for tuition refunds. See 2.1.3. Students who withdraw may incur an academic penalty based on a minimum of two final grades, see 3.11. Other departments and offices will receive a copy of the withdrawal notice: the business office, campus bookstore, campus post office, dean of students, financial aid, library, registrar’s office, residence office, student life office, students’ union (for health insurance), and TSG.

3.8 ACADEMIC INTEGRITY POLICY
All members of St. Francis Xavier University are expected to conduct themselves in an ethical manner in their academic work. It is the policy of the university that academic dishonesty in any form is not acceptable. Academic dishonesty is defined as any act, practice or behaviour that gives a student an unearned academic advantage over another or that counteracts or undermines the integrity of academic or scholarly endeavor at St. Francis Xavier University.

3.8.1 The Code of Academic Conduct
An academic community flourishes when its members are committed to five fundamental values. An academic community of integrity:
   a) advances the quest for truth and knowledge by acknowledging intellectual and personal honesty in learning, teaching, research, and service;
   b) fosters a climate of mutual trust, encourages the free exchange of ideas, and enables all to reach their highest potential;
   c) establishes clear standards, practices, and procedures and expects fairness in interactions among students, faculty, staff, and administrators;
   d) recognizes the participatory nature of the learning process and honours and respects a wide range of opinions and ideas; and
   e) upholds personal responsibility and accountability and depends upon action in the face of wrong-doing.

3.8.2 Offenses Against Academic Integrity
The following is a list of offenses constituting academic dishonesty that are subject to discipline; this list is not intended to be exhaustive.

a) Plagiarism
Although academic work often involves research on, or reference to, the ideas, data, and critical commentary of other scholars, academic integrity requires that any use of another person’s work be explicitly acknowledged. Plagiarism is the misrepresentation of another’s work—whether ideas or words, intellectual or creative works, images or data, published or unpublished—as one’s own. Examples of plagiarism include:
   i) quoting, paraphrasing, or summarizing text, even small portions of text, without proper acknowledgement;
   ii) paraphrasing too closely (e.g., changing only a few words or simply re-arranging the text); and,
   iii) downloading from the Web or from a library or any other database all or part of a paper, a journal article, or a book, or downloading any other website material, excluding bibliography makers, and presenting it as one’s own work.

b) Cheating
Some examples of cheating are:
   i) submission, in whole or in part, of any purchased written work as one’s own;
   ii) sharing papers, including the buying or selling, borrowing or leasing of essays, tests, or other assignments;
   iii) submission, without the prior expressed written consent of the appropriate instructor(s), of any work for which credit has been, or is being, sought in another course, including any work that has been submitted at another institution;
   iv) collaboration (i.e., working together) on an assignment which an instructor did not specify was to be completed collaboratively;
   v) possession of unauthorized aids or assistance including copying during tests and examinations;
   vi) impersonating another student in a test, examination, assignment, or attendance record, or knowingly permitting another to impersonate oneself;
vi) knowingly helping another to engage in academically dishonest behaviour (including, but not limited to, providing answers to a test or examination or providing an essay or laboratory report that is subsequently plagiarized or submitted by another student as his or her work);

vii) obtaining or looking at a copy of a test or examination before it is administered; and

ix) altering a test or examination after it has been graded and returned by the instructor.

c) Falsification

Some examples of falsification are:

i) falsification of any research results, whether in laboratory experiments, field trip exercises, or other assignments;

ii) alteration or falsification of transcripts or other academic records for any purpose;

iii) submission of false credentials;

iv) making false representation on an application for admission;

v) making false representation on an application for ethical approval for a research project involving human or animal subjects; and

vi) requesting the extension of a deadline citing reasons known to be false, including submitting false documentation supporting that request.

d) Tampering

Examples of tampering are:

i) unauthorized access to, use of, or alteration of computer data sets, including course, student, faculty, alumni, public, and corporate records;

ii) gaining unfair advantage by using software and computer tools that inhibit the use of the resources by others;

iii) damage to or destruction of library materials or laboratory resources; and

iv) willful or negligent damage to the academic work of another member of the university.

e) Miscellaneous

i) any other form of misrepresentation, cheating, fraudulent academic behaviour, or other improper academic conduct of comparable severity to the above.

3.8.3 Academic Integrity Policy and Procedures

The full academic integrity policies and procedures document is available at http://www.stfx.ca/services/registrar/academic-integrity-document.pdf

Further information is available at: www.sites.stfx.ca/registrars_office/academic_integrity

3.9 EXAMINATIONS

Examinations are written during the examination periods indicated in the Academic Calendar (calendar of events). Normally, no student may be required to write more than two exams in 24 hours. No written tests or examinations (excluding lab exams) worth 10% or more of a student's final grade should take place during the two weeks prior to the last day of classes of the academic term (September - April).

Students unable to write an examination at its scheduled time must notify the dean's office prior to the examination. If there is a medical problem, the student must provide an original doctor's certification of the condition.

3.10 GRADING SYSTEM FOR UNDERGRADUATE PROGRAMS

a) The passing grade is 50.

b) The student's average is a weighted calculation. A six-credit course has a weight of one; a three-credit course has a weight of one-half. The average is based on the final grades in all courses attempted.

c) The grade and average requirements for major, advanced major and honours degrees are stated in chapter 4 for arts degrees, chapter 5 for business degrees and chapter 7 for science degrees.

d) At least 75% of the final grade in all courses will be based on written (not oral) work; further, at least 40% of the final grade in a six-credit 100- or 200-level course will be based on invigilated written December and April examinations, and at least 40% of the final grade in a three-credit 100- or 200-level course will be based on invigilated mid-term quizzes and December or April examinations.

e) When a student repeats a course, the original grade remains on the transcript and in the student's average. However, the credits originally earned are removed from the student's transcript.

3.11 ACADEMIC PENALTIES

To remain in satisfactory academic standing at the end of the academic year, students are required to earn:

i) a year end average of 55 or better, and

ii) earned credit for at least 60% of the courses completed. See chart below.

<table>
<thead>
<tr>
<th>Credits</th>
<th>Required Credits</th>
<th>Penalty</th>
</tr>
</thead>
<tbody>
<tr>
<td>Completed 30 or 30+</td>
<td>27</td>
<td>18</td>
</tr>
<tr>
<td>Earned, at least</td>
<td>18</td>
<td>16</td>
</tr>
<tr>
<td>15</td>
<td>12</td>
<td></td>
</tr>
<tr>
<td>9</td>
<td>6</td>
<td></td>
</tr>
</tbody>
</table>

Assessment is based on a minimum of two final grades. Students who fail to meet one or two of these requirements will incur an academic penalty as listed below. However, students who require fewer than 30 credits to complete their degrees will not be subject to academic penalties.

- None One Probation
- One suspension One Suspension
- One probation One Suspension
- One probation Two Dismissal
- One suspension One Dismissal
- More than one One Dismissal

Students on probation must enrol in APEX unless, upon application by the student, the committee on studies of the appropriate faculty excuses the student on the grounds that the student would not benefit in a meaningful way from the program.

Academic penalties incurred for a full academic year are applied at the end of the following spring term. Students who are suspended or dismissed and who are enrolled in courses when the penalty is applied may complete their progress courses. However, any courses in which these students have enrolled for future terms will be dropped.

Students who are suspended from the university may return the next spring term following the term of their suspension.

Students who have been dismissed will not be eligible for further study at the university.

Students who successfully appeal a suspension or dismissal may return on probation, for the next full academic year following the appeal unless there will be 12 months or more between course registrations, in which case the student will be required to apply for re-admission. See section 3.4. No credit will be granted for work completed elsewhere while a suspension or dismissal was in effect.

See section 6.4 for Faculty of Education regulations.

3.12 APPEAL OF AN ACADEMIC PENALTY

Academic penalties of suspension or dismissal may be appealed to the committee on studies of the appropriate faculty. Appeals of suspension must be received by June 15 of the calendar year in which the suspension was imposed. Appeals of dismissal must be received by June 15 of the calendar year in which the student wishes to return to studies. The decisions of the committee on studies are final.

3.13 GRADE APPEAL PROCEDURE

a) Only final grades, including grades of composites used to calculate a final grade may be appealed.

b) All appeals must be made in writing through the appropriate dean. The letter must state the reason for the appeal. There is a fee of $10 for each grade appealed. This fee is refunded if the appeal results in a change of grade.

c) Appeals must be made before January 15 for first-term courses; before May 30 for full-year and second-term courses; before July 15 for spring courses; and before September 15 for summer courses.

d) The dean will request a review from the instructor and report it to the student, or the student may request the dean to arrange an interview between the student and the instructor.

e) If the student is dissatisfied, the dean will set up an appeal committee of three instructors from the department, one chosen by the student, one chosen by the instructor, and a third chosen by the first two members. To initiate this proceeding, the student must appeal in writing within 10 days of receiving
notification of the results of the review. Both the student and the professor may present their respective cases in writing to the appeal committee.

f) The student must pay a fee of $25 if an appeal committee is established; this fee is refunded if the committee decides in his or her favour.

3.14 CONVOCATION

SFU confers degrees and/or diplomas at two convocations per year; Spring (May) and Fall (December). Please refer to the calendar of events for dates. All students who expect to receive their degree or diploma at the next convocation ceremony must complete an application for degree or diploma. The on-line form is available in mesAmis. Applications must be made no later than the deadline dates listed in the calendar of events. Students who are completing their degree requirements in the fall term are not eligible to graduate at fall convocation with the exception of students in those programs whose requirements are all completed well in advance of the end of the term.

The name printed on the parchment must be the student’s legal name as recorded on his/her academic record and the name provided on the admission application. Any change to this name must be supported by official documentation and submitted to the Registrar’s Office.

SFU degrees are printed in Latin and show the academic designation (i.e., Bachelor of Arts with Major) but not the specific major, concentration, or minor. However, this information is included in the students’ official academic record and appears on any transcript issued. SFU diplomas are printed in English. Graduates who are unable to attend convocation will have their degrees mailed to their home address on file.

Students graduating with an undergraduate degree may be awarded the designation Distinction or First Class Honors. See section 3.20. Candidates who receive degrees, diplomas and certificates from St. Francis Xavier University become members of the SFU Alumni Association. As members, alumni are eligible to receive the Alumni News, benefits and promotions exclusive to alumni, and information regarding development programs. Additional graduation information is available at http://www.sites.sfu.ca/registrar_office/graduation.

3.15 ACADEMIC RECORDS

3.15.1 Release of Student Academic Records

Disclosure to students of their own records

a) Students have the right to inspect their academic records and to challenge contents they believe to be inaccurate. This right does not extend to letters of reference given in confidence by the author. A member of the registrar’s staff will be present during the inspection.

b) Students have the right to receive transcripts of their own marks. Information on a student’s record will not be given over the phone.

c) No partial transcripts will be issued.

d) The registrar will not provide students or third parties with copies of other documents on file, e.g., transcripts from other institutions.

Disclosure to University Officials

Information on students may be disclosed without their consent to faculty, university officers or committees at the discretion of the Registrar. Students’ personal and academic information is stored securely and used solely for the university’s normal course of business.

Disclosure to Third Parties

a) The following information is considered public and may be released at the discretion of the registrar without restriction:
   i) Name; hometown if in convocation program;
   ii) Certificates, diplomas, and degrees awarded;
   iii) Date of conferral.

b) Information will be released without student consent in compliance with a judicial order, search warrant or subpoena, or as required by federal or provincial legislation.

c) Necessary information may be released without student consent in an emergency, if knowledge of that information is required to protect the health or safety of a student or other persons. Such requests should be directed to the registrar.

d) Statistics Canada

Statistics Canada is the national statistical agency. As such, Statistics Canada carries out hundreds of surveys each year on a wide variety of matters, including education.

It is essential to be able to follow students across time and institutions to understand, for example, the factors affecting enrolment demand at postsecondary institutions. The increase emphasis on accountability for public investment means that it is also important to understand “outcomes”. In order to conduct such studies, Statistics Canada asks all colleges and universities to provide data on students and graduates. Institutions collect and provide to Statistics Canada, student identification information (student’s name, student ID number, Social Insurance Number), student contact information (address and phone number), student demographic characteristics, enrolment information, previous education, and labour force activity.

The federal Statistics Act provides the legal authority for Statistics Canada to obtain access to personal information held by educational institutions. The information may be used for statistical purposes only, and the confidentiality provisions of the Statistics Act prevent the information from being released in any way that would identify a student.

Students who do not wish to have their information used can ask Statistics Canada to remove their identifying information from the national database. On request by a student, Statistics Canada will delete an individual’s contact information from the PSIS database. To make such request, contact Statistics Canada:

Via mail: Institutional Surveys Section
Centre for Education Statistics
Statistics Canada
150 Tunney’s Pasture Driveway, Main Building, 2100-K
Ottawa, ON K1A 0T6
Via email: PSIS-SIEP_contact@statcan.gc.ca

Maritime Provinces Higher Education Commission (MPHEC)

The MPHEC collects data described above on behalf of Statistics Canada. In addition, it archives these data and uses them to generate basic statistics, research products, as well as the sampling frame for its graduate survey. These activities support its mandate, which is to assist institutions and governments in enhancing the post-secondary learning environment. The legal authority for these activities is provided by the Maritime Provinces Higher Education Commission Act. The Act also requires that all data received by the Commission is kept confidential and ensure protection of personal information. More information about the MPHEC and its Standard for Maintaining Confidentiality may be found at www.mphec.ca.

Regarding those students who do not wish to have their information uses, Statistics Canada will notify the MPHEC of any student choosing to have their personal information removed from the national database, and their information will subsequently be removed from the MPHEC’s database.

e) Other than in the above situations, personal information about a student will be released to third parties only with the written consent of the student, or in accordance with the purposes for which it was collected or as required by law. A student’s academic record will be released to third parties only at the written request of the student, or when the student has signed an agreement with a third party, a condition of which is access to his or her record (e.g., financial aid), or as required by law. This restriction applies to requests from parents, spouses, credit bureaus and police.

f) Academic records, that is, paper files in the registrar’s office, will be held for five years from the date of last attendance, and then destroyed. Former students who wish to re-apply after their files have been destroyed may have to re-submit academic transcripts from other institutions.

3.15.2 Transcript Requests

Requests for transcripts must be made in writing by students and accompanied by the required fee. Requests by phone cannot be accepted. Requests are to be made on the appropriate form obtainable from the office of the registrar or online at www.mysf.ca/services/registrar/transcripts/ Transcript requests are processed in the order in which they are received. Although the normal processing time is 3-5 days, additional time may be needed during the weeks following the December and April exam periods. Transcripts include the following information, where appropriate:

a) The student’s program

b) Courses and numeric grades (failed as well as passed) for all academic work attempted or completed at SFU. Approximate conversion to letter grades is: A = 99-80, B = 79-70, C = 69-60, D = 59-50, F = less than 50.

c) The rank and year-end average if the student is enrolled in a full-time undergraduate program. The average is calculated by weighing each grade by the credit value; see section 3.10. The decile is a student’s ranking (10 high, 1 low) in a course with a least 15 registrants.

d) Transfer credits granted; grades for transfer credits are not shown.
3.16 REGULATIONS FOR A SECOND STFX DEGREE

To receive a second degree from STFX, a graduate of the university must complete at least 30 credits towards the second degree at STFX and must comply with all course requirements of the second degree. Candidate for a second degree may not choose a major, joint major, advanced major, joint advanced major or honours in the same subject as the first degree.

A STFX graduate who previously earned a BA, BSc or BBA below the honours level may subsequently qualify for and receive an honours degree in the same major as that of the first degree. The student must qualify by meeting all faculty and department course, residence, grade, and average requirements for the honours degree, and must complete a minimum of 18 additional credits at STFX towards a second degree.

3.17 CONTINUING AND DISTANCE EDUCATION

The continuing and distance education department offers degree and non-degree learning opportunities onsite and by distance (print-based and online) during fall, winter, spring and summer sessions.

For degree-credit courses, see specific departments in chapter 9; section 9.29 for information on the part-time B. Sc. Nursing program; chapter 8 for programs leading to master's degrees in education; and section 4.3 for the diploma in ministry program.

Non-degree and non-credit courses offered through continuing and distance education are normally concentrated in two areas: general interest and professional development. Several non-degree programs are available by distance education, including a Diploma in Intellectual Disability Studies; and a Certificate in Spirituality. Non-credit workshops may also be offered on campus and online.

Current listings may be obtained from the continuing and distance education department’s website at http://sites.stfx.ca/continuingeducation or by phone at 902-867-3906 or toll-free 1-877-867-3906.

3.18 EXCHANGE AND STUDY ABROAD

STFX has exchange agreements with a number of universities, normally for a third year international study experience. Many of these universities are listed below.

</table>

Students on exchange pay full-time tuition to STFX and any other applicable fees to the host institution. A student may also apply to study abroad as a visiting student at any accredited university and pay tuition and other fees directly to that university. Both exchange and study abroad students must apply to the International Exchange Office and have the host university course of study approved by STFX in order to have these courses credited towards their STFX degree. Students in some programs may need additional semesters in order to complete their degree. Students must:

a) be enrolled in a four-year program;
b) be in good academic standing in all semesters prior to the exchange semester/year;
c) earn an average of at least 70, based on a minimum of 15 credits, in the semester prior to submitting the exchange application;
d) submit an application, with required supporting documents, to the International Exchange Co-ordinator.

Second year students applying by the January 15 deadline will be considered for host university spaces available in the following academic year. After January 15, students may only apply to do an exchange during the winter term of third year for remaining exchange spaces at host universities. Applications are due by October 1 of that year. For more information contact Brenda Riley, International Exchange Co-ordinator at briley@stfx.ca or 902 867-4532.

3.19 DEAN’S LIST

At the end of each academic year students who have carried at least 24 credits, and have earned an average of at least 75, will be named to the Dean’s List if they rank in the top:

20% in the first year;
25% in the sophomore year; or
33 1/3% in the junior or senior year.

3.20 DISTINCTION AND FIRST CLASS HONOURS

Faculty of Arts and the Faculty of Business

The designation of Distinction is awarded to students whose general average over the final three years of the program is at least 80.

Candidates in the Faculty of Arts and Business who satisfy requirements for the degree with honours will be awarded the designation of First Class Honours when their general average is 80 or higher over the final three years, with an average of 80 or higher in all courses taken in the honours subject over the final three years. Students who return to complete 30 credits toward an honours degree are not eligible for the First Class Honours designation.

For students who complete part or all of a degree through part-time study, the designation of Distinction is awarded to those who earn an average of at least 80 over the last 90 credits. Students must complete 80% of the courses at STFX.

Faculty of Science

The designation of Distinction is awarded to students whose combined average over the final three years of the program is at least 80 with a minimum average of 75 in each of the three years.

In the Faculty of Science, the designation of First Class Honours is awarded to students whose general average over the final three years is 80 or higher, with a minimum average of 75 in each year, and who have satisfied all other requirements for the degree with honours.

For students who complete part or all of a degree through part-time study, the designation of Distinction is awarded to those who earn an average of at least 80 on the best 60 credits completed at STFX, with no grade below 75 in any course completed at STFX or elsewhere.

For students in the B. Sc. Nursing, accelerated post-degree option, the average of at least 80 will be based on the credits completed at STFX by calculating three averages, with no average less than 75, as follows:

i) combined first-year, spring and summer courses,
ii) full academic year September to April, and
iii) combined second-year, spring, summer, and fall courses.
3.21 CORRESPONDENCE FROM THE REGISTRAR’S OFFICE TO THE STUDENT

Upon registration at StFX, all official correspondence from the registrar’s office, with the exception of academic penalty letters, is sent to students via their WebFX email accounts. Students are reminded to check their email regularly and to keep their inbox open for delivery.

3.22 OBLIGATIONS OF STUDENTS

Upon registration at StFX, students agree to abide by all applicable rules and regulations and acknowledge that their right to remain at StFX is subject to their observance of these regulations. Students must familiarize themselves with such documents as:

i) the SFX Academic Calendar available at http://sites.stfx.ca/registrars_office/academic_calendar or from the registrar’s office

ii) the SFX Community Code, available at http://sites.stfx.ca/student_life/student_conduct or from the Student Life office

Students are also expected to obey all federal, provincial, and municipal laws.

3.23 RESEARCH ETHICS

All faculty and student researchers at StFX who wish to carry out research involving humans, whether on campus or elsewhere, must have their projects approved by the University Research Ethics Board (REB) or one of its department sub-committees. Researchers must supply six copies of a completed application form and any supporting documentation. Researchers must have REB approval prior to beginning the study. The REB operates within the Tri-Council Policy Statement Guidelines; researchers may consult these or the REB website for further information.

</table>

Students in a BA program, including those who have transferred from another program, may count towards the BA a maximum of 18 credits in courses taken in professional programs. The following regulations, in notes 1-3, apply.

Note 1 Students may normally complete a maximum of 12 credits in BSAD or INFO but only students who transfer out of BBA or BIS programs may count these as a pair. Only students completing a major or advanced major in Economics may complete a minor in Business Administration.

Note 2 Students who transfer out of the engineering or nursing program may count a maximum of 6 credits in ENGR or NURS.

Note 3 A maximum of six credits in HNIN and/or HNUN may be used as open electives, they may not be taken in the first year; permission of the professor and the department chair is required.

Note 4 The degree is BA Major in Economics or Public Policy and Social Research, and Major in Aquatic Resources.

Note 5 In addition to using science courses as electives, students may complete a minor or one pair in a science discipline.

** A subsidiary may normally be done only in a subject in which a major is offered in the BA program with exceptions as noted.
Bachelor of Arts in Music (Jazz Studies) with Honours
Bachelor of Arts with Major in Music
Bachelor of Music (Jazz Studies) with Honours
Diploma in Jazz Studies

The human kinetics degrees, each with a choice of kinesiology or pre-education major, are
Bachelor of Arts in Human Kinetics
Bachelor of Arts in Human Kinetics with Advanced Major
Bachelor of Arts in Human Kinetics with Honours

4.1.2 Subjects Available (see chart previous page)
The subjects available chart lists the subjects available for study in the arts degrees within the Faculty of Arts and where these subjects can be a major, minor, pair or elective course, or where two subjects may be combined in a joint major, joint advanced major, or honours with subsidiary degree. Reference is also made to information in chapter 9.

4.1.3 Degree and Diploma Patterns (see chart below)
Listed below are the degrees and diplomas in the Faculty of Arts with their course patterns and credit requirements. Each degree requires 120 credits.

In general at StFX courses are three credits for a one-semester course and six credits for a full-year (two-semester) course.

First-Year Pattern
Students in the first year of the BA normally follow the pattern of courses listed below. Group I and Group II refer to departments that offer the full range of BA degree options, namely, majors, advanced majors, and honours programs. All courses are introductory with numbers in the range 100-199 (e.g., ENGL 100). The normal academic load is 30 credits per year. In first year, students in the BA carry courses as follows:

Group I
- 6 credits from Catholic studies, Celtic studies, English, history, mathematics/statistics/computer science, philosophy, religious studies

4.1.4 Declaration of Major, Advanced Major, or Honours

Students wishing to follow the honours or advanced major in a subject are advised to consult with the department chair as early as possible. In their second year of study, students declare a major or apply for admission to an advanced major or honours program when they complete the appropriate application form and submit the form, signed by the chair, to their college’s office by March 31. Students are advised of their acceptance to the program in the summer following submission of the form. Students in the advanced major or honours programs must be registered full time in their final year of study. The forms are available at http://sites.stfx.ca/dean_of_arts/

4.1.5 Advancement & Graduation Requirements by Degree (see chart previous page)

All students must fulfill the pattern and credit requirements as specified above and the course, seminar, research report, senior paper, or honours thesis requirements of the major, advanced major or honours department(s). For any honours with subsidiary or joint degrees, students submit only one research report, senior paper, or honours thesis to the first named department on the student’s application, after consultation with both departments.

Candidates who fail to meet the requirements for the degree for which they have applied may be eligible for another degree, provided those requirements are met.

Exceptions to these requirements need the approval of the dean and the department chair. Additional requirements are listed below.

The averages and grades specified below are the minima required.

4.1.6 Co-operative Education Program in Arts

This optional academic program is for BA in computer science or mathematics students. Students have the opportunity to gain 12 months of professional, paid work experience in a range of opportunities in industry, government and not-for-profit across Canada. Students obtain valuable technical and professional experience to reinforce classroom-based instruction. See section 9.13 for further information.

4.2 DIPLOMA IN MINISTRY

The Diploma in Ministry is a distance-education program offered to students across Canada. The program offers six 12-week courses. Students must complete five in order to receive the diploma. Three courses are compulsory (*), and students choose two from the remaining three as electives. Each course requires a minimum of 12 hours per week of study.

Note: Not all electives may be offered each year.

4.3 HEALTH STUDIES COLLOQUIUM

The Health Studies Colloquium (HSC) is an optional, interdisciplinary, interfaculty opportunity that will bring together a small group of first-year students in both the Faculty of Arts and the Faculty of Science to study three academic subjects that will enable them to explore biological, psychological and sociological perspectives on human health. Students in the HSC will be enrolled in biology, psychology, and sociology. The material covered in these classes will be similar to that covered in the regular introductory courses, but with a shift in focus to highlight how the material can be related to matters concerning health. In the biology courses, students will attend classes with other students who are not in the HSC; however, the HSC students will assigned to their own laboratory section(s). The material covered in these courses provides students with the basic foundations of biological principles, and, where possible, will highlight the applications of these principles to the study of health. Students will also complete a Service Learning assignment in partnership with a community organization that is directly involved in human health. This assignment will help students develop a stronger sense of social responsibility as they use what they have learned in the three courses to serve, and learn from, members of the Antigonish community. The HSC also includes a lecture series featuring talks by members of the StFX community who engage in research and practice related to human health. These presentations will highlight StFX’s contribution to the field, and will help students identify potential thesis supervisors and research opportunities to pursue in subsequent years at StFX.

Further information is available on the website at http://sites.stfx.ca/hsc/
### 5.1.2 Degree Patterns

Listed below are the basic degree patterns for degrees in the Faculty of Business. Each degree requires 120 credits. For more specific requirements for the major and honours degrees, see section 9.6 or 9.24.

All BSAD and INFO courses are three credits. While most courses offered by other departments at StFX are three credits, some are six credits for a full-year (two-term) course.

### 5.1.3 Electives

a) **Arts and Science Electives**

i) BBA students must earn 36 credits of arts/science electives. Normally, these credits are completed prior to the fourth year of study (except information systems majors who require 30 credits). The arts/science electives must include a pair (12 credits) in each of two different subjects offered by the Faculty of Arts or the Faculty of Science with exceptions noted below. The third 12 credits of arts/science electives may be additional courses in paired subjects or courses in other subjects.

ii) BIS students must earn 30 credits of arts/science electives. Normally, these credits are earned as 6 credits in each of years one and two, 12 credits in year three and 6 credits in year four. The arts/science electives must include a pair (12 credits) in each of two different subjects offered by the Faculty of Arts or the Faculty of Science with exceptions noted below. The remaining 6 credits of arts/science electives may be additional courses in paired subjects or courses in other subjects.

<td>average 75; average 75 in INFO and required BSAD courses taken in year four; grade of 70 in each of these courses</td>
</tr>
</tbody>
</table>

b) **Earning a Minor in an Arts or Science Subject (BBA programs)**

Any BBA student earning 24 credits in one arts or science subject may qualify for a minor in that subject. Any specific departmental requirements for the minor must be met. Students must also complete a pair (12 credits) in another subject. To have a minor officially recognized, a student must advise the dean’s office of the desire to have the minor noted on the academic record.

i) Students wishing to complete a minor in economics must complete 24 credits in addition to ECON 101 and 102. (Finance majors must complete 24 credits in addition to ECON 101 and 102.)

ii) Students wishing to complete a minor in mathematics/statistics/computer science must complete 24 credits in addition to MATH 205 and STAT 201.

c) **Open Electives**

Most BBA and BIS programs include six credits of open electives. Students may satisfy this requirement by completing BSAD or INFO courses, arts/science courses (as above) or, with permission of the appropriate chair, courses in selected subjects not normally permitted as arts/science electives including engineering, human kinetics, human nutrition and nursing.
5.1.4 Application for Major or Honours
Students wishing to follow the major or honours in a subject are advised to consult with their department chair as early as possible. In the second year of study, students apply for admission to a major or honours program when they complete the appropriate application form and submit the form, signed by the chair, to the dean’s office by March 31. Students are advised of their acceptance to the program in the summer following submission of the form. Students in the major or honours programs must be registered full-time in their final year of study. The forms are available at http://sites.stfx.ca/dean_of_business/

5.1.5 Advancement and Graduation Requirements by Degree
All students must fulfill the pattern and credit requirements as specified above and the course, seminar, research report, senior paper, or honours thesis requirements of the major or honours department(s). For any joint degrees, students submit only one research report, senior paper, or honours thesis to the named department on the student’s application, after consultation with both departments. Candidates who fail to meet the requirements for the degree for which they have applied may be eligible for another degree, provided those requirements are met. Exceptions to these requirements need the approval of the dean and the department chair. Additional requirements are listed below.

The averages and grades specified below are the minima required.

5.1.6 Co-operative Education Programs in Business Administration and Information Systems
This optional academic program allows students the opportunity to gain 12 months of professional, paid work experience in a range of opportunities in industry, government and not-for-profit across Canada. Students obtain valuable technical and professional experience to reinforce classroom-based instruction. The BBA and BIS Co-op Programs are accredited by the Canadian Association for Co-operative Education (CAFCE). See section 9.13 for further information.

6.8 Certificate in Elementary Mathematics Education
6.9 Certificate in Outdoor Education

6.1 BACHELOR OF EDUCATION ADMISSION REQUIREMENTS
The Bachelor of Education (B.Ed.) is a two-year program following a first degree. Applicants must have completed a first degree in arts, science, human kinetics, kinesiology, physical education or equivalent. The B.Ed. program has two streams: elementary and secondary with an additional middle years option available in either stream. Specialist programs in teaching physical education and French as a second language are available in all streams and options.

6.1.1 Admission Process
At the present time, admission to the B.Ed. program is limited to approximately 115 students. The admissions process consists of the three steps described below.

a) File Review
During the file review process, applicants are initially evaluated on four equally weighted criteria.
   i) Academic record: Normally applicants must have a senior-year average of at least 70 or a GPA of 2.5. Consideration is also given to the applicant’s performance throughout their undergraduate program.
   ii) Life experiences and community involvement: Both breadth and depth of involvement are evaluated, as is the applicant’s experience with diversity and with inclusive practices.
   iii) Letters of reference: Evaluation of the applicant’s personal and professional qualities as presented by three referees who know the individual well as a student, worker and community member-leader.
   iv) Essay on why the applicant wants to teach: Evaluation of the essay is based on the applicant’s articulation of his/her view of students, subject area, and vision for schooling.

b) Interview
Based on the above criteria, applicants will be short-listed for the next stage of the process in which interviews are normally required. Interviews are about 30-40 minutes in length and include core questions asked of all applicants applying to the B.Ed. program as well as specific questions relating to the elementary, middle years or secondary stream, as applicable. Secondary stream applicants are asked about the major and minor subject fields for which they are applying. Interview questions focus on a general understanding of teaching, teaching content and processes, personal and professional qualities, an understanding of diversity and inclusive practices, and communication skills.

c) Decision
The applicant’s file review and interview are equally weighted. Composite scores from the two parts of the application process form the basis for offers in each stream of the program, and within subject fields in the secondary stream.

6.1.2 Admission Timeline
Jan 24 Completed applications are submitted for the year in which admission is sought.
Feb 1-10 Applications are reviewed by Faculty of Education.
Feb 10-Mar 15 Selected applicants are invited for interviews by stream and by subject field throughout this period.
Feb 25-Mar 30 Letters are mailed to applicants either making an offer, placing individuals on a wait list, or expressing regret.

6.1.3 Elementary Education (P-8) Requirements
There are five requirements for entrance into the B.Ed. elementary stream.

Social Studies: Nine credits are required in social studies from any one or combination of the following disciplines: history (with a preference for local and Canadian history), geography, economics, political science, anthropology, sociology, law, classics, Acadian studies, African-Canadian studies, Mi’kmaq studies, and/or philosophy.

Mathematics: Six credits are required in the subject field of mathematics. Three of the six credits must include the investigation of fundamental concepts and ideas.

English or French: Six credits are required in the subject field of English, if the undergraduate degree was delivered in English. Six credits are required in the subject field of French, if the undergraduate degree was delivered in French. Applicants for the specialist program for teaching French are encouraged to have courses in oral and written communication; communication strategies (speaking, listening, reading, writing strategies); Acadian, Quebec and francophone culture courses; an introduction to French literature, which could include literature throughout the francophone world. In addition to this, elementary applicants are encouraged to have a course in children’s French literature taught in French.

Science: Six credits are required in science from any one or combination of: biology, chemistry, physics, geology/earth sciences, oceanography and environmental studies. Please note that a full laboratory component is recommended and is required for teacher certification in some Canadian provinces outside of Nova Scotia.

Developmental Psychology: Three or six credits are required.

A maximum of six credits of cognate courses may be recognized in fulfillment of the individual subject field requirements identified above.

Cognate coursework refers to coursework in which the content is consistent with the content in the discipline for which credit is being allocated, for example, classics as history, communications as English. Final decisions on cognates are determined by the Faculty of Education in consultation with the NS Department of Teacher Certification.

6.1.4 Secondary Education
Secondary education students must prepare to teach two subject fields normally taught in the public secondary schools of Nova Scotia (English, French, social studies, mathematics, science, physical education/health education, fine arts, Gaelic, family studies, Spanish). Information on subject fields and related disciplines:

English: Applicants are encouraged to have courses in Canadian, American, British (including Shakespeare), and post-colonial literature.
French: Applicants are encouraged to have courses in oral and written communication; communication strategies (speaking, listening, reading, writing strategies); Academic, Québécois, and francophone culture courses; and an introduction to French literature which could include literature throughout the francophone world.

Social Studies: Applicants must have a concentration in one of the following related disciplines: African-Canadian studies, classics, Academic studies, economics, geography, history, law, Mi'kmaq studies, political science, or sociology. Anthropology may be used for a minor subject field and as a major subject field only if the courses are cross-listed with sociology.

Mathematics: Applicants are encouraged to take courses in calculus, algebra, geometry, and statistics.

Science: Applicants must have a concentration in one of the following related disciplines: biology, chemistry, geology/earth sciences, environmental studies, oceanography, or physics.

Physical Education/Health Education: See section 6.2.

Gaelic: Applicants must have a concentration in one of the following related disciplines: Celtic studies, Scottish Gaelic, or Irish Gaelic.

Fine Arts: Applicants must have a concentration in one of the following related disciplines: art, drama, music or theatre studies.

Family Studies: Applicants must have a dual concentration which covers two of the three threads of the family studies program: food and nutrition; textile arts and family dynamics. Applicants' transcripts will be assessed individually for suitability for the family studies field, but generally, a concentration in human nutrition, family studies, sociology, psychology, and consumer education is recommended.

Spanish: Applicants must have a concentration in Spanish with an emphasis on oral and written communication.

Secondary Education Requirements

There are two requirements for entrance into the B.Ed. secondary stream.

a) Major Subject Field
A minimum of at least 30 credit hours of university coursework in one discipline of a subject field taught in Nova Scotia secondary schools. A maximum of 6 credit hours of cognate university coursework may be included in fulfillment of this requirement.

b) Minor Subject Field
A minimum of at least 18 credit hours of university coursework in one discipline of a second subject field taught in Nova Scotia secondary schools. A maximum of 6 credit hours of cognate university coursework may be included in fulfillment of this requirement.

Cognate coursework refers to coursework in which the content is consistent with the content in the discipline for which credit is being allocated, for example, classics as history, communications as English. Final decisions on cognates are made by the Faculty of Education in consultation with the NS Department of Education.

Spanish: Applicants must have a concentration in Spanish with an emphasis on oral and written communication.

Secondary Education Requirements

There are two requirements for entrance into the B.Ed. secondary stream.

a) Major Subject Field
A minimum of at least 30 credit hours of university coursework in one discipline of a subject field taught in Nova Scotia secondary schools. A maximum of 6 credit hours of cognate university coursework may be included in fulfillment of this requirement.

b) Minor Subject Field
A minimum of at least 18 credit hours of university coursework in one discipline of a second subject field taught in Nova Scotia secondary schools. A maximum of 6 credit hours of cognate university coursework may be included in fulfillment of this requirement.

Cognate coursework refers to coursework in which the content is consistent with the content in the discipline for which credit is being allocated, for example, classics as history, communications as English. Final decisions on cognates are made by the Faculty of Education in consultation with the NS Department of Education.

Spanish: Applicants must have a concentration in Spanish with an emphasis on oral and written communication.

6.2 BACHELOR OF EDUCATION PHYSICAL EDUCATION SPECIALIZATION

As a specialist discipline, physical education requires that prospective students normally meet recognized CCUPEKA standards. In addition to the general requirements for either the elementary or secondary stream, applicants must have a minimum of 30 credits in the major subject for their first degree in the related disciplines of physical education, human kinetics, or kinesiology, with at least half consisting of courses beyond the introductory level. In addition, students should present among their required courses the following:

a) Courses illustrating knowledge of disciplinary content, including but not limited to, human anatomy/physiology, motor learning and control, biomechanics, and psychology of physical activity.

b) Courses related to the curriculum of the provincial school system including basic movement, gymnastics, dance, and team/individual sports, recreation and leisure pursuits, outdoor pursuits, and exercise and health-related fitness.

c) Courses in health education and growth and development.

d) A course in special populations in physical education.

Consideration may be given to applicants with unique skill sets or experiences.

6.3 BACHELOR OF EDUCATION MI'KMAQ FOCUS

Applicants pursuing a Mi'kmaq focus in their B.Ed. may develop a concentration in language and/or culture. The language focus requires oral fluency in Mi'kmaq, and at least 18 credits in Mi'kmaq language-related courses in the first degree.

6.4 BACHELOR OF EDUCATION PROGRESSION REQUIREMENTS AND ACADEMIC PENALTIES

To qualify for the B.Ed. degree an average of at least 65 is required in all courses taken in the program. The pass mark in each course is 60.

Given the compressed time frame of the B.Ed. program, students will be reviewed at the end of each term. Students are expected to pass all of their academic courses and practicum each term.

a) Students who fail one academic course in one term will normally be placed on academic probation and may be withheld from practicum.

b) Students who fail more than one academic course in a term will normally be suspended.

c) Students who fail practicum (i.e. a student who receives two unsatisfactory reports in any single practicum term) will normally be suspended.

If a student is re-admitted to the program after the suspension period and fails one or more courses or receives two more unsatisfactory practicum reports in a single practicum term, the student will normally be dismissed from the program.

The procedure for appealing two unsatisfactory practicum reports is given in Section VI (G) of the Faculty of Education Field Experience Handbook.

The procedure for appealing an academic penalty is given in section 3.12. Students who successfully appeal will be permitted return to the B.Ed. program as soon as course availability permits. Consideration for alternative arrangements to complete coursework will be made at the discretion of the department chair. A student who is suspended from the B.Ed. program may re-apply after a period of one year. Other regulations in 3.11 may apply.

6.5 BACHELOR OF EDUCATION PROFESSIONAL CONDUCT

The Department of Teacher Education has adopted guidelines for the conduct of preservive teachers enrolled in the Bachelor of Education program. As students and aspiring teachers, all B.Ed. program members must adhere to the guidelines as outlined in the B.Ed. Handbook and the Nova Scotia Teachers' Union Code of Ethics.

In the event of unprofessional conduct of a Bachelor of Education student, a faculty advisor or faculty member is required to bring it to the immediate attention of the B.Ed. Chair. The B.Ed. Chair shall call a meeting of the B.Ed. Professional Committee which will examine the circumstances of the reported incident(s). Based on the advice of the committee, the B.Ed. Chair may recommend the imposition of penalties including probation and/or a letter a warning, or suspension from the B.Ed. program. In some cases, violation of professional conduct guidelines may result in the B.Ed. Chair recommending dismissal of the pre-service teacher to the Faculty of Education Committee on Studies.

6.6 BACHELOR OF EDUCATION CERTIFICATION

Candidates for a teacher's certificate may be asked to disclose disciplinary action at an educational institution or violations of the law which resulted in penalty.

Upon completion of the B.Ed. program, students are eligible to apply for the Teacher’s Certificate, ITC, awarded by the Nova Scotia Department of Education.

6.7 DIPLOMA IN ADULT EDUCATION

This program is offered in major centres across Canada throughout the year. The Diploma in Adult Education is a professional designation. The modules are arranged as a series, yet each is a complete unit of learning which may be taken independently of the others at the discretion of the program director. The modules cover knowledge and skills in the following areas and carry credit value as indicated:

<table>
<thead>
<tr>
<th>Credits</th>
<th>Module Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>311 - Assessing Training Needs</td>
<td>1</td>
</tr>
<tr>
<td>1</td>
<td>312 - Setting Learning Objectives</td>
<td>1</td>
</tr>
<tr>
<td>1</td>
<td>321 - Evaluation Strategies</td>
<td>1</td>
</tr>
<tr>
<td>2</td>
<td>322 - Designing Learning Activities</td>
<td>2</td>
</tr>
<tr>
<td>1</td>
<td>331 - Facilitating Learning</td>
<td>1</td>
</tr>
<tr>
<td>6</td>
<td>332 - Practicum</td>
<td>6</td>
</tr>
</tbody>
</table>
Upon completion of the first five modules, the Certificate in Adult Education is awarded. The Diploma in Adult Education is awarded upon completion of the six modules. Students may count, in multiples of three, up to 12 credits as electives in BA programs.

6.8 CERTIFICATE IN ELEMENTARY MATHEMATICS EDUCATION

This program has been developed in response to a need identified by the Nova Scotia Department of Education and school board partners. The Certificate in Elementary Mathematics Education is recognized for a licensing upgrade in Nova Scotia. The certificate consists of a sequence of ten courses focusing on content and pedagogy suitable for the elementary and middle years and is offered to cohorts of in-service teachers on a part-time basis.

6.9 CERTIFICATE IN OUTDOOR EDUCATION

This program is designed to fulfill a need identified by practitioners across the province in response to curriculum changes in the Physical Education curriculum in Nova Scotia. The Certificate in Outdoor Education is recognized for a licensing upgrade in Nova Scotia and consists of a sequence of eleven courses which focus on the skills and pedagogy required to offer outdoor pursuits to students of all ages in Nova Scotia schools. This certificate is offered to cohorts of in-service teachers on a part-time basis.

7. FACULTY OF SCIENCE REGULATIONS

7.1 General Regulations

7.1.1 Degrees Offered
7.1.2 Subjects Available
7.1.3 Degree Patterns
7.1.4 Declaration of Major, Advanced Major, or Honours
7.1.5 Advancement and Graduation
7.1.6 Requirements by Degree
7.1.7 Bachelor of Science with Joint Honours
7.1.8 Co-operative Education Program in Science

7.2 Engineering

7.2.1 Bachelor of Science with a Diploma in Engineering

7.3 Possible Pathways in the Sciences

7.3.1 Architectural Science
7.3.2 Pre-Medical Studies
7.3.3 Pre-Dental Studies
7.3.4 Pre-Veterinary Studies
7.3.5 Graduate Studies
7.3.6 Education and Teaching

7.1 GENERAL REGULATIONS

Each degree in the Faculty of Science requires 120 credits, with the exception of the B.Sc. Nursing degrees. The four-year B.Sc. in Nursing requires 126 credits; the accelerated option for post-degree students is 72 credits; and the option for RNs requires 63 credits. The Diploma in Engineering requires 72 credits.

Courses for each degree and diploma must follow the pattern required by the program chosen.

Students wishing to apply for an advanced major or honours program are advised to consult with the department chair as early as possible.

Re-entry to degree programs in the Faculty of Science will not be granted automatically to students who have been absent from the university for more than 10 years. In each science discipline, an entrance examination may be required to determine the extent to which credit will be awarded for courses completed previously.

7.1.1 Degrees and Diploma Offered

The Faculty of Science offers undergraduate degrees in the natural and applied sciences (biology, chemistry, computer science, earth sciences, environmental sciences, mathematics, physics, psychology) and in the health sciences (human kinetics, human nutrition, nursing) and the diploma in engineering.

Under the science heading there are several degree options:

- Bachelor of Science with Honours:
- Bachelor of Science with Joint Honours:
- Bachelor of Science with a Major in Aquatic Resources:

Under the mathematics heading there are three degrees, each with a choice of kinesiology or pre-education major:

- Bachelor of Science in Human Kinetics
- Bachelor of Science in Human Kinetics with Honours
- Bachelor of Science in Human Kinetics with Advanced Major

Under the nursing heading there are four degrees and two certificates:

- Bachelor of Science in Nursing:
- Bachelor of Science in Nursing with Honours
- Bachelor of Science in Nursing for Registered Nurses:

Under the engineering heading there is one diploma:

- Diploma in Engineering

The Diploma in Engineering can be completed concurrently with the Bachelor of Science degree; see section 7.2.1.

7.1.2 Subjects Available (see chart previous page)
The following chart lists the subjects available for study in the science degrees within the Faculty of Science, where each subject may be used within the degree pattern, and where two subjects may be combined in a joint advanced major or joint honours degree.

7.1.3 Degree Patterns (see chart below)
Listed in the chart on the next page are the degrees and the diploma in the Faculty of Science with the course patterns and credit requirements for each. In science, the acceptable arts subjects are anthropology, art, Canadian studies, Catholic studies, Celtic studies, classical studies, development studies, economics, English, French, German, history, music, philosophy, political science, psychology, religious studies, sociology, Spanish, and women’s and gender studies. Certain restrictions apply; see chart 4.1.2.

For definitions of the humanities and social sciences, see the glossary at the end of this calendar.

7.1.4 Declaration of Major, Advanced Major, or Honours
Students meet with faculty advisors in their major, advanced major, or honours departments to discuss future course selection. In the second year of study, a student applies for admission to the desired program by completing and submitting the appropriate application form, signed by the chair, to the dean’s office by March 31. Students are advised of acceptance to their programs in the summer following submission of the forms. The forms are available at http://sites.stfx.ca/dean_of_science/

7.1.5 Advancement and Graduation Requirements by Degree (see chart next page)
All students must fulfill the pattern and credit requirements as specified above and the course, seminar, research report, senior paper, or honors thesis requirements of the major, advanced major or honors department(s). For joint degrees, students submit only one research report, senior paper, or honors thesis.

Candidates who fail to meet the requirements for the degrees for which they have applied may be eligible for other degrees, provided those degree requirements are met. Exceptions to these requirements need the approval of the dean and the department chair.

Additional requirements are listed in the chart. The averages and grades specified are the minima required.

Note 1 Of science A, B and C, one must be mathematics/statistics/computer science, and six credits from this department must be calculus. In the B.Sc. Advanced Major in Science with Business, either science A or B must be mathematics/statistics/computer science, and must include six credits of calculus.

Note 2 With permission of the major department(s), courses from other science departments may be used to satisfy major, advanced major or honours requirements: up to 6 credits for the major; up to 12 credits for the advanced major, joint advanced major, or the advanced major with business; up to 18 credits for the honours; up to 12 credits for the joint honours.

Note 3 Students may use up to 30 credits of courses from professional programs (business administration, information systems, engineering, human kinetics, human nutrition, nursing) as open or approved electives.

Note 4 If science A is not mathematics/statistics/computer science, science B must be, and must include six credits of calculus. If science A is computer science, neither science B nor science C may be mathematics/statistics/computer science (and vice versa) because science A, B and C must each be from different departments.

Note 5 For students pursuing the human nutrition minor, there are 15 credits fewer of human kinetics electives and 15 credits of additional science requirements. See section 9.22.

Note 6 For students pursuing the secondary teaching stream option, a minimum of 24 credits must be in one of the subject fields taught in Nova Scotia schools. For those intending the elementary teaching stream, science A becomes 18 credits and the approved electives become 12 credits.

Note 7 The 12 credits art subject in all human nutrition programs must constitute a pair. See the glossary for definitions of pair, humanities and social sciences.

Note 8 Honours and advanced major options are not available in the post-degree B.Sc. Nursing program.
7.1.6 Bachelor of Science with Joint Advanced Major

It is possible to pursue an advanced major program which involves combined study of two science subjects; where Y = yes, possible:

7.1.8 Co-operative Education Program in Science

This optional academic program allows students the opportunity to gain 12 months of professional, paid work experience in a range of opportunities in industry, government and not-for-profit across Canada. Students obtain valuable technical and professional experience to reinforce classroom-based instruction. Students enrolled in biology, computer science, human nutrition, or mathematics are eligible to apply. See section 9.13 for further information.

7.2 ENGINEERING

The Bachelor of Engineering (B.Eng.) program in Nova Scotia is either a two-year diploma program at any of the associated universities followed by two years of study at Dalhousie University in Halifax, or a four-year program at Dalhousie University.

The SIFX Engineering Diploma consists of 72 credits normally taken over two academic years, 36 credits in each year. During the second term of the first year, students apply for conditional acceptance into one of the following engineering programs at Dalhousie University: chemical, civil, electrical, environmental, industrial, materials, mechanical, or mineral resource engineering. Conditional acceptance into a program allows the student to choose the appropriate courses to take in the second year of the diploma program at SIFX. The 72 credits required for the diploma must satisfy the requirements of one of the engineering programs listed in section 9.18. Any deviations must be approved in writing by the chair of the department and the Dean of Science.

Dalhousie and the associated universities form a unified system of engineering education. Therefore, all diploma graduates from the associated universities are guaranteed admission into the Faculty of Engineering at Dalhousie University. However, it is not possible for Dalhousie to guarantee that students will gain entry to the program of first choice, since all programs are subject to a maximum number of admissions. Thus in the second half of the first year, students are required to

**Note 1** To progress to third year, all first and second year courses must be successfully completed.
specify their choices of programs, in preferential order. The Dalhousie Faculty of Engineering notifies the chair of the SFXF department of engineering of conditional admission to specific programs. The notification is normally sent in June. Placement of students into programs is based on academic performance. SFXF, along with the other associated universities, has a formal Memorandum of Understanding (MOU) with Dalhousie University that addresses admissions. Article 4.0.1 of the MOU states that “The Faculty of Engineering at Dalhousie University will treat students from the Associated University programs on an equal basis with students who entered the program as freshmen at Dalhousie University. Academic merit will be the only deciding factor on admission to disciplines.” Students who do not gain entrance to their preferred programs or do not wish to continue their studies at Dalhousie University may apply to an engineering program at any other institution and transfer the credits earned.

Students who transfer to the SFXF diploma program from other universities must obtain at least 36 credits taken at SFXF in order to receive a diploma from SFXF. Students cannot use a distance or online course to satisfy the requirement.

7.2.1 Bachelor of Science with a Diploma in Engineering
Students who wish to earn the engineering diploma and a B.Sc. degree can do so concurrently. This option exists for a major in mathematics/statistics/computer science. Students interested in completing this combined program with another major should consult with the Dean of Science and appropriate department chair.

7.3 POSSIBLE PATHWAYS IN THE SCIENCES

7.3.1 Architectural Studies
In association with Dalhousie University, SFXF offers the first two years of a minimum of four calendar years of study leading to a Bachelor of Environmental Design Studies.

A student who has successfully completed two years in a BA, BBA, B.Sc. or engineering program may apply to enter the third year at Dalhousie University School of Architecture. Some mathematical facility is required and credit should be earned for at least six credits in statistics and/or calculus. For requirements, interested students are encouraged to contact the School of Architecture, Dalhousie University.

7.3.2 Pre-Medical Studies
Most Canadian medical schools require or recommend that applicants earn credit for general biology, general chemistry, organic chemistry, biochemistry, physics, introductory psychology and introductory sociology. They also require a superior academic record. It is possible to satisfy the entrance requirements while completing either a B.Sc. or a BA degree.

Dalhousie University Faculty of Medicine requires applicants to have a baccalaureate degree, or the equivalent of the three-year B.Sc. degree at Dalhousie University. Students are advised to take the courses listed above in order to do well on the Medical College Admissions Test (MCAT). Beyond these courses, their education should include broad study in the physical, life and social sciences and the humanities.

7.3.3 Pre-Dental Studies
Admission to the four-year Dalhousie Doctor of Dental Surgery program requires the completion of a minimum of 10 full-year academic classes at the undergraduate level. These classes will normally be completed by May 1 of the year of expected entry to the Faculty of Dentistry. Two one-term academic classes in the same discipline are considered equal to one full-year academic class.

Academic requirements:

a) One full-year academic class in each of biology, general chemistry, physics, organic chemistry. (Each of these courses must include laboratory instruction.) An approved one-term bio-organic chemistry course may be substituted for the full-year organic chemistry class.

b) Two full-year academic courses (or four one-term courses) chosen from the humanities and/or social sciences.

c) One full-year (or two one-term) writing course, English.

d) One full-year university course (or two one-term courses) in vertebrate physiology and one university course (full-year or one-term) in each of introductory biochemistry and introductory microbiology. These courses should be at the second-year level or higher and applicants are encouraged to contact the Faculty of Dentistry for approval of selected courses.

7.3.4 Pre-Veterinary Studies
The Atlantic Veterinary College is located at the University of Prince Edward Island. Applicants are required to complete prerequisite courses and supply official Graduate Record Examination – General (GRE) results. A total of 50 points (or 50%) of the applicant score will be based upon grades attained in the 20 required courses (15 specified and 5 electives with the highest grades). “Course” refers to a one-term, three-credit class. The 50 points will be determined as follows:

a) 30% or 15 points from the average of the four biological science prerequisite courses, including genetics, microbiology, and two animal biology electives;

b) 70% or 35 points from grades in the remaining 16 required courses as listed: two math courses (one being statistics), three chemistry courses (one being organic chemistry), one physics course, two English courses (one being composition), three humanities and/or social sciences, five electives in any area.

7.3.5 Graduate Studies
Students with an excellent academic record may be interested in moving on to a master’s degree. There are many graduate programs to choose from regionally, nationally, and internationally. Faculty are well poised to give advice on potential graduate schools and programs. Students who are interested in pursuing a master’s degree at SFXF should refer to chapter 8.

7.3.6 Education and Teaching
Students may be interested in moving into the field of education and becoming a teacher. SFXF offers a Bachelor of Education degree and students majoring in sciences may pursue teaching specializations in sciences, mathematics, physical education and family studies. Science students may also pursue additional teaching areas in departments in the arts. An option also exists for a degree in elementary education. See chapter 6 for additional information.

8. GRADUATE STUDIES

8.1 Master of Arts and Master of Science

8.2 Master of Adult Education

8.3 Master of Education

8.4 Ph.D. in Educational Studies

8.5 Regulations

Graduate Studies is under the direction of the Associate Vice-President Research and Graduate Studies who is advised by the committee on graduate studies.

Courses of study leading to the following graduate degrees are currently offered:

Master of Arts (MA)

Master of Science (M.Sc.)

Master of Adult Education (M.A.Ed.)

Master of Education (M.Ed.)

Ph.D. in Educational Studies

For fee information, see http://sites.stfx.ca/financial_services/StudentAccounts

8.1 MASTER OF ARTS AND MASTER OF SCIENCE

The MA program may be offered in Celtic studies, and M.Sc. degree programs may be offered in biology, chemistry, computer science, and Earth sciences.

8.1.1 Admission Requirements and Procedures

The MA program may be offered in Celtic studies; and M.Sc. degree programs may be offered in biology, chemistry, computer science, and Earth sciences.

Minimum admission requirements for these degree programs are:

a) A bachelor’s degree with the equivalent of an undergraduate major (36 credits) normally in the same field of study;

b) an overall average of 70 (B) or higher in the bachelor’s program.

Admission to these programs is based on the following factors:

a) The university must be able to provide a program of study and research that meets the expectations of the applicant as specified in the application for admission.

b) The candidate’s academic performance and references must indicate that s/he is able to complete the program of study and research prescribed in the degree program.

c) A faculty member must be available who is competent to supervise the program of study and the research prescribed for the degree.

Applications for admission should be sent to the university admissions office at least two months before the date of proposed registration. Applicants are encouraged to contact the chair of the department to which they are applying prior to submitting an
8.1.2 Program Requirements

Master of Arts
a) A minimum residence of 12 months for candidates with an honours degree, and a minimum residence of 18 months for other candidates.
b) Students must earn a total of 36 credits in graduate work; the thesis will count for 18 credits.
c) Candidates must satisfy degree requirements as determined by the candidate’s supervisory committee and approved by the department chair.
d) On the recommendation of the department chair, candidates may be required to demonstrate a reading knowledge of a second language relevant to your studies, and an examination in the designated language must be passed within six months after registration.

Master of Science
a) A minimum residence of 12 months for candidates with an honours degree, and a minimum residence of 18 months for other candidates.
b) Students must earn a total of 36 credits in graduate work; the thesis will count for 18 credits.
c) Candidates must satisfy degree requirements as determined by the candidate’s supervisory committee and approved by the department chair.

8.2 MASTER OF ADULT EDUCATION

The M.Ad.Ed. program is, with the exception of the foundations institute, a distance-learning program. This program provides an effective learning experience for professional adult educators. Candidates come from a wide variety of career areas such as literacy, health education, higher education, vocational education, human resources training and development, community development, and educational technology.

8.2.1 Admissions Procedures

For admission to the M.Ad.Ed. program, applicants must:

a) have completed an appropriate bachelor’s degree with an overall average of 70 (B) or higher; and
b) have post-baccalaureate experience in work relating to adult education.

Applications for admission should be sent to the university admissions office. This program has continuous intake; there is no admission deadline. Upon acceptance to the M.Ad.Ed. program, candidates are assigned to begin their studies in one of the foundations institutes which are held in the spring and summer.

8.2.2 Program Requirements

Students must earn a total of 36 credits in graduate work. Students may not use courses taken elsewhere toward the M.Ad.Ed. degree.

There are two routes by which a student may complete the requirements for the M.Ad.Ed.: a synthesizing examination route or a thesis route.

For successful completion of the degree, candidates must demonstrate a comprehensive knowledge of the area of study and an understanding of the principles and practices of adult education. To fulfill these requirements candidates must:

a) design a learning program that includes
   i) a learning plan;
   ii) a comprehensive annotated bibliography; and
   iii) a critical review of the literature;

b) conduct a professional development research project;

c) evaluate the program learning experience with reference to the learning plan;

d) complete, present, and defend a research project and synthesizing examination or complete and submit an academic thesis to demonstrate that the learning objectives of the program have been achieved.

All program requirements must be fulfilled, and the completed thesis must be submitted and approved, within five years of commencement of the program.

Exceptions to the five-year requirement may, upon recommendation of the department and the approval of the chair of the committee on graduate studies, be granted to a limited number of candidates who have demonstrated satisfactory academic progress and paid an extension fee equal to 6 credits tuition.

Students who have been unable to pursue their course of study for four months or more due to medical reasons and who have otherwise demonstrated satisfactory progress, may request a medical extension of up to one year. This request must be made in writing to the department chair, be accompanied by a physician’s statement, and receive approval of the department and of the chair of graduate studies. In such cases, no tuition or extension fee is required.

Graduating students should note that a final copy of the successful thesis must be approved and all grades submitted, no later than April 15 for Spring Convocation and November 15 for Fall Convocation.
Qualified applicants will only be admitted if a suitable supervisor and program can be provided. To achieve success in this doctoral program, applicants must demonstrate strong reading, writing and comprehension skills in the English language.

The application package is available from the doctoral program office in the faculty of education and online at the Inter-University Ph.D. website www.educationphd.ns.ca

a) Applicants apply for their institution of choice (Acadia, MSVU or StFX) through the doctoral program office by November 15 for July 1 entry;

b) The IDAC will review all applications and, by majority agreement, recommend acceptance of applicants to the participating institutions;

c) The StFX admissions office will inform the applicant, in writing after March 1, regarding the decision of the IDAC. StFX becomes the institution of record for all doctoral students formally admitted to StFX.

d) In addition to specific doctoral program requirements and regulations, StFX students are bound by the regulations and procedures pertaining to graduate studies at StFX.

e) Each dissertation supervisor will arrange for an entry meeting for his/her student(s) to develop a preliminary program plan and an initial outline of the proposed research area. This preliminary plan will be submitted in writing to the IDAC for approval (within a time frame specified by the IDAC), through the Doctoral Program Co-ordinator. Normally, this plan is completed before the July 1 start date.

8.4.2 Program Requirements

Students must complete EDUC 9001-9005 and 9010 during four consecutive semesters (14-month residency). Students normally defend their dissertation within two years after the portfolio examination, but no later than six years after entering the doctoral program, unless an extension has been granted. Students must register in a minimum of one course per year. Active students in the program are considered full-time throughout the program.

Students enrol in EDUC 9001 and 9002 on site in July at one of the three universities. The site for these two courses will rotate amongst the three universities from year-to-year. Students complete EDUC 9010 and 9100 with their dissertation advisor and their committee at their home institution of record. The remaining courses are delivered using an e-learning platform. In some instances, doctoral students may arrange to enrol in an existing topic-related Master level course, augmented with doctoral level analysis and applications. Doctoral students have the right to take courses and seminars and use the academic facilities of any of the three participating universities in accordance with their approved plan of study.

The required courses are: 9001; 9002; 9003; 9004, 9005; 9010, and 9100. At the time of admission, students will be advised if they are required, and they may choose, to complete (in consultation with pro-tern advisor and with approval from IDAC): EDUC 9006, 9007, 9008, and 9009. See section 9.17.3 for course information.

8.5 REGULATIONS

Students are expected to be familiar with all university and department regulations. See chapter 3 and the relevant department in chapter 9.

8.5.1 Full-time and Part-time Studies

a) Full-time Study

The university may admit suitable candidates for full-time study during the regular academic year in the MA, M.Ed., and M.Sc. programs.

Full-time students register for a minimum of 18 credits and a maximum of 24 graduate credits during the academic year, including thesis credits. For purposes of classification as full-time, candidates for graduate degrees may take up to 12 undergraduate credits, to a combined total of 30 credits. However, undergraduate credits thus included will not count for graduate credit.

Full-time students must complete the program, including thesis, so that the thesis is completed within two years of the date of initial registration for students possessing an honours degree. An extension for a third year of study may be obtained as outlined below.

b) Part-time Study

The university may admit suitable candidates for part-time study for the MA, M.Ed. and M.Sc. programs.

Part-time students may register for only six graduate credits during any term or summer session and must complete the program so that the degree is awarded within six years of initial registration.

c) Combined Full-time and Part-time Study

Master’s candidates who elect to complete their program by a combination of full-time and part-time study are governed by the following elapsed-time limitations: five calendar years if the candidate is registered as a full-time student for two or three terms and part-time for the balance; four calendar years if the candidate is registered for four or five terms as a full-time student and part-time for the balance.

8.5.2 Non-degree graduate level students

Students without previous admission to a degree program may be permitted to register in graduate courses offered in the MA, M.Sc. and M.Ed. programs provided they meet the program’s admission requirements and obtain the approval of the instructor and department chair and notification of the chair of the committee on graduate studies.

A student who has registered in courses in compliance with the previous paragraph, and who is later admitted to a degree program without condition, may, upon recommendation of the department chair, be granted advanced standing to a maximum of 6 credits provided they are acceptable as part of the program in which the student is enrolled.

8.5.3 Transfer Credit

New applicants may request permission to transfer credits (a maximum of six credits) to the MA, M.Sc. or M.Ed. program prior to acceptance.

8.5.4 Letter of Permission

Once registered in the MA, M.Sc. or M.Ed. program, a student may request a letter of permission from the relevant department chair and dean to complete a maximum of six credits from another university. These credits can be used to fulfill program requirements.

8.5.5 Visiting Students

Normally, only students who have been accepted into the StFX M.Ed. program are eligible to enrol in M.Ed. courses offered by the university. Graduate students in good standing in M.Ed. programs at other universities may also apply to take up to 6 credits of M.Ed. courses at StFX. Such students are encouraged to contact the continuing and distance education office to determine course availability and eligibility. Students should apply for admission as non-degree students with a letter of permission from their home institution.

8.5.6 English Language Requirement

See section 1.6.

8.5.7 Academic Standing

To maintain in satisfactory standing, students must achieve a passing grade of 60 in each course and must maintain an average of 70 throughout the program. Students who fail any course or do not maintain the required average will be placed on academic probation. A student who subsequently fails a second course or does not achieve a program average of 70 will be dismissed. Evaluation of in-progress thesis work is normally carried out through the annual review process. A student whose thesis progress is rated as ‘not acceptable’ following the annual review may be subject to dismissal. A student may elect to appeal a dismissal following the process outlined in Section 3.12 of the Academic Calendar.

If a student believes that the work is not proceeding satisfactorily for reasons outside of his/her control, the student may make representation to his/her supervisory committee, the department chair, the dean, and if the matter remains unresolved, to the chair of the committee on graduate studies.

8.5.8 Thesis Regulations

Master of Adult Education

Students choosing to follow the thesis route are required to prepare a thesis based on original research under the guidance of the chair or faculty advisor. Theses are evaluated by two faculty members of the Department of Adult Education, and an external examiner. A final corrected copy of the successful thesis must be submitted to the chair of the committee on graduate studies for approval at least two weeks prior to the date of the convocation at which the candidate expects to graduate. The final copy of any thesis based on a research project requiring ethical approval must include a copy of the appropriate certificate of approval. Students are responsible for providing copies of the approved thesis so that they may be deposited with the StFX university library, the department thesis collection, and the National Library of Canada, and for paying the appropriate thesis fee.

Master of Arts, Master of Science

Upon admission to, or registration in, a thesis program, and after consultation with the candidate and with department faculty members, each candidate will be assigned a thesis Supervisory Committee by the Department Chair. This Committee will include the candidate’s thesis advisor and at least one other faculty member, normally chosen from the Department.

Candidates must make a formal presentation of the thesis proposal. The formal presentation is normally made to the faculty of the department for which the thesis
is being written, and it is open to members of the Committee on Graduate Studies, other interested faculty members, and graduate students. The Department Chair (and/or the candidate’s thesis supervisor) will ensure that at least two weeks’ notice is given of the date, time, and place of the presentation of the thesis proposal.

After presentation of the proposal, after obtaining the approval of the appropriate ethics committee(s), and on the recommendation of the candidate’s thesis supervisory committee, and the Department Chair or Director of the School, the candidate will be permitted to register in the thesis.

When completed, the thesis is submitted to the Chair of the candidate’s supervisory committee for approval. The thesis is read by at least one other faculty member designated by the Department Chair. The thesis is also read by an external examiner chosen by the Department Chair after consultation with the candidate’s Supervisory Committee. The external examiner is a faculty member external to the candidate’s Department and may be, as appropriate, external to the University. After consultation with the candidate’s Supervisory Committee, the Department Chair will appoint a thesis examination committee consisting of the external examiner, the candidate’s thesis advisor, and at least one (but no more than three) other members of the Department. (Members of the Supervisory Committee may serve as members of the Examining Committee.) The Chair of Graduate Studies or her/his designate will be a non-voting member of this Committee ex-officio.

The external examiner must submit a report on the thesis to the Chair of the Supervisory Committee and to the Chair of the Committee on Graduate Studies. A public presentation and defence of the thesis is presented by the candidate after reading of the external examiner’s report and following the approval of the supervisory committee. Normally, at least two weeks’ notice is given (to the Chair of Graduate Studies) concerning the date, time, and place of the presentation and defence. Immediately following the public presentation, an examination of the candidate is held. Normally, the public presentation and examination will not exceed 120 minutes.

The examining committee will then, in camera, arrive at a unanimous decision, agree on any changes to be made to the thesis, determine who will be responsible for ensuring that these changes are made, and consider whether the student is to be nominated for an Outstanding Graduate Student Research Award. Should the committee not be able to arrive at a decision on the disposition of the thesis, the matter will be referred to the committee on graduate studies.

The decision of the examining committee, along with its names and signatures, will be recorded on the thesis examination form, with a copy retained by the department and a second copy sent to the Chair of Graduate Studies.

A final corrected copy of the successful thesis must be submitted to the Chair of the Committee on Graduate Studies for approval at least two weeks prior to the date of the convocation at which the candidate expects to graduate. Students are responsible for a) providing copies of the approved thesis; b) for ensuring that they are deposited with the University Library and the National Library of Canada; and c) for completing and submitting the required ‘non-exclusive use’ form, and for paying the appropriate thesis fee.

8.5.9 Research Ethics Approval
Research undertaken towards a thesis or research project involving human subjects normally requires approval by the university research ethics board (REB); see section 3.24. Before such a research project is initiated and before registration in the thesis is permitted, students must obtain REB approval, or must provide a letter signed by their research supervisor and by the chair of the REB, stating that the project does not require REB approval.

Research undertaken towards a thesis or research project involving animal use or testing normally requires review and approval by the StFX animal care committee.

8.5.10 Continuation Status and Fees
After 2 years of study, students in the MA, M.Sc. and M.Ad.Ed. are part-time continuing students, and PhD students are full-time continuing students.

Continuing students pay a continuation fee each year until they have completed their degree requirements or until they reach the maximum time to completion for their program. MA, M.Sc., and M.Ad.Ed students are registered as continuing students until they have reached the maximum time to completion, which is 5 years from the commencement of the program.

The continuation fee amount for 2015-2016 for graduate-level students is:

<table>

The Coady International Institute represents StFX’s commitment to social justice in action. Founded in 1959 and named for one of Canada’s great heroes, Rev. Dr. Moses Coady, the Institute has been educating development professionals from around the world for 55 years. Today, the Coady has an extensive network with thousands of graduates and global partners working in more than 130 countries, helping millions of people in the world’s poorest neighbourhoods to build better lives for themselves.

The Institute offers its flagship 20-week Diploma in Development Leadership program and specialized certificate courses that are based on three themes: strengthening local economies; building resilient communities; and promoting accountable democracies. There is also special emphasis placed on leadership programs for women and youth. The Skills for Social Change certificate attracts young people from North America who are passionate about community-driven social change.

The International Centre for Women’s Leadership in Coady Institute oversees five specialized programs: the Global Change Leaders program; the Indigenous Women in Community Leadership program for Indigenous women in Canada, the Community Development Leadership by Women certificate, the Canadian Women’s Foundation Leadership Initiative for Canadian women working in the non-profit community economic development sector; the African Women’s Leadership and Mentoring Initiative offered for participants from five African countries.

The Coady Institute and the Department of Adult Education also jointly offer a community development stream in the existing Master of Adult Education program. Coady staff members collaborate with the Faculty of Arts to offer the undergraduate program in development studies. As of 2014, graduates of the Coady diploma program will be eligible for up to 12 credits toward elective courses in a StFX undergraduate degree program.

The international development professionals who study at the Coady Institute add much to the multicultural atmosphere at StFX and provide a rich resource for students interested in international issues. StFX students are welcome to join the CoadyFX Student Society and Xtending Hope Student Society, and to use the Institute’s Marie Michael Library, which houses a specialized collection on international development.
8.5.11 Extensions
An extension to the time limit of up to one year beyond that indicated above may, upon recommendation of the department and subsequent approval of the Chair of the committee on graduate studies, be granted to candidates who have demonstrated satisfactory academic progress and paid an extension fee. Requests for extensions beyond one year are normally not considered, these will only be granted with the approval of the graduate studies committee.

8.5.12 Leaves of Absence
Upon recommendation of her/his Department and the approval of the Chair of the Committee on Graduate Studies, a student may request a leave of absence from a program (e.g., for medical or family reasons). The period of this leave of absence will not count towards the time limit in the program. If a leave is granted, students must pay an associated fee.

8.5.13 Graduation
Students are responsible for ensuring that they have registered for convocation by the required date and that they have fulfilled all degree and program requirements by the requisite deadlines.

8.5.14 Outstanding Graduate Student Research Award
Students who have completed their degree with a master’s thesis of outstanding quality may be considered for an outstanding graduate student research award.

9. DEPARTMENT AND PROGRAMS

9.1 Adult Education
9.2 Anthropology
9.3 Aquatic Resources
9.4 Art
9.5 Biology
9.6 Business Administration
9.7 Canadian Studies
9.8 Catholic Studies
9.9 Celtic Studies
9.10 Chemistry
9.11 Classical Studies
9.12 Computer Science
9.13 Co-operative Education

9.28 Music
9.29 Nursing
9.30 Philosophy
9.31 Physics
9.32 Political Science
9.33 Psychology
9.34 Religious Studies
9.35 Sociology
9.36 Women and Gender Studies

 Unless otherwise noted, all courses meet for three hours of lecture each week. Laboratories are normally three hours each week. Six-credit courses normally meet for a full year, three-credit courses for one term (a half year). In addition to the courses listed, students may request a directed study course as described in section 3.5. Refer to the current timetable listing for course offering, as not all courses listed in the StFX Academic Calendar will be offered every year. Certain advanced-level courses are not offered every year. Others are offered on an alternating basis, as noted in course descriptions. See glossary for degree and subject abbreviations.

9.1 ADULT EDUCATION
M. Coady, Ph.D.
L. English, Ph.D.
E. Lange, Ph.D.
C. Roy, Ph.D.

Adjunct Professors
J. Merrifield, Ph.D.
A. Quigley, Ph.D.

StFX offers both a master’s degree in adult education (M.Ad.Ed.) and a diploma in adult education (see section 6.7 for Diploma in Adult Education)

Graduate Program
The admission procedures and requirements for the M.Ad.Ed. degree are in chapter 8. Students have five years to complete 36 credits. Further details can be found on the department’s web page: www.mystfx.ca/academic/adased/ or in to section 8.2.

Foundations Institute
This is an intensive three-week residential session during which students become familiar with the foundations of, and requirements for, the master’s program.

Master of Adult Education Courses

500 Learning Plan and Annotated Bibliography
Development and submission of a learning plan including: a learning narrative, learning goal statement, research project proposal, and learning contract with learning intents. Second, development and submission of an annotated bibliography demonstrating critical reading of a broad range of foundational literature, as well as literature in the chosen area and aspect of study as seen in the learning plan. Six credits.

510 Professional Portfolio and Literature Review
Development and submission of a professional portfolio consisting of learning experiences, accomplishments, and demonstrated professional competencies, supported by documentation. Second, development and submission of a critical review of the literature in the field with an emphasis on the area and aspect of study as seen in the learning plan. Six credits.

520 Practical Research Project
Developing a practical research project to achieve learning intents. This project is typically completed in the student’s place of practice and typically requires approval of the StFX Research Ethics Board. At the end of this phase, the student submits a project report that includes a detailed description of the learning intents, project design, means of implementation, and evaluation of the project. Twelve credits.

530 Learning Program Evaluation
This phase includes a report on the student’s personal and professional learning with reference to the learning plan developed in ADED 500. This reflective report evaluates knowledge gained and changes in practice, and is accompanied by a narrative. Six credits.

Alternate Routes to Graduation
There are two routes by which a student may complete the requirements for the M.Ad.Ed.
1) complete and submit an academic thesis (ADED 600) or
2) complete, present, and defend a project and synthesizing examination which demonstrates that the learning objectives of the program have been achieved (ADED 601).

600 Thesis
The thesis is a scholarly contribution to the field of adult education. Upon completion of the preceding phases of the program, students draft an outline and write a thesis in consultation with their faculty advisor. The thesis provides an opportunity for students to analyze and reflect on their professional project, in light of the relevant adult education literature. The completed thesis is submitted to an external examiner and to the committee on graduate studies for approval. Credit will be granted for only one of ADED 600 or ADED 601. Six credits.

601 Synthesizing Examination
The synthesizing examination is the alternative route to complete the M.Ad.Ed. It follows satisfactory completion of the preceding phases of the program. The synthesizing examination is intended to provide an opportunity for students to reflect on their professional project and bring the relevant literature and student’s research project together with the particular reference to practice. The synthesizing examination will be attended by two faculty members of the adult education department. Credit will be granted for only one of ADED 601 or ADED 600. Six credits.
9.2 ANTHROPOLOGY
C. Fawcett, Ph.D.
M. Haller, Ph.D.
L.J. McMillan, Ph.D.
S. Vincent, Ph.D.

Anthropology is the holistic study of human culture and biology in the past and present. Anthropologists teach about human evolution and global archaeology as well as contemporary cultures around the world. The Department of Anthropology offers honours, advanced major or major degrees. Students may select courses to meet their own interests in a general anthropology core area, or may choose to follow suggested patterns in the following core areas: Archaeology, the Anthropology of Development or Indigenous Peoples. These streams are described on the Department of Anthropology’s website. Students not pursuing degrees in anthropology may take a minor, a pair or electives. For general program regulations, see section 4.1.

Minor and Subsidiary
Requirements include 24 credits as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Prerequisite</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH 111 and 112 (6 credits);</td>
<td></td>
<td></td>

Social Justice Colloquium
The Social Justice Colloquium is a first-year option for Bachelor of Arts students. Participants are enrolled in dedicated sections of anthropology, global history and women’s and gender studies. See section 4.5 for further information.

111 Introduction to Physical Anthropology/Archaeology
Archaeology and physical anthropology provide a unique opportunity to examine the development of human society. With their long temporal depth, we can examine how humans, and their ancestors, evolved and populated the entire globe. The nature of modern archaeological and physical anthropological research including topics of hominid evolution, primatology, genetic research, origins of agriculture and civilization and First Nations archaeology will be discussed. Students will have an opportunity to apply this knowledge using real research data. Credit will be granted for only one of ANTH 111 or ANTH 110. Three credits. Offered every year.

112 Introduction to Socio-cultural Anthropology
Socio-cultural anthropology involves the comparative study of societies throughout the world. Students will learn how societies differ from each other, as well as observing similarities among them. The course surveys traditional ways of understanding cultures while incorporating current insights and research. Topics include diverse political and economic systems, kinship patterns, religion, forms of ethnic and gender identity, health and medicine, development and migration. Department foci relating to First Nations, development and general anthropology are introduced. Credit will be granted for only one of ANTH 112 or ANTH 110. Three credits. Offered every year.

218 Anthropology of Health and Illness
An examination of global health and illness from an anthropological perspective, this course applies key anthropological concepts to topics such as the meaning of health and illness cross-culturally, cultural construction of the body, medical pluralism, cross-cultural psychiatry, critical medical anthropology and the health of Indigenous peoples in Canada and other parts of the world. Prerequisite: ANTH 110 or ANTH 111/112 or permission of the instructor. Three credits. Offered every year.

223 Anthropology of Globalization
Globalization has affected more than the world economy; people, politics and culture all travel globally, with wide-ranging consequences. This course will examine the history of global processes by focusing on how different peoples around the world have engaged in or resisted them. Ethnographic studies will be used to explore global diversity as well as the effects of efforts to impose global uniformity. Cross-listed as DEV 223. Prerequisite: ANTH 110 or 111/112, or DEV 201, 202 or permission of the instructor. Three credits. Offered 2015-2016 and in alternate years.

233 Ethnographic Studies
This course explores the rich cultural diversity of human societies around the globe through an ethnographic lens. Using a variety of ethnographic works, students will analyse how anthropologists have represented this diversity. Course material will include classic and current texts about ‘other’ and ‘own’ societies, the representation of Indigenous peoples, ethnographic film, as well as portrayals of culture in new media. Prerequisite: ANTH 110 or 111/112 or permission of the instructor. Three credits. Offered in alternate years; next offered 2016-2017.

234 Introduction to Indigenous Anthropology
The diversity and complexity of contemporary cultural, political and legal Indigenous issues are explored using anthropological methods and theories. Beginning with the historical antecedents of colonial relations and leading to contemporary ethnography, this course assesses the impacts of state policies and legislation on Indigenous treaty rights and the roles and livelihoods today. Students will study the engaged anthropology and the relationships between the State and Indigenous peoples in areas of Indigenous rights, culture, law, governance, politics, environment, media, social development, gender, and health, and examine potential pathways and strategies toward reconciliation and equity. Credit will be granted for only one of ANTH 234 or ANTH 331. Prerequisite: ANTH 110 or 111/112 or permission of the instructor. Three credits. Offered 2015-2016.

243 Principles of Archaeology & Prehistoric Societies
This course offers an examination of modern archaeological research including how archaeologists work in the field, their analytical techniques, and some of the principal methodological and theoretical issues facing the field. A wide variety of archaeological examples (from lavish Egyptian tombs to simple nomadic settlements) will be used to illustrate the main themes of the course. Students will participate in the process of archaeological research through a series of practical exercises and assignments. Prerequisite: ANTH 110 or 111/112. Three credits. Offered 2015-2016 and in alternate years.

253 Origins of Cities
Urban living is an increasingly common experience for humans across the globe. City life, however, is not a modern phenomenon. This course is a broad introduction to the process of urbanism and the rise of early pre-industrial cities in both the New and Old Worlds. Specific cases are examined in order to elucidate the varying roles cities played in ancient civilizations and how knowledge of these roles can aid in our current understanding of modern urban life. Prerequisite: ANTH 110 or 111/112. Three credits. Offered in alternate years; next offered 2016-2017.

303 Anthropological Theory
This course will give students an understanding of past and present trends in anthropological theory. Students will learn about the purpose of theory and the main elements of major theoretical frameworks. There will be an emphasis on how to apply theory to anthropological material. Prerequisites: ANTH 110 or ANTH 111/112 and at least 6 ANTH credits at the 200 level. Three credits. Offered every year.

304 Principles and Methods of Fieldwork
This course introduces students to qualitative field methods used by anthropologists and social scientists. Through lectures, seminars and field assignments, students will participate in a variety of research techniques including digital data gathering, video ethnography, participant observation, archival searches, oral and life histories, interviewing, sampling, mapping and focus group strategies. In addition to practical application of these skills, students will learn about Indigenous research methods, and collaborative and ethical research design. Prerequisite: ANTH 110 or ANTH 111/112. Three credits. Offered 2015-2016 and in alternate years.

305 Anthropological Data Analysis
This course introduces students to the basic principles of statistics and quantitative analysis of anthropological data. Through lectures, seminars and lab assignments students will learn skills such as quantitative research design and methods, data analysis, and computer applications in anthropological research. Prerequisite: ANTH 110 or ANTH 111/112. Three credits. Offered in alternate years; next offered 2016-2017.

310 Anthropology of Tourism
Tourism is an important industry as well as a source of identity and meaning for individuals, local groups, and nations. This course examines tourism using a
variety of theoretical frameworks. Students analyse various forms of tourism, such as historical tourism, cultural heritage tourism, eco-tourism, ethnic tourism and development tourism. Attention is given to gender, ethnicity, nationalism, class, environmental and economic impact, and the political importance of tourism in a globalizing world. Prerequisite: ANTH 110 or ANTH 111/112. Three credits. Offered every year.

320 Anthropology of Development
This course explores how development policy and practice have affected the people it aims to help. Students will develop critical analytical skills by using case studies to examine the strengths and weaknesses of such strategies as those promoting popular participation, gender equality, small-scale business, local knowledge and democratic reform. The material includes anthropological analyses of development institutions. Cross-listed as DEV 321. Prerequisites: ANTH 110 or ANTH 111/112 or DEV 201, 202, ANTH 223 is recommended. Three credits. Offered every year.

324 Anthropology of Gender
From a cross-cultural perspective and using examples from physical anthropology, archaeology, linguistic anthropology and socio-cultural anthropology, students will explore various questions such as: Can the differences observed between men and women best be explained by biology or culture? What factors explain the subordination of women found in many societies around the world? How do political, economic and symbolic powers acquired and used by men and women in cultural contexts around the world? Cross-listed as WMGS 324. Prerequisite: ANTH 110 or ANTH 111/112 or WMGS 100 or 200 or permission of the instructor. Three credits. Offered 2015-2016 and in alternate years.

326 Issues in the Anthropology of Kinship
This course explores current themes and debates about the constitution of families cross culturally. It will examine topics such as: cultural understandings of kinship; historical transformations of kinship systems; current reconfigurations of marriage; partnering strategies; new reproductives technologies; transnational adoption; intra-familial conflict; the role of kinship for individuals and in societies; and the influence of the state on kin patterns. Course material will include ethnographic examples from around the world. Cross-listed as WMGS 326. Prerequisite: ANTH 110 or ANTH 111/112, or WMGS 100 or 200 or permission of the instructor. Three credits. Offered in alternate years; next offered 2016-2017.

332 Mi’kmaq Studies: Advanced Critical Issues in Indigenous Anthropology
Using theories and methods relevant to researching Indigenous knowledge, self-determination, strategies of resistance and cultural sustainability of the Mi’kmaw Nation of Atlantic Canada, in the first section we explore Mi’kmaw oral histories, cosmology and sociocultural organization. In the second section we look at the impact of colonization on Mi’kmaw cultural practices and governance. In the third section we look at contemporary issues such as the impact of court decisions on treaty implementation, customary law, economic development, resource use and cultural production. Prerequisites: ANTH 110 or ANTH 111/112, or WMGS 100 or 200 or permission of the instructor. Three credits. Offered in alternate years; next offered 2016-2017.

341 North American Archaeology
This course explores past and present Indigenous societies from North America and examines how these societies emerged, developed and were radically transformed by European colonization. Students will discover that even through great spans of time separate modern and ancient Indigenous cultures, cultural continuity exists. Prerequisite: ANTH 243 or 253. Three credits. Offered in alternate years; next offered 2016-2017.

342 Ancient Mesoamerica
This course will use archaeological and ethnohistorical information to examine the people who lived in Mesoamerica (currently, Mexico, Belize, Honduras and Guatemala) prior to and at the time of early contact with Europeans. Students will use archaeological data to study the Aztecs, Maya and Zapotecs and their predecessors. Students will also refine their knowledge of archaeological inquiry and methods. Prerequisite: ANTH 243 or 253. Three credits. Offered in alternate years; next offered 2016-2017.

356 Current Issues in Biblical Archaeology
Cross-listed as RELS 355; see RELS 355. Three credits.

371 Archaeological Field Methods
This course teaches students the basic archaeological field methods of site survey and excavation through participation in an actual archaeological field project either locally or in another part of Canada or abroad. The course will examine a range of archaeological techniques and methodological approaches. It will also introduce students to the ethical issues they need to consider when conducting archaeological field research in Canada and abroad. Prerequisite: ANTH 243 or permission of the instructor. Three credits. Not offered 2015-2016.

372 Archaeological Laboratory Methods
This course teaches students methods of analysing, cataloguing and reporting on materials recovered from archaeological site survey and/or excavation. Students will learn how to disseminate information to professional and public audiences. Prerequisite: ANTH 371 or permission of the instructor. Three credits. Not offered 2015-2016.

400 Honours Thesis Research
A required course for all senior honours students. Six credits.

415 Anthropology of HIV/AIDS
This course examines global HIV/AIDS from an anthropological perspective. Using a holistic and cross-cultural approach, students will think about how kinship systems, gender, class, sexual orientation, nationality, ethnicity and global economic and political structures affect how individuals in different populations learn about and give meaning to HIV/AIDS, the risks they face, and the degree to which they can protect themselves and receive treatment if infected. Prerequisite: ANTH 211 or 218 or DEV 201 and 202 or permission of the instructor. Three credits. Offered in alternate years; next offered 2016-2017.

425 Power and Change
Power and change can be volatile processes. This course allows students to understand and analyse them from an anthropological point of view. Topics may include topics as the tension between indigenous collective rights and individual human rights; the tortuous local politics of constructing identity; the effects of and reactions to globalization; the cultural causes and consequences of terror and war. Prerequisite: 12 credits ANTH or permission of instructor. Three credits. Offered 2015-2016 and in alternate years.

435 Advanced Indigenous Issues
A course for senior students wanting to use Indigenous research methods and theories to engage anthropologically with specific issues of concern to Indigenous peoples. Topics may include in-depth analyses of Indigenous legal traditions, treaty and Aboriginal rights, politics and governance, natural resource management, cultural production and sustainability, decolonization and reconciliation. Prerequisite: ANTH 243 or 331 or permission of the instructor. Three credits. Offered in alternate years; next offered 2016-2017.

445 Advanced Archaeological Seminar
This course will examine various topics of interest to archaeologists. Students may learn about topics such as zooarchaeology, human osteology, regional settlement patterns and GIS, archaeological theory, chiefdoms, archaeology and society, archaeology and Canada’s First Nations or Roman archaeology. Prerequisite: ANTH 341 or 342. Three credits. Offered 2015-2016 and in alternate years.

492 Selected Topics in Anthropology
The topic for 2015-2016 is Evolution of Food. This course investigates key issues in anthropology on the subjects of food and culture. We will begin by looking at the evolution of human subsistence practices — from simple nomadic hunter-gatherer bands to increasingly complex and sedentary food-producing societies. We will then examine the impact of agricultural industrialization on human populations, and consequences for social, political and economic structures in different regions of the world. Our discussions will include research on: a diverse range of cultures and peoples; dietary choices and human health; cultural prohibitions and culinary preferences; globalization, commoditization and unequal access to food resources; sustainable agricultural practices, biodiversity and food security. Prerequisites: ANTH 110 or ANTH 111 and 6 credits of ANTH courses at 200 level, or permission of the instructor. Three credits.

499 Directed Study
Under the direction of a professor, students will work in an area of anthropology not available in other course offerings. Interested students must consult with a faculty member or with the program co-ordinator. See section 3.5. Three or six credits.
9.3 AQUATIC RESOURCES, INTERDISCIPLINARY STUDIES IN

J. Williams, Ph.D., ISAR Co-ordinator
L. Patterson, M.Sc., ISAR Program Assistant

Advising Faculty

J. Harling Stalker, Ph.D.
L. Patterson, M.Sc.
L. Robertson, Ph.D.
M. Walker, Ph.D.

Department

Biology
Ecology
Environmental Science

ISAR students interested in completing an advanced major or honours degree in aquatic resources can examine our changing world in terms of climate change, environmental management, freshwater policy, aboriginal use, erosion and flood events, adaptation of fisheries, cultural perceptions and ancient use, economic valuation, to name but a few.

Interdisciplinary Studies in Aquatic Resources (ISAR), a four-year program (comprised of 120 credits) leading to a BA or a B.Sc. degree, offers an integrated approach to the understanding, use and sustained management of aquatic resources as both natural and social systems. aquatic ecosystems include groundwater, watersheds, wetlands, lakes, rivers, oceans, etc.

ISAR prepares students for careers in natural resource management, government or private sector research and/or policy development, consultancy services, community development, and private enterprise. Depending on their program of study, students will also be positioned favourably for graduate or professional study in such areas as environmental law, public policy and administration, marine biology, oceanography, environmental sciences, human ecology, fisheries science and/or management, geographic information systems, conservation, and social science research.

All students complete a major in aquatic resources, and a major in one of: biology; economics; earth sciences; mathematics, statistics, and computer science; or public policy and social research (political science; sociology and/or anthropology). ISAR students complete a mandatory work term (AQVA 400) and participate in the senior seminar (AQVA 450).

Students may enter the ISAR program in their 1st or 2nd year of study at StFX. Students entering the program in 2nd year will complete AQA 100 and AQA 200 simultaneously.

ISAR students interested in completing an advanced major or honours degree in their second major field of study: anthropology; biology; ecology; economics; earth sciences; mathematics/statistics/computer science; political science; sociology; must satisfy the requirements outlined in chapters 4, 5 or 7.

Major Program

Major candidates are required to complete:

a) a core ISAR major program of AQA 100, 200, 325, and 400, 450; ESCI 171; BIOL 112; ECON 101, 102; plus BSAD 101;

b) 36 credits in the second major discipline, or 48 credits for public policy and social research majors, including at least 18 credits of AR-designated courses from that discipline;

c) at least 12 credits of AR-designated courses in at least two of the participating academic departments other than the major.

Candidates must also satisfy the requirements outlined in chapters 4, 5 or 7.

Progression Requirements

Students must achieve a minimum grade of 65 in AQA 100, plus a minimum average of 65 in the first-year AQA core courses (AQA 100, BIOL 112, ECON 101 & 102, and ESCI 171) in order to maintain their ISAR major and proceed to the second year of study in the program.

Students are encouraged to meet regularly with the co-ordinator or program assistant to discuss their academic progress, work term opportunities and career aspirations.

BA Major in Economics and Major in Aquatic Resources

Year 1
AQA 100; BIOL 112; ECON 101, 102; ESCI 171; ANTH 111/112 or PSCI 100; 6 credits arts/science electives at the 100-level.

Years 2 and 3
AQA 200, 325 and preparation for AQA 400; BSAD 101; ECON required and/or elective courses; AR-designated courses; arts or science electives to include MATH 111.

Year 4
AQA 400, 450; ECON required and/or elective courses; AR-designated courses; arts or science electives.

BA Major in Public Policy and Social Research and Major in Aquatic Resources

Year 1
AQA 100; BIOL 112; ECON 101, 102; ESCI 171; PSCI 100; ANTH 111/112 or PSCI 100.

Year 2
AQA 200; BSAD 101; 6 credits PSCI at the 200-level; 6 credits PSCI or ANTH at the 200-level; PSCI, PSCI and/or ANTH electives; AR-designated courses; arts or science electives.

Year 3
AQA 325 and preparation for AQA 400; PSCI, PSCI and/or ANTH courses; AR-designated courses; arts or science electives.

Year 4
AQA 400, 450; PSCI, PSCI and/or ANTH courses; AR-designated courses; arts or science electives.

B.Sc. Major in Biology and Major in Aquatic Resources

Year 1
AQA 100; BIOL 112; ECON 101, 102; ESCI 171; MATH 111,112; 6 credits science electives at the 100-level (CHEM 100 is recommended for those intending to major in biology or earth sciences).

Years 2 and 3
AQA 200, 325 and preparation for AQA 400; BIOL 111, 201, 202, 203, 204, BSAD 101; STAT 231; AR-designated courses; arts or science electives.

Year 4
AQA 400, 450; minimum of 3 credits BIOL at the 400-level; BIOL electives; AR-designated courses; arts or science electives.

B.Sc. Major in Earth Sciences & Major in Aquatic Resources

Year 1
AQA 100; BIOL 112; ECON 101, 102; ESCI 171; MATH 111,112; 6 credits science electives at the 100-level (CHEM 100 is recommended for those intending to major in biology or earth sciences).

Years 2 and 3
AQA 200, 325 and preparation for AQA 400; BSAD 101; 3 or 6 credits CHEM; ECON 201, 215, 216, 271, 272, 375 or 376, 305, 366; AR-designated courses; arts or science electives.

Year 4
AQA 400, 450; ESCI 406 and/or 465; AR-designated courses; arts electives.

B.Sc. Major in Mathematics, Statistics, and Computer Science and Major in Aquatic Resources

Year 1
AQA 100; BIOL 112; ECON 101, 102; ESCI 171; MATH 111,112; 6 credits science electives at the 100-level.

Years 2 and 3
AQA 200, 325 and preparation for AQA 400; BSAD 101; CSCI 125, 235; MATH 253, 267, 277, 287; STAT 231; AR-designated courses; arts and/or science electives.

Year 4
AQA 400, 450; MATH 367, 387; AR-designated courses; arts and/or science electives.

All courses are restricted to Aquatic Resources Majors or permission to enrol may be requested of the ISAR co-ordinator and instructor.

100 Introduction to Aquatic Resources I: Natural Science Applications

This course explores the living and non-living characteristics that determine the nature of aquatic resource ecosystems, and examines human interaction with these resources. Case studies expose students to the natural as well as some of the social science applications of aquatic resource use, while field trips and laboratory exercises introduce the methodologies used to study these ecosystems. Lab and field trips. Six credits.

200 Introduction to Aquatic Resources II: Social Science Applications

This course explores the political, economic and sociological dimensions of aquatic resource systems. It examines both freshwater and ocean environments. In the process, key concepts and frameworks of social science are applied to a variety of case studies, historical and contemporary. Topics include watershed politics, multiple resource use, integrated watershed management, alternative governance arrangements, coastal communities, the move toward sustainable fisheries and aquaculture and coastal and ocean management. Six credits.

325 Aquatic Resources Field Camp

This course is a week-long field camp on integrated watershed management. It consists of assigned reading, talks by experts in watershed management and field trips to watershed sites. Students must complete the field camp prior to the beginning of either their third- or fourth-year of study. Not required for students who take one of BIOL 307, ESCI 375, ESCI 376. Not offered every year; equivalencies will be considered on an individual basis. No credit.
400 Work Experience/Student Internship

Students will spend the equivalent of one term, normally the summer between the junior and senior year, gaining hands-on experience in an aquatics-related work or volunteer setting. Placements may include research labs, aquatic resource businesses, community organizations, public policy agencies. To focus the applied learning experience, students develop a topic for special study, in collaboration with the work experience provider and an academic advisor. Prerequisite: AQUA 200. Three credits.

450 Senior Seminar in Aquatic Resources

The seminar represents the capstone for students completing their aquatic resources major. Each year the seminar considers an important interdisciplinary theme in the aquatics field. Students also develop and present the results of their major essay projects. Visits by ISAR guest speakers are co-ordinated with seminar work. Co-requisite: AQUA 400. Three credits.

9.4 ART

S. Gregory, Ph.D.

Part Time

K. Brown, BFA
J. Fecteau, BA
M. Gibson, MFA
S. Jan, BA
M. MacFarlane, BFA
A. MacLean, BFA
F. Martin, BFA
W. Rogers, B.Ed.
B. Sparks, BFA, MA
A. Syperek, BFA
O. Tetu
R. Young, M.Ad.Ed.

Art courses may be used as electives, a pair, or minor. Please see the art department website at http://sites.stfx.ca/art/ for a list of 2015-2016 course offerings.

Minor in Studio Art

ART 100, 141 and 142 and 12 additional credits in studio courses. It is
recommended that students take ART 141 and 142 before their senior year.

**Minor or Subsidiary in Art History**

ART 141, 142, and 18 additional credits in art history courses. Students may take up to six credits of studio art courses for credit toward a minor or subsidiary in art history. Students may take no more than six credits from the following cross-listed courses for credit toward a minor or subsidiary in art history: ART/HIST 300, ART/ PSCI 312, ART/CATH 331/332.

Students with advanced drawing experience and a portfolio can apply to enrol in advanced drawing and painting courses without the prerequisite of ART 100.

**100 Drawing**

This introductory course allows students to acquire the fundamental skills of drawing, and explore form, content, and subject matter in a variety of drawing media. Artistic awareness is achieved by introducing students to the language of art and to the creative accomplishments of the past. Speaking clearly about one’s artistic ideas and concerns by using the vocabulary of formal analysis becomes an important aspect of “seeing”, as identification allows for critical studio practice and discussion. Six credits.

**115 Design**

This course focuses on design principles and elements such as unity, balance, repetition, line, shape, and colour. The course provides students with a vocabulary and working knowledge of visual communication. Students develop their visual problem-solving skills and explore their creativity through studio projects and class discussions. Three credits.

**125 Materials and Methods**

This course will afford students the opportunity of working in a variety of art media, (two-dimensional and possibly three-dimensional) while exploring techniques, presentations, concept and materials. Projects may include painting, printmaking, sculpture, animation, textiles and more. Students will some prior knowledge of drawing and/or art experience will benefit most from this course. Prerequisite: ART 100 recommended. Three credits.

**141 History of Art I**

Long before human beings developed written language, we were making works of art. This introductory survey examines art and architecture within the intellectual and social contexts of their historical production. It provides a working knowledge of the history of art from prehistory through Classical Greece and Rome, to the great cathedrals of the Medieval period. Students will begin to develop critical tools for studying visual culture, and achieve a deeper understanding of cultural history. Three credits.

**142 History of Art II**

This section of the art history survey begins with works of art and architecture of the Italian Renaissance, where new ideas (including the notion of genius) had major repercussions for the cultural and artistic history of subsequent periods, including the Baroque, Romanticism, the 20th century, and our contemporary era. Students will learn new ways of observing and interpreting art, enrich their appreciation of art and architecture, and further deepen their understanding of cultural and intellectual history. Three credits.

**145 Introduction to Colour**

This course deals with the vocabulary, nature and physical properties of colour: hue, value and intensity. Studio assignments provide practice in learning colour relationships in unified and contrasting colour schemes. Prerequisite: ART 100 recommended. Three credits.

**200 Painting I**

An introduction to painting techniques. Work on drawing skills, design, colour and composition will be emphasized. Prerequisite: ART 100 or portfolio demonstrating drawing and design skills. Six credits.

**211 Stained Glass Studio I**

This course introduces the copper foil method of stained glass. Students will create original designs and learn basic technical skills to complete a two-dimensional stained glass artwork using materials (including coloured, textured glass) and equipment in the studio. Prerequisite: ART 100, 115 or portfolio demonstrating drawing and design skills. Three credits.

**212 Stained Glass Studio II**

In this intermediate-level course in the copper foil method of stained glass, students will create original designs, and refine the technical skills learned in ART 211 to produce a three-dimensional stained glass art project. Prerequisite: Art 211 or portfolio demonstrating stained glass design and studio skills. Three credits.

**221 Batik Studio**

Batik is an ancient art form originating in Asia and Africa by which dyes and resist (such as melted wax) are applied to cloth. After learning basic skills for mixing dyes and applying wax to cloth, students will create a series of original batik artworks. The course also touches on other forms of resist art, e.g., silk painting, shibori, and tritik. Prerequisite: ART 100, 115 or portfolio demonstrating drawing and design skills. Three credits.

**222 Weaving Studio**

Tapestry weaving technique is practiced by cultures around the world. In the Western tradition tapestries are typically pictorial narratives used as wall hangings. Students will learn the fundamental techniques of tapestry weaving applied to a small tapestry designed in collaboration with the instructor. Students will be introduced to the history and development of tapestry both as a technique and as an art form. Offered in partnership with StFX Service Learning in some years. Prerequisite: ART 100, 115, or portfolio demonstrating drawing and design skills. Three credits.

**231 Etching Studio I**

Students will learn the basic techniques of intaglio printmaking: hardground, softground, drypoint and aquatint. They will be required to produce a series of prints demonstrating competence in each technique. Prerequisite: ART 100 or portfolio demonstrating drawing skills. Three credits.

**232 Etching Studio II**

Students will develop a portfolio of prints using the techniques learned in Etching Studio I. Prerequisite: ART 231. Three credits.

**240 Pastels**

This studio course introduces pastels as a painting medium. Pastels consist of crayon-like sticks of compressed pigment in either a chalk or wax binder. It is an expressive, direct medium that has been widely used by the European and English masters. In this course, colour mixing and pastel techniques on a variety of papers will be explored. Students will complete a number of landscape, still life, and portrait paintings. Emphasis will be put on developing compositional skills using pastels. Prerequisite: ART 100. Three credits.

**244 History of Photography**

From the public announcement of a viable process in 1839, to the present day, photographic images have come to dominate our visual world. This course will examine the history of photography through its technology and through the work of key photographers, styles, and purposes. It will also consider photography as a medium for art in itself, its position and relationships with the traditional arts, and its extraordinary power to construct a world. Three credits.

**251 Medieval Art**

This course examines major developments in art and architecture of the Middle Ages, from the triumph of Christianity in Imperial Rome through the late Gothic period of the 14th century. The Bible and most early Church theologians associated images with idolatry and paganism, yet this 1000-year period was one of exceptional richness and diversity in Christian visual arts. Students will see how medieval art and architecture reflect and respond to changing theological, devotional and societal needs. Three credits.

**252 Baroque Art**

This course explores developments in the visual arts in Europe during the 17th century. Works of art and architecture will be examined in their social and cultural contexts, including discussion of the Italian Counter-Reformation and new ideas about the function of religious images and buildings, urban planning and the glory of Rome, absolutist monarchies and visual propaganda, specialization in the art market and Dutch genre painting, and the rise of art academies and art theory. Three credits.

**255 Watercolour - Techniques and Approaches**

Students familiarize themselves with the materials and the basic techniques of transparent watercolour in this course. Instruction will include various classic and innovative approaches to this versatile medium, using paintings by well-known masters of the art of watercolour as a jumping-off point for their own exploration in the watercolour medium. Prerequisite: ART 100 or equivalent. Three credits.

**258 Impressionism**

An important movement in French painting during the second half of the 19th century, Impressionism greatly influenced modern art. This course will critically examine the subject in an historical and international context. Prerequisite: a survey course in art history or permission of the instructor. Three credits.

**260 20th Century: Modern Art**

This course examines the origins of modernist endeavour in the late 19th century and covers art up to the end of World War II. Attention will be paid to major
movements and artists, parallel movements in literature and music, the social and political context, and new technologies. Prerequisite: a survey course in art history. Three credits.

261 Contemporary Art
This course examines art from the end of World War II to the present day. Attention will be paid to major movements and artists, the social and political context, and changing assumptions about what art should be and do. Prerequisite: a survey course in art history. Three credits.

298 Selected Topics
Three credits.

300 A Cultural and Intellectual History of Canada
This course is an historical analysis of Canadian literature, art, and architecture, and the intellectual forces that have shaped Canadian society. Cross-listed as HIST 300. Six credits.

312 Art and Politics
Cross-listed as PSCI 312; see PSCI 312. Three credits.

320 Painting II
A continuation of ART 200 with emphasis on composition, technique and materials with special attention to individual creativity and development. Prerequisite: ART 200 or portfolio demonstrating painting skills. Six credits.

331 Catholicism and the Arts I
Cross-listed as CATH 331; see CATH 331. Three credits.

332 Catholicism and the Arts II
Cross-listed as CATH 332; see CATH 332. Three credits.

343 Issues in Canadian Art through World War II
Students will consider Canadian art practice and institutions from pre-European contact up to the Group of Seven. Topics can include aboriginal practice and the representation of native peoples, the construction of wilderness and place, and the role of the church in Quebec in the context of social and political change. Prerequisites: ART 141, 142 or survey of Canadian art or permission of the instructor. Three credits.

344 Issues in Contemporary Canadian Art
Students will consider selected topics which can include: Michael Snow and his contemporaries, post-colonialism and contemporary aboriginal art, landscape and the critique of nature, feminism. Prerequisites: ART 141, 142 or survey of Canadian art or permission of the instructor. Three credits.

346 Botanical Art and Illustration: Drawing
This course will be concerned with developing drawing to accurately reproduce plant forms. Non flowering and flowering plant form and diversity will be covered using pencil, pen and ink. Prerequisite: ART 100 or BIOL 202 or portfolio demonstrating drawing or painting skills. Three credits.

347 Botanical Art and Illustration: Painting
This course will be concerned with developing drawing to accurately reproduce plant forms. Non flowering and flowering plant form and diversity will be covered using pencil and watercolour. Prerequisites: ART 100 or 346 or BIOL 202 or portfolio demonstrating drawing or painting skills. Three credits.

356 Iconography of Christian Art: The Life of Christ
Iconography is the identification and interpretation of images. This course is an introduction to the iconography of Christian art, with an emphasis on images of the Life and Passion of Christ. The course will examine how images develop over history, and how they may be understood in light of historical events, changes in theological thought, and in the artist's own spirituality. Cross-listed as RELS 353. Three credits.

357 Iconography of Christian Art: The Saints
This course is an introduction to the iconography of Christian art, with an emphasis on images of Mary and the saints. The course will examine how images develop over history, and how they may be understood in light of historical events, changes in theological thought, and in the artist's own spirituality. Discussion will include how such images were used as objects of personal devotion but also for the conveying of important theological and social values. Cross-listed as RELS 354. Three credits.

363 Advanced Drawing I
A continuation of Art 100, this course covers the direct observation of still-life, figure drawing, composition, expression, and critical analysis. A variety of drawing media, both colour and black and white, will be used. Projects to be done outside of class will be assigned on a regular basis. Prerequisite: ART 100 or a portfolio approved by the instructor. Three credits.

364 Advanced Drawing II
This course will concentrate on the development of individual expression. There will be greater emphasis on the expressive potential of the figure. Projects to be completed outside the class will be assigned on a regular basis. Prerequisite: ART 363. Three credits.

371 Italian Renaissance Art I
During the Italian Renaissance, humanists began to look back to the Classical past for inspiration. At the same time, some religious leaders led followers to an increased interest in the natural world and contemporary everyday life. These new trends deeply affected the visual arts. This course will examine this period of profound innovation in painting, sculpture and architecture, from the time of Giotto to the precursors of High Renaissance style in Florence and Venice. Credit will be granted for only one of ART 371 or ART 370. Three credits.

372 Northern Renaissance Art
This course explores the innovative artistic legacy of Northern Renaissance Europe. New technical developments such as oil painting allowed artists to create unprecedented levels of realistic illusion in paintings. The rise of the printing press opened up new avenues for the dissemination of imagery in the form of woodcuts and engravings. The religious turmoil of the Protestant Reformation also had profound consequences for the development of art - and its subject matter - in the North. Three credits.

373 Italian Renaissance Art II
This course examines Italian art and architecture during the late 15th and 16th Centuries, beginning with the monumental “High Renaissance” style established by Leonardo da Vinci, Michelangelo, and Raphael. The role these artists and others played in the rise of the notion of artistic genius led to problems linked to artistic license as the century progressed. We will consider works of art from the point of view of style and technique, but also how art functions in its social and political context. Three credits.

399 Directed Study
See section 3.5. Three or six credits.

435 Seminar in Italian Renaissance Art
This course is an intensive investigation into an aspect of Italian Renaissance art. Topics may include, among others: Michelangelo and his biographers; Giorgio Vasari’s Lives of the Artists; Raphael in Rome; Renaissance art in Venice; Italian Mannerism. Students will learn to use and assess important primary sources from the Renaissance period, and will also examine the secondary scholarly literature in some depth. See http://sites.stfx.ca/art for more information. Prerequisites: ART 142, or 371, or 373, or permission of the instructor. Three credits.

499 Directed Study
See section 3.5. Three or six credits.

J.A. Buckland-Nicks, Ph.D.
A.G. Miller, Ph.D.

Biology is the science of living organisms and their interactions in the world around us. Many biology courses deal with the human condition, as well as the influence that humans have on the global environment. The biology department offers courses that emphasize the structure and function of organisms from the molecular level to the level of global ecology. The major, advanced major, and honours degrees prepare students for advanced training and careers in basic and applied biology and in the biomedical sciences; for graduate study in biology, medicine, dentistry, physiotherapy, and veterinary science; for teaching at both the primary and the secondary level.

Biology is a highly integrative science that is informed by a conceptual background in other sciences including mathematics, chemistry, physics, and earth sciences. Joint degree programs with these and other sciences are available. In addition to the regular biology programs, students may also study biology through the Interdisciplinary Studies in Aquatic Resources program or the Environmental Sciences program.
First year biology students normally register for BIOL 111, 112; CHEM 100 or 120; MATH 111 and 112; 6 credits in a humanities subject; 6 credits in a social sciences. See glossary for definitions of the humanities and social sciences. Students with a minimum high school average of 85 may consider a third science, usually PHYS 100 or ESCI 171 and 172 instead of 6 credits of arts.

**Department Requirements**

a) The biology core program is BIOL 111, 112, and four of the following courses: 201, 202, 203, 204 and 315.

b) Students wishing to complete a pair in biology should take BIOL 111, 112, 201 and 202. BIOL 201, 202, 203, 204 are normally taken in the second year.

c) Credit for BIOL 111 and 112 with an average of 55 is required for all students continuing in biology major, advanced major or honours programs.

d) BIOL 221 and 222 cannot be used as science A in biology major, advanced major or honours programs.

e) CHEM 100 or 120 is a prerequisite for BIOL 201, 202, 203 and 204.

f) Advanced major and honours students normally take CHEM 225, 255 and STAT 231 in second year. Students interested in the health professions should take CHEM 220 in second year.

g) Biology students may take no more than six credits of cross-listed courses as BIOL credits.

**Major Program**

Program requirements are given in chapter 7. Students in the major program must take BIOL 111, 112, and four of the following courses: 201, 202, 203, 204, 315 and 18 additional biology credits, of which 12 credits must be at the 300 or 400 level, to complete 36 credits for science A.

**Advanced Major and Honours Program**

Program requirements are given in section 7.1. Honours and advanced major students select their courses in consultation with the department chair. PHYS 100 or 120 is required in the honours program and may count as science A. In the advanced major program PHYS 100 or 120 is strongly recommended but may not count as science A. BIOL 391 and 491 are required non-credit courses taken in third and fourth years. Course requirements are shown below.

Biology offers six areas of concentration, health sciences, ecology, cell and molecular biology, animal biology, plant biology and aquatic biology. A concentration is included in the students’ official academic record and appears on any transcript issued. Advanced major and honours students may fulfill the requirements for a concentration by completing a minimum of 15 credits, including at least 3 credits at the 400 level from a specified concentration. Courses assigned to each concentration are listed on the department website http://sites.stfx.ca/biology/undergraduate_programs.

**Advanced Major Program**

Students must take BIOL 111, 112, and four of the following courses: 201, 202, 203, 204, 315, and 391; CHEM 100 or 120, CHEM 225 (or 220) and 255; MATH 111, 112; STAT 231; an additional 24 BIOL credits, of which 18 must be at the 300 or 400 level (at least 3 credits must be BIOL at the 400 level, other than 491 and 499); 18 credits arts electives, to include one pair; 15 credits approved electives; 24 credits open electives.

**Honours Program**

Students must take BIOL 111, 112, and four of the following courses: 201, 202, 203, 204, 315 and 391; 491, 493; CHEM 100 or 120, 225 (or 220) and 255; MATH 111, 112, PHYS 100 or 120; STAT 231; an additional 33 credits of BIOL or other approved science courses, of which 24 credits must be at the 300 or 400 level (at least 3 credits must be BIOL at the 400 level, other than BIOL 475, 491, 493 and 499); 18 credits arts electives to include one pair; 15 credits approved electives; 6 credits open electives.

**Joint Honours and Joint Advanced Major**

Joint honours and joint advanced major programs may be offered with other departments. For course patterns see sections 7.1.3. Students considering a joint honours or advanced major should consult with the relevant department chairs as early as possible. A concentration in health sciences, ecology, cell and molecular biology, animal biology, plant biology or aquatic biology may be completed for students having biology as their Science A. Requirements are as listed for advanced major and honours programs.

**Biology and Environmental Sciences**

See section 9.20

**Co-operative Education Program in Biology**

This optional academic program allows students have the opportunity to gain 12 months of professional, paid work experience in a range of opportunities in industry, government and not-for-profit across Canada. Students can gain valuable technical and professional experience in field and lab work, research, policy and education to reinforce classroom-based instruction. See section 9.13 for further information.

**Health Studies Colloquium**

The Health Studies Colloquium is an optional, interdisciplinary, interfaculty opportunity that will bring together a small group of first-year students in both the Faculty of Arts and the Faculty of Science to study three academic subjects: biology, psychology and sociology. See section 4.3 for further information.

**105 Introductory Cell and Molecular Biology**

This course will focus on the structure and function of cells, cell division, patterns of inheritance, and the molecular basis of inheritance. Restricted to nursing students. Three credits and tutorial.

**111 Introductory Cell Biology**

An introduction to cells, their structure and function, and the techniques used to study them. Provides a basic introduction to cells as the building blocks of all life. Required for all students continuing in biology. Three credits and lab.

**112 Diversity of Life**

This course emphasizes the interrelationships of living systems and their roles in the global ecosystem. Students explore evolution and the origins of life, organismic diversity, adaptations, and ecology. Human interactions with the diversity of life are considered throughout the course. Basic skills that underpin success as an undergraduate student are also emphasized. Required for all students continuing in biology. Three credits and lab.

**115 Microbes in Human Biology**

An introduction to microorganisms from a human perspective, this course deals with viruses, bacteria and fungi. Topics include bacterial structure and function, bacterial genetics and antibiotic resistance, and viral structure and infection. Restricted to nursing students. Credit will be granted for only one of BIOL 115 or BIOL 215. Prerequisite: BIOL 105. Three credits and tutorial.

**201 Animal Biology**

An introduction to major groups of animals, emphasizing the structure, physiology and way of life of certain species. Prerequisites: an average of 55 in BIOL 111, 112 for biology majors, advanced majors or honours students. Three credits and lab.

**202 Plant Biology**

An introduction to the diversity, form and function of plants emphasizing the biology of land plants. Organisms are treated from the perspectives of evolution, reproduction, physiology, and ecology. Prerequisites: an average of 55 in BIOL 111, 112 for biology majors, advanced majors or honours students. Three credits and lab.

**203 Introductory Ecology**

An introduction to the fundamental concepts of ecology, exploring how organisms interact with their environment and with each other, at the levels of populations, communities and entire ecosystems. Interactions from competition to food chains are considered from an evolutionary perspective recognizing the role of the physical environment and humanity. Prerequisites: an average of 55 in BIOL 111, 112 for biology majors, advanced majors or honours students. Three credits and lab.

**204 Introduction to Genetics**

An introduction to the mechanisms of inheritance, genome structure, and genetic analysis. Concepts include: DNA structure and function; gene regulation, mutation, repair, linkage; gene manipulation. Laboratory involves problem solving and genetic crosses with fruit flies. Prerequisites: an average of 55 in BIOL 111, 112 for biology majors, advanced majors or honours students. Three credits and lab.

**215 Microbiology for Human Nutrition**

An introduction to microorganisms from a human health perspective, that focuses on immunological concepts, viruses, bacteria and fungi. Laboratories cover basic microbiological techniques and tutorials cover applications from a health perspective to communicable disease control, infection control, food and water quality, and food hygiene. Credit will be granted for only one of BIOL 215 or BIOL 115. Restricted to Human Nutrition students and Human Kinetics students with Nutrition minor. Prerequisites: BIOL 111 and CHEM 100 or 120. Three credits and lab/tutorial.

**220 Selected Topics in Biology**

This course is for non-science students who are interested in understanding biological concepts. The course deals with how scientific principles are established and illustrates this by discussing selected topics of biological and human interest. Topics include evolution and diversity, ecology and food, human evolution and population, diabetes, homeostasis, HIV and vaccines, antibiotic resistance, and cancer. Offered through distance education. Acceptable for credit only in the Faculties of Arts and Business and as an open elective in the B.Sc. Nursing. Credit will be granted for only one of BIOL 220 or BIOL 221/222. Six credits.
221 Issues in Resource Management
This course introduces the basic science necessary to understand a number of current environmental resource issues such as forest and wildlife management. Within each broad area, the mechanisms and dynamics of living systems will be covered, with the goal of understanding resource decision making, and how human activities can alter the structure and function of terrestrial ecosystems. Credit will be granted for only one of BIOL 221 or BIOL 220. Prerequisite: BIOL 112 or upper-year status in non-science programs. Cannot be used as science A for biology students. Three credits.

222 Topics in Environmental Ecology
This course introduces current environmental issues related to resource use and environmental degradation from an ecological perspective. Water, mineral, and food/soil resources will be discussed, followed by non-renewable and renewable energy sources, with emphasis on ecological implications of resource use. The last half of the course will deal with environmental degradation, and will provide students with an understanding of cause, extent, and impacts of all forms of pollution. Credit will be granted for only one of BIOL 222 or BIOL 220. Prerequisites: BIOL 112 or upper-year status in non-science programs. Cannot be used as science A for biology students. Three credits.

231 Plants and Human Health
An introduction to the role of plants in human affairs. Topics will include plants as medicine, food, fibres, and psychoactive agents. The course will introduce basic plant structure, and integrate chemistry with utilization. Important themes will be the role of plants in aboriginal cultures and the processes of plant domestication and breeding. Prerequisite: BIOL 112 or upper-year status in non-science programs. Three credits and lab.

251 Human Anatomy and Physiology I
This course uses an integrated approach to the study of the anatomy and physiology of the following systems: the integumentary, skeletal, muscular, nervous and endocrine systems. The course provides students with a comprehensive working knowledge of the anatomic and physiologic aspects of these systems. Required for students in human kinetics, human nutrition and nursing; other students may be permitted depending on space availability and permission of instructor. Credit may be granted for only one of BIOL 251 and 304. Three credits and lab.

252 Human Anatomy and Physiology II
This course uses an integrated approach to the study of the anatomy and physiology of the following systems: the cardiovascular, respiratory, digestive, urinary and reproductive systems. The objective of the course is to provide students with a comprehensive working knowledge of the anatomic and physiologic aspects of these systems. Required for students in human kinetics, human nutrition and nursing; other students may be permitted depending on space availability and permission of instructor. Credit may be granted for only one of BIOL 252 and BIOL 304. Prerequisite: BIOL 251. Three credits and lab.

285 Paleontology: The History of Life

301 Form and Function in Animals
This course will introduce and apply the physical concepts required to understand form and function in the complexity of biological processes. Prerequisites: BIOL 201; PHYS 100 or 120. Three credits and lab.

302 Evolution
Life on our planet, in all its wonderful diversity, has evolved to be this way. This course will introduce the student to the core concepts of Darwinian natural selection, the process of speciation, methods of phylogenetic construction, the relationship between phylogenetics and taxonomy, analysis of evolutionary patterns, the history of life on Earth, and selected topics including human evolution and social behaviour. Prerequisites: BIOL 201, 204 or permission of the instructor. Three credits and tutorial.

304 Vertebrate Physiology
This course uses an integrative approach to study the function of organ systems, including neural, cardiovascular, muscular, respiratory, renal, reproductive and endocrine. Examples of how vertebrates, including humans, respond to different demands imposed by their environment and activities will be discussed. Credit will be granted for only one of BIOL 304 or BIOL 251/252. Prerequisite: BIOL 201. Three credits and lab.

306 Ichthyology
Introduces students to the diversity of fish in terms of morphology, physiology, ecology, and behaviour, as well as the basic concepts of fisheries science and management. The emphasis will be on a global perspective for the lecture component, while laboratory work will focus on Atlantic Canadian species. Prerequisites: BIOL 201, 203. Three credits and lab.

307 Field Biology
Provides practical experience in the observation, collection, identification and quantification of organisms in nature. Held for two weeks in intercession, the course emphasizes field ecology, dealing with some or all of the following groups of organisms: birds, small mammals, fish, plants, marine algae, marine invertebrates and insects. Prerequisite: BIOL 203. Three credits and lab.

308 Biology of Populations
This course covers the principles of plant and animal population dynamics. The great diversity in growth, survival, reproduction, and dispersal patterns in aquatic and terrestrial populations is examined. Contents include theory, evidence from experimental studies and the interaction between the environment and populations. Prerequisite: BIOL 203 or permission of the instructor. Three credits.

311 Coastal Marine Ecology
An introduction to coastal marine habitat and the factors that influence the population and community structure of primary producers and consumers. The course includes an overview of marine ecological theory, field work, and laboratory observations, focusing on Nova Scotia shores. Prerequisite: BIOL 203. Three credits, lab and research project.

312 Marine Biology
This introductory course covers photosynthetic organisms in an ecological context and explores the structuring of marine communities and humanity’s impact on the ocean. Lectures introduce oceanographic principles but emphasize the ecological and functional roles of primary producers in marine communities such as plankton, kelp forests, intertidal zones, and salt marshes. Prerequisites: BIOL 201, 202, 203; aquatic resources students exempt. Three credits and lab.

315 Introductory Microbiology
Provides a broad perspective on the microbial world and its role in the biosphere. The diversity, morphology and physiology of prokaryotic microorganisms will be discussed. Laboratories stress basic microbiological techniques including microscopic examination, isolation from natural environments, enumeration and examination of physiology. Prerequisites: BIOL 201, 204; CHEM 220, or CHEM 225 and 225. Open to human kinetics students upon completion of CHEM 220, or CHEM 225 and 255. Three credits and lab.

317 Molecular Biology
An introduction to the analysis of peptides and nucleic acids using standard molecular methodology. Topics include electrophoretic techniques; manipulation of DNA, the introduction of foreign DNA into host bacterial cells and the use of gene cloning, gene amplification, and DNA sequencing. In labs students will apply these methods to interpret gels and to generate genetically modified bacteria. Prerequisites: BIOL 204, 315. Three credits and lab.

331 Statistical Methods
Cross-listed as STAT 331; see STAT 331. Three credits and a one-hour lab.

335 Developmental Biology
The course provides an introduction to the means by which animals replicate themselves. Students will be introduced to experimental methods, intercellular communication, the diversity of different ways that animals develop and the role of gene regulation therein. Laboratories will highlight topics covered in lecture and introduce students to some experimental techniques. Prerequisites: BIOL 201, 204. Three credits and lab.

342 Invertebrate Zoology
A comparative study of the diversity of invertebrate animals and their adaptations, including their morphology, behaviour, physiology, ecology and evolution. Students will learn in both lecture and lab the remarkable diversity of both form and function in these animals. At the same time, students will be taught how to refine their powers of observation, improve their ability to ask and answer critical questions about organisms, and design experiments that will lead to further insight into invertebrate zoology. Prerequisite: BIOL 201. Three credits and lab.

343 Comparative Anatomy of Vertebrates
A comparative study of the anatomy and evolution of chordate animals with emphasis on the vertebrates, including humans. In the laboratory, students will study the anatomy of representative vertebrates and will complete a project focusing on wildlife. Prerequisite: BIOL 201. Three credits and lab.

345 Communities and Ecosystems
An outline of the essential theory of community and ecosystem ecology, including climate drivers, mineral cycles, energy flow and community structure. The concepts of succession, food webs and biodiversity are illustrated with comparative examples drawn from a variety of aquatic and terrestrial ecosystems. Prerequisites: BIOL 201, 202, 203. Three credits.
360 Global Change Biology
This course analyzes major anthropogenic phenomena that are currently affecting natural systems at a global scale. Topics include global warming, ocean acidification, species invasions, habitat fragmentation, and overfishing, focusing on the effects of such processes on aquatic and terrestrial organisms. Successful migration and conservation strategies are evaluated. Prerequisites: BIOL 201, 202, 203. Three credits.

381 Selected Topics
The topic for 2015-2016 is Human Biomechanics. This course provides a mechanical analysis of physiological processes such as blood flow and introduces the basic physical principles. Current issues from the field of biomechanical engineering will be introduced. Students will complete a design project throughout the term. Prerequisite: BIOL 201; PHYS 100 or PHYS 120. Three credits.

384 Experimental Research in Biology
This course provides training in experimental design and data analysis, with emphasis on research questions that are common in biology. All relevant aspects of experimental research will be covered, i.e., identifying a problem, formulating a hypothesis, designing an experiment, analyzing and interpreting data, and delineating future research steps. Concepts and techniques will be applied with numerical examples. Prerequisites: BIOL 203 or permission of the instructor. Three credits and lab.

385 Animal Behaviour
An introduction to the principles of ethology drawing on examples from all animal phyla, with an emphasis on vertebrates. Students learn both the physiological and evolutionary bases of behaviour. Topics covered will span simple reflexes through complex social behaviours, including survival, predation, habitat selection, communication, and mating behaviours. Participation in field trips is required. Prerequisite: BIOL 201 or PSYC 230. Three credits and lab.

391 Junior Seminar
This course will assist students in choosing a career, gaining admission to graduate or professional school and help honours students choose a supervisor and prepare for their honours thesis work. Required for all biology advanced major and honours students in their third year. No credit.

395 Cell Biology
An introduction to the eukaryotic cell, including relationships between biochemical mechanisms and organelle functions, and techniques used to study cell function. Prerequisites: BIOL 201, 204; CHEM 220 or 255. Three credits and lab.

401 Comparative Physiology and Biophysics
An introduction to the physical aspects of biological systems, including the application of solid and fluid mechanics to living systems and the mechanics of locomotion. Prerequisite: BIOL 301. Three credits and lab. Not offered 2015-2016; next offered 2016-2017.

402 Membrane Physiology
Molecular biology, physiology, and the biophysics of membranes in animal cells are studied in order to integrate single membrane function into the operation of tissues and organs. Emphasis is on transport channels, enzymes and their regulation in normal cells and in membrane disorders. Prerequisites: BIOL 304 or 251/252; PHYS 100 or 120; CHEM 255. Three credits and lab.

404 Endocrine Physiology
Covers principles and concepts in vertebrate and human control systems, including the principal actions of hormones and neurohormones, hormone interactions, and endocrine disorders. Prerequisite: BIOL 201 and one of BIOL 304 or 251/252. Three credits and lab. Not offered 2015-2016.

407 Integrated Resource Management
An introduction to integrated resource management planning and land-use decision-making in an industrial landscape, using the principles of landscape ecology, ecosystem management and conservation biology. Lectures examine the challenges of biodiversity conservation, and wildlife and water management using these methods within the context of forest management. Guest lecturers from industry and other land user groups will discuss the opportunities, constraints, and problems presented by multi-stakeholder approaches. Prerequisite: BIOL 203. Three credits and lab.

411 Evolutionary Developmental Biology
Evolutionary Developmental biology or “evo-devo” is a contemporary interdisciplinary field that has been challenging existing evolutionary theory and making major new discoveries about organismal diversity in relation to genetic diversity. In this course we will explore: (i) how natural selection acts on the developmental process, (ii) whether development constrains evolution, (iii) developmental mechanisms of evolutionary change, (iv) the interaction of the environment with developmental processes and (v) the genetics of development. Prerequisite: BIOL 302 or 335 or permission of instructor. Three credits. Not offered 2015-2016.

417 Microbial Pathogens
This course provides a general overview of a human host’s defense mechanisms, including immune and inflammatory responses, and describes the pathogenic interactions between humans and different types of microbes with an emphasis on bacterial pathogens. Prerequisites: BIOL 201, 204, 315. Three credits and tutorial.

445 Experimental Phyology
A lecture and laboratory based course in which algae are used as experimental models in cell and developmental biology. Students will develop practical skills in fluorescence microscopy, photo-microscopy and algal culturing. Prerequisite: permission of instructor. Three credits and lab. Not offered 2015-2016.

452 Bioinformatics
Bioinformatics is an exciting new field of science that uses computers to archive, organize, retrieve and analyze biological information. The amount of nucleotide and amino acid sequence data has risen in recent years, with over 1000 genomes now sequenced and many more to come. This course will focus on how the data is generated, accessed and managed, how to retrieve particular types of data and what some of the end users of these data are. No computing background required. Prerequisite: BIOL 317 or permission of the instructor. Three credits.

453 Advanced Behavioral Neuroscience I
Credit will be granted for only one of BIOL 453 or BIOL 450. Cross-listed as PSYC 431; see PSYC 431. Three credits.

454 Advanced Behavioral Neuroscience II
Credit will be granted for only one of BIOL 454 or BIOL 450. Cross-listed as PSYC 432; see PSYC 432. Three credits.

465 Advanced Microscopy
An introduction to the theory and application of electron microscopy. Students will be taught the tissue preparation techniques required to investigate cellular structure and will learn the imaging skills necessary to assemble an electron micrograph figure for publication. Emphasis is placed on practical skills. Prerequisite: permission of the instructor. Three credits and lab. Not offered every year.

468 Restoration Ecology
This integrative course introduces students to the variety of ways that degraded ecosystems, terrestrial and aquatic, can be restored by the application of ecological principles. These ideas are illustrated with Nova Scotia case studies involving invasive species, stream restoration, reforestation and contaminated sites. Prerequisites: BIOL 201, 202, 203; BIOL 345 recommended. Three credits. Offered 2015-2016 and in alternate years.

470 Environmental Microbiology
Examines the contributions of prokaryotes to the biogeochemical cycling of elements; and to the development of soils, microbial mats and stromatolites, bog metal deposits and acid drainage. Topics also include some of the more unusual prokaryotes such as the ecto- and endosymbionts of marine organisms, photosynthetic and bioluminescent bacteria. Labs examine microbial ecosystem development and diversity. Prerequisites: BIOL 204, 315. Three credits and lab.

472 Freshwater Ecology
A study of the structure of freshwater ecosystems and how aquatic communities are shaped by the unique physical and chemical properties of flowing and standing fresh waters. Field trips to local streams and lakes illustrate the distributions and adaptations of freshwater organisms, while providing hands-on experience with limnological methods. Prerequisites: BIOL 201, 202, 203. Three credits and lab.

474 Environmental Biology of Soils
An introduction to the diversity of soil organisms and their roles in ecosystem processes. The nature of soil as habitat for bacteria, fungi, and animals, and the connections between soil and the aboveground environment will be considered along with the role of soils and soil organisms in decomposition, nutrient cycling, plant nutrition and ecosystem succession. Students must complete a semester-long lab project. Prerequisite: BIOL 203. Three credits and lab. Not offered 2015-2016; next offered 2016-2017.

475 Accessing the Biological Literature
Library resources and on-line databases will be used to write an essay relevant to the honours student’s interest or thesis. Restricted to honours students. Three credits.

481 Selected Topics
Three credits.
The BBA program provides 13 streams: BBA general; BBA Major in accounting, enterprise development, finance, information systems, leadership in management, and marketing; BBA Honours in accounting, enterprise development, finance, leadership in management, and marketing; and BBA Joint Honours in business administration and economics. Each BBA stream offers a primarily classroom-based option and a co-op, work-study option.

Students who wish to study business administration and another discipline may choose the B.Sc. with Advanced Major in a Science with Business Administration (see chapter 7); the BA with Major or Advanced Major in economics and a minor in business administration (see section 9.16); or the BIS program (see section 9.24).

To earn a BBA degree, students must successfully complete courses with a combined value of 120 credits. All BSAD courses are one-term, three-credit courses. Normally BBA students earn 30 credits per year for each of four years. At least 36 of each student's 60 BSAD credits must be earned at StFX.

Transfer students should consult with the department chair prior to registration to confirm their course selections.

**Admission to the BBA Program**

Admission to the BBA program may be restricted based on quotas, general average, and course grades. See chapter 1 for general admission requirements.

**Advancement in the BBA Program**

BSAD 200-level courses are prerequisites for 300-level courses. Admission to 400-level courses normally requires completion of one or more courses at the 300 level. Permission of the department chair to register in a course may override the normal prerequisites.

**Substitutions**

A BBA student may substitute courses in subjects other than business administration for BSAD electives. Substitutions are not automatic. Students must apply in writing to the department chair indicating the career or program rationale for requesting a substitution.

Students with credit for MATH 111 may wish to substitute MATH 111 for the MATH 205 requirement. ECON 271 may also be substituted for MATH 205 for students who are interested in finance.

Students in the joint honours in business administration and economics, majors in finance, and majors in information systems may substitute ECON or INFO courses for selected BSAD courses with the permission of the chair.

**Affiliations with Professional Associations**

The Department of Business Administration maintains ongoing relationships with the Atlantic School of Chartered Accountancy, the Certified General Accountants' Association, the Society of Management Accountants. Graduates may earn credit for most courses toward completion of the CA, CGA or CMA professional accounting designations. Graduates may also earn credit for courses toward the Canadian Institute of Management Program, the Fellows Program of the Institute of Canadian Bankers, and other professional certification programs.

**300- and 400-Level BSAD Electives**

Many BSAD electives at the 300 and 400 level may be taken in either the third or fourth year. Permission of the department chair to register in a course may override the normal prerequisites.

**Co-operative Education Programs in Business Administration**

This optional academic program offers BBA students the opportunity to gain 12 months of professional, paid work experience in a range of opportunities in industry, government and not-for-profit across Canada. Students can gain valuable professional experience within the fields of accounting, finance, marketing, management and more, to reinforce classroom-based instruction. The Business Co-op Program is accredited by the Canadian Association for Co-operative Education (CAFCe). See section 9.13 for further information.

**BBA General Degree**

- **Year 1**: BSAD 101, 102; ECON 101, 102; INFO 101, 102; 12 credits arts/science electives
- **Year 2**: BSAD 221, 223, 231, 241, 261; MATH 205; STAT 201; 9 credits arts/science electives
- **Year 3**: 15 credits BSAD electives; 15 credits arts/science electives
- **Year 4**: BSAD 471; 21 credits BSAD electives; 6 credits open electives

**BBA Major Degrees**

The BBA program offers majors in accounting, enterprise development, finance, information systems, leadership in management, and marketing.
Accounting
Years 1 & 2 Same as general degree
Year 3 BSAD 321, 322, 323, 324, 342; 15 credits arts/science electives
Year 4 BSAD 424, 471; 18 credits BSAD electives (at least 6 credits must be from the 420 series); 6 credits open electives

Enterprise Development
Years 1 & 2 Same as general degree
Year 3 BSAD 331, 356; 9 credits BSAD electives; 15 credits arts/ science electives
Year 4 BSAD 332, 457 (or 456), 458, 471; 12 credits BSAD electives; 6 credits open electives

Finance (For the major in finance ECON 201, 202 are regarded as BSAD electives.)
Year 1 Same as general degree
Year 2 ECON 201, 202; BSAD 221, 223, 241, 261; MATH 205 (or ECON 271); STAT 201; 3 credits arts/science electives
Year 3 BSAD 342; 12 credits BSAD electives; 15 credits arts/science electives
Year 4 BSAD 471, 492; 3 credits BSAD electives; 9 credits from the BSAD 34_ or 44_ series or BSAD 454; 6 credits arts/science electives; 6 credits open electives

Information Systems
Year 1 BSAD 101, 102; ECON 101, 102; INFO 101, 102; 12 credits arts/science electives
Year 2 BSAD 221, 223, 241, 261; MATH 205; STAT 201; INFO 245, 275; 3 credits arts/science electives
Year 3 BSAD 361, 381; 9 credits BSAD/INFO electives; 15 credits arts/science electives
Year 4 BSAD 415, 419, 471, 492; BSAD/INFO 416; INFO 415; 6 credits BSAD/INFO electives; 6 credits open electives

Leadership in Management
Years 1 & 2 Same as general degree
Year 3 BSAD 358, 361, 363; 12 credits BSAD electives; 9 credits arts/science electives
Year 4 BSAD 461, 467, 471, 492; 6 credits BSAD electives; 6 credits open electives; 6 credits arts/science electives

Marketing
Years 1 & 2 Same as general degree
Year 3 BSAD 331; 12 credits BSAD electives including 3 from the BSAD 33_ or 43_ series; 15 credits arts/science electives
Year 4 BSAD 332, 471, 492; 15 credits BSAD electives including 9 from the BSAD 33_ or 43_ series; 6 credits open electives

BBA Honours Degrees
The BBA program offers honours degrees in accounting, enterprise development, finance, leadership in management, and marketing; and a Joint Honours Degree in Business Administration and Economics.

All BBA honours degrees follow the same patterns as the major degrees except students must take BSAD 391 in year three and BSAD 494 in year four. Accounting students normally move 3 credits of arts/science electives from year three to year four and complete only 12 credits of BSAD electives in year four. All other honours students substitute BSAD 391 for a BSAD elective in year three, and substitute BSAD 494 for 492 (or for 458 in the case of enterprise development students) in year four.

BBA Joint Honours Degree
The normal course sequence for the BBA with Joint Honours in Business Administration and Economics.

Year 1 Same as general degree
Year 2 BSAD 221, 223; ECON 201, 202, 301, 302; MATH 111 or 205; STAT 201; 6 credits arts/science electives
Year 3* BSAD 231, 241, 261, 391; 6 credits ECON electives at the 300/400 level; 12 credits arts/science electives
Year 4* BSAD 471, 494; ECON 493; 9 credits ECON electives at the 300/400 level; 6 credits BSAD elective; 6 credits arts/science electives

* If the honours thesis is done in the economics department, BSAD 494 is replaced by ECON 494, and three credits ECON elective are replaced by three credits BSAD elective.

Business Administration Courses
All BSAD courses are one-term, three-credit courses. Normally students take 200-level courses in second year, primarily 300-level courses in third year and primarily 400-level courses in fourth year. Not all BSAD electives at the 300 or 400 level are offered every year.

101 Introduction to Business
An introduction to the Canadian business environment including exposure to the issues, trends, forces, organizations and personalities affecting businesses in Canada. The course exposes students to the types of teaching/learning experiences they will encounter in the BBA program, including case studies, team work, exercises, presentations, simulations, readings and lectures. Three credits.

102 Business Decision-Making
Introduces students to the challenge of making business decisions, to the primary areas of business (management, marketing, operations, finance), and to the role of the general manager. The course provides an introduction to the core vocabulary and analytical tools appropriate to the functional areas, and helps students develop their analytical, presentation, small group management, and self-management skills. Three credits.

221 Introductory Financial Accounting
An introduction to the basic concepts, principles and procedures underlying financial accounting and financial statement preparation and interpretation. Required for all BBA students; a prerequisite for all 300- and 400-level financial accounting and finance courses. Three credits.

223 Introductory Managerial Accounting
An introduction to the basic concepts of management accounting and the use of accounting information for managerial decisions. Required for all BBA students; a prerequisite for all 300- and 400-level courses in managerial accounting. Prerequisite: BSAD 221, completed or concurrent. Three credits.

231 Foundations of Marketing
Customers do not buy products: they buy benefits, satisfactions, and solutions to their problems. This course provides students with the customer and marketplace focus central to effective marketing. The course employs exercises and cases to develop students' analytical skills and provides opportunities to demonstrate these skills through memos and reports. Prerequisites: BSAD 101, 102. Three credits.

241 Introductory Financial Management
Covers fundamental aspects of financial decision-making, including financial analysis and planning, valuing stocks and bonds, capital budgeting, accessing capital markets, the cost of capital, and working capital management. Prerequisites: BSAD 221; MATH 205 (or ECON 271). Three credits.

261 Organizational Behaviour
Organizational behaviour introduces students to the context, concepts, principles and theories of human behaviour in organizations. The topics explored range from motivation to teamwork to communication. The objective is twofold: to understand how an organizational member might experience, interpret, and manage human relations as an individual and a group member; and to understand how the influences on human behaviour in turn contribute to organizational effectiveness. Prerequisites: BSAD 101, 102. Three credits.

321 Intermediate Managerial Accounting I
Develops the ability to request and use accounting information in the process of planning and control. Topics include cost accounting, cost and revenue analysis for decision-making, budgeting, and performance analysis. Prerequisite: BSAD 223. Three credits.

322 Intermediate Managerial Accounting II
Examines in greater depth the topics introduced in BSAD 321, applying the concepts to more complex cases. Essential for students pursuing a career in accounting; useful to non-accounting students with an interest in managerial uses of accounting information. Prerequisite: BSAD 321. Three credits.

323 Intermediate Financial Accounting I
An examination of accounting and reporting issues of the public reporting companies as they relate to published financial statements. The course examines controversial aspects of financial accounting with reference to current writings and the pronouncements of professional accounting bodies including IFRS. Emphasis is placed on income measurement and accounting for assets. Prerequisite: BSAD 221. Three credits.

324 Intermediate Financial Accounting II
A continuation of the examination of accounting and reporting issues of the public reporting companies as they relate to published financial statements. Emphasis is placed on accounting for debt, equity and special topics. Prerequisite: BSAD 323. Three credits.

331 Marketing Management
Marketing strategies are developed to capitalize on marketplace opportunities and overcome marketplace problems. The key components of an overall marketing strategy are selection, positioning, product-service, pricing, distribution, and
332 Marketing Research
The role of marketing research is to provide relevant, timely, valid information to reduce uncertainty in decision-making. This course examines the research process, including problem definition, data sources, research types, sampling, measurement, data collection and data analysis. Although the context is marketing, the research process examined is applicable to all areas of business research. Prerequisite: BSAD 231. Three credits.

333 Professional Sales: Building Relationships
This course addresses the nature of professional selling. The course covers changes in the traditional selling process; strategically planning sales within a larger account strategy; strengthening communications; and building partnerships. Prerequisite: BSAD 231. Three credits.

335 Consumer Behaviour
Marketers study consumer behaviour to understand and predict how and why products and services satisfy consumer’s needs. This course examines the internal and external influences on consumers’ purchase decision-making process including perception, motivation, attitude, culture, and reference groups in an interactive class setting. Students will complete exploratory consumer behaviour projects and will use theoretical concepts to create marketing solutions to cases. Prerequisite: BSAD 231. Three credits.

342 Cases in Financial Management
Enhances students’ knowledge of the financial management topics covered in BSAD 241 through the application of financial decision-making techniques and theories to business cases. Topics include risk and capital budgeting, dividend policy, leasing, and bond refunding. Prerequisite: BSAD 241. Three credits.

344 Investment Management
Examines marketable securities as an investment medium, and the analytical techniques that may be employed in selecting a security and meeting an individual investor’s requirements. Credit will be granted for only one of BSAD 344 and BSAD 443. Prerequisite: BSAD 241. Three credits.

345 Personal Financial Management
This course draws on the principles of finance and applies them to decisions faced by individuals in the management of their personal finances. The course explores the planning process using readings, cases and problems. Prerequisite: BSAD 241. Three credits.

346 Financial Statement Analysis
This course provides participants with the tools to make informed managerial decisions regarding a company’s investments, financings, and operations. Techniques learned in this course will be used to understand the biases, limitations, and messages conveyed via the financial statements of a business. The course will examine issues such as revenue recognition, cash flow, profitability, and business valuation principles. Credit will be granted for only one of BSAD 346 and BSAD 498 completed in 2013-2014. Prerequisites: BSAD 221, 241. Three credits.

347 Financial Economics
The course builds on the framework of consumer optimization problems under conditions of uncertainty. It provides a solid foundation for asset pricing and portfolio management. It covers, specifically, Capital Asset Pricing Models (CAPM), Arbitrage Pricing Theory (APT), and Arrow-Debreu theories. These models exemplify two fundamental approaches to pricing securities, namely equilibrium and no-arbitrage. The course finishes by applying theories to the pricing of derivatives. Prerequisites: BSAD 241, ECON 201, 202. Three credits.

351 Business Law
Introduces the legal system in Canada and provides a practical examination of laws affecting Canadian businesses, including: forms of ownership; the management and composition of corporations; the powers and duties of the board of directors; contract law (sale of goods, employment, insurance, real estate); creditor-debtor rights including bankruptcy; and the initiation and conduct of civil court actions. Prerequisites: BSAD 241; third or fourth-year status. Three credits.

356 Entrepreneurship/New Venture Development
This course uses a new venture context to examine small business and entrepreneurship. Students will develop, operate, and wind down a campus-based business, building the knowledge and skills to launch a new venture successfully, and learning that both technical business knowledge and entrepreneurship are needed to deal effectively with uncertainty and change. Prerequisites: BSAD 221, third or fourth-year status. Three credits.

357 International Business
This course examines the theory and methods of engaging in business internationally. The course involves selected aspects of globalization, culture, international trade theory, political economy, foreign direct investment, regional economic integration, the global monetary system, global strategy and international operations. Prerequisites: BSAD 221, 223, 231, 241, 261. Three credits.

358 Business Ethics
An application of philosophical theory to a variety of current issues relevant to business. By examining the consequences of business decisions upon a wide range of stakeholders, students are provided with an overview of the many ways in which business interacts with society and the social and moral responsibilities that this interaction may generate. Prerequisite: BSAD 261 or permission of the instructor. Three credits.

361 Organizational Analysis
Introduces students to important organizational theories and organizational design principles. The course focuses on topics ranging from organizational strategy, structure and culture to organizational change. It also addresses the historical development of the modern business corporation and its changing role in society currently as an agent and vehicle of globalization. Classes feature lectures and discussions, student presentations, and case-based applications of the covered material. Prerequisite: BSAD 261. Three credits.

362 Career Dynamics
Introduces students to key concepts, theories, and principles of career management from the perspective of the individual and the organization. The course focuses on topics ranging from occupational choice, individual career patterns, and organizational career systems to career performance. The course provides students with conceptual knowledge which will be helpful not only for developing their own career strategies and tactics but also for making informed decisions as organizational leaders. Classes feature lectures, discussions, and workshops. Prerequisite: BSAD 361. Three credits.

363 Human Resource Management
A review of the many functions of human resource management, including but not limited to employee selection, development, appraisal and compensation, in addition to the broader social and legal context which influences the HR practice. This course makes a case for the strategic role that proper management of human resources plays in successful organizations while providing an important critique of the practice. Prerequisite: BSAD 261. Three credits.

367 Gender and Management
Reviews the recent growth of women managers in today’s organizational world. Students examine gender roles in organizations and identify some of the barriers women experience in reaching the top. The course explores the systemic discrimination facing women, and presents potential management models for women and men. Cross-listed as WMGS 367. Prerequisite: BSAD 261. Three credits.

381 Operations Management
This course takes an integrated, systems-oriented approach to the operations function of manufacturing and service organizations. Students will explore operations decision-making using the underlying disciplines: behavioural, qualitative, economic, and systems. Prerequisite: BSAD 241. Three credits.

391 Foundations of Management Research
An introduction to effective research in business and management. Topics include the scientific method in management research; approaches to issues in management; developing conceptual models and hypotheses; defining a theoretical framework; reading current literature; evaluating research; and understanding the limitations of management research. Required for all honours students; open to other third- and fourth-year BBA students with an average of at least 70 as a BSAD elective. Three credits.

415 Electronic Business
Prerequisite: BSAD 241. Cross-listed as INFO 446; see INFO 446. Three credits.

416 Project Management and Practice
This course covers the factors necessary for successful management of system development or enhancement projects. Technical and behavioural aspects of project management are discussed. Cross-listed as INFO 416. Prerequisite: BSAD 241. Three credits.

418 Topics in Information Systems
Prerequisite: INFO 102. Cross-listed as INFO 418; see INFO 418. Three credits.

419 Management of Information Technology
Prerequisite: BSAD 241. Cross-listed as INFO 482; see INFO 482. Three credits.
424 Financial Accounting Theory
A study of the development of accounting theory and the relationship of theory to practice. Major contributions to accounting theory will be examined. Prerequisite: BSAD 323. Three credits.

425 Auditing
An examination of audit strategy, procedures, and risk, as well as reporting standards and ethical and legal considerations in the current business environment. Emphasis is placed upon the theory of auditing in the context of the attest function. Prerequisite: BSAD 323. Three credits.

426 Advanced Accounting I
Develops an understanding of the financial reporting process by examining theory and practice in the management of financial disclosure. The course also deals with the accounting treatment of inter-corporate investments and consolidations. Prerequisite: BSAD 324. Three credits.

427 Management Control Systems
Focuses on managing organizational performance to optimize the implementation of organizational strategies. Within an established framework, this course reviews the process through which an organization manages performance, and specific techniques that are used to control the implementation of strategy. Concepts are reinforced via case analysis. Prerequisite: BSAD 321. Three credits.

428 Advanced Accounting II
Examine such accounting topics as the financial reporting of international activities, non-business organizations, and estates and trusts. The reporting requirements for interim and segmented financial statements and bankruptcy and receivership are examined. Prerequisite: BSAD 426. Three credits.

431 Services Marketing
This course augments other marketing electives by focusing on (intangible) services. Services now account for more than 78% of Canada’s GDP and most graduates will work in a service firm. Unlike products, most services are intangible, time constrained, co-produced by the provider and the customer, perishable and highly variable. These characteristics pose unique challenges to services as diverse as insurance, investment advice, banking, entertainment, tourism and hospitality, healthcare, consulting, transportation and education. Course methods are highly experiential and include presentations, exercises, cases and journals. Prerequisites: BSAD 331 and 335, completed or concurrent. Three credits.

432 Retailing
Focuses on improving the management of retail institutions in Canada using a marketing orientation. Areas of retail strategy include the retail environment, store location, product mix control, channel choice, store layout and financial management. Exercises, cases and projects will be used to develop analytic proficiency and emphasize evidence based solutions. Prerequisites: BSAD 331 and 335, completed or concurrent. Three credits.

434 Integrated Marketing Communications
Focuses on the design and implementation of integrated marketing communication strategies. Advertising and sales promotion activities are emphasized. Topics include defining the roles and objectives of marketing communications; selecting media; creating advertisements; and evaluating results. Prerequisites: BSAD 331 and 335, completed or concurrent. Three credits.

435 Sales Force Management
An introductory course in sales force management. Topics include organizing the sales effort; establishing territories and quotas; hiring, training, compensating and supervising sales people; analyzing and evaluating the sales effort; and the ethical responsibilities associated with a sales career. Prerequisite: BSAD 333 or 361. Three credits.

444 Advanced Financial Management
Considers a broad range of financial management issues using the theory and procedural skills developed in earlier courses and applied to comprehensive case situations. Topics include working capital management, capital structure, dividend policy, cost of capital, capital budgeting, and mergers and acquisitions. Prerequisite: BSAD 342. Three credits.

445 Derivatives
This comprehensive course in derivative markets and instruments focuses on analyzing standard derivative instruments such as forwards, futures, swaps, and options. By the end of the course, students will have a good knowledge of how these products work, how they are used, how they are priced, and how financial institutions hedge their risks when they trade the products. Additionally, they will better understand the social and economic consequences of derivatives, and their implications for the larger investment community. Prerequisite: BSAD 443. Three credits.

448 International Financial Management
This course focuses on financial management of the firm in the international marketplace. It provides grounding in the academic literature on international financial management, and develops professional decision-making skills. Students will read extensively and class discussions will include current issues and business cases. Prerequisites: BSAD 241, 342 or permission of the instructor. Three credits.

449 Portfolio Management
This course provides an exploration of the theory and practice of portfolio management. Students will learn tools for managing risk, allocating funds among asset classes, and measuring the success of managers. Student will also learn how market factors, at both the macro and micro level, impact portfolio performance. By the end of the course, participants will be able to construct an investment portfolio based on a solid understanding of investment principles and be able to use available financial market information to assess its on-going performance. Prerequisite: BSAD 344 or 443. Three credits.

454 Taxation
Examines the Canadian tax system with emphasis on the Income Tax Act and its effect on business decisions. The course examines the determination of income for corporations and individuals, the taxation of corporate distributions, and the computation of tax. Prerequisite: BSAD 241. Three credits.

456 Small Business Management
This course examines the unique aspects of managing a small firm, its growth and its harvest. The course incorporates current theory and practice in dealing with a variety of general management topics, and students will gain practical decision-making experience in small business management issues. Prerequisites: BSAD 221, 223, 231, 241, 261. Three credits.

457 Social Entrepreneurship
The context, models, trends, opportunities, and challenges associated with social entrepreneurship focus on areas of public concern such as economic development, education, community welfare, and healthcare. These issues are examined using case studies, group projects, and experiential learning. Emphasis is on how entrepreneurship is combined with the tools of business to create effective responses to social needs and innovative solutions to social problems. Cross-listed as DEVS 457. Prerequisite: BSAD 241. Three credits.

458 Research Project: Enterprise Development
Students in the enterprise development major are required to complete a field-based project. This project may be completed for or with a community-based economic development organization, a small business or as the implementation of a new venture business plan. Approved projects may be completed either during the summer after third year or during the fourth year. Restricted to enterprise development majors; equivalent to BSAD 492 for other majors. Three credits.

461 Leadership
A theoretical and a practical exploration of leadership. Using a range of materials and individual examples, students will develop an understanding of the leadership role in organizations and the behaviours of exemplary leaders. Experiential learning techniques will allow students to perform, observe and reflect upon leadership to gain a better sense of themselves as a leader. Prerequisite: BSAD 361. Three credits.

462 Industrial Relations
Examines the history, current structure, and future of industrial relations in Canada, including trade unions and management, collective bargaining, and contract administration. Students will benefit from guest lectures and from engaging in negotiation-simulation exercises. Prerequisite: BSAD 361. Three credits.

466 Lessons in Leadership from Film & Literature
This course extends students' knowledge of leadership theory to analyze case studies in leadership. Cases are drawn largely from film, both fiction and non-fiction, and lessons are applied to a modern business context. Prerequisite: BSAD 461 recommended. Three credits.

467 Leading Change: The Challenge of Creating and Sustaining Organizational Change
A major challenge facing all organizations is how to adapt to change. Pressures for change come from many areas, including social, technological, demographic, environmental, and political. This course explores the challenge of leading and sustaining organizational change, including starting a change process, the challenges leaders face when initiating change, and sustaining change. Prerequisite: BSAD 361. Three credits.

471 Strategic Management
This is the capstone course in business and is required of all students. The course takes a strategic approach to integrating concepts from management,
marketing, accounting, finance and information systems. From the perspective of senior executives, students study vision and mission statements, analyze internal and external environments, and the formulation, implementation and monitoring of business and corporate strategy in order to achieve sustainable competitive advantage. Course methods may include lectures, guest speakers, cases, presentations, simulations and traditional examinations. Prerequisite: BSAD 241; at least 24 credits at the 300-level. Three credits.

473 Advanced Topics in Responsible Management
This course introduces students to advanced topics in corporate social responsibility, providing students with deeper insights into responsible business practices and stakeholder engagement. The course covers a range of topics relevant to responsible business practices and stakeholder engagement, including ethical decision-making, corporate social responsibility, and sustainability. The course includes case studies and guest lectures from industry leaders. Prerequisites: BSAD 331, 333. Three credits.

474 International Human Resource Management
Students will explore the challenges of managing human resources in an increasingly international business context. The course covers a range of topics relevant for HRM practitioners including the role of culture, international business strategies and HRM models, international recruitment, expatriation and repatriation, international compensation, and performance management. A comparative approach to selected topics like employment governance and international relations is included. Key international employment regulators and regulatory frameworks are also covered. Methods: lectures, cases, presentations. Prerequisites: BSAD 363 or permission of instructor. Three credits.

488 Selected Topics
The topic for 2015-2016 is Advertising Agency Simulation. Students from StFX will collaborate with NSCAD design students in running an advertising agency and creating an ad campaign. The objective of the course is to give students the opportunity to integrate the learning from marketing courses in the highly collaborative, living lab environment. Students will fill typical ad agency roles and be responsible for pitching a client, creating an integrated marketing communications plan, creating and producing an ad campaign. Prerequisites: BSAD 331, 434 (concurrent). Three credits.

489 Selected Topics
The topic for 2015-2016 is Business Intelligence. Organizations must sense and respond to changes in their internal and external environments. To do this, firms should implement business intelligence (BI) systems—processes and tools that transform data into actionable information. Through case studies, this course helps students understand the value that information provides and an overview of how BI systems are designed and deployed. Topics covered include information-driven decision making, BI system architecture, BI tools and BI development methodology. Credit will be granted for only one of this course and BSAD/INFO 418 completed in 2014-2015. Cross-listed as INFO 498. Prerequisite: INFO 102, INFO 275 is recommended. Three credits.

490 Selected Topics
The topic for 2015-2016 is Digital Marketing. Focuses on aligning and executing a digital marketing strategy sensitive to the ways in which consumers interact with their brands and make purchasing decisions in today’s hyper-connected media environment. By embracing the changing digital marketing landscape, students will learn to shape a digital strategy that allows insights come to life in the right channel, for the right consumer, at the right time. Prerequisites: BSAD 331, 333. Three credits.

492 Consulting Project for Majors
Exposes students to applied research in business through completion of a consulting assignment. Required for all majors in finance, information systems, leadership in management, and marketing. Restricted to fourth-year major and honours students. Three credits over the full academic year.

494 Honours Thesis
Under the supervision of a faculty member, honours students will prepare and submit a thesis. Normally students develop and present draft proposals as part of BSAD 391, then complete the proposal, conduct the fieldwork and present/defend their theses as part of BSAD 494. Prerequisite: BSAD 391. Three credits over the full year.

495 Selected Topics
The topic for 2015-2016 is Essentials of Graphic Design for Marketers. We live during a visual revolution. Marketers have three seconds or less to make an impression on potential clients. This is a lab-based course where students will examine the design process; with a focus on understanding how design principles and elements work together to create powerful visual communication. Using different elements in Adobe, students will create a variety of designs in different media using typographies, colours, and images. Prerequisite: BSAD 331 or permission of the department chair. Three credits.

496 Selected Topics
The topic for 2015-2016 is Financial Markets and Institutions. A survey of important funds markets and institutions including sources of supply and demand for funds in each market. The course begins with an introduction of the key financial markets and financial institutions, explains why interest rates change over time and explains why yields vary among securities. Major financial markets (money markets, bond markets, mortgage markets, equity markets, futures market, options markets, swap markets and foreign exchange derivative markets) are discussed. The integration of each market with other markets is stressed throughout the course. Prerequisites: BSAD 342; BSAD 443 recommended. Three credits.

497 Selected Topics
The topic for 2015-2016 is Human Resource Management. This course introduces students to human resource management and the role of the HRM professional in organizations. Prerequisites: BSAD 261; third or fourth-year standing. Three credits.

498 Selected Topics
The topic for 2015-2016 is Leadership: Conversations with the C-Suite. Each week the class will host a C-Suite Executive chosen from a variety of organizations. These leaders come from private sector, public sector, professional and publicly traded companies. Students, in teams, will research the leader and their organization/industry, brief the class, send the guest participant discussion questions and then lead the guest through the questions. The team will do a summary report of their interaction with the C-Suite executive. Students will learn about leadership through these interactions with C-Suite leaders. Restricted to fourth-year honours or major students. Three credits.

9.7 CANADIAN STUDIES
J. Bickerton, Ph.D., Co-ordinator
Students in BA programs may count as a pair or minor (subject B) courses that have as their common characteristic substantial Canadian content. The minor must be made up of at least two subjects and not more than three, and may not include any course at the 100 level. Subjects (but not courses) drawn upon to make up such a concentration may also be used to make up other subject requirements for the BA degree. Courses acceptable for such a pair or minor are listed below. Departmental prerequisites will apply.

Anthropology
ANTH 234 Introduction to Indigenous Anthropology  3
ANTH 310 Anthropology of Tourism  3
ANTH 332 Mi’kmaq Studies  3
ANTH 341 North American Archaeology  3
ANTH 435 Advanced Indigenous Issues  3

Art
ART 300/HIST 300 A Cultural and Intellectual History of Canada  6
ART 343 Issues in Canadian Art through World War II  3
ART 344 Issues in Contemporary Canadian Art  3

Celtic Studies
CELT 332 The Scottish Gael in North America  3

Development Studies
DEVS 202 International Development: Canada  3

Economics
ECON 241 Canadian Economic Prospects and Challenges  3
ECON 391 Public Finance I: Expenditures  3
ECON 392 Public Finance II: Taxation  3

English
ENGL 263 Canadian Literature I: 18th and 19th-Centuries  3
ENGL 264 Canadian Literature II: The 20th Century and After  3
ENGL 366 Special Topics in Canadian Literature  3

Other courses, not listed here, may be considered designated courses with permission of the Canadian studies co-ordinator.

**9.8 CATHOLIC STUDIES**

Catholic studies is an interdisciplinary program in the theology, history, artistic culture, literature, philosophy, and institutions associated with Roman Catholicism. Students who major in Catholic studies must take CATH 100; 12 additional credits from the following core courses in Catholic studies; and 12 credits from the designated courses listed below.

**100 Introduction to Catholic Traditions and Culture**

This course examines major themes, institutions, and practices in Catholicism, providing an interdisciplinary overview of Catholic traditions and culture. Topics include: Catholic perspectives on reading the Bible; the person and work of Jesus of Nazareth; institutions and change in the Catholic Church, including the history of the papacy; Catholicism and modern science; and Catholic teaching on ethics and social justice. Each unit will include an historical overview, illustrating themes through art, music, film, and other media. Credit will be granted for only one of CATH 100 or CATH 200. Six credits.

**241 Sin and Salvation in the Catholic Tradition**

This course will study the themes of sin and salvation as they appear in the Bible, in literature, and in two great theological controversies, the Pelagian controversy of the 5th century, and the Protestant Reformation of the 16th century. Three credits. Not offered 2015-2016.

**245 Christ in the Catholic Tradition**

This course will examine the person, nature, and work of Christ as these are understood in the Catholic tradition. Topics and texts will include: the Bible, theological works from different historical periods, literary presentations of Christ, and artistic depictions of Christ. Three credits. Not offered 2015-2016.

**251 The End of the World in the Catholic Tradition**

The purpose of this course is to give students an interdisciplinary understanding of eschatology, which is the study of theological and religious views about ‘last things’ (death, heaven, purgatory, hell). This topic will be presented from three points of view: historical sources, including scripture; doctrinal issues; artistic depictions. Three credits. Not offered 2015-2016.

**298 Selected Topics**

The topic for 2015-2016 is Angles and Demons. The word ‘angel’ originally meant ‘messenger’ and, in Judaism, Christianity, and Islam, it refers specifically to messengers of the most exalted form. This course will trace the evolution of Catholic teaching about angels and, as a parallel, about the nature and role of demons. By the end of the course, students will have a deeper understanding of what Christianity teaches about the role of angels in everyday life, about demons, and exorcism. Three credits.

**301 Classic Texts in Roman Catholicismo**

An interdisciplinary seminar on the works of important thinkers in the Catholic tradition from the early and mediaeval Church, such as St. Augustine, St. Anselm, St. Thomas Aquinas, and Hildegard of Bingen. The seminar will normally focus on one thinker. Credit will be granted for only one of CATH 301 or CATH 300. Prerequisites: CATH 100 or 200 or permission of instructor. Three credits. Not offered 2015-2016.

**302 Classic Texts in Roman Catholicismo II**

An interdisciplinary seminar on the works of important thinkers in the Catholic tradition from the modern and contemporary Church, such as St. Theresa of Avila, St. John of the Cross, John Henry Newman, Jacques Maritain, and Thomas Merton. The seminar will normally focus on one thinker. Credit will be granted for only one of CATH 302 and CATH 300. Prerequisites: CATH 100 or 200 or permission of instructor. Three credits. Not offered 2015-2016.

**321 Classic Debates in Christianity & Science**

This course reviews the major historical developments in Christian teaching on science. The course has four parts: understanding the relationship between secular...
and Scriptural knowledge (or reason and faith) in the Early Church; creation and the philosophy of nature in the 13th century; Galileo and the Inquisition; and 19th century debates over evolution. Credit will be granted for only one of CATH 321 or CATH 320. Three credits. Not offered 2015-2016.

322 Contemporary Issues in Christianity & Science
This course examines the contemporary interaction between the sciences and Christianity. Topics may include: recent Christian responses to methodologies in the sciences; evolutionary theory and the interpretation of creation narratives in the book of Genesis; the meaning of human embodiment and its relevance to understanding sexuality and issues in bioethics; neuroscience and the phenomenon of religious experience; the impact of contemporary cosmology, technology, and biology on Christian theology. Credit will be granted for only one of CATH 322 or CATH 320. Three credits.

331 Catholicism and the Arts I
This course will trace Catholic themes and ideas about Catholicism in literary, musical, architectural, or artistic works from the beginnings of Christianity to the early Renaissance. Cross-listed as ART 331. Credit will be granted for only one of CATH 331 or CATH 330. Three credits.

332 Catholicism and the Arts II
This course will trace Catholic themes and ideas about Catholicism in literary, musical, architectural, or artistic works from the Renaissance until the contemporary era. Credit will be granted for only one of CATH 332 or CATH 330. Cross-listed as ART 332. Three credits.

341 Catholic Social Thought
Rooted in scripture, philosophy, and theology, Catholic social thought proposes principles of justice that emphasize the dignity of the person, the value of economic and political institutions, and the importance of a common good. This course explores these principles and their application to contemporary social, political, and economic issues with reference to official documents of the Catholic Church. Three credits. Not offered 2015-2016.

344 Education in the Catholic Tradition: History, Theories, and Practices
This course provides an historical overview of models of education in the Catholic tradition, of debates on the purposes and structure of education, and of texts that have influenced Catholic education and its applications. Three credits. Not offered 2015-2016.

Designated Courses
The following courses may be chosen as designated courses to complete the program in Catholic Studies. Normally a student will take no more than 9 credits from any one of these subject areas. Should a student take CATH 331, 332, only 6 further credits may be taken from the art electives.

9.9 CELTIC STUDIES

R. de Vries, Ph.D.
M. Linkletter, Ph.D.
Professor Emerita
Sr. M. MacDonell, Ph.D.

Celtic studies encompasses a wide range of history, geography, and culture: from the ancient Celts of continental Europe to the modern Celtic peoples of Scotland, Ireland, Wales, Cornwall, Brittany, and the Isle of Man. The program focuses on the Gaelic language, history, and culture of Scotland, Nova Scotia, and Ireland.

Interest in Celtic studies has grown in recent years. Some graduates have pursued advanced degrees in Celtic or related fields. Others have found employment in the region involving Gaelic.

Students may count courses in Celtic history (CELT 131, 132, 331, 332) as courses in the Department of History. Students may count SOCI 373 Irish Society as a credit in Celtic studies. Suggested streams of specialization in Celtic Studies:

a) Scottish Gaelic Studies: CELT 100, 200, 300, 331, 332, 341, 342, 352, 420
b) Irish Studies: CELT 110, 210, 351, 431, 432; SOCI 373
c) Gaelic Studies (Ireland/Scotland): CELT 110, 200, 210, 221, 341, 342, 351, 352, 431, 432
d) Celtic Studies (comparative/medieval): CELT 100, 110, 115, 131, 132, 200, 210, 220, 221, 222, 230, 331, 341, 431

Major Program
See chapter 4.

Advanced Major
Advanced majors must complete 36 credits in Celtic studies, including: CELT 100 or 110; 131 and 132, or 221 and 222; 200 or 210; 331 and 332, or 351 and 352; six credits CELT at the 400 level; six additional credits CELT, and a senior paper.

Honours Program
Honours candidates are required to complete: CELT 100; 131 and 132, or 221 and 222; 200; 110 or 115 or 300; 420, or 431 and 432; 490 (thesis); 27 credits CELT.

Master of Arts
The Master of Arts degree may be offered in Celtic studies. See chapter 8.

100 Scottish Gaelic
Designed for students who have no knowledge of the language, this course provides instruction in basic Gaelic grammar, phonetics, and sentence structure. Texts and recordings are used for practice in reading and conversation. May not be taken concurrently with CELT 110. Six credits. Offered 2015-2016.

110 Irish Gaelic
An introduction to the Irish language as it is spoken in the Gaeltacht or Irish-speaking districts. Students will be introduced to the basics of spoken and written Irish. May not be taken concurrently with CELT 100. Six credits. Offered 2015-2016.

115 Modern Welsh
This course will provide an introduction to the language. Students will learn to read, write and speak elementary Welsh. The class will also learn a number of Welsh folksongs and proverbs. Six credits. Not offered 2015-2016.

131 Celtic Civilization I
This course provides an introduction to the Celtic peoples from the Bronze Age to interactions with the Greeks and Romans. It discusses the types of evidence available for the understanding of Celtic cultures relating to archaeology (including art and architecture, numismatics (coins), weaponry, trade, votive offerings), history (Greek and Roman sources, geography), linguistics (inscriptions, place-names,
Celtic Language family-tree), and customs (burial, dining, drinking, dress, warfare, religion). Acceptable as a course in history. Three credits. Offered 2015-2016.

### 132 Celtic Civilization II
This course covers the Celtic languages and cultures of Scotland, Ireland, Wales, Brittany, the Isle of Man, and Cornwall from the early historic to the early modern period. Topics will include music, folklore, literature, present-day revival movements, and the meaning of Cultural Celtic in North America today. Acceptable as a course in history. Prerequisite: CELT 131. Three credits. Offered 2015-2016.

### 161 Selected Topics

#### 200 Second-Year Scottish Gaelic
Includes selected readings of riddles, proverbs, poetry, and folktales as well as conversation and composition. Six credits. Offered 2015-2016.

#### 210 Second-Year Irish Gaelic
A continuation of CELT 110, this course introduces advanced grammatical concepts and includes conversation and composition practice. Readings from modern Irish literature and folklore will be used to illustrate differences in the three major dialects. The course will include an introduction to Irish script and the manuscript tradition. Six credits. Not offered 2015-2016.

#### 220 Celtic Paganism
This course examines the religious practices and beliefs of the ancient Celtic peoples that we can glean from archaeology, reports of Greek and Roman commentators, place-name evidence, and the mythology in medieval Irish and Welsh narrative tradition. Other topics include syncretism, the adaptation of pagan festivals into Christian holidays, the persistence of elements of paganism into the Christian era, witchcraft in Scotland and Ireland in the context of the European phenomenon and neo-paganism today. Cross-listed as RELS 219. Three credits. Offered 2015-2016.

#### 221 Celtic Literature: Early Ireland
This course is designed to acquaint students with the wide scope of early Irish literature, one of the oldest vernacular literary traditions in Europe, and is a survey of medieval Irish saga literature in translation. Types of tales to be read include stories of heroes, kings and queens, and supernatural beings. Three credits. Not offered 2015-16.

#### 222 Celtic Literature: Early Wales
This course is a survey of medieval Welsh prose and poetry. Tales to be read will include those in the Mabinogi as well as some of the earliest tales extant concerning King Arthur. Various genres of poetry will be read, including samples of early heroic and satirical verse. Three credits. Not offered 2015-2016.

#### 230 Celtic Christianity
This course is an exploration of the development of Christianity amongst the Celtic peoples. A major facet will be the medieval hagiographic tradition and saints’ cults from the fourth to the twelfth centuries. Other topics include monasticism, peregrini, the Hiberno-Schottish mission to the continent, conflict with Roman Catholicism, material culture, the modern use of the term “Celtic Christianity”. Cross-listed as RELS 229. Three credits. Offered 2015-2016.

#### 300 Third-Year Scottish Gaelic
An advanced-level course with emphasis on retaining fluency. The course will concentrate on the Gaelic of Nova Scotia with readings from local publications. The class will also work on transcribing recordings of local speakers. Prerequisites: CELT 100, 200. Six credits. Offered 2015-2016.

#### 331 Scottish History
This course is a survey of the history of Scotland from the earliest times to the present with special emphasis on the role of the Gael. Topics that will be covered include the Dalriadic Scots and the consolidation of the kingdom of Alba, the early Gaelic church, the Kingdom and Lordship of the Isles, the rise of the clans, the decline of Gaelic, the Scottish Wars of Independence, the Reformation and union with England. Acceptable as a credit in history. Credit will be granted for only one of CELT 331 and CELT 333. Three credits. Not offered 2015-2016.

#### 332 The Scots in North America
This course will follow the fortunes of the Gaels of the Highland diaspora. Emphasis will be placed on studying the Highland settlements of North America with an in-depth look at the history of the Gaels in the Maritime Provinces, particularly Nova Scotia, from the earliest settlements to more recent times. Acceptable as a credit in history. Credit will be granted for only one of CELT 332 and CELT 333. Prerequisite: CELT 331. Three credits. Not offered 2015-2016.

#### 341 Scottish Gaelic Poetry I
A survey of Scottish Gaelic poetry from the 6th to the 16th century. It familiarizes students with some of the masterpieces of Gaelic literature, provides a grounding in the historical and cultural aspects of literary production in the Scottish Gaelic world, and introduces aspects of metrical and literary analysis. Taught through the medium of English. Credit will be granted for only one of CELT 341 and CELT 340. Three credits. Not offered 2015-2016.

#### 342 Scottish Gaelic Poetry II
A survey of Scottish Gaelic poetry from the 17th and 18th centuries. It familiarizes students with some of the masterpieces of Gaelic literature, provides a grounding in the historical and cultural aspects of literary production in the Scottish Gaelic world, and introduces aspects of metrical and literary analysis. Taught through the medium of English. Credit will be granted for only one of CELT 342 and CELT 340. Prerequisite: CELT 341. Three credits. Not offered 2015-2016.

#### 351 Irish Folklore
Studies in the oral traditions of Gaelic Ireland including the folktale, the storyteller, folklore collectors, folktale tradition, fairies and calendar customs. Credit will be granted for only one of CELT 351 and CELT 350. Three credits. Offered 2015-2016.

#### 352 Folklore of Scotland and Nova Scotia
An introduction to the Gaelic folklore of Scotland and Nova Scotia, with an emphasis on wonder tales, clan sagas, Fenian tales, calendar customs, rites of passage, the supernatural and the history of folkloristics. Credit will be granted for only one of CELT 352 and CELT 350. Three credits. Offered 2015-2016.

#### 361 Selected Topics I
The topic for 2015-2016 is Medieval Food and Medicine. This course examines the history of food and medicine in Western society, with particular emphasis on medieval Ireland, Wales and Scotland. After an overview of medieval (Celtic) medicine, we will focus on the roles and functions of food in everyday life. We will conclude by examining food and medicine in present-day folk-beliefs. This course is of particular interest for students in Celtic Studies, History, and those interested in the history of food and/or medicine. Three credits.

#### 362 Selected Topics II
The topic for 2015-2016 is Sport and Entertainment. This course focuses on the types and (social) functions of sport and entertainment throughout history, with particular focus on medieval Ireland and Wales. In the sports component, we will examine different sports, including racing, throwing and ball games, and sports injuries. Lecture topics for the entertainment component include different kinds of music, instruments, entertainers and board-games. This course is of particular interest for students in Celtic Studies, History, and students interested in sport and entertainment. Three credits.

#### 420 Seminar on Scottish Gaelic Immigrant Literature
A study of prose and poetry written in North America, emphasizing Nova Scotian examples, and including material from such current and historical publications as MacTalla, Mosgladh, The Casket, Clàrsach na Coille. Taught through the medium of Scottish Gaelic. Prerequisite: three years of Gaelic. Six credits. Not offered 2015-2016.

#### 431 Irish Gaelic Poetry I
Explores the early stages of poetry in the Irish language: 500-1650 AD. The class will cover Filiocht na Sgol, metrics, religious poetry and eulogy. The course work will be in English but some knowledge of Irish or Scottish Gaelic is recommended. Credit will be granted for only one of CELT 431 and CELT 430. Prerequisite: Three credits CELT. Three credits. Not offered 2015-2016.

#### 432 Irish Gaelic Poetry II
Explores Irish language poetry from 1650 AD to the present. The course work will be in English but some knowledge of Irish or Scottish Gaelic is recommended. Credit will be granted for only one of CELT 432 and CELT 430. Prerequisite: Three credits CELT. Three credits. Not offered 2015-2016.

#### 490 Honours Thesis
Three credits.

#### 499 Directed Study
A directed study course in advanced topics in Celtic studies. See section 3.5. Three or six credits.

**GRADUATE COURSES**
Master of Arts in Celtic Studies
Consult the department chair for a list of available courses.
Chemistry deals with the molecular and atomic levels, seeking to explain structures, properties, and reactions, and to develop syntheses of new substances and new uses for known substances. The study of chemistry prepares graduates for advanced work in biology, engineering, geology, medicine, and other professions; for careers in industry, government agencies, science journalism, and teaching. SIFX chemistry graduates can be found carrying out tasks as varied as art conservation, pharmaceutical research, and industrial product development.

Faculty members are actively engaged in pure and applied chemistry research, and opportunities exist for students to participate. Chemistry laboratories are equipped with a wide range of modern instrumentation, including spectroscopic equipment (atomic absorption, FT-infrared, multi-nuclear magnetic resonance, photoelectron, ultraviolet/visible); chromatographic analyzers; and instrumentation to carry out calorimetry, capillary electrophoresis, differential thermal analysis, polargraphy, and thermogravimetric analysis. Junior and senior courses involve frequent practical experience with this equipment.

The department offers honours, advanced major and major programs at the B.Sc. level. Joint honours and advanced major programs are offered in conjunction with other science departments and business administration. General requirements are given in chapter 7.

**Department Requirements**

Students must choose their courses in consultation with the department chair; programs and required courses are listed below. Students considering an advanced major or honours degree must complete the physics and second mathematics requirements (see below) by the end of their second year and take CHEM 220, 245, 265 in their second year. Potential honours students should also take CHEM 231, 232 in their second year. All chemistry students are required to take CHEM 325 in the first term of their junior year. For the recommended course sequence, see the department’s website at sites.stfx.ca/chemistry/

Chemistry students are required to attend all department seminars during their third and fourth years. Credit for a course may not be earned if the lab component is not reasonably completed. Students who are concerned that their health may be adversely affected by a lab should consult their professor or department chair. As well, students who are subject to a medical condition, e.g., frequent fainting, seizures, that may endanger them or others in a lab setting, are required to inform the professor, in confidence, so that steps can be taken to minimize the danger to the student and others in the lab.

**Major**

The course pattern for major in chemistry is:

- **CHEM**
  - 6 credits introductory (100 or 120); 3 credits analytical (265); 3 credits inorganic (245); 6 credits organic (220); 3 credits physical (231); 3 credits structural (325); 6 credits electives from 255, 321, 322, 331, 332, 341, 342, 355, 361, 362, 411, 421, 422; 6 credits CHEM (or other science with permission of the department chair); for a total of 36 credits; plus 391, 491(department seminars); if 331 is taken then CHEM 232 is also required

- **Science B**
  - 12 credits in another science

- **Science C**
  - 6 credits in another science (science B or C must be MATH and include MATH 111, 112 or 121 and 122)

- **Science Elect**
  - 6 credits, PHYS 100 or 120 (120 preferred)

- **Arts X**
  - 12 credits in a humanities discipline

- **Arts Y**
  - 12 credits in a social science discipline

- **Arts Z**
  - 6 credits in a humanities or social science discipline. Subjects X, Y, and Z must be different.

- **Open Elect**
  - 30 credits

**Advanced Major**

The course pattern for advanced major in chemistry is:

- **CHEM**
  - 6 credits introductory (100 or 120); 9 credits analytical (265, 361, 362); 6 credits inorganic (245, 341); 6 credits organic (220); 6 credits physical (231, 232); 3 credits biochemistry (255); 6 credits electives from 331, 332, 342, 411, 421, 422; for a total of 42 credits; plus 391 and 491

- **Science B**
  - 12 credits in another science

- **Science C**
  - 6 credits of in another science (science B or C must be MATH and include MATH 111, 112 or 121 and 122)

- **Arts X**
  - 12 credits in a humanities or social science discipline

- **Arts Y**
  - 6 credits in a humanities or social science discipline

- **Approved Elect**
  - 18 credits approved electives; unless it is taken as a science B or C course, these electives must include CHEM 325 (structural), PHYS 120, and 6 credits must be from MATH 253, 254, 267, 367 (or 221). The balance must come from science, MATH, or CSCI courses, or PHIL 210

- **Open Elect**
  - 24 credits

**Honours**

The course pattern for honours in chemistry is:

- **CHEM**
  - 6 credits introductory (100 or 120); 9 credits analytical (265, 361, 362); 9 credits inorganic (245, 341, 342); 12 credits organic (220, 421, 422); 12 credits physical (231, 232, 331, 332); 3 credits biochemistry (255); 3 credits honours thesis (493); 6 credits electives (may be in another science with permission of the department chair); for a total of 60 credits; plus 391 and 491

- **Science B**
  - 12 credits in another science

- **Science C**
  - 6 credits in another science (science B or C must be MATH and include MATH 111, 112 or 121, 122)

- **Arts X**
  - 12 credits in a humanities or social science discipline

- **Arts Y**
  - 6 credits in a humanities or social science discipline

- **Approved Elect**
  - 18 credits approved electives; unless they are taken in science B or C courses, these electives must include CHEM 325(structural), PHYS 120, and 6 credits must be from MATH 253, 254, 267, 367 (or 221). The balance must come from science, MATH, or CSCI courses, or PHIL 210

- **Open Elect**
  - 6 credits arts or science electives

The honours and advanced major degrees are accredited by the Canadian Society for Chemistry.

**B.Sc. with Joint Honours**

**B.Sc. with Joint Advanced Major Degrees**

Joint honours and joint advanced major degree programs are available between chemistry and each of the following: biology, computer science, earth sciences, mathematics, physics, and business administration (advanced major only). Please note that a joint program may take more than four years to complete, and, where applicable, the physics and second six credits of mathematics must be completed by the end of the sophomore year. Interested students should consult the chair of the chemistry department.

The joint honours degrees with biology, computer science, earth sciences and mathematics, and the joint advanced major with biology degree are accredited by the Canadian Society for Chemistry.

**Chemistry and Environmental Sciences**

See section 9.20

**Master of Science**

Research fields available include various aspects of analytical, environmental, inorganic, organic and physical chemistry. General requirements for graduate degrees are outlined in chapter 8. For specific requirements, consult the chemistry faculty or department chair.

**100 General Chemistry**

The fundamental principles of chemistry, including atomic and molecular structure, bonding, elementary thermo-chemistry and thermodynamics, oxidation-reduction reactions, kinetics and equilibrium reactions with particular reference to the behaviour of solutions, and an introduction to organic chemistry. This course emphasizes the application of chemical principles in areas of interest to students in the life sciences. Credit will be granted for only one of CHEM 100 or CHEM 120. Six credits and lab.

**120 Principles of Chemistry**

Reaction types and stoichiometry; applications of equilibria; principles of chemical thermodynamics; electrochemistry; atomic structure and models of chemical bonding; chemical kinetics; properties of gases, liquids, solids, and solutions; chemistry of the representative elements, introduction to organic chemistry. The applications are in areas of interest to students contemplating further studies in chemistry, engineering, mathematics, and the physical sciences. Credit will be granted for only one of CHEM 120 or CHEM 100. Six credits and lab.
150 **Fundamentals of General and Biological Chemistry**

Topics include basic concepts of general chemistry, introduction to organic nomenclature and the reactivities of functional groups; coverage of the fundamentals of biological chemistry. May not be used as a prerequisite for any other chemistry course. Open to students in nursing, human kinetics, and arts; may not be taken for credit by other science students. Restricted enrolment. Six credits and lab.

220 **Organic Chemistry**

Areas of study include: the properties and reactions of common classes of organic compounds; relationships between the structures of organic compounds and their physical and chemical properties; relationships between these properties and their technological uses and biological activities; reaction mechanisms; spectroscopic techniques with emphasis on nuclear magnetic resonance; and stereochemistry. Credit will be granted for only one of CHEM 220, 221, 222, 225. Prerequisite: CHEM 100 or 120. Six credits and lab.

222 **Organic Chemistry II**

The second term of CHEM 220; topics include aromatics, reaction mechanisms and spectroscopy. Prerequisite: CHEM 221. Three credits and lab.

225 **Principles of Organic Chemistry**

An introduction to organic chemistry. The course focuses on the properties and reactions of common classes of organic compounds; the relationship between the structures of organic compounds and their physical and chemical properties. Some reaction mechanisms are also covered. Credit will be granted for only one of CHEM 225, 220, 221, 222. Prerequisite: CHEM 100 or 120. Three credits and lab.

231 **Physical Chemistry I**

An introduction to physical chemistry, this course begins with the properties of ideal and real gases; covers the fundamental principles of thermodynamics (the three laws of thermodynamics) and their application to physical and chemical transformations, and chemical reaction equilibrium and concludes with the chemical potential and its application to phase equilibria. Prerequisites: CHEM 100 or 120; MATH 111 and 112 or 121 and 122. Three credits and lab.

232 **Physical Chemistry II**

Building upon the principles developed in CHEM 231, this course describes the thermodynamics of real systems. Students will learn the applications of chemical thermodynamics, including phase equilibria in multi-component systems, ideal and real solutions, and electrochemistry; the principles governing the dynamics of systems, including the kinetic molecular theory of gases, transport properties, and the rates of chemical reactions. Prerequisite: CHEM 231. Three credits and lab.

245 **Basic Inorganic Chemistry**

An introductory course on the properties and uses of the main group elements; the practical and commercial uses of various inorganic compounds and elements; and the factors contributing to the energies and types of chemical bonds. Prerequisite: CHEM 100 or 120. Three credits and lab.

255 **Introductory Biochemistry**

Areas of study include the chemistry of carbohydrates, fats, proteins, nucleic acids and some enzymes. Biochemical energetics, metabolism pathways and some commonly used experimental biochemical techniques are also examined. Prerequisite: CHEM 220 completed (recommended) or concurrent or CHEM 225 or 221. Three credits and lab.

265 **Basic Analytical and Environmental Chemistry**

An introductory course which includes a survey of aqueous titration methods, the evaluation of analytical data, and an introduction to electrochemistry, UV visible absorption spectroscopy and chromatography. Prerequisite: CHEM 100 or 120. Three credits and lab.

321 **Intermediate Organic Chemistry**

A continuation of CHEM 220, this course covers: addition and condensation polymerization; di-valent carbon compounds; pericyclic reactions; Woodward Hoffmann rules; mass spectrometry of organic compounds; organic chemistry of sulfur, phosphorous, and silicon compounds; mechanisms of nucleophilic substitutions. Prerequisite: CHEM 220. Three credits and lab.

325 **Organic Structural Methods**

Methods for deducing the structural features of organic compounds will be examined, with emphasis on the use of spectroscopic techniques. While the theory and instrumentation of each technique will be presented, the course will focus on the interpretation of spectral data to provide information on functional groups, bonding, and stereochemistry. Use will be made of spectral data correlation charts, compilations and databases. Required for, and restricted to, students in degree programs where chemistry is science A. Required in the first term of the junior year. Prerequisites: CHEM 220, PHYS 120. Three credits and tutorial.

331 **Introduction to Quantum Mechanics**

The course deals with quantum mechanics and its applications to the structure of atoms and molecules. The topics covered are: the postulates of quantum mechanics and their applications to simple physical systems, including particle in a box; the quantum mechanical model for vibration and rotation of molecules; the hydrogen atom and many electron systems; introduction to the Variation Principle and Hückel's molecular orbital method. Credit will be granted for only one of CHEM 331 or CHEM 330. Prerequisite: CHEM 232. Three credits and lab/tutorial.

332 **Introduction to Molecular Spectroscopy & Statistical Thermodynamics**

The course deals with the characterization of patterns of molecular quantized energy levels in rotational, vibrational and electronic spectra of both linear and non-linear molecules. Other topics include photoelectron spectroscopy and magnetic resonances; introduction to statistical thermodynamics including partition functions and calculations of various thermodynamics properties, equilibrium constants and rate constants. Credit will be granted for only one of CHEM 332 or CHEM 330. Prerequisite: CHEM 331. Three credits and lab/tutorial.

341 **Inorganic and Theoretical Chemistry I**

An introduction to molecular symmetry and group theory and its applications to vibrational spectroscopy. Also included are basic coordination chemistry of the transition metals, including discussion of some common inorganic techniques, as well as electronic magnetic properties of transition metal compounds. Prerequisite: CHEM 245. Three credits and lab.

342 **Inorganic and Theoretical Chemistry II**

Electronic and magnetic properties of transition metal compounds. Introduction to organometallic chemistry, homogeneous and heterogeneous catalysis, inorganic reaction kinetics and mechanisms and bio-inorganic chemistry. Prerequisite: CHEM 341. Three credits and lab.

355 **Advanced Biochemistry**

The course focuses on the biosynthesis and metabolism of important biological molecules. Topics include lipids, amino acids, nucleotides, other carbohydrate metabolism pathways, and plant hormones. Prerequisites: CHEM 220, 225. Three credits and lab.

356 **Advanced Quantum Mechanics**

An introduction to molecular symmetry and group theory and its applications to simple physical systems, including particle in a box; the quantum mechanical model for vibration and rotation of molecules; the hydrogen atom and many electron systems; introduction to the Variation Principle and Hückel's molecular orbital method. Credit will be granted for only one of CHEM 331 or CHEM 330. Prerequisite: CHEM 232. Three credits and lab/tutorial.

361 **Instrumental Analytical Spectroscopy**

The course deals with instrumental design and the analytical application of UV/visible, atomic, and infrared absorption spectrometers, Raman spectrometers, and fluorimeters. Topics include sample preparation, data analysis, method optimization and radiochemistry. Credit will be granted for only one of CHEM 361 or CHEM 360. Prerequisite: CHEM 265. Three credits and lab/tutorial.

362 **Instrumental Separations & Analysis**

This course deals with liquid and gas chromatography, capillary electrophoresis and electrochemistry. Included are sample preparation, data analysis, and method optimization. Credit will be granted for only one of CHEM 362 or CHEM 360. Prerequisite: CHEM 361. Three credits and lab.

381 **Industrial Chemistry**

May be used as a chemistry elective in the majors program and as an approved or open elective in other chemistry degree programs. Prerequisites: CHEM 221 or 225 or 220 (concurrent), 231, 232 (concurrent). Three credits and problem session.

391 **Chemistry Seminar I**

Introduction to seminar techniques using topics in modern chemistry, chemical information sources, basic molecular modeling and drawing. Required for, and restricted to, students in degree programs where chemistry is science A. Required in the first term of the junior year. No credit.

421 **Physical Organic Chemistry**

A survey of theoretical models and experimental tools to correlated data related to the structure, property, and reactivity of organic compounds. This course is intended for advanced majors and honours students in chemistry. Topics include qualitative models (resonance, hybridization, VSEPR, qualitative molecular orbital theory), quantitative computational chemistry methods (Hartree-Fock, semi-empirical and density functional theory methods), and spectroscopic methods (IR and NMR). Extensive use is made of theoretical and spectroscopic studies in assignments, computational and experimental labs. Credit will be granted for only one of CHEM 421 or CHEM 420. Prerequisites: CHEM 220, 232, PHYS 120. Three credits and lab.

422 **Advanced Organic Chemistry: Structure & Mechanism**

Building on the structures and energetics of organic reactive intermediates, this course will examine their role in reaction mechanisms. Several important classes of reactions will be analyzed in detail with respect to stereoelectronic effects. This course will also examine some of the methodology used to determine organic...
reaction mechanisms. The synergy between experimental and computational results will be discussed. Credit will be granted for only one of CHEM 422 or CHEM 420. Prerequisite: CHEM 220, CHEM 421 recommended. Three credits and lab.

432  Electrochemical Methods
This course investigates modern electrochemical techniques, including potential step and potential sweep methods, pulse voltammetry, controlled-current experiments, hydrodynamic voltammetry, and AC impedance. Particular attention will be given to processes that occur at the electrode-solution interface in the use of these techniques (mass transport, charge transport kinetics, current-time and current-potential profiles). Topics of current interest, such as fuel cells, chemically modified electrodes, corrosion, ion-selective electrodes, ultramicroelectrodes, and catalysis are included. Prerequisite: CHEM 232, 361, 362 (concurrent). Three credits and lab.

434  Colloids and Interfaces
Covers the properties of colloids, surfaces, interfaces, and polymers, and provides a qualitative description of the colloidal state, including colloids and their preparation and properties. Topics include experimental techniques used to determine colloidal properties; interfacial phenomena; the properties of surface active agents; the stabilization of colloidal systems. Prerequisites: CHEM 231, 232. Three credits and lab. Not offered 2015-2016.

435  Introduction to Polymer Chemistry
This course introduces the basic principles and techniques employed in polymer chemistry. The following topics are emphasized: polymerization reactions and mechanisms; kinetics of polymerization; molecular mass methods; molecular sizes and shapes; polymer morphology; thermal, mechanical and rheological properties; and the thermodynamics of polymer solutions. Prerequisites: CHEM 220, 231, 232. Three credits. Not offered 2015-2016.

442  Bio-Inorganic Chemistry
A survey of metal ions in biological systems. Topics include ion pumps, oxygen carriers such as hemoglobin, metalloenzymes, nitrogen fixation, photosynthesis, biologically important trace metals, biomimetic systems and inorganic drugs. Discussion of various physical techniques used in bio-inorganic chemistry will also be included. Prerequisites: CHEM 341; CHEM 342 completed or concurrent. Three credits and lab. Not offered 2015-2016.

443  Inorganic Materials
Discussion of current areas of interest in inorganic materials research. Topics include superconductors, magnetic and electronic materials, nonlinear optics, polymeric co-ordination complexes, biogenic materials, intercalation compounds and liquid crystals. Prerequisites: CHEM 341; CHEM 342, completed or concurrent. Three credits and lab. Not offered 2015-2016.

445  Introduction to Photochemistry and Applications in Sustainable Catalysis
An introduction to photochemistry with a focus on current catalytic applications. The course will focus on the fundamental concepts of photochemistry and light-induced chemistry of common organic functional groups. Modern applications of photochemistry in catalysis involving transition metals, semiconductors, supramolecular materials, and nanomaterials will also be discussed. Prerequisites: CHEM 220 (221, 222) CHEM 225. Three credits.

455  Medicinal Chemistry
Topics include the drug development process, receptors, drug interaction, pharmacodynamics, pharmacokinetics and quantitative structure activity relationships. Chemical properties and mode of action of some of the following classes of drugs will be discussed: antibacterial drugs, drugs that work on the central nervous system, antiviral drugs, antineoplastic drugs, and analgesics. Case studies of current drugs going through approval processes will be included. Prerequisites: CHEM 220, 255. Three credits and lab.

461  Topics in Instrumentation and Analysis
This course typically starts with a brief introduction to electronics, signals, noise and data manipulation. This is followed by a survey of molecules with bioanalytic applications (enzymes, immunoglobulins, avidin/biotin, cyclodextrin), and a discussion of selected bioanalytic methods and their applications in sensors. A variety of instrumentation is used in the lab, with some attention paid to assembly of equipment, maintenance and repair. Prerequisite: CHEM 361, 362; may be taken concurrently. Three credits and lab. Not offered 2015-2016.

462  Topics in Analysis and Spectroscopy
Topics are typically selected from the following: NMR, fluorescence, FTIR, Raman, methods used for surface analysis, capillary electrophoresis, mass spectrometry, flow injection analysis and process analytical chemistry. Prerequisite: CHEM 361, 362; may be taken concurrently. Three credits and lab. Not offered 2015-2016.

471  Topics in Chemistry
This course examines current specialized chemistry topics not normally covered in other courses. See section 3.5. Three credits.

491  Chemistry Seminar II
Presentations by visitors, faculty, staff, senior honours and advanced major students on aspects of chemical science. Attendance is mandatory for students in all B.Sc. and M.Sc. degree programs where chemistry is science A. No formal credit is given for this course, but satisfactory completion of senior essays for students in the major program, senior essays and presentations for students in the advanced major program, and presentations based on their theses for students in the honours program are requirements for the B.Sc. degree.

493  Honours Thesis
Based upon a program of experimental research involving the use of modern chemical techniques to solve a problem in the areas of analytical, inorganic, organic, or physical chemistry. An acceptable thesis based on the research must be submitted before the conclusion of lectures for the academic year to satisfy the department requirements for the B.Sc. with Honours in chemistry. Three credits and lab.

496  Selected Topics
The topic for 2015-2016 is Computer Modeling of Biomolecules. Students will use computers in order to build three-dimensional models of biomolecules and to study relationship between structure and chemical reactivity. The course involves an examination of theoretical methods (force field, semi-empirical, ab initio, and density functional theory), and the use of computational modeling and viewing software to develop basic skills in molecular modeling and help students to understand at the molecular level how the human body functions: how it uses energy, maintains its structure, recognizes and responds to a wide variety of signals, develops and grows, and protects itself. Prerequisites: CHEM 220 (221, 222) or CHEM 225 and CHEM 255 with a minimum grade of 75. Three credits.

497  Selected Topics
The topic for 2015-2016 is Industrial Organic and Inorganic Chemistry. An introduction to the manufacture and uses of organic and inorganic industrial chemicals. Topics discussed include primary inorganic chemicals, metal production, petroleum refining, industrial electrochemistry, basic polymer chemistry, pulp and paper, fertilizers, soaps and detergents, adhesives and coatings and fermentation. Prerequisites: CHEM 221 or 225, or CHEM 220 (concurrent); CHEM 231, 232 (concurrent). Three credits.

499  Directed Study
Designed for students with high academic standing. Explores current topics in chemistry and new methods in chemical research. See section 3.5. Three credits.

Additional courses are available depending on the requirements and interests of the student and the availability of faculty.
Students in arts, science, and applied programs may take any of the courses listed below as electives or use 12 credits for a pair in classical studies. Students in BA programs may also use classical studies as a minor.

BA with a Minor in Classical Studies
Course requirements for the minor are: CLAS 110 or 120; CLAS 230 or 240; one of CLAS 110, 120, 230 or 240 or 6 credits from CLAS 211, 212, 213, 214, or ENGL 206 and 207; PHIL 351, 352 or RELS 340 or 345.

110 Latin I
For students with no previous knowledge of Latin, this course will teach a reading command of the language. Recommended for those interested in classical languages, literature, history, philosophy, and religious studies. Six credits.

120 Introductory Greek
The aim of this course is to familiarize students with the basic structural features of classical Greek. In addition to grammar and vocabulary, the class will consider simple texts from classical Greek philosophy and literature as well as from the New Testament. Six credits. Not offered 2015-2016.

230 Latin II
A follow-up to CLAS 110, this course includes oral work designed to enhance reading skills, and the study of hymns, poems, epitaphs, and speeches, as well as selections from the New Vulgate. Prerequisite: CLAS 110. Six credits.

240 Greek Literature in Translation
The study of selected works of ancient Greek literature, read in translation, concentrating on the principal figures and themes of ancient Greek mythology. Texts will include the epic poetry of Homer and the tragedies of Aeschylus, Sophocles, and Euripides. Six credits. Not offered 2015-2016.

9.12 COMPUTER SCIENCE
I. Gondra, Ph.D.
M. Lin, Ph.D.
W. MacCauli, Ph.D.
M. van Bommel, Ph.D.
P. Wang, Ph.D.
L. Yang, Ph.D.

Computer science is the study of computation. For any given problem, a central question is whether a solution can be computed, and, if so, what are the most efficient and practical ways to carry out the computation. Computer science also involves questions that have the potential to change how we view the world. What is the nature of intelligence and can we reproduce it in a machine? How do we represent the knowledge we have about the world and apply this knowledge to help make better decisions?

A computer is a mechanical device that manipulates symbols according to specified rules. As a discipline, computer science lies at the intersection of mathematics, science, and engineering, but it also has very strong ties to many other disciplines. Bioinformatics employs computers for storing and analyzing protein and genome sequences in order to interpret and predict biological structure and function. Business is served by providing the means to perform complex calculations and to interpret large amounts of data to make informed business decisions. The film industry relies on computer-generated graphics for three-dimensional animation. Psychology and philosophy share with computer science the desire to understand the nature of reasoning, learning and intelligence. Computer Science has many subfields, such as algorithms, artificial intelligence, automated theorem proving, databases, graphics, high-performance computing, networking, programming languages, robotics, security, and verification. A common misconception is that computer science is equivalent to programming. Programming is a necessary tool, but it is not the focus.

The Department of Mathematics, Statistics, and Computer Science offers courses leading to BA and B.Sc. degrees with Major, Advanced Major, and Honours in Computer Science as well as a B.Sc. Advanced Major degree in Computer Science with Business. Students must meet the general requirements of both the faculty and the department in which they are registered; course and program regulations for mathematics and statistics are listed in sections 9.28.

Students completing a program in computer science have a wide variety of options, including graduate studies in emerging areas of computer science such as big data, robotics, computer-aided vision, and artificial intelligence; and employment in areas such as systems and network analysis, software engineering and computer programming, database, information technology consulting, and data communications. Students are advised to choose their program of study in consultation with faculty and the chair of the Department of Mathematics, Statistics, and Computer Science.

Students pursuing a major, advanced major or honours degree in computer science must take certain core courses: CSCI 161, 162, 255, 273, 275, 375, 491; MATH 111, 112, 277. MATH 111 and 112 are counted as approved or open electives in advanced major and honours programs. MATH 100, 205; CSCI 100, 235 may be available only as approved or open electives.

Major in Computer Science
In addition to the core requirements, students must take an additional 9 credits which may be chosen from CSCI, MATH, or STAT.

Advanced Major in Computer Science
In addition to the core requirements, students must take CSCI 368, 485; MATH 253, and a STAT course plus an additional three credits of CSCI at the 300 or 400 level. B.Sc. students require an additional six credits, which may be taken from CSCI, MATH, or STAT; CSCI 493 is optional.

Typical Advanced Major Pattern:
Year 1 CSCI 161, 162; MATH 111, 112
Year 2 CSCI 255, 263, 275; MATH 253, 277; STAT 201 or 231
Year 3 CSCI 368, 375; additional CSCI courses
Year 4 CSCI 485, 491; additional CSCI courses

B.Sc. Advanced Major in Computer Science & Business
In addition to the requirements for Advanced Major in Computer Science, students take CSCI 235, plus 36 credits in Business and Economics. Details of the program can be obtained from the department chair.

Honours in Computer Science
In addition to the core requirements, students must take CSCI 355, 356, 368, 485, 493, and six credits chosen from CSCI 455, 467, 487 or 495; MATH 253 and a STAT course, plus 12 credits chosen from CSCI, MATH or STAT. Students wishing to follow an honours program that adheres to the recommendations of the 2001 ACM and IEEE Computing Curricula, should include CSCI 487 and 495.

Typical Honours Pattern:
Year 1 CSCI 161, 162; MATH 111, 112
Year 2 CSCI 255, 263, 275; MATH 253, 277; STAT 201 or 231
Year 3 CSCI 355, 356, 368, 375; additional CSCI courses
Year 4 CSCI 485, 491, 493 and two of 455, 487, 487, 495; additional CSCI courses

Co-operative Education Program in Computer Science
This optional academic program allows BA or BSc in CSCI students the opportunity to gain 12 months of professional, paid work experience in a range of opportunities in industry, government and not-for-profit across Canada. Students can gain valuable technical and professional experience in areas including (but not limited to) various programming languages and systems analysis to reinforce classroom-based instruction. See section 9.13 for further information.

Master of Science Program
A research-based M.Sc. program is available covering the areas of systems, theory, and applications. General requirements for graduate degrees are outlined in section 8. For specific requirements, consult the department chair or visit http://sites.stfx.ca/mscs/graduate/

125 Computer Programming in C
Cross-listed as ENGR 144; see ENGR 144. Three credits and a two-hour lab.

140 Understanding Computing & Computer Technology
A basic introduction to computing and modern computer technology. Topics include the history of computing; problem solving and programming basics; the components of the computer; how a computer works; how the Internet works; databases; artificial intelligence; privacy and security; social issues in computing. No prior background is assumed. Credit will be granted for only one of CSCI 140 or CSCI 100. Six credits.

161 Introduction to Programming
An introduction to computers, algorithms and programming. Topics include problem analysis, algorithm development, data representation, control structures, arrays, and file manipulation. Credit will be granted for only one of CSCI 161, CSCI 125, ENGR 144. Three credits and a two-hour lab.

162 Programming and Data Structures
Continuing from the material in CSCI 161, this course covers memory management and data abstraction via classes and objects, and introduces the linear data
structures lists, stacks, and queues. Structured programming is encouraged via modular development. Prerequisite: CSCI 125 or 161. Three credits and a two-hour lab.

**235 Micro-Computers in Science**

An introduction to the hardware, operating systems and utilities of microcomputers. Typical micro-computer applications include word processing, spreadsheets, and database management systems. Examples and applications are taken from the sciences. Restricted to students in the Faculty of Science. Credit will be granted for only one of CSCI 235, 100, INFO 101. Three credits.

**255 Advanced Data Structures**

Linear data structures such as lists, stacks, and queues are reviewed. Objects are introduced using C++ classes and templates. Multi-linked lists and trees together with their fundamental algorithms are covered. Searching, sorting, and hashing are described and implemented in C++. Prerequisite: CSCI 162. Three credits and a two-hour lab.

**263 Computer Organization**

This course covers basic computer arithmetic, architectures, and instruction sets; in-depth study of the central processing unit, memory and input/output organization; and microprogramming and interfacing. Credit will be granted for only one of CSCI 263, 365, INFO 225. Prerequisite: CSCI 255. Three credits and a two-hour lab.

**275 Database Management Systems**

An introduction to the theory associated with the design and implementation of databases. Topics include database models (relational model in detail), design, normalization, SQL, and a DBMS (ORACLE). Credit will be granted for only one of CSCI 275 or INFO 275. Prerequisite: CSCI 162. Three credits and a two-hour lab. Not offered 2015-2016.

**335 Operations Research**

The course will cover selected topics from linear programming; transportation and assignment models; networks; scheduling; inventory models; decision-making; queueing theory; forecasting and simulation. Packaged software and spreadsheets will be used. Prerequisites: MATH 112; CSCI 125 or 161. Three credits. Offered 2015-2016 and in alternate years.

**345 Computer Graphics**

Covers fundamental mathematical, algorithmic, and representational issues in computer graphics. Topics include graphics programming, geometrical objects and transformations, 2-D and 3-D data description, manipulation, viewing projections, clipping, shading and animation. Prerequisites: MATH 253; CSCI 255. Three credits and a two-hour lab. Not offered 2015-2016; next offered 2016-2017.

**355 Data Structures and Algorithm Analysis**

Analysis and design techniques are applied to non-numeric algorithms for data structures. Algorithmic analysis is used to select methods of manipulating data. Credit will be granted for only one of CSCI 355 or CSCI 256. Prerequisites: CSCI 255; MATH 277. Three credits and a two-hour lab. Not offered 2015-2016; next offered 2016-2017.

**356 Theory of Computing**

An introduction to the theoretical foundations of computer science, examining finite automata, context-free grammars, Turing machines, undecidability, and NP-completeness. Abstract models are employed to help categorize problems as undecidable, intractable, tractable, and efficient. Prerequisites: CSCI 255; MATH 277. Three credits.

**364 Mobile Application Development**

A mobile application (mobile app) is a software application designed to run on smartphones, tablet and other mobile devices. The android mobile platform has become one of the most popular mobile platforms used by millions around the world. This course introduces application development for the Android OS that can run on mobile devices. The course covers the Android system, the Android development tools, Activity Lifecycle, User Interfaces in Android, and Android application development that uses SMS, databases, location tracking, and/or multimedia. Credit will be granted for only one of CSCI 364 and CSCI 471. Prerequisite: CSCI 162 or INFO 256. Three credits and a two-hour lab.

**368 Data Communication Systems and Networks**

This course covers communication systems; environments and components; common carrier services; network control, design and management; distributed and local networks. Credit will be granted for only one of CSCI 368, CSCI 465, INFO 465. Prerequisite: CSCI 263 or 365. Three credits and a two-hour lab. Not offered 2015-2016; next offered 2016-2017.

**375 Operating Systems**

An overview of operating systems functions: file management, CPU scheduling, process management, synchronization, memory management, and deadlock handling. UNIX will be introduced and used in this course. Prerequisite: CSCI 263 or 365. Three credits and a two-hour lab. Not offered 2015-2016; next offered 2016-2017.

**455 Parallel Computing: Architectures, Algorithms, and Applications**

Introduces parallel programming techniques as a natural extension to sequential programming. Students will learn techniques of message-passing parallel programming; study problem-specific algorithms in both non-numeric and numeric domains. Topics will include: numeric algorithms; image processing and searching; optimization. Prerequisites: CSCI 263 or 365. Three credits and a two-hour lab. Offered 2015-2016 and in alternate years.

**467 Computer and Network Security**

Covers the theory and practice of computer and network security, including cryptography, authentication, network security, and computer system security. Topics include secret and public key cryptography; message digests; authentication, including password-based, address-based, and cryptographic; network security; system security, including intruders, malicious software, and firewalls. Students will use and implement algorithms. Prerequisite: CSCI 368. Three credits. Not offered 2015-2016; next offered 2016-2017.

**471 Topics in Computer Science**

This course explores current topics in computer science, such as interface design, real-time control, and simulation. Three credits. See http://sites.stfx.ca/mscs/cs_courses for more information.

**483 Interactive Programming with Java**

This course introduces the object-oriented language Java and its application to interactive programming. Topics include Java syntax and object inheritance structure, exception handling, GUI and Applet programming, Java networking and multithreading. Credit will be granted for only one of CSCI 483 or INFO 355. Prerequisite: CSCI 375 completed or concurrent. Three credits and a two-hour lab.

**485 Software Design**

The course covers techniques for the design and management of large software projects, including structured programming, debugging, and testing methodologies. Examples of large systems will be provided and a programming project will be completed. Prerequisite: CSCI 375, completed or concurrent. Three credits and a two-hour lab. Offered 2015-2016 and in alternate years.

**487 Organization of Programming Languages**

Topics include structure of language definitions, control structures, data types and data flow, compilers vs interpreters, introduction to lexical analysis and parsing. Prerequisite: CSCI 263 or 365. Three credits and a two-hour lab. Offered 2015-2016 and in alternate years.

**491 Senior Seminar**

Cross-listed as MATH 491 and STAT 491. The purpose of this non-credit course is to assist students in carrying out research, composition, and oral presentation. Students will present a project topic in the fall term and their project in the spring. Attendance at departmental seminars is mandatory. No credit.

**493 Senior Thesis**

Students will prepare and present a thesis based on original research conducted under the supervision of a faculty member. Required for honours students; permitted for advanced major students. Three credits.

**495 Artificial Intelligence**

9.13 CO-OPERATIVE EDUCATION

J. MacDonald, MLIS, M.Ad.Ed., M.Ed., Manager

Co-operative education utilizes experiential learning partnerships between the university and employer to provide students with opportunities for relevant, paid employment while completing academic studies. A combination of professional development training and practical work experience empowers students to apply and further develop the knowledge and skills they have acquired in their degree program.

Admission to the program is selective. Students must demonstrate professional qualities that are suitable for employment sponsorship by the University.

Students are eligible to join the co-operative education program after at least one full year of academic study. Students may apply to the program at any time but must apply before published deadlines in September or January to participate in professional development seminars in that term. A minimum overall first-year average of 65% is required for students joining the program in their second year. A minimum overall average of 70% in the second and subsequent years is required for students who join and remain in the program.

Students must successfully complete mandatory professional development seminars to be eligible for co-op work terms and must complete all required levels of professional development seminars, a minimum of 12 months of work term employment and a formal debrief process to receive a passing grade, three academic credits and a certificate for co-operative education.

Students who apply for the Co-operative Education Program prior to declaring their major subject must commit to a degree program that includes a co-op option. Academic programs with a co-op option: biology, business administration, computer science, human nutrition, information systems and mathematics. Students’ degree programs and registration will be monitored and academic averages will be assessed annually to determine eligibility to continue in the program.

Students must be registered in a minimum of 12 credits per term in the full academic year to be considered for, and to remain in, the Co-operative Education Program.

Students are permitted to commence professional development seminars in their second year of study. Students will be permitted to commence the work term component of the program after completion of their second year of study, subject to meeting prerequisite requirements. After completing the work terms, students must return to full-time studies at StFX for a minimum of one term.

Work terms must occur in at least two of the three semesters and must be preceded and followed by an academic term. “Academic Semesters” are January to April, May to August, and September to December. This is a three semester model. Eight-month or back-to-back work terms are acceptable as long as they are also preceded and followed by an academic term. The 12-16 month work term is considered a co-op internship and must be with one employer. The co-op team and academic advising will help you make a plan that is right for you.

All work placements must be approved by the co-op office in advance. Failure to obtain the required approval or to submit documentation may result in the work term not counting toward the program.

Students will be encouraged to complete their professional development seminars within a reasonable time frame. However, COOP 110 must be completed in the semester the student was accepted into the program. Work terms must be scheduled in a way that accommodates students’ academic program requirements. Required courses must be available to students during their on-campus terms. Also, the requirement to complete their degrees with a minimum of one term of on-campus study in a full course load will present a major consideration in scheduling work term placements.

Participation in the Cooperative Education Program is voluntary, obtaining a Cooperative Education work assignment is competitive, and students are not guaranteed a cooperative education work placement.

Students may withdraw from the Co-operative Education Program at any time by submitting an email to the program manager outlining the intent to withdraw. There will be no refund of fees collected for professional development seminars or work terms completed prior to the date of withdrawal. For students who withdraw during a PDS session or while completing a work term, normal refunding will apply.

Students who successfully complete all co-op requirements and all academic requirements for their degrees will receive a certificate with their degree parchment. Also, a "Co-operative Education" designation will be displayed in the degrees awarded section of their official transcripts. Students must graduate with the associated degree to also complete the Co-operative Education Program.

The Co-operative Education Programs in Business and Information Systems are accredited by the Canadian Association for Co-operative Education (CAFCE). Biology, computer science, and human nutrition co-op programs also follow the same guidelines as our accredited programs.

110 Introduction to Co-operative Education Program and Professional Development

This course provides an overview of program requirements and materials needed to attain relevant professional experience. Students are presented with models for self-evaluation and improvement as well as information on transitioning into the work force, self-marketing and applying effective job search strategies. No credit.

120 Intermediate Co-operative Education Program and Professional Development

This course offers students an overview of different types of organizations with a focus on communication styles in the workplace and special topics in Co-op education. Students will also be provided with tools for securing co-operative education employment and evaluating personal success on the job search process and as an employee. No credit.

130 Advanced Co-operative Education and Professional Development

Students enhance their knowledge of self-evaluation and personal preparation and learn how to optimize their opportunities for personal success in the job market. Students will develop a professional portfolio that is a representation of their skills, abilities, and knowledge and learn how to incorporate portfolio thinking into future learning. No credit.

401-404 Co-operative Education Work Terms

COOP work terms parlay professional development theory and academic knowledge into practice in employment that is related to student’s degree program. The Co-operative Education Program staff, as well as their direct reporting managers, will evaluate the student. While on work terms, students will document their work term learning objectives, participate in a work site evaluation by the Co-op staff, submit formal performance evaluation and write a reflective essay. No credit.

405 Co-operative Education Work Term and Integrated Learning

Following the completion of work term requirements, students reflect on, discuss and report on their co-op experience. Prerequisites: COOP 110, 120, 130, 401, 402 and 403. Three credits used to satisfy elective requirements.

9.14 DEVELOPMENT STUDIES

J. Bickerton, Ph.D., Co-ordinator

Advising Faculty
Y. Cho, Ph.D.
M. Diochon, Ph.D.
S. Dodaro, Ph.D.
D. Garbary, Ph.D.
J. Langdon, Ph.D.
A. Mathie, Ph.D.
S. Vincent, Ph.D.

Department
Political Science
Business Administration
Economics
Biology
Adult Education
Coady International Institute
Anthropology

This interdisciplinary program in development studies examines the local and global social, economic, political, and cultural contexts in which development takes place. Students will investigate the theory and practice of development and social justice, and learn about the Antagonism Movement.

Students may complete an honours with subsidiary, a joint advanced major or a joint major in development studies and another subject, a subsidiary or a minor in development studies, pair two courses, or simply take DEV 201 and/or 202 as electives. See section 4.1 for degree regulations. Students interested in DEV5 degree options should consult the co-ordinator as early as possible. Students graduating with an honours, joint advanced major or joint major in development studies and another subject must complete ECON 101 and 102.

Note: For honours, joint advanced major and joint major, no more than 12 credits of development studies cross-listed or designated courses (see below) may be in a single subject. Also, none of the development studies cross-listed or designated courses may be in the student’s other declared subject.
Honours in Development Studies with a Subsidiary
See section 4.1 for general regulations on degree requirements.
Requirements:
a) 48 credits in DEVS (subject A) and 30 credits in the subsidiary subject (subject B). Students must complete the following:
   i) DEVS 201, 202, 302, 303, 311, 401, 405, 412 24 credits
   ii) DEVS 490 (thesis) 6 credits
   iii) DEVS cross-listed or designated courses 18 credits
   iv) ECON 101, 102 6 credits
   v) Social Science Research Methods Course* 3 credits
*Social science courses that satisfy the DEVS research methods requirement include PSCI 399, ANTH 304 and SOCI 202. Other courses may be considered with the permission of the Development Studies Coordinator.
b) Course Pattern: see section 4.1.3

Joint Advanced Major in Development Studies
Requirements:
a) 36 credits in DEVS (subject A) and 36 credits in another subject (subject B; see definition of subject at 4.1.2) or 36 credits in another subject (subject A) and 36 credits in DEVS (subject B). The program or department requirements for advanced majors are applicable in both subjects.
   Students using DEVS as subject A or B must complete the following:
   i) DEVS 201, 202, 302, 303, 311 15 credits
   ii) DEVS core, cross-listed or designated courses 15 credits
   iii) ECON 101, 102 6 credits
   iv) Social Science Research Methods Course* 3 credits
*Social science courses that satisfy the DEVS research methods requirement include PSCI 399, ANTH 304 and SOCI 202. Other courses may be considered with the permission of the Development Studies Coordinator.
b) Course Pattern: see section 4.1.3
c) A senior paper is required for all advanced major students. The senior paper will be written in either DEVS 401 or 405 when development studies is subject A. When development studies is subject B, the senior paper will be written for the department or program that is subject A.

Joint Major in Development Studies
Requirements:
a) 36 credits in DEVS (subject A) and 36 credits in another subject (subject B). The program or department requirements for majors are applicable in both subjects.
   Students must complete the following:
   i) DEVS 201, 202, 302, 303, 311 15 credits
   ii) Minimum of 3 credits from 401, 405 3 credits
   iii) DEVS core, cross-listed or designated courses 18 credits
   iv) ECON 101, 102 6 credits
b) Course Pattern: see section 4.1.3

Subsidiary in Development Studies
Requirements:
a) 24 credits in DEVS and 48-60 credits in the honours subject. Students are encouraged to include an additional six credits of DEVS core, cross-listed or designated courses if possible. No more than six credits of DEVS cross-listed or designated courses may be from a single department. None of the development studies cross-listed or designated courses may be in the student’s honours subject.
   Students must complete the following:
   i) DEVS 201, 202, 302, 303 12 credits
   ii) DEVS core, cross-listed or designated courses 12 credits

Minor in Development Studies
Requirements:
a) 24 credits in DEVS. No more than six credits of DEVS cross-listed or designated courses may be from a single department. None of the cross-listed or designated courses may be in the student’s declared major subject. Students must complete the following:
   i) DEVS 201, 202 6 credits
   ii) DEVS core, cross-listed or designated courses 18 credits

Pair
   i) DEVS 201, 202 6 credits
   ii) DEVS core, cross-listed or designated courses 6 credits

DEVELOPMENT STUDIES CORE COURSES

201 Introduction to International Development: The Global South
An introduction to development theory and practice as it applies to inequality between countries, and within countries of the Global South. The course provides students with a critical framework for analyzing development policies, programs, trends, and impacts, especially since the formation of the Bretton Woods institutions. Students will explore the concepts of sustainable development and of social and economic justice as they relate to development. Credit will be granted for only one of DEVS 201 or DEVS 200. Prerequisite: 24 credits or permission of the co-ordinator. Three credits.

202 Introduction to International Development: Canada
In this course, Canada’s place in the world, its path to development, and the challenges it currently faces will be explored. These include the retention of its capacity to generate sufficient wealth to provide a high standard of living to its citizens, the persistence of inequalities that raise questions about the distribution of the benefits of development, and the challenge of sustainability, given the stresses that industrialized societies such as Canada’s place on their physical and social environment. Credit will be granted for only one of DEVS 202 or DEVS 200. Prerequisite: 24 credits or permission of the co-ordinator. Three credits.

302 Globalization and Development
The course provides an analysis of the forces affecting the globalization process, its evolution over time, and its impacts on development. It takes a broad view, from an interdisciplinary perspective, of the factors at work, their nature and their consequences. Topics that are considered include the fact and policy dimensions of globalization, questions that pertain to equity and fairness, issues concerning production, consumption, global markets, governance, and the role of various international institutions. It also analyzes the mechanisms that link the global to the local level. Credit will be granted for only one of DEVS 302 or DEVS 300. Prerequisites: DEVS 201, 202 or ECON 101, 102. Three credits.

303 Topics in Globalization and Development
The course considers in detail a range of topics that pertain to the globalization process that are important to development. It provides an interdisciplinary analysis of such issues as: international trade and finance and their impacts, regionalization versus globalization, the environment and sustainability, culture and ideas, justice and human rights, gender and health issues, migration, NGOs, NPOs and civil society. The course also considers alternatives to the existing reality in terms of changes in institutions, practices, policies, local and grassroots responses (including the Antigonish Movement). Credit will be granted for only one of DEVS 303 or DEVS 300. Prerequisite: DEVS 302 or permission of the instructor. Three credits.

311 Issues in Development Practice
In this course student make the link between theoretical discussion of development and actual development practice, both locally and internationally. An in-class component addresses the practicalities of development interventions and the major issues that affect them, such as: gender/ethnic/class stratification; power relations within and between localities and external agents; and indigenous versus dominant forms of knowledge. Student will then apply this in an experiential learning component in a local or international context. Credit will be granted for only one of DEVS 311 or DEVS 310. Prerequisite: DEVS 201 or DEVS 310. Prerequisite: DEVS 201, 202 or permission of the instructor. Three credits.

391 Selected Topics
The topic for 2015-216 is Cities, Urbanization and Development. This course examines different conceptual, theoretical and policy perspectives on urbanization and urban development. The course will also cover social, economic and environmental living conditions in cities of the Global South. Students will learn about cities in their national, international and global context. The course will cover specific urban development issues as weekly themes including but not limited to the growth and expansion of slums and gated communities; rural to urban migration trends; employment including informal employment; health and food challenges; and mega events in cities. This course will offer students an exciting opportunity to think about the urban development nexus and how that links back to community-based development. Prerequisite: DEVS 201. Three credits.

401 Theories of Development
This seminar takes an interdisciplinary approach to the study of theories that have shaped the conceptualization and practice of development around the world. The seminar focuses on current versions of general development theories such as: modernization, structuralism, Marxism, dependency theory, neoclassical and neoliberal theory, alternative development, and post-development. Examples
of current theories that focus on key development issues are also covered. Prerequisites: DEVS 201, 202. Three credits.

405 Community-Based Development: Strategies and Practice

This seminar is an examination of community-based development. It explores and evaluates strategies, practices and techniques used to strengthen people's capacity to build sustainable livelihoods, and examines the role of different agencies (e.g. local citizens, government, non-government organizations, and the private sector) in stimulating development at the community level. The course will include development strategies used in the Global South and practices used in Canada, especially Atlantic Canada. Prerequisites: DEVS 201, 202. Three credits.

412 Internship in Development Studies

This internship builds on DEVS 311. Students may extend their placement from 311 or undertake a new posting. The class will be largely experiential. Students will be required to blog regularly, to submit critical reflection papers, to produce a research product of use to their host organization, to make an oral presentation and to submit a final written report. Students will do their internship during the spring and summer before their senior year and complete this course in the fall term of their senior year. Credit will be granted for only one of DEVS 412, DEVS 300, or DEVS 312. Prerequisite: DEVS 311 and permission of the instructor. Three credits.

490 Thesis

Students will work under the supervision of a faculty member who guides the selection of a thesis topic, use of resources, research methodology, and quality of analysis. Restricted to honours students. Six credits.

499 Directed Study

Students will work with a course instructor on a topic which is not available through other course offerings. Prerequisites: DEVS 201, 202 and six additional credits in core development studies courses. See section 3.5. Three credits.

DEVELOPMENT STUDIES CROSS-LISTED COURSES

211 Local and Community Development Economics

Cross-listed as ECON 211; see ECON 211. Three credits.

223 Anthropology of Globalization

Cross-listed as ANTH 223; see ANTH 223. Prerequisite: ANTH 111, 112 (110) or DEVS 201 and 202. Three credits.

305 Economic Development I

Cross-listed as ECON 305; see ECON 305. Three credits.

306 Economic Development II

Cross-listed as ECON 306; see ECON 306. Three credits.

321 Anthropology of Development

Cross-listed as ANTH 321; see ANTH 321. Prerequisites: ANTH 111, 112 (110) or DEVS 201, 202. Three credits.

322 Antagonism Movement as Change & Development

Cross-listed as SOCI 322; see SOCI 322. Prerequisites: SOCI 100 or DEVS 201, 202. Three credits.

354 International Political Economy

Cross-listed as PSCI 354; see PSCI 354. Prerequisites: PSCI 100 or DEVS 201, 202; PSCI 250 recommended. Three credits.

355 Global Issues

Cross-listed as PSCI 355; see PSCI 355. Prerequisites: PSCI 100 or DEVS 201, 202; PSCI 250 recommended. Three credits.

370 Third World/South-North Politics

Cross-listed as PSCI 370; see PSCI 370. Prerequisites: PSCI 100 or DEVS 201, 202. Six credits.

457 Social Entrepreneurship

Cross-listed as BSAD 457; see BSAD 457. Prerequisite: DEVS 201, 202. Three credits.

</table>
The Earth is a dynamic and exciting planet, which has continually evolved over its 4.6 billion-year history. During this time, oceans and mountains were created and destroyed; catastrophic events occurred, such as meteorite impacts, volcanic eruptions and earthquakes; global greenhouses and icehouses developed; life forms evolved and became extinct. Earth science is devoted to understanding the origin, evolution, and destruction of the Earth's atmosphere, ocean and fresh waters, rocks, minerals and fossils; explores and develops valuable resources; and evaluates the environmental implications of these activities.

A degree in Earth sciences prepares students for graduate studies, as well as a wide range of careers in geology, climatology, oceanography, environmental science, resource exploration and development, government, industry, and financial institutions where geological knowledge is vital for investments and economic planning.

A number of options and concentrations are available for students interested in a B.Sc. in Earth sciences. We offer options in geoscience, environmental geoscience, geochemistry; joint programs with biology, business administration, chemistry, information systems, mathematics, and physics; and non-specialist courses for students interested in understanding the planet on which we all live.

The most important laboratory instruction is in the field, where studies bridge the gap between textbook descriptions and actual occurrences.

### Department Requirements

Recommended course selections for Earth Sciences programs are shown below; variations in content require the permission of the department chair and/or the dean of science. See chapter 7 for information on the degree patterns, declarations of major, advanced major and honours, advancement and graduation requirements.

Approved electives may be in any discipline normally accepted for credit for science students: BIOL, CHEM, MATH, STAT, CSCl and PHYS (including PHYS 271, 272). However, some programs have recommended electives; students should consult the department chair for details. We strongly recommend that students take French or Spanish as one of their arts electives.

Required courses for all students doing any major, advanced major, or honours degree in Earth Sciences are: ESCI 171, 172, 201, 215, 216, 305, 375 or 376. Students doing a major in Earth Sciences should take 15 additional ESCI credits from among the required courses of the Geoscience Concentration, the Environmental Earth Science Concentration, or the Geochemistry Concentration listed below. All Earth Sciences majors must take: CHEM 100 or 120; MATH 111, 112; additional ESCI, science, arts and elective courses as outlined in section 7.1.

The recommended courses for first year students intending to do an Earth Sciences degree are: ESCI 171, 172; MATH 111, 112; CHEM 100 or 120; PHYS 100 or 120, or BIOL 111, 112; 6 credits arts electives.

### Advanced Major and Honours in Earth Sciences

#### Geoscience Concentration

The following are the recommended courses for an advanced major or honours degree in the Earth Sciences Geoscience Concentration: ESCI 201, 202, 215, 216, 245, 285, 301, 302, 305, 365, 366, 375, 426, 435, 446, 475, 476, 491 (non-credit), 493 or 499; PHYS 100 or 120; STAT 231; 6 credits science B (which may be BIOL; 6 credits of CHEM 231, 232, 245 and 265; 6 credits MATH/STAT/CSCI; or PHYS 241 and 3 credits PHYS); plus additional ESCI, science and arts electives as outlined in section 7.1. Variation in content requires the permission of the department chair and/or dean of science.

#### Environmental Earth Science Concentration

The following are the recommended courses for an advanced major or honours degree in the Environmental Earth Science Concentration: ESCI 201, 202, 215, 216, 245, 271, 272, 305, 365, 366, 374, 376, 386, 406, 485, 472, 475, 491 (non-credit), 493 or 499; BIOL 111, 112, PHYS 100 or 120 (recommended); STAT 231; 6 credits science B (may be BIOL 203 and 3 credits BIOL; 6 credits of CHEM 231, 232, 245 and 265; 6 credits MATH/STAT/CSCI; or PHYS 241 and 3 credits PHYS); plus additional ESCI, science, arts and elective courses as outlined in section 7.1. Variation in content requires the permission of the department chair and/or dean of science.

#### Geochemistry Concentration

Recommended courses for students in the honours and advanced major programs of the Geochemistry Concentration are: ESCI 171, 172, 201, 202, 215, 216, 245, 271, 272, 305, 375, 406, 491 (non-credit), 493 or 499; BIOL 111, 112; PHYS 100 or 120; CHEM 100 or 120, or BIOL 111, 112; 6 credits arts electives.

### Joint Honours and Joint Advanced Major Programs

Joint honours and joint advanced major programs are offered in conjunction with aquatic resources and with the departments of biology, chemistry, mathematics, statistics, and computer science. Joint advanced major programs are offered with the departments of business administration and physics. For general information on course patterns see section 7.1. Students should consult the appropriate department chair or program co-ordinator. Typical programs are shown below; variations are available at the discretion of the department.

### Earth Sciences with Aquatic Resources

Earth Sciences and Biology
ESCI 171, 172, 201, 215, 216, 375 or 376, 271, 272, 285, 386; 27 credits BIOL;
CHEM 100 or 120, 225, 255; MATH 111, 112, C35; STAT 231; additional ESCI,
arts and elective courses as outlined in section 5.1; interdisciplinary thesis and seminar.

Earth Sciences with Business Administration
Science A (ESCI) 36 credits: ESCI 171, 172, 201, 215, 216, 305, 365, 366;
12 additional credits ESCI
Science B (MATH) 12 credits: MATH 111, 112; any 6 additional credits
MATH, STAT or CSCI
Science C (CHEM) CHEM 100 or 120
BSAD 101, 102, 221, 223, 231, 261, 241, 471; 6 credits electives
CSCI 235
ECON 6 credits
Arts X 12 credits humanities or social science
Arts Y 6 credits
Approved electives 9 credits BIOL, CHEM, ESCI, or PHYS

Earth Sciences and Chemistry
ESCI 171, 172, 201, 215, 216, 245, 246, 375 or 376, 272, 475 (for additional credits,
consult the Earth sciences department chair); 36 credits MATH; CHEM 100 or 120;
PHYS 100 or 120; additional ESCI, arts and elective courses as outlined in section 7.1;
interdisciplinary thesis and seminar.

Earth Sciences and Mathematics/Statistics/Computer
Science
ESCI 171, 172, 201, 215, 216, 245, 246, 375 or 376, 272, 475 (for other credits,
consult the Earth sciences department chair); 30 credits MATH; CHEM 100 or 120;
PHYS 100 or 120; additional ESCI, arts and elective courses as outlined in section 7.1;
interdisciplinary thesis and seminar.

Earth Sciences and Physics
ESCI 171, 172, 201, 215, 216, 245, 246, 272, 375 or 376, 302 or 435, 446, 472, 475
(for other credits, consult the Earth sciences department chair); 30 credits PHYS
(consult the physics department chair); CHEM 100 or 120, 231 and 232 or 245 and
265; MATH 111, 112, 253, 267, 367; additional ESCI, arts and elective courses as
outlined in section 7.1; interdisciplinary thesis and seminar.

Environmental and Earth Sciences
See section 9.20.

Minor in Earth Sciences
ESCI 171, 172 and 18 additional ESCI credits.

Master of Science Program
See chapter 8 for admission regulations.

171 Understanding the Earth I
An introduction to the study of rocks and minerals that make up planet Earth; the Earth's origin and internal structure and composition; the plate
tectonic and continental drift theory, crustal processes (the early history of the Earth and
its atmosphere, evolution and extinction of life forms; composition and structure
of the Earth, origin of continents, oceans, volcanoes, earthquakes, mountains),
crustal deformation and mountain building; resources from earth. Three credits.

172 Understanding the Earth II
An introductory treatment of the processes driving Earth's ocean, atmosphere,
hydrosphere and cryosphere. Course includes study of the environment and
problems such as soil erosion, ozone layer, waste disposal, Earth's energy
resources (solar, geothermal, etc.), surface and ground waters, water quality
in humanity's future, an introduction to biogeochemical cycles, and a current
examination of climate change, future scenarios and issues of impact, migration
and adaptation to climate change. Three credits.

201 Crystal Chemistry and Mineralogy
Examines the foundations of crystal chemistry and mineralogy. Explores the
characterization of and relationship among chemical, physical and optical properties
of minerals and other transparent solids. Prerequisites: ESCI 171; ESCI 172 or
AQUA 100; or with permission of instructor; CHEM 100 or 120, concurrent
with permission of the instructor. Three credits and lab.

202 Introduction to Igneous and Metamorphic
Systems
Uses physicochemical and thermodynamic principles to explain the origin and
composition of Earth materials, with particular reference to the genesis of igneous
and metamorphic rocks. Applies the phase rule and phase equilibria to natural
systems using thermo-chemical and experimental data, binary and ternary phase
diagrams. Prerequisite: ESCI 201. Three credits and lab.

215 Sedimentology and Stratigraphy
A study of the major processes involved in the origin, transport and deposition
of marine and non-marine clastic, carbonate and evaporite sediments. Covers the
principles of sedimentation, environmental analysis, marine and non-marine
depositional systems and facies models. Basic stratigraphic principles are introduced.
Prerequisites: ESCI 171; ESCI 172 or AQUA 100. Three credits and lab.

216 Earth History
An overview of the evolution of planet Earth from its origin some 4.6 billion years
ago to the present. Students will examine changes in the distribution and character
of continents and ocean basins, mountain ranges, continental glaciers and other
features of the Earth's surface in light of plate tectonic theory, while studying
the evolution of plant and animal life as revealed by fossils. Prerequisites: ESCI
171; ESCI 172 or AQUA 100, concurrent with permission of the instructor. Three
credits and lab.

245 Structural Geology
An introduction to rock mechanics, three-dimensional analysis of stress and strain,
mechanisms and concepts of deformation; classification and interpretation of folds,
faults, fractures; introduction to Earth graphic and stereographic analysis of three-
dimensional structures. Prerequisite: ESCI 171. Three credits and lab.

246 Quantitative Methods in Earth Science
This course is intended to familiarize students with modern analytical techniques
to provide them with the theoretical and quantitative background necessary for further
study in Earth sciences. Topics include applications of multivariate analysis and
spectral analysis techniques. Prerequisites: ESCI 171; ESCI 172 or AQUA 100;
MATH 111, 112; or permission of the instructor. Three credits and lab.

271 Environmental Earth Science
This course will focus on the relationships between Earth surface processes
and human activities. Topics include atmospheric processes and contamination;
salt formation, degradation and erosion; an introduction to surface water and
groundwater resources and pollutant transport in aquatic environments, as well
as a critical examination of pollution and waste issues. Prerequisites: ESCI 171;
ESCI 172 or AQUA 100. Three credits and lab.

272 Global Change and the Climate System
This course will examine the global climate system. Processes that contribute
to climate change will be examined in the context of both its natural variability and
anthropogenic impact. Paleoclimates, greenhouse warming, ice ages and ocean-
climate interaction will be discussed. Prerequisites: ESCI 171; ESCI 172 or
AQUA 100. Three credits and lab.

273 Health and the Environment
Understanding the relationship between environment and health is a significant
challenge for current and future generations. Environmental agents play key roles
in the development of many common illnesses and conditions. Most of these
environmental agents are the result of human interference in the natural processes
and fluxes of elements in the planetary system. This course will explore many
aspects of this feedback-loop between human and planetary health. Cannot be used as a
science credit by students majoring in earth sciences or environmental sciences.
Three credits.

274 Health Impacts of Global Environmental Change
Many environmental issues with planetary-scale implications are changing the way
the earth system works. This course will explore some of these issues, including
the causes, effects, and health implications of global environmental change caused
by global warming, loss of the ozone layer, aerosols, toxic greenhouse gases, overpopulation, genetics-environment interactions, changes to the hydrological
cycle, and the use of chemicals to improve food production. Cannot be used as a
science credit by students majoring in earth sciences or environmental sciences.
Three credits.

278 Introduction to Atmospheric Physics
Cross-listed as PHYS 278; see PHYS 278. Three credits.

285 Paleontology: The History of Life
Covers the principles of paleontology including methods of analysis of fossil
individuals, populations and species; biostratigraphy; paleoecology; biogeography;
evolution and extinction; the origin and major events in the history of life from an
evolutionary and ecological perspective. Laboratory study of selected fossil groups,
field and laboratory techniques. Cross-listed as BIOL 285. Prerequisite: ESCI 171,
172 or BIOL 111, 112 or permission of the instructor. Three credits and lab. Not
offered 2015-2016.
301 Genesis of Igneous Rocks
An advanced treatment of the rheological properties of magma, fluid dynamics, crystal growth, crystal-melt-fluid equilibria, igneous rock suites and their genesis, petrogenetic modeling. Applications of thermodynamic principles and phase equilibria to the genesis of igneous rocks and application of microscopic techniques. Prerequisites: ESCI 201, 202. Three credits and lab. Offered 2015-2016 and in alternate years.

302 Genesis of Metamorphic Rocks
Topics include determination of pressure; temperature and fluid conditions of metamorphism; applications of chemical equilibria and thermodynamic principles; Schreinemakers’s methods of phase diagram construction; equilibrium and disequilibrium metamorphic textures; kinetics of crystal growth; determination and rates of metamorphic reactions; variations of metamorphism through geological time; pressure-temperature-time relationships. Prerequisites: ESCI 201, 202. Three credits and lab. Not offered 2015-2016.

305 Geochemistry of Natural Waters
Covers geochemistry of natural waters and the interaction of elements in natural materials, aqueous and atmospheric geochemistry, global cycles, weathering processes, and natural redox reactions and stable isotope geochemistry. Application of thermodynamic principles to geochemistry. Prerequisites: CHEM 100 or 120; ESCI 171; ESCI 172 or AQUA 100. Three credits and lab.

365 Geomorphology and Quaternary Geology
Covers landform processes and development; glaciation and glacial deposits; slopes and mass movements; drainage basin form and process; Quaternary stratigraphy, paleoclimatology, and paleoecology. Prerequisites: ESCI 171; ESCI 172 or AQUA 100. Three credits and lab. Offered 2015-2016 and in alternate years.

366 Hydrology
A study of natural freshwater cycling in watersheds, this course covers the processes controlling soil water, stream flow, lake circulation, groundwater flow, and the exchange of water between natural reservoirs and the atmosphere; applications of chemical tracers to hydrology; aspects of human interaction with these systems, including flood hazards, water resource usage, and contamination. Prerequisites: ESCI 171; ESCI 172 or AQUA 100. Three credits and lab.

374 Geographic Information Systems
Students will learn how GIS tools can be used to analyze, represent and model geographic data derived from censuses, surveys, maps, aerial photographs, and satellite imagery. Topics include cartography and map projections; spatial and attribute data; data capture techniques; vector and raster structure; GIS analysis; data visualization; GIS modeling. Credit will be granted for only one of ESCI 374 or ESCI 471. Cross-listed as INFO 374. Three credits and lab.

375 Geological Field Methods
An introduction to field techniques; geological mapping on small and large scales; stratigraphic and structural interpretations. Topics include aerial photographs, topographic, and geophysical maps; elementary surveying techniques; systematics of rock and mineral identification. Includes a 10-day introductory field camp, normally at the end of the second year, held in collaboration with Acadia University. Prerequisites: ESCI 202, 215, 216 or permission of instructor. Three credits.

376 Environmental Earth Science Field Course
A field and lab course which introduces field techniques in environmental earth sciences, including sampling, collection, analysis, and interpretation of climatological, geo-chemical, biogeo-chemical, hydrological, geo-physical, and surficial geological data. Topics include spatial variability in natural physical and chemical processes; field sampling techniques and tools; lab and computer-aided analysis of data. A 10-day course held in May. Prerequisites: ESCI 271, 272, 305 or permission of the instructor. Three credits.

386 Oceanography
This course provides an introduction to physical oceanography and its processes governing the ocean and its interaction with the atmosphere. Prerequisites: ESCI 172 or AQUA 100 or permission of the instructor. Three credits and lab. Offered 2015-2016 and in alternate years.

406 Advanced Environmental Geochemistry
An advanced examination of selected topics in environment geochemistry and biogeochemistry including chemical cycling and contamination in atmospheric, soil and aquatic environments from an Earth systems science perspective. Topics may include stable isotopes, redox processes, sulfur, carbon and nitrogen cycling. Prerequisites: ESCI 271, 305 or permission of the instructor. Three credits and lab. Offered 2015-2016 and in alternate years.

415 Special Topics in Earth Sciences
This course will cover selected current topics in Earth sciences. Prerequisite: permission of the instructor. Three credits.

426 Ore Deposits
Covers classification, petrology, ore mineralogy, and mode of occurrence of mineral deposits. Laboratory stresses familiarity with the large and small-scale characteristics of mineral deposits and interpretation of the controls of ore formation. Prerequisites: ESCI 215, 301, 245; ESCI 302, concurrent if necessary. Three credits and lab. Not offered 2015-2016.

435 Advanced Structure and Tectonics
Topics include regional structures; mechanics of deformation; geometric analysis; tectonics and metamorphism; interpretation of single and polyphase deformation; structural interpretations of ore zones; overview of tectonic processes; tectonic principles and dynamics; tectonic elements, zones, and terranes; the origin and development of orogenic belts; Phanerozoic, Proterozoic, and Archean tectonics. Prerequisites: ESCI 245. Three credits and lab. Not offered 2015-2016.

446 Advanced Sedimentology and Basin Analysis
Covers the origin, geochemistry, and diagenesis of sedimentary rocks, including siliciclastics, carbonates, and organic matter in sediments. Applies stratigraphic correlation, facies analysis methods, and geophysical techniques to basin mapping; depositional systems and sequence stratigraphy; basin subsidence and fill; regional and global stratigraphic cycles; and basin models in plate tectonics. Prerequisites: ESCI 202, 215, 245. Three credits and a lab. Offered 2015-2016 and in alternate years.

465 Hydrogeology
Covers the principles and applications of groundwater and groundwater flow, including: Darcy’s Law; steady-state and transient flow conditions; flow nets, aquifer testing, and groundwater resource evaluation; the role of groundwater in the hydrologic cycle; and the physical processes controlling groundwater pollution. Prerequisites: ESCI 305; ESCI 366 or permission of the instructor; MATH 111, 112. Three credits and lab.

472 Ocean-Atmosphere Interactions
This course introduces students to a unified treatment of ocean and atmospheric processes. The mathematical treatment of the phenomena will be central to this course and students will gain an in-depth understanding of the fundamental physical behaviour of large-scale ocean-atmosphere interactions. Prerequisites: ESCI 246, 271, 272; PHYS 100 or 120; MATH 111, 112. Three credits and lab.

475 Geophysics
This course introduces the use of physical measurements to determine the internal and external structure and composition of the Earth system. Topics include (but are not limited to) an introduction to earthquake seismology, gravity and magnetic fields, isostasy, seismic reflection, heat flow applications, and elementary concepts in geodynamics. This course summarizes current knowledge of Earth system science as determined by modern geophysical techniques. Some computing techniques are presented in lab. Prerequisites: MATH 111, 112; PHYS 100 or 120 recommended. Three credits and lab. Offered 2015-2016 and in alternate years.

476 Advanced Geological Field Methods
A seven-day field camp in an important geological area held in late summer, followed by structural and petrographic analysis, seminars and report writing during the fall term. Prerequisites: ESCI 245, 375. Three credits and lab.

491 Senior Seminar
This course will foster discussion and analysis of current topics in Earth sciences with emphasis on student initiative. Each student will select a major problem to work on during the year. No credit.

493 Senior Dissertation
Restricted to honors students. Three credits.

499 Directed Study
Designed for advanced students interested in fields of study not normally covered in courses or thesis presentations. The research may be field-, laboratory- or library-based. Under the supervision of a faculty member, students will plan and conduct research, present the results of their research at a department seminar, and produce a research paper. Prerequisite: permission of the department chair. Three credits. See section 3.5.

Department Requirements
Students can earn a BA, a B.Sc. or a BBA with a concentration in economics; an honours degree in economics with a subsidiary subject; or an honours degree in another program with economics as a subsidiary subject. Students in economics can complete a minor in business administration. Programs of study must be approved by the department chair.

BA Minor Program
a) ECON 101, 102, 201, 202;
b) 12 credits ECON
Students who take a minor in economics typically combine the minor with major in English, history, philosophy, political science, or sociology, or with the BBA degree.

BA Major Program
See chapter 4 for information on the degree pattern, declarations of major, advanced major and honours, advancement and graduation requirements.

BA Advanced Major Program
a) ECON 101, 102, 201, 202, 301, 302, 371, 372, 493, 494;
b) 6 credits of MATH or STAT; 3 credits must be calculus;
c) 15 credits ECON with at least 12 credits at the 300 or 400 level;
d) 6 credits of calculus.

B.Sc. Advanced Major in Economics
Candidates for a major or advanced major in economics may take a minor in business administration by fulfilling the normal requirements for the major or the advanced major degree and completing 24 credits in BSAD. The student will normally complete BSAD 101, 102, 221, 233, 231, 261, and six credits of BSAD electives.

BA Honours Program
a) ECON 101, 102, 201, 202, 301, 302, 371, 372, 493, 494; 30 credits ECON electives with at least 18 credits at the 300 or 400 level;
b) a thesis supervised by a department member;
c) 6 credits of calculus.

Students planning to pursue graduate work in economics are encouraged to take additional MATH courses.

BA Honours with a Subsidiary Subject
An honours degree in economics may be completed with a subsidiary subject. Candidates must follow the degree regulations established by the university and the requirements established by both departments; see section 4.1 and the relevant department chairs. Honours degrees with a subsidiary subject are offered in a wide range of disciplines.

The Department of Economics offers the following programs:

BA Honours in Economics and Aquatic Resources
BA Honours in Economics and Political Science
BA Honours in Economics and History
BA Honours in Economics and Mathematics, Statistics & Computer Science

When economics is the primary subject, not the subsidiary subject, students are required to complete:

a) ECON 101, 102, 201, 202, 301, 302, 371, 372, 493, 494;
b) 18 credits of ECON electives with at least 12 credits at the 300 or 400 level;
c) a thesis supervised by a department member;
d) 6 credits of calculus.

When economics is the subsidiary subject, students are required to complete:

a) ECON 101, 102, 201, 202, 301, 302;
b) normally 18 credits ECON electives with at least 6 credits at the 300 or 400 level;
c) ECON electives may include ECON 493 with approval of the department chair;
d) A course in quantitative methods (ECON 371; 372; STAT 201, 224, 231) is strongly recommended.

Honours in Economics with a subsidiary in Mathematics and Computer Science
Students must include ECON 401, 402, 471 as ECON electives.

Honours in Mathematics and Computer Science with a subsidiary in Economics
ECON 401, 402, 471 are recommended as ECON electives. Depending on the nature of the individual thesis, joint supervision by an economist and a mathematician may be appropriate.

BBA Joint Honours
In conjunction with the Department of Business Administration, the Department of Economics offers a joint honours program in business and economics. See section 5.1 for degree regulations.

B.Sc. Honours in Economics
See degree regulations in chapter 7. Degree requirements are:

a) ECON 101, 102, 201, 202, 301, 302, 371, 372, 493;
b) 15 credits ECON electives, including 6 at the 300 or 400 level;
c) a minimum of 12 credits in MATH including STAT 231 and 6 credits of calculus;
d) the 18 credits of approved electives are normally taken in math or science subjects;
e) PHIL 213 is recommended.

B.Sc. Honours in Economics
See degree regulations in chapter 7. Degree requirements are:

a) ECON 101, 102, 201, 202, 301, 302, 371, 372, 401, 402, 471, 493, 494 and 21 credits ECON electives with at least 9 credits at the 300 or 400 level;
b) a thesis supervised by a department member;
c) a minimum of 12 credits in MATH, including 6 credits of calculus;
d) the 18 credits of approved electives are normally taken in math or science subjects;
e) PHIL 213 is recommended.

Note: ECON 101 and 102 are prerequisites for all other courses unless otherwise stated. Students lacking other prerequisites may request department approval to enrol in a course.

101 Introductory Microeconomics
This course provides an introduction to microeconomic concepts and methodology. Students will learn about basic concepts such as scarcity and opportunity cost, and economic efficiency. The other central themes of the course include theories of supply and demand; the theory of production and costs, the functioning and the performance of competitive markets versus monopolies and oligopolies; labour markets and the markets for public goods. Three credits.

102 Introductory Macroeconomics
The second half of introductory economics provides an introduction to macroeconomic concepts. The course examines pressing problems and issues in the Canadian economy and the world. Students will learn about alternate economic systems, national income accounting and the components of the national economy;
the role of money in the economy; inflation; unemployment; international trade and trade policy; and the role of government in managing the economy. Three credits.

201 Intermediate Microeconomic Theory I
An introduction to the basic concepts of microeconomic theory; this course examines the demand-supply model, consumer theory, production theory, and the purely competitive model, using numerical examples and graphs as aids. Three credits.

202 Intermediate Macroeconomics I
This is the first of two half-courses on intermediate macroeconomics. Students will examine the structure of, and behaviour underlying, contemporary national economies with emphasis on the policies developed to gear them towards the public interest. This course focuses on the Keynesian and classical models of the closed economy for explaining what determines national income, employment, unemployment, prices, inflation, and the interest rate. Three credits.

211 Local and Community Development Economics
Beginning with theories of local and community economic development and welfare, this course provides an economic analysis of community needs and resources (human resources, capital and natural resources, infrastructure). Students will examine interactions within the community and between the community and the outside world, exploring approaches to local and community economic development and planning. Cross-listed as DEV$S 211. Three credits.

241 Canadian Economic Prospects and Challenges
Covers policy issues and problems in the Canadian economy. Topics include employment and unemployment; poverty and income distribution; productivity, education and the ‘brain drain’; health care and the social welfare safety net; trade and globalization; the environment and sustainable development; the primary sectors, regional disparity; and the new economy. Topics that reflect strong student interest and/or new issues may be added. Three credits. Not offered 2015-2016.

271 Quantitative Methods in Economics
This course introduces students to quantitative and mathematical tools commonly used in the study of economics and finance. Topics include functions of one or more variables, financial mathematics, differential calculus and linear algebra. Applications include computing elasticities, macroeconomic equilibria, profit-maximization, constrained optimization, interest rates, present value and bond pricing. Prerequisite: ECON 101; completed or concurrent. Three credits.

281 Environmental Economics
As an introduction to the relationship between human economic activity and the environment, this course explores the economic concepts used to analyze the causes, consequences, and possible solutions to local and global environmental issues. Topics include market failure; property rights; externalities; public goods; environmental valuation; environmental policies dealing with pollution and global issues such as global warming, ozone depletion, biodiversity, and sustainability. Prerequisite: ECON 101. Three credits.

291 Economics of Leisure, Recreation & Sports
This course includes topics related to choices about the time individuals do not spend working. It deals with aspects of the economics of leisure and labour supply; the valuation of time; outdoor recreation; the economics of sports; the economics of dating and marriage; the economics of crime and the consumption of addictive goods; the economics of gambling and other addictive behaviour associated with the consumption of leisure, and the economics of the entertainment industry. Prerequisite: ECON 101. Three credits.

301 Intermediate Microeconomic Theory II
An extension of ECON 201, this course covers price determination in monopoly, monopolistic competition, and oligopoly models. Uncertainty and risk, factor pricing, capital investment over time, externalities, and public goods are discussed. The use of micro-economics as a tool in decision-making is illustrated. Prerequisite: ECON 201. Three credits.

302 Intermediate Macroeconomics II
This sequel to ECON 202 explores the new Keynesian and new classical perspectives on the macro economy. Attention is directed to the determinants of investment, consumption, money demand and supply as well as the role of expectations in macro behaviour. Questions of unemployment, inflation, interest rates, the government budget, economic growth and macroeconomic policies are examined in their international setting. Prerequisite: ECON 202. Three credits.

305 Economic Development I
Starting with an overview of the present state of the world, this course explores economic development strategies and prospects for the Third World. Topics include the meaning of economic development: past and present theories of growth; alternate approaches to economic development (including the grassroots approach and sustainable development); the role of agriculture and industrialization; and issues pertaining to development planning, markets and the role of governments. Cross-listed as DEV$S 305. Three credits.

306 Economic Development II
This course covers economic development prospects and experience in the Third World. Topics include income distribution; population and human resources (including education and health); urbanization, rural-urban migration and the informal economy; labour markets and unemployment; gender and development; savings, taxation and investment; foreign aid and MNCs; the debt problem and structural adjustment; trade and globalization; and the international economic order. Cross-listed as DEV$S 306. Prerequisite: ECON 101, 102. Three credits.

312 Industrial Organization
This course deals with the behaviour of firms in imperfectly competitive markets and with the role of competition policies. Business practices such as price discrimination, product differentiation, advertising, and investment in research and development will be explained using both traditional models of industrial organization and more recent ones, which emphasize issues of strategic interaction. Prerequisite: ECON 201. Three credits. Not offered 2015-2016.

335 Money Banking & Financial Markets I
The course uses basic economic principles to organize students’ understanding of and thinking about money, the functions and structure of financial markets and financial institutions. Topics covered include: the necessity, the nature, and the future of money; the determinants of interest rates; the term structure of interest rates, the pricing of government securities; what banks do and how their operations affect the economy. Credit will be granted for only one of ECON 335 or ECON 330. Three credits.

336 Money Banking & Financial Markets II
The course introduces students to the role of imperfect information in financial markets. Topics covered include: asymmetric information and its consequences; the necessity of regulations of financial institutions and the role of domestic regulators and policy makers; comparative analysis of financial system regulations; financial market instabilities and the elements for the conduct of monetary policy. The course helps students understand the causes of financial instability and crises, and what policy makers can do to alleviate or avoid them. Credit will be granted for only one of ECON 336 or ECON 330. Prerequisite: ECON 335, ECON 202 is recommended. Three credits.

361 Human Resources and Labor Economics
The course analyzes the essential elements of the labour market: labour demand and labour supply, and their interaction to determine wages, employment and unemployment. Topics include fertility, education, regional wage disparities, income maintenance schemes, wage discrimination, the unemployment insurance program, unions and collective bargaining, and the distribution of wealth. Prerequisite: ECON 201. Three credits.

364 Health Economics
The course introduces students to the role of economics in health, health care, and health policy. The course focuses on individual’s choice pertaining to health, and economic evaluation of various methods of health care delivery. Students will learn how the market for health care differs from other markets, especially with regards to uncertainty and asymmetric information, and understand health insurance markets and their interrelationship with the market for health care services, as well as the role of the government. Prerequisite: ECON 201. Three credits.

365 International Trade
Covers the theory of international trade and its policy implications, including: comparative advantage; gains from trade; terms of trade; trade and growth; trade and economic development; commercial policy (tariff and non-tariff barriers, effective protection, trade liberalization); economic integration (with emphasis on NAFTA and the EC); migration and trade in service; and intellectual property rights. Prerequisite: ECON 201. Three credits.

366 International Payments and Finance
Covers the theory and policy implications of international payments and finance. Topics include the exchange rate and the foreign exchange market; balance of payments problems and policies; fixed versus flexible exchange rate regimes and common currency areas; the Eurocurrency market; open economy macroeconomics; international finance, financial liberalization and globalization; capital flows and multinational corporations; and the international monetary system. Prerequisites: ECON 201, 202. Three credits.

371 Econometrics I
This course develops the simple and multiple classical regression models, interval estimation and hypothesis testing. The problems of estimation, inference, mis-specified structures, multicollinearity, heteroskedasticity, and serial correlation are
presented. Students will be exposed to STATA or other relevant econometric software. The course requires some proficiency in calculus and basis statistics. Prerequisites: MATH 111, 112; STAT 201 or 231 or permission of the instructor. Three credits.

372 Econometrics II
This course is a continuation of ECON 371 and deals with various estimation methods, including least squares and maximum likelihood, specification tests, dynamic models and simultaneous equation models as well as limited and qualitative dependent variables. Students will be exposed to MATLAB or other matrix-based analytical software. Prerequisite: ECON 371. Three credits.

381 Natural Resource Economics
Examines the role of natural resource industries in the Canadian and world economies, including minerals, oil and gas, forest resources, fisheries and endangered species, and water resources. The course introduces students to the use of economic tools in analyzing problems of renewable and non-renewable resource management. Topics include welfare and inter-temporal analysis of resource exploitation; ownership and property rights issues in resource use and management; the nature of resource markets; resource taxation; biodiversity conservation; and sustainability. Prerequisites: ECON 201; MATH 111 recommended. Three credits.

391 Public Finance I: Expenditures
An analysis of the role of government in the economy, focusing on expenditure and with emphasis on the Canadian situation. Starting with an introduction to the public sector, the course covers: the rationale for government participation in the economy; the growth of the public sector over time; the theory of collective decision-making; cost-benefit analysis; fiscal federalism; specific spending programs. Prerequisite: ECON 201. Three credits.

392 Public Finance II: Taxation
An analysis of the role of government in the economy, focusing on revenue and with emphasis on the Canadian situation. Starting with an introduction to taxation and tax policy, the course covers: individual income taxes; corporation taxes; consumption; value-added and sales taxes; property and other taxes; tax reform; the revenue side of fiscal federalism; and the international dimensions of taxation and taxation policies. Prerequisite: ECON 201. Three credits.

401 Advanced Microeconomics
An advanced treatment of micro-economic concepts and topics, such as consumer choice and demand analysis, production technology and cost, market structure and pricing, factor markets and shares, general equilibrium and economic welfare. Credit will be granted for only one of ECON 401 or ECON 412. Prerequisites: ECON 301; MATH 112 or ECON 271. Three credits.

402 Advanced Macroeconomics
An advanced treatment of macroeconomic theory and how macroeconomic policy is conducted. The course offers deeper insights into economic growth processes, business cycles, international macroeconomic stabilization policies, and alternative approaches to building macroeconomic models. Students are introduced to the use of two-period models. Credit will be granted for only one of ECON 402 or ECON 411. Prerequisites: ECON 302; MATH 112 or ECON 271. Three credits.

471 Mathematical Economics
An introduction to mathematical reasoning in economics and business, this course covers: the methodology of operations research; profit and cost analysis; resource use and production decisions; input-output and macro-analysis; pricing and inventory decisions; capitalization of cash flows and growth; portfolio selection and investment. Prerequisites: MATH 111, 112. Three credits.

491 Selected Topics I
The topic for 2015-2016 is The Economics of Violence. This course examines the economic causes and consequences of violent conflict, whether it be from the perspective of nation states (e.g. war, revolution), or between individuals (e.g. civil unrest, domestic abuse). We will use both microeconomic theory and well-identified empirical evidence to analyse fundamental questions, such as “How can we prevent violence?”. By the end of this course, you will have a thorough understanding of the economic literature on violence, and be able to engage with the most current issues in the field. More generally, you will learn how to apply theory and evidence to policy. Three credits.

492 Selected Topics II
Three credits.

493 Seminar
This is a capstone course designed to introduce students to current research issues in various fields of economics. Students will read and critically analyze significant historical or recent research papers, and to complete assignments related to these readings. They will also be exposed to the art of presenting research findings, as department faculty and visiting speakers will present some of their latest research. In the past students have been exposed to topics such as: macroeconomic data revisions; economic impact of climate change; European financial integration; matching models; and the economics of the non-profit sector. Three credits.

494 Thesis
Each student works under the supervision of a professor who guides the selection of a thesis topic, the use of resources, the methodological component, and the quality of analysis. Restricted to honours students. Three credits over full year.

499 Directed Study
A directed study course in advanced topics in economics. See section 3.5. Students wishing to take this course must consult the department chair. Three credits.

Mi'kmaq Language Focus

A student in either the elementary or secondary program can achieve a focus on Mi'kmaq language by earning credit for EDUC 454 and 455.

French Language Specialization

A student in either the elementary or secondary program may specialize in teaching French. Students who complete EDUC 459 and 460 may achieve a core French specialization. Students with demonstrated French fluency can, after successfully
Physical Education Specialization
A student in either the elementary or the secondary program may specialize in teaching physical education by earning credits for EDUC 425A and B, and 444. These courses prepare the teacher for a K-12 physical education where the emphasis is on the development of a physically active lifestyle, and includes such topics as movement education, fitness and dance, outdoor education, health education, personal development. Students pursuing this specialization would take EDUC 425A in the fall of year one, EDUC 425B in winter year one; EDUC 444 in the fall of year two, and EDUC 457 in the winter of year two.

Core Courses for Elementary and Secondary Programs
Year One

433 Sociology of Education
This course will examine the social-political context of education in Canada, particularly contemporary structures. Students will explore the relationship between educational opportunity and conditions of inequality. Three credits.

435 Inclusive Practices I
This course discusses educational, practices and procedures, past and present, affecting pupils who have been marginalized socially and/or physically. These policies have evolved from an ideology of exclusion to inclusion. Preservice teachers will learn curriculum and instructional approaches to assist in meeting the academic and socio-emotional needs of students with diverse learning needs. Three credits.

471 Internship I
Students are placed in schools for five weeks of supervised practicum. Three credits.

472 Internship II
Students are placed in schools for five weeks of supervised practicum. Three credits.

Year Two

434 Contemporary Issues in Public Education
This course examines the historical, legal, and philosophical underpinnings of contemporary issues facing public schooling, Goals, purposes, and dilemmas that have affected such facets of education as the structure of Canadian schooling, political and policy making processes, educational law, the work of teachers' organizations, and educational standards are explored. Three credits.

436 Inclusive Practices II (E2 & S2)
This course provides preservice teachers with an understanding of the learning strengths and challenges of students with exceptionalities. Emphasis will be placed on collaborative team planning, professional supports provided for students with diverse learning needs, the assessment and education referral process, and the development of individualized educational plans. Three credits.

481 Internship III
Students are placed in schools for five weeks of supervised practicum. Three credits.

482 Internship IV
Students are placed in schools for five weeks of supervised practicum. Three credits.

Required Elementary Courses

411 Curriculum and Instruction in Language and Literacy I (E1)
This course is designed to prepare prospective elementary teachers to teach the language arts: reading, writing, speaking, listening, and viewing. Also included is comprehensive literacy programming, children's literature, authentic assessment, and organizing the classroom for language instruction across the curriculum. Throughout this course, the practical influence of various language arts theories is emphasized with a particular focus upon early literacy in the lower elementary grades. Three credits.

412 Curriculum and Instruction in Mathematics (E1)
This course includes an examination of the elementary school mathematics program, and of various approaches to teaching mathematics to children, with emphasis on exploring strategies for the development of conceptual understanding through multiple representations. Three credits.

413 Curriculum and Instruction in Science (E1)
The focus of this course is an emphasis on the process approach to teaching science, on the inquiry method, and on special techniques in the teaching of scientific concepts. The elementary science curriculum is examined. Three credits.

414 Curriculum and Instruction in Language and Literacy II (E2)
This course is a continuation of Language Arts I with emphasis on the upper elementary years. Three credits.

416 Curriculum and Instruction in Social Studies (E1)
A review of the social studies programs used in elementary school, with emphasis on the development of skills, methods and approaches involved in teaching these programs. Three credits.

439 Principles and Practices of Elementary Education (E1)
This course emphasizes the foundations of becoming an elementary school teacher. Topics include the professional and ethical role of the teacher, educational planning, the professional development process, reflective practice, teaching strategies, learning processes, classroom environment and management. Six credits.

463 Elementary Assessment for and of Learning
This course examines current research and practices in classroom assessment, evaluation, record keeping and communication of student achievement. Three credits.

468 Teaching Mathematics in Middle Schools
Students will learn the process, content, and assessment of middle school mathematics. They will make connections, communicate, reason mathematically, and complete problems. Students will explore strategies for the development of conceptual understanding through multiple representations. Three credits.

Required Secondary Courses

420 to 429 Curriculum and Instruction in Secondary Education (S1 and S2)
Curricular and instructional concepts will be described, demonstrated, evaluated, and applied in relation to the following subject fields of the school curriculum:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Subject</th>
</tr>
</thead>
<tbody>
<tr>
<td>420</td>
<td>A &amp; B Gaelic</td>

</tbody>
</table>

469 Selected Topics: C & I Spanish
Students normally register for one of these eight courses in year one, and a second in year two. The choice is determined by each student’s two subject fields of study. For students pursuing a French or physical education specialization, please consult that section of the Calendar for more details of course sequence. Students with more than two teachable subjects may take additional courses from this list as electives. Six credits per pair.

432A & B Principles and Practices of Secondary Education (S1)
This course emphasizes the foundations of becoming a secondary school teacher. Topics include the professional and ethical role of the teacher, educational planning, the professional development process, reflective practice, teaching strategies, learning processes, classroom environment and management. Three credits each.

438 Assessment for and of Learning (S2)
This course explores issues surrounding the assessment for and of learning from a variety of perspectives. Basic principles of learning theory will be emphasized in the context of curricular examples from different teachable subject areas. Students will gain the skills necessary to critically evaluate and develop effective assessment approaches. Three credits.

440 Literacy in the Content Areas (S2)
This course explores and models teaching strategies that are consistent with the philosophy and background theory of content literacy. Students use the associated theories of literacy and the five recognized tools (reading, writing, speaking, listening, viewing) to develop their knowledge of, and skill in applying, these concepts. Three credits.

Electives

205 French/Education (Thematic Oral Communication)
Available exclusively to education students, this course enhances French communication skills, leading to the necessary proficiency to teach core French at the elementary level. The course is designed for students who have studied French as a second language at the secondary level, or who have had some exposure to...
French at the university level. Three credits.

417  Curriculum and Instruction for Diversity
This course provides preservice teachers with an overview of curricular approaches and content for representing the cultural diversity of Canadian society in the elementary curriculum. Multicultural, anti-racist, feminist and Aboriginal approaches to curriculum content, teaching, assessment, classroom management and learning are emphasized. Three credits.

419  Curriculum and Instruction in Middle School Science
This course examines curriculum and instructional strategies appropriate in middle years’ science classrooms, including an emphasis on the process approach to teaching science, the inquiry method, and special techniques in the teaching of scientific concepts. The grade six to grade nine science curriculum is examined. Three credits.

437  Guidance (S2)
This course focuses on the development and knowledge of interpersonal relationships and interpersonal skills required by the classroom teacher in providing guidance for his/her students. It addresses specific strategies and frameworks for meeting the needs of at-risk students and those with other special needs in a variety of contexts. The basic principles and practices of guidance will be emphasized. Three credits.

442  Learning through Drama
This course provides pre-service, K-12 teachers with concepts and ideas for drama lesson plans; approaches to drama; basic drama and drama education theory; a working knowledge of theatre production; an introduction to the Nova Scotia curricular guidelines; and play selection guidelines for elementary and secondary student productions. Three credits.

444  Outdoor Experiential Education
Students will explore strategies to encourage their pupils to achieve, appreciate, and maintain a physically active lifestyle in the outdoors. They will learn to develop physical education programs that foster a life-long commitment to outdoor education that is enjoyable, challenging, and safe. They will experience a range of outdoor pursuits and selected topics: flatwater paddling, navigation, Geocaching, core camping, snowshoeing, archery, wilderness and remote first aid, risk management and emergency procedures, and other activities that allows for self-expression and positive social interaction. Three credits.

445  Curriculum & Instruction in Comprehensive School Health
This course provides students with an interest in health and wellness an opportunity to acquire the knowledge, skills and attitudes needed for teaching a comprehensive school health education curriculum in the public school system. An overview of the main components of a comprehensive school health curriculum and associated pedagogical approaches will be explored. Three credits.

447  Mental Health Education
This course will develop an understanding of mental health education as both wellbeing and the experiences of children and youth who are living with poor mental health in schools. Pre-service teachers will develop their awareness of how such issues as anxiety, depression, addictions and bullying can be addressed to create greater well-being for all students and staff. The course will also analyze school policies and various support services related to mental health education. Three credits.

453  Teaching English Language Learners
Provides student teachers with a thorough understanding of the theoretical and methodological aspects of learning and teaching a second language, focusing on the learning/teaching of English (ESL). Students will become familiar with relevant research and will examine the prevalent theories in different ESL areas. Three credits.

454  Mi’km’aq Language Arts I
This course will focus on language acquisition theories and the methodologies that support these theories. Students will examine current approaches to bilingual language learning, especially reclamation and revitalizing aboriginal languages. Topics include early literacy strategies linked to oral tradition; immersion strategies; promoting oral and written language; different writing systems used by Mi’km’aq over time, including the Smith-Francis orthography. Three credits.

455  Mi’km’aq Language Arts II
This course combines theories of language acquisition with their practical application in first- and second-language classrooms. Topics include materials and lesson development; using community resources; bringing elders into the classroom; making links with parents and other community members for language revitalization; connecting language communities using technology. Students will continue to perfect their ability to use the Smith-Francis orthography. Three credits.

456  Curriculum and Instruction in Music
This course provides an examination of music methods, materials, and curricula, using the Kodaly and other systems currently in use in the elementary school system. Three credits.

457  Curriculum and Instruction in Elementary Physical Education
This course is designed to introduce beginning pre-service teachers to the theoretical knowledge, practical experiences, and professional responsibilities of a successful elementary school physical education teacher. This course focuses on establishing structure for elementary physical education, writing unit plans, applying a teaching model based on skill themes and movement concepts, understanding developmentally appropriate instructional approaches, and implementing interdisciplinary practices. Three credits.

458  Curriculum and Instruction in Visual Arts
The aim of this course is to introduce the student to the visual and creative arts, and to discover ways to integrate these with the other subjects of the elementary school curriculum. Three credits.

459  French Education I
This course surveys several theories of language learning and the methodologies that reflect these theories. Students will learn how the National Core French Study (NCFS) brought about a change in French curriculum throughout Canada, and how the four syllabii of the NCFS are incorporated into all aspects of French second-language teaching and learning. Three credits.

460  French Education II
This course combines theories of language acquisition with their practical application in the second-language classroom. Topics will include: unit planning and implementation; materials and lesson plan development in the four skill areas; co-operative grouping strategies; graphic organizers as learning strategies; learning centres and authentic evaluation techniques. Three credits.

462  Teaching Religious Education in a Catholic School
Students will learn about the Canadian Catholic catechism and its setting within the doctrinal foundations of the Catholic faith. Related topics of religious philosophy and spirituality and their roles in people’s lives will be explored. Three credits.

464  Environmental Education
Beginning with the assumption that solutions to environmental problems require well-designed environmental education programs, students will develop a conceptual framework and practical strategies for creating an environmental education curriculum for grades K-12. Three credits.

467  21st-Century Teaching and Learning
This course examines the effective implementation of technological options for teaching and learning in the 21st century for P-12 teachers. Students will explore legal, social, and ethical issues; selection and design of learning experiences that incorporate technology, and analyses of the use of emerging technologies to improve teaching and learning. Three credits.

469  Selected Topics in Education
Three credits.

491  Advanced French Grammar
Available exclusively to education students and educators, this course will lead participants to a critical and analytical review of functional grammar as applied to the field of education. Special focus will be placed on French linguistic structures related to material development, correspondence with parents, teachers and other professionals in the field and the development of additional curriculum resources. A major objective of the course will be to encourage and enable participants to learn to self-correct written and oral communication. Restricted to Year 2 French students only. Three credits.

493  Directed Study
In consultation with the department and with permission of the chair, students may undertake a directed study in an approved area of interest not available through other course offerings. See section 3.5. Three credits.

Certificate Courses

401  Pedagogical Foundations for Elementary Mathematics Education I: Numeracy
This course is a survey of curriculum topics, which supports teachers’ delivery of the elementary mathematics curriculum. Selected topics in the pedagogy of numeracy are designed to help pupils develop their mathematical thinking in relation...
to numerical reasoning. In-service teachers will investigate and explore topics of relevance for the effective teaching of elementary school mathematics including number systems, operation sense, rational and irrational numbers, counting principles, and statistics. Three credits.

402 Pedagogical Foundations for Elementary Mathematics Education II: Mathematical Modelling
This course is a survey of curriculum topics, which support teachers’ delivery of the mathematical modelling components of the elementary mathematics curriculum. Selected topics in the pedagogy of mathematical modelling are designed to help develop their mathematical thinking in relation to modelling real-world contexts and solve mathematical problems. In-service teachers will investigate and explore selected topics for the effective teaching of elementary school mathematics including functions, algebraic modelling, statistical modelling, and graph theory. Three credits.

403 Pedagogical Foundations for Elementary Mathematics Education III: Geometric Reasoning
This course is a survey of curriculum topics, which supports teachers’ delivery of the elementary mathematics curriculum. Selected topics in the pedagogy of modern geometries are designed to help pupils understand the application of geometric reasoning. In-service teachers will investigate and explore topics of relevance for the effective teaching of elementary school mathematics including Euclidean and non-Euclidean geometry, topology, transformational geometry, and geometric constructions. Three credits.

404A Curriculum and Instruction in Early Childhood Mathematics I
This course includes an examination of the elementary school mathematics program focusing on appropriate content and pedagogy from pre-kindergarten to grade two. Students in this course will focus on various approaches to teaching mathematics to young children, with emphasis on exploring strategies for the development of conceptual understanding through multiple representations including concrete models, pictures, symbols, words and contextual situations. Three credits.

404B Curriculum and Instruction in Upper Elementary Mathematics II
This course includes an examination of the elementary school mathematics program focusing on appropriate content and pedagogy for grades three to six. Students in this course will focus on various approaches to teaching mathematics to children in upper elementary, with emphasis on exploring strategies for the development of conceptual understanding through multiple representations. Three credits.

9.17.2 Master of Education
Graduate courses in education are offered in the fall, winter, and spring terms in locations around the province and in summer school in July in Antigonish. Because the majority of M.Ed. candidates study part time, the fall, winter, and spring courses are offered in evenings and on weekends.

Candidates for the M.Ed. program are normally required to take EDUC 505 and EDUC 534 as their first two courses in Antigonish during the summer session after acceptance into the program. EDUC 505 is a prerequisite for EDUC 506, 507, 508. Normally EDUC 506, 507, 508 are taken after the core courses are completed. EDUC 506 or 507 is required in the thesis and project routes.

Electives are to be selected from the graduate courses offered in education and should reflect the focus of study chosen by the student. Three credits each.
521 **Current Research in Instruction**  
A critical exploration of recent theories and research related to current issues in instruction with a concentration in one of:  
521A English Language Arts  
521B French  
521C Mathematics  
521D Diverse Cultures  
521E Science  
521F Social Studies  
521G Physical Education  
521H Arts  
521I Health  
521J Outdoor/Experiential  
521K Second Language  
521L Drama  
521M Music  
521N Visual Arts  
Three credits each.

527 **Principles of Learning**  
This course examines theories of learning and development and their implications for instruction. In addition to the general cognitive and behaviourist theories, the course will focus on the aspects of cognitive learning that are relevant to understanding the diversity of learners. Three credits.

529 **School and Teaching Effectiveness**  
An examination of research on school and teaching effectiveness and the implications of this research for school improvement. Three credits.

532 **Curriculum Theory**  
In this course the ideas of major curriculum theorists will be examined and the implications of each position for program development for schooling will be explored. Three credits.

533 **Dynamics of Change**  
This course examines major concepts in the successful implementation of change. Students will learn to recognize and understand the ways in which change can have an impact on education. Three credits.

534 **Introduction to the Foundations of Education**  
Students are asked to critically examine their own practice and its context. Issues of power and privilege as they operate in the field of education are central unifying themes of the course. The investigative approach includes ethical reasoning, autobiographical reflection, arts and esthetics, deconstruction and sociological analysis. Three credits.

536 **Program Development**  
Program development is investigated from the practitioner’s perspective using narrative inquiry to explore relationships among the four curriculum commonplaces of students, teacher, curriculum, and milieu. Three credits.

537 **Philosophical Foundation of Curriculum**  
This course examines the philosophical foundations, criteria, and principles underlying the choice of subjects and curricula in educational institutions. Three credits.

538 **Nature of the Reading Process**  
This course will examine models related to our understanding of the reading process and will explore the contributions of current literary theories to the development of contemporary literary theories and practices. Three credits.

540 **Educational Finance**  
While providing students with the opportunity to explore public and private funding of education, this course will also examine the moral, political, and economic bases for decisions in educational finance in the context of current educational and societal trends. Three credits.

541 **Administration of First Nations Education**  
An introduction to the historical, legal, and philosophical bases of First Nations education. The course will explore issues related to the roles, responsibilities, and duties of administrators in band-controlled schools. Three credits.

543 **Internship**  
Under faculty supervision, student interns will develop their practical and theoretical knowledge and competence in a particular area of education. Three credits.

544 **Cross-Cultural Issues in Education**  
Students will examine various issues and theories related to cultural and race relations policies and practices in the education system. Three credits.

545 **English as a Second Language**  
The course will cover theoretical and methodological aspects of learning and teaching a second language, focusing on the learning and teaching of English. Students will become familiar with the relevant research and examine the prevalent theories in different ESL areas. Three credits.

553 **Assessment for Teaching Students with Learning Challenges I**  
This course will review trends and practices in assessment. Students will appraise various types of assessment, both standardized and informal, paying attention to characteristics, areas of usefulness, and limitations. Three credits.

554 **Assessment for Teaching Students with Learning Challenges II**  
Students will develop the ability to choose formal and informal measures for assessing individual student achievement. They will learn how to administer, interpret, and communicate the results of these assessments. Relating the results of the assessment to the provincial outcomes suitable for the students will be a critical component of the course. Prerequisite: EDUC 553. Three credits.

561 **Leadership and Administrative Theories**  
This course is an introduction to theory, research and practice in educational administration. Emphasis is placed on the evolutionary nature of administrative theory and its role in the operation of public education systems. Three credits.

562 **Contemporary Issues in Educational Administration Theory**  
This course further explores contemporary issues in the theory, research, and practice of educational administration. Building upon EDUC 561, students will discuss topics such as post-modernism, feminist theory, chaos theory, and critical theory. Prerequisite: EDUC 561. Three credits.

564 **Administration of Inclusive Schools**  
Many Canadian educational systems have inclusive schooling as a priority. This course will provide an overview of the movement towards inclusive schools and will explore proven practices in the administration of these schools. Three credits.

567 **School Law**  
An examination of legal principles and procedures pertaining to school boards, administrators, and teachers. Consideration will be given to legislation and court decisions relative to the organization, policy, and administration of school districts in Nova Scotia. Three credits.

569 **Selected Topics in Education**  
Students will explore in detail the theoretical underpinnings and practical implications of various topics and issues in education. Course content will vary from year to year. Three credits.

571 **Specific Issues in School Administration**  
This course examines recurring and emerging issues in educational administration from the perspective of their theoretical roots. Students will address problems identified in the literature and in their own practice, develop an understanding of the issues involved, examine the theoretical assumptions influencing these problems, and create alternative solution strategies. Three credits.

573 **Professional Development and Supervision**  
This course addresses the role of supervision in an instructional program, focusing on human resources and the professional development process for instructional and support staff. Three credits.

576 **Specific Issues in Curriculum Development**  
This course will examine selected contemporary educational controversies and explore their implications for curriculum decision-making. Students will examine current issues and problems. Three credits.

577 **Computers in Humanities Education**  
This online course provides an overview of the role of computers in elementary and secondary education. By reading articles and books on selected topics, students will have a starting point for online discussions about the issues associated with computer technology in the classroom. Students also study a variety of software packages and Internet websites and create web lessons. Some prior knowledge of computers and basic keyboarding skills is required. This course will be of interest to K-12 teachers who are interested in using computers in language arts, social studies and the arts. Three credits.

578 **Computers in Science Education**  
This online course provides an overview of the role of computers in elementary and secondary education. By reading articles and books on selected topics, students will have a starting point for online discussions about the issues associated with
computer technology in the classroom. Students also study a variety of software packages and Internet websites and create web lesson. Some prior knowledge of computers and basic keyboarding skills is required. This course will be of interest to K-12 teachers who are interested in using computers in the sciences. Three credits.

581 The Role of the Principal
An examination of perspectives on educational leadership, delegation of functionally categorized responsibilities, administration of instructional programs, effective enhancement of staff, and the development of productive and satisfying learning environments for students. Three credits.

583 Education Planning and Policy
An examination of political theory as a basis for constructing policy and planning for the implementation of policy. Three credits.

590 Research Project
This course involves individual research, under the supervision of a faculty member, which develops both practical and theoretical understanding and competence in a particular area of education. Six credits.

593 Directed Study
In consultation with the department chair, students may undertake a directed study program in an approved area of interest that is not available through other course offerings. See section 3.5. Three credits.

595 Seminar
Students work under the supervision of a professor who will guide them in the selection of thesis topics and the preparation of thesis proposals. Students will have the opportunity to discuss their work with others as the research proposal is prepared. No credit.

599 Thesis
Twelve credits.

9.17.3 Ph.D. in Educational Studies
The Ph.D. in Educational Studies is offered in partnership by St. Francis Xavier University, Mount Saint Vincent University, and Acadia University. This research-oriented doctoral program is jointly administered by the Inter-University Doctoral Administrative Committee (IDAC). Applicants are admitted to one university and graduate from that home institution of record.

Doctoral students can focus their studies on one or more of six interrelated themes: curriculum studies, educational foundations and leadership, inclusive education, lifelong learning, literacies, and the psychological aspects of education. Applicants are encouraged to review these research interests of education faculty members at all three participating universities, available at their respective websites. An average of 14 students will be admitted each year: six at MSVU, four at St FX and four at Acadia. The IDAC may consider applicants on a case-by-case basis and waive the fixed application date, if deemed warranted and if space is available in the program for that year.

Students enrol in EDUC 9001 and 9002 on site in July at one of the three universities. The site for these two courses will rotate amongst the three universities from year-to-year. Students complete EDUC 9010 and 9100 with their dissertation advisor and their committee at their home institution of record. The remaining courses are delivered using an e-learning platform. In some instances, doctoral students may arrange to enrol in an existing topic-related Master level course, effective enhancement of staff, and the development of productive and satisfying learning environments for students. Three credits.

9009 Independent Study
The curriculum for this course will be determined by the supervisor of the course in consultation with the student and other faculty members, as necessary. Prerequisites: EDUC 9001, 9002. Three credits.

9010 Comprehensive Examination: Research/Scholarly Portfolio
Students will develop and orally defend an extensive scholarly portfolio demonstrating sufficient breadth, depth, creativity and engagement to undertake substantive research in their field. The portfolio will demonstrate students’ knowledge and competence in each of five areas: general knowledge of educational theoretical traditions and trends, in-depth knowledge of their specific focal area, research and methodological knowledge and competence, professional competency in their focal area, and teaching competency in their professional area. Pass/Fail. The portfolio is created concurrently with EDUC 9001, 9002, 9003, 9004, 9005 and any EDUC 9006, 9007 and/or EDUC 9008. Nine credits.

9100 Dissertation
The dissertation must constitute a substantial and original contribution to the study of education. Students must prepare a research proposal for approval by an appropriate faculty dissertation committee, complete the proposed study, and defend the completed thesis in a final oral examination. Pass/Fail. Prerequisite: EDUC 9010. Eighteen credits.

9.18 ENGINEERING
F. Comeau, Ph.D., P.Eng.
E.C. Oguejiofor, Ph.D., P.Eng.
W.R. Quinn, Ph.D., P.Eng.

Part Time
P. Doiron, P.Eng.
H. Dunnewold, P.Eng.
M.S.G. Razul, Ph.D., P.Phys.

Program requirements are found in chapter 7. Year 1 is common to all disciplines. For year 2, students must follow the requirements for the disciplines to which they hold conditional admissions, as outlined below:

Year 1
- 36 credits consisting of CHEM 120; ENGR 121, 122, 123, 131, 132, 136; PHYS 120; 6 credits of writing courses taken from one or a combination of ANTH, ART (history), CELT (literature or culture), ENGL, HIST, PHIL, PSCI, RELS, or SOCI. Students wishing to take a writing course not listed here must obtain the
Year 2 36 credits consisting of ENGR 144, 211, 221, 222, 224, 232, 235, 237, 242; 9 credits of the program-specific courses listed below:

| Chemical | ENGR 126, 226, 227 |
| Civil    | ENGR 212, 216, 231 |
| Electrical | ENGR 126, 238, 246 |
| Environmental | ENGR 126, 226, 227 |
| Industrial | One or both of ENGR 126 and 216; and one or two of the following for a total of three: ENGR 212, 226, 227, 231, 238, 246 |
| Materials | ENGR 126, 226, 227 |
| Mechanical | ENGR 212, 231; one of ENGR 238, 246 |
| Mineral Resources | ENGR 212, 216; and one course taken from the arts, social sciences, or humanities. Language acquisition, technical content and economics are not permitted. Please consult with the chair of engineering for course selection. |

For up to date information, please visit the department website: http://www.sites.stfx.ca/engineering/

### 121 Calculus I for Engineers
This course examines the main idea of calculus of a single variable. It covers functions; limits; continuity; differentiation and integration of polynomial, exponential, logarithmic and trigonometric functions; product, quotient and chain rules; applications of differentiation to graphing; maximum-minimum problems and related rate problems; definite and indefinite integrals and the fundamental theorem of calculus. Credit will be granted for only one of ENGR 121 or MATH 111. Cross-listed as MATH 121. Three credits and one-hour lab and one-hour problem session.

### 122 Calculus II for Engineers
A continuation of ENGR 121, this course covers applications of integration including areas, volumes, moments, pressure and work; techniques of integration; numerical integration; length of curves; surfaces of revolution; parametric equations; polar co-ordinates; sequences and series and Taylor series. Credit will be granted for only one of ENGR 122 and MATH 112. Cross-listed as MATH 122. Prerequisite: ENGR 121. Three credits and one-hour lab and one-hour problem session.

### 123 Linear Algebra for Engineers
Covers geometric vectors in three dimensions; dot product; cross product; lines and planes; complex numbers; systems of linear equations; matrix algebra; matrix inverse; determinants; Cramer’s rule; introduction to vector spaces; linear independence and bases; rank; linear transformations; orthogonality and applications; Gram-Schmidt algorithm; eigenvalues and eigenvectors. Cross-listed as MATH 223. Three credits and two-hour lab.

### 124 Probability and Statistics for Engineers
This course covers probability laws and the interpretation of numerical data, probability distributions and probability densities, functions of random variables, joint distributions, characteristic functions, inferences concerning mean and variance, tests of hypotheses, linear regression, and time series analysis. Engineering applications are emphasized and statistical computer packages are used extensively. Cross-listed as STAT 224. Prerequisite: ENGR 122 or MATH 122. Three credits and two-hour lab.

### 125 Introduction to Chemical Engineering
This course covers minerals, igneous rocks, weathering, sedimentary rocks, metamorphic rocks, geologic time, mass wasting, running water, groundwater, glaciations, shorelines, ocean floors, deformation and mountain building, earth’s interior, earthquakes. Three credits and two-hour lab.

### 211 Thermo-Fluids I
This is the first of two courses in which the content of the traditional introductory thermodynamics and fluid mechanics courses is presented in a unified manner. Fluid properties; fluid statics; conservation of mass for both steady and unsteady flow systems; the first and second laws of thermodynamics and the application of these laws to closed systems and to steady and unsteady open systems; Bernoulli’s equation; vapour and gas cycles will be covered. Credit will be granted for only one of ENGR 211 and ENGR 233 or ENGR 234. Prerequisites: ENGR 121, 122, 136. Three credits and three-hour lab.

### 212 Thermo-Fluids II
The second of two courses on thermo-fluids engineering will present availability; reversibility; the control volume form of the continuity, momentum and energy equations; Euler’s equation of motion; fluid kinematics; dimensional analysis and similarity; viscous flow in pipes and ducts. Credit will be granted for only one of ENGR 212 and ENGR 233 or ENGR 234. Prerequisites: ENGR 123, 211. Three credits and three-hour lab.

### 216 Geology for Engineers
This course covers minerals, igneous rocks, weathering, sedimentary rocks, metamorphic rocks, geologic time, mass wasting, running water, groundwater, glaciations, shorelines, ocean floors, deformation and mountain building, earth’s interior, earthquakes. Three credits and two-hour lab.

### 221 Differential Equations for Engineers
Covers first order linear and non-linear ordinary differential equations; ordinary differential equations of higher order with constant coefficients; applications to engineering problems; Laplace transforms; periodic functions; applications of Laplace transforms to linear systems; Fourier series. Cross-listed as MATH 221. Prerequisites: ENGR 121, 122 or MATH 121, 122. Three credits and two-hour problem session.

### 222 Calculus III for Engineers
Extends the ideas introduced in ENGR 121 to the calculus of several variables, and covers surface curves, arclength, curvature; partial derivatives; implicit functions; constrained and unconstrained extrema; multiple integrals; line, surface, and volume integrals; change of variables in multiple integrals; scalar and vectors fields; gradient, divergence, and curl; Stokes theorem. Cross-listed as MATH 222. Prerequisites: ENGR 121, 122 or MATH 121, 122. Three credits and two-hour lab.

### 224 Probability and Statistics for Engineers
This course covers probability laws and the interpretation of numerical data, probability distributions and probability densities, functions of random variables, joint distributions, characteristic functions, inferences concerning mean and variance, tests of hypotheses, linear regression, and time series analysis. Engineering applications are emphasized and statistical computer packages are used extensively. Cross-listed as STAT 224. Prerequisite: ENGR 122 or MATH 122. Three credits and two-hour lab.

### 226 Fundamentals of Environmental Engineering
This course focuses on sources of environmental pollutants, the effects of pollutants on living and non-living systems, processes by which pollutants are generated or by which their effects can be minimized or remediated. Lectures are supplemented by guest speakers, case studies and field trips. Credit will be granted for only one of ENGR 226 and ENGR 228. Prerequisite: CHEM 120. Three credits.

### 227 Fundamentals of Process Engineering
Covers mass and energy balances for reacting and non-reacting chemical processes. Topics include the system of units; processes and process variables; mass balances for single-phase and multi-phase systems; Gibbs phase rule; Raoult’s law; Henry’s law; colligative properties; energy balances; combined mass and energy balances on reactive and non-reactive processes and on transient processes. Prerequisite: CHEM 120. Three credits and two-hour lab.

### 231 Dynamics
This second course in the study of engineering mechanics covers dynamics of particles and rigid bodies. Topics include kinematics; kinetics of particles and rigid bodies in motion using Newton’s second law; the principle of work and energy; and the principle of impulse and momentum. Vector analysis is used extensively and there will be computer applications. Prerequisites: ENGR 121, 122, 123; PHYS 120 or ENGR 136. Three credits and three-hour lab.
232 Engineering Design and Communications II
This project-based course offers students the opportunity to integrate and apply skills and knowledge learned in previous courses to a constrained engineering design project. Students work individually and as part of a design team. Project design outcomes are presented orally and in formal written reports, as well as electronically on the internet. Elementary project management concepts are introduced. Ethical and legal issues that impact the practice of engineering are discussed. Credit will be granted for only one of ENGR 232 and ENGR 236 or ENGR 248. Prerequisites: ENGR 131, 132, 136, 144 or CSCI 125, 235, 237 or PHYS 221. Three credits and three-hour lab.

235 Strength of Materials
An introduction to basic principles of stress, strain, and stability. Topics include plane stress and strain; relationships between stress and strain; mechanical properties of materials; shear force; bending moment; axial force; torsion; stresses and deformations due to foregoing force effects; elastic and inelastic buckling. Prerequisite: ENGR 136. Three credits and three-hour lab.

237 Basic Electric Circuits Theory
Topics include introductory concepts; resistive networks; response to linear circuits with energy storage; exponential excitation functions; steady-state AC circuits; analysis; network analysis; systems. Cross-listed as PHYS 221. Prerequisite: ENGR 221 or MATH 221 concurrent; PHYS 120. Three credits and three-hour lab.

242 Engineering Economics
This course provides an introduction to the economic aspects of decision-making in engineering. Topics include fundamental concepts; cash flow diagrams; interest factors; discounted cash flow techniques; rate of return; inflation; accounting; tax; project financing; sensitivity and risk analysis; replacement analysis; public sector analysis. Three credits and two-hour lab.

246 Circuit Analysis
Covers advanced circuit analysis techniques, starting with sinusoidal excitation. Topics include grounding and harmonics; symmetrical components and dealing with unbalanced networks; real and reactive power flow; balanced three-phase circuits for power distribution; phasors and complex impedance. Mutual inductance and magnetically coupled coils are used to introduce transformer behaviour and performance. Prerequisites: ENGR 144 or CSCI 125; ENGR 237 or PHYS 221. Three credits and three-hour lab.

ENGLISH
9.19
M. D’Arcy, Ph.D. C. Rushton, Ph.D.
M. Fellion, Ph.D. D. Smith, Ph.D.
J. Khoury, Ph.D. E. Wilputte, Ph.D.
P.A. Marquis, Ph.D. K. Wright, Ph.D.
M.B. McGillivray, Ph.D. Part Time
M.A. Moynagh, Ph.D. A. Simpson, MA
R.A. Nemesvari, Ph.D. M. Niles, Ph.D.
J. Potts, Ph.D. J. Strickler, MA

English courses are organized into nine categories.

Medieval Literature
206* World Masterpieces I: The Classical World
207* World Masterpieces II
290 The Canterbury Tales
388 Heroic Literature of the Middle Ages
389 The Ricardian Age: Chaucer’s Contemporaries

Renaissance Literature
237 Shakespeare
304 The Early Tudor and Elizabethan Renaissance *
305 The Later Elizabethan Renaissance
308 Milton and His Time
492 Selected Topics II: Shakespeare and the Bible

18th-Century Literature
253 Coffeehouse Culture of 18th-Century England
254 Topics in 18th-Century Literature
355 Restoration and 18th-Century Drama and Prose
356 18th-Century Novel and Poetry

19th-Century Literature
242 The American Renaissance and its Shadows
243 The Proto-modern American Novel
246 19th-Century British Short Fiction
255 The British Novel, 1800-1850
256 The British Novel, 1850-1900
270 The Romantic Gothic: 19th-Century Poetry and Short Fiction
271 Gothic Fiction: The 18th- and 19th-Century Gothic Novel
323 Victorian Medievalism
325 The American Novel, 1850-1940
370 English Romantic Literature
371 Victorian Literature, 1832-1867
372 Victorian Literature, 1867-1901

20th- and 21st-Century Literature
201 Science Fiction and Fantasy
211 Introduction to Film and Media Studies
216 Modern Irish Literature
218 British Fiction Since 1950
233 Children’s Literature: 1865 to the Present
241 Modern & Contemporary Poetry
250 Survey of 20th-Century Literature in English
257 The 21st-Century American Novel
298 Selected Topics: Modern and Contemporary Poetry
319 Topics in Film Studies
329 Studies in Women Writers: Feminisms and Their Literatures
330 Studies in Women Writers: Genres, Cultures, and Contexts *
337 Children’s Literature: Genres and Themes
378 Themes in Contemporary American Prose
379 American Literature

Canadian Literature
263 Canadian Literature I: 18th and 19th Centuries
264 Canadian Literature II: The 20th-Century and After
338 Canadian Drama
368 Canadian Poetry

Postcolonial Literature
240 Literature of the Middle East
245 Postcolonial Literature
347 Literature of Africa and the African Diaspora
491 Selected Topics I: Afrotutures, Speculative Pasts and Contemporary Fiction from Africa and the African Diaspora

Creative Writing
231 Introduction to Creative Writing
322 Intermediate Creative Writing
422 Advanced Creative Writing

Literary Criticism and Cultural Theory
206* World Masterpieces I: The Classical World
207* World Masterpieces II
215 Principles & Practices of Literary Criticism
314 Contemporary Literary Theory
318 Cultural Theory through Popular Culture

*Courses could satisfy more than one category and/or historical period. See department for clarification.

DEPARTMENT REQUIREMENTS
ENGL 100, 110 or equivalent is required for entrance to all other ENGL courses. A student should have ENGL 100 or 110 plus at least three credits at the 200 level before taking a course at the 300 level. Some exceptions apply; see course descriptions. A student must have at least 18 credits of ENGL for admission to a 400-level course.

All students seeking admission to honours and advanced major programs must consult the department chair by March 31 of the second year to obtain approval for proposed course patterns, and again in March of the junior year for advice on thesis and senior seminar requirements.
Major Program

Students majoring in English must take the following courses: ENGL 100 or 110; six credits Medieval or Renaissance; six credits 18th or 19th century; six credits 20th and 21st century or Canadian or Postcolonial; and 12 credits ENGL electives. Major students will normally complete at least nine credits of English courses before enrolling in a 300- or 400-level course. All prospective majors should attend an advising session normally held in March.

Advanced Major Program

Advanced majors in English will take the following courses: ENGL 100, 110 or equivalent; 24 credits of English electives from four of the five following historical periods, including: Medieval; Renaissance; Restoration and 18th century; 19th century; and 20th- and 21st-century literature; and six credits of senior seminars, one 3-credit senior seminar in the fall term, and another 3-credit senior seminar in the winter term. Students must also write an advanced major thesis in their final year in one of the senior seminars. See section 4.1 for degree regulations.

Honours Program

Students take ENGL 100 or 110, and 24 credits of English electives from four of the five following historical periods of literature: Medieval; Renaissance; Restoration and 18th century; 19th century; 20- and 21st-century literature. Students also take 18 credits of English electives from three of the following four categories: Postcolonial literature; literary criticism and cultural theory; Canadian literature; and creative writing. An honours thesis is also required (6 credits), as well as 6 credits of senior seminars. See section 4.1 for degree regulations.

Honours with a Subsidiary Subject

Honours (ENGL) with a subsidiary subject requires 60 credits in the same pattern as the English honours program.

A subsidiary subject in English requires 24 credits in English, with at least 6 credits at the 300 or 400 level.

Senior Seminar

Each year certain advanced courses will be designated senior seminars. All honours and advanced major students must be enrolled in at least one of these during their senior year, one in the first term and the other in the second term. Normally students will have third-year standing and have taken a minimum of 15 credits in English. Priority will be given to honours and advanced major students in English.

Humanities Colloquium

The humanities colloquium is an optional and interdisciplinary way of studying three first-year courses, usually ENGL 100, HIST 100, and PHIL 100. See section 4.4 for further information.

Note: Not all 400-level seminars are senior seminars.

100 Introduction to Literature and Critical Writing

This course introduces students to the critical tools and methods of literary study, including close reading and argumentative writing. Students will learn about the history of genres (e.g., poetry, drama, and the novel) and forms of literature (e.g., tragedy, realism). Texts may include the earliest writing in English to more recent works in various media. Credit will be granted for only one of ENGL 100 or ENGL 110. Six credits.

Note: ENGL 100, 110 or equivalent is required for entrance to all other ENGL courses.

206 World Masterpieces I: The Classical World

Classical Literary Theory: Through a reading of Homer's classical and influential poems (the Iliad and Odyssey), the course will explore how the ancient world thought about texts worked. Readings will include Plato, Aristotle, Lucretius, Horace and others. The course will also look at the New Testament's adaptation of older texts, including the Old Testament, from a literary vantage point. Three credits. Not offered 2015-2016.

211 Introduction to Film and Media Studies

This course will consider concepts and discussions that have developed in the history of film, television, and media studies. Students will be introduced to the vocabulary of film and media studies, techniques of analysis, and major theoretical discussions in these fields. Screenings will introduce students to various kinds of films, dating from the early 20th century to the present. Credit will be granted for one of ENGL 211, 209 or 297 "Analyzing Film." Prerequisite: ENGL 100, 110, or equivalent. Three credits.

215 Principles and Practices of Literary Criticism

This course builds on the skills students acquire in ENGL 100. Its aim is twofold. On the one hand, it will concern itself with philosophical questions regarding literariness, form and genre, and schools of critical approach (e.g., rhetorical, historical, sex and gender, sociological, political, psychological, neo-formal). On the other, it will develop practical skills by: expanding critical vocabulary; developing abilities to write argumentatively; and increasing proficiency with sources and databases. Three credits.

217 British Fiction, 1900-1950

A study of British fiction in the first half of the 20th century. Literary works will be considered in relationship to central cultural and intellectual developments of this period, as well as crucial historical points of reference (the world wars, colonialism and decolonization). Authors to be studied may include Joseph Conrad, E.M. Forster, James Joyce, Virginia Woolf, and Elizabeth Bowen. Credit will be granted for only one of ENGL 217 and ENGL 350. Prerequisite: ENGL 100, 110, or equivalent. Three credits.

218 British Fiction Since 1950

This course will examine British fiction published since 1950. We will be concerned in particular with the following issues: changing conceptions of British national identity, and the relationship between these changes and the development of British fiction; ongoing discussions in this period on the capabilities and responsibilities of fictional narrative; the notions of postmodernism and late modernism and the pertinence of these periodizing terms to post-war British fiction. Credit will be granted for only one of ENGL 218 and ENGL 350. Prerequisite: ENGL 100, 110, or equivalent. Three credits.

233 Children's Literature: 1865 to the Present

Using the landmark publication of Lewis Carroll's Alice's Adventures in Wonderland as a starting point, this course provides a critical survey of children's literature in Britain, America, and Canada. Authors to be studied include Carroll, L.M. Montgomery, E.B. White, Roald Dahl, Maurice Sendak, Cecil de Mille, Dennis Lee, and Sheree Fitch. Credit will be granted for only one of ENGL 233 or ENGL 234. Three credits.

CREATIVE WRITING COURSES

Students wishing to enrol in any creative writing course are required to submit a portfolio to the English Department. The portfolio must be submitted electronically to english@stfx.ca as an attachment by June 1. The portfolio should consist of 10-15 pages of prose fiction, poetry, drama, or any combination thereof. If in any calendar year a course is restricted to a particular genre, the portfolio should consist solely of work in that genre. Students must indicate the creative writing course for which they wish to be considered and provide a complete list of English courses previously taken.

231 Introduction to Creative Writing

This course teaches students how to write creatively in two genres -- poetry and fiction -- in a workshop setting. Students will explore those elements of composition (imagery, dialogue, point of view, characterization, etc.) that make for interesting and challenging writing. Prerequisite: ENGL 100, 110 or equivalent. Six credits.

322 Intermediate Creative Writing

Students will be expected to choose one genre through which they will continue to explore and develop the basic elements of composition learned in English 231. Prerequisite: ENGL 100, 110 or equivalent; three credits creative writing. Three credits. Not offered 2015-2016.

422 Advanced Creative Writing

Explores the techniques of writing prose narrative, poetry, and drama to help students develop their powers of creative expression. Techniques include regular exercises, set assignments, free submissions, parodies, and imitations. Occasional guest writers. Prerequisite: ENGL 100, 110 or equivalent; six credits creative writing. Three credits. Not offered 2015-2016.

237 Shakespeare

An introduction to the range of literary genres found in Shakespeare's works, including narrative poems, dramatic comedies, histories, tragedies, and romances, from a variety of perspectives, including historiographical, textual, thematic and structural, focusing on such issues relevant to the Elizabethan and Jacobean period not excluding politics, culture, gender, power, and sexuality. Students will be encouraged to engage in close readings of Shakespeare's works and place the particular concerns of his characters into the larger humanist tradition. Credit will be granted for only one of ENGL 237 or ENGL 340. Six credits.

241 Modern and Contemporary Poetry

A study of some of the major poets of the 20th and 21st centuries, including Elizabeth Bishop, T.S. Eliot, Wallace Stevens, Marianne Moore, W.B. Yeats, Gwendolyn Brooks, Philip Larkin, Derek Walcott, Sylvia Plath, Adrienne Rich, Henri Cole, Eavan Boland. Credit will be granted for only one of ENGL 241, 320 or 298 ST: Modern & Contemporary Poetry. Prerequisite: ENGL 100 or 110 or equivalent. Three credits.
243  The Protomodern American Novel
In this course we will examine novels written between 1870 and 1910 that establish the concerns that we now associate with modernism. Topics include time, consciousness, inequality, photography, urbanization, art, nativism, utopianism, ethnicity and exile. Authors include Edward Bellamy, Theodore Dreiser, Frank Norris, Jacob Riis, Mark Twain, Henry James, William James, Stephen Crane, Harold Frederic, Ellen Glasgow, Charles Chesnutt, Abraham Cahan, Jack London, Mary Antin and James Weldon Johnson. Credit will be granted for only one of ENGL 243 and ENGL 344. Prerequisite: ENGL 100, 110, or equivalent. Three credits.

245  Postcolonial Literature
This course will introduce you to the culture of empire and to a growing body of writing that has come to be called "postcolonial." Broadly defined as the literature of peoples who have experienced colonialism, this body of writing raises important questions about place, identity and belonging, and about the role of literature in representing nation, empire, and globalization. We will read fiction, poetry, and essays by writers from Europe, Africa, South Asia, and the Caribbean. Credit will be granted for only one of ENGL 245 and ENGL 247. Three credits. Not offered 2015-2016.

246  19th-Century British Short Fiction
A study of short stories and other short fiction by 19th-century British authors, spanning a variety of genres, such as realism, the Gothic tale, and detective fiction. Will include major authors such as Walter Scott, Charles Dickens, Elizabeth Gaskell, and Arthur Conan Doyle, as well as lesser-known writers. Three credits. Not offered 2015-2016.

250  Survey of 20th-Century Literature in English

253  Coffeehouse Culture of 18th-Century England
A course exploring a variety of works through the lens of the 18th-century coffeehouse. Focusing primarily on the periodical literature of the time—The Tatler, The Spectator, The Plain Dealer and The Female Spectator—and novels and poetry, the course will consider themes like conversation, urban space, taste and culture, consumerism, gender fashioning, and the private subject made public. Three credits. Not offered 2015-2016.

254  Topics in 18th-Century Literature
The focus of this course will vary from year to year with changing emphasis on particular themes, genres or authors of the long 18th century. Prerequisite: 6 credits of ENGL. Three credits. Not offered 2015-2016.

255  The British Novel, 1800-1850
A study of 19th-century novels from the Regency through the early Victorian period. Works may include novels by Jane Austen, Walter Scott, the Brontës, and William Makepeace Thackeray, as well as Charles Dickens’s early novels. Credit will be granted for only one of ENGL 255 or ENGL 377. Three credits.

256  The British Novel, 1850-1900
A study of 19th-century British novels from the mid to late Victorian period. Works may include the novels of Elizabeth Gaskell, George Eliot, Wilkie Collins, Anthony Trollope, George Meredith, Mary Elizabeth Braddon, Thomas Hardy, H. G. Wells, Robert Louis Stevenson, Oscar Wilde, Bram Stoker, Rudyard Kipling, as well as the late novels of Charles Dickens. Credit will be granted for only one of ENGL 256 or ENGL 377. Prerequisite: 6 credits ENGL. Three credits. Not offered 2015-2016.

257  The 21st-Century American Novel
This course will introduce students to recent formal and generic developments in the American novel and situate these trends within the history of the novel as a literary form. Prerequisite: 6 credits ENGL. Three credits.

263  Canadian Literature I: 18th and 19th Centuries
This course will survey Canadian poetry and prose in the historical contexts of exploration, settlement, and Confederation. Students will examine early Canadian authors’ engagements with the Romantics and Victorians, and will consider the emergence of a national literature. Selected authors may include Frances Brooke, Samuel Hearne, John Richardson, Thomas Chandler Haliburton, Susanna Moodie, James de Mille, Isabella Valency Crawford, and Sir Charles G. D. Roberts. Credit will be granted for only one of ENGL 263 or ENGL 265. Three credits.

264  Canadian Literature II: The 20th-Century and After
This course examines the major genres of Canadian writing during the 20th and 21st centuries, including fiction, poetry, and non-fiction. The course will emphasize key aesthetic developments within the contexts of modernism, feminism, postcolonialism, regionalism, postmodernism, environmentalism, culture and race. Credit will be granted for only one of ENGL 264 or ENGL 265. Three credits. Not offered 2015-2016.

270  The Romantic Gothic: Poetry and Short Fiction
A study of Gothic literature in its historical and philosophical context; this course will explore 19th-century short fiction and poetry as well as a play and influential 18th-century literary sources. Authors may include: Walpole, Burke, Kant, Wordsworth, Smith, Robinson, Hogg, Scott, Coleridge, Keats, Lord Byron, and Baillie. Three credits. Not offered 2015-2016.

271  Gothic Fiction: The 18th- and 19th-Century Gothic Novel
An examination of the Gothic novel and the cultural forces that produced it. The course will explore supernatural tales from the classical and medieval periods which acted as forerunners to the genre. Authors may include: Horace Walpole, Ann Radcliffe, Matthew "Monk" Lewis, and Jane Austen; students may also read Frankenstein and Dracula. Three credits. Not offered 2015-2016.

290  The Canterbury Tales
This course will introduce Geoffrey Chaucer’s Canterbury Tales, but it does more than that. The generic and formal diversity of Chaucer’s collection allows for discussion of medieval literary form and content, while also introducing significant aspects of medieval culture (the problem of “courty love,” medical theory and political life). Further, the course allows discussion of manuscript tradition and theories of influence. Credit will be granted for only one of ENGL 290 or ENGL 390. Prerequisite: 6 credits of ENGL. Three credits. Not offered 2015-2016.

295  Selected Topics

297  Selected Topics

298  Selected Topics

304  The Early Tudor and Elizabethan Renaissance
A study of texts produced during the Tudor dynasty. Authors may include Christopher Marlowe, William Shakespeare, Thomas Kyd, Edmund Spenser, and others. Prerequisite: ENGL 100, 110 or equivalent. Three credits. Not offered 2015-2016.

305  The Later Elizabethan Renaissance
William Shakespeare’s sonnet sequence, along with Edmund Spenser’s epic allegory, The Faerie Queene, will be read in the context of the 1590s, the last full decade of the reign of Elizabeth I. In close readings of these two masterpieces, we will examine the relations between literature and culture and the way in which politics and gender provide a context for aesthetic production. Prerequisite: ENGL 100, 110 or equivalent. Three credits. Not offered 2015-2016.

308  Milton and his Time
This course will provide an intensive study of Milton’s life and major poems, especially Paradise Lost, and some of his polemical prose. The course will also focus on the historical and political contexts of this revolutionary age, and Milton’s contributions to the Republicanism of the era. Credit will be granted for only one of ENGL 308 and ENGL 312. Prerequisite: 9 credits ENGL. Three credits.

313  Literary Theory’s Histories
This course introduces students to the histories of literary theory. Depending on the instructor, the course may cover either a specific period in literary studies (e.g. Medieval, Early Modern, Romantic) or a broader historical accounting of contemporary theory’s antecedents. Credit will be granted for only one of ENGL 313 and ENGL 445. Prerequisite: 9 credits of ENGL; ENGL 215 is recommended. Three credits.

314  Contemporary Literary Theory
This course introduces students to current issues in literary criticism including (but not limited to): formalism, gender and sexuality, materialism, psychology and historicism. Our aim will be to consider the usefulness of different approaches in opening up our readings of texts. We will examine a sample of different types of works—a novel, a play, a film, lyric poems—in testing different theoretical approaches. Credit will be granted for only one of ENGL 314 and ENGL 445. Prerequisite: 9 credits of ENGL; ENGL 215 is recommended. Three credits.

318  Cultural Theory through Popular Culture
An introduction to the study of culture as a system of constructing values and identities, primarily through textual production. The course will combine case studies of genre fiction, film, and television with analyses by practicing cultural scholars. Prerequisite: 9 credits ENGL. Six credits.
319 **Topics in Film Studies**  
This course will address the development of cinema from a historical and formal perspective. Topics to be covered include movements and periods in the history of the cinema, the impact on cinema of technological developments, different modes of narrative cinema, and major categories of formal analysis, such as mise-en-scène, editing, and cinematography. One focus of the course will be on the techniques and conventions of writing about cinema. The focus in 2015-2016 will be “Film Noir”. Prerequisite: 9 credits of ENGL. ENGL 211 recommended. Three credits.

323 **Victorian Medievalism**  
This course will examine Victorian treatments of the medieval. Texts studied will include non-fiction, fiction, and poetry. We will also consider the Gothic Revival in architecture and the Pre-Raphaelite movement in painting. Authors may include Thomas Carlyle, Alfred Lord Tennyson, E. B. and Robert Browning, John Ruskin, George Eliot, Edward FitzGerald, William Morris, and Christina and D. G. Rossetti. Prerequisite: 9 credits ENGL. Three credits. Not offered 2015-2016.

329 **Studies in Women Writers: Feminisms and Their Literatures**  
An introduction to feminist theories within historical, cultural, and philosophical contexts, this course explores the relationship between feminist theories and literary texts that exemplify or extend them. Cross-listed as WMGS 329. Prerequisite: 9 credits ENGL. Three credits. Not offered 2015-2016.

330 **Studies in Women Writers: Genres, Cultures, and Contexts**  
This course explores modern and contemporary poetry written by women in English. Cross-listed as WMGS 330. Prerequisite: 9 credits ENGL. Three credits. Not offered 2015-2016.

337 **Children's Literature: Genres and Themes**  
This course will examine predominant themes, authors, and strategies within literature created for children, focusing this year on monsters. Texts will include Tolkien’s *The Hobbit*, *Sleeping Beauty/Maleficent*, *The Nightmare Before Christmas*, and Lewis’s Narnia books. Credit will be granted for only one version of this course. Prerequisite: 9 credits ENGL. Three credits.

338 **Canadian Drama**  
This course will examine how Canadian drama has been (re)defining our national identity for the past four hundred years. Introducing students to theatrical forms such as vaudeville, minstrelsy, clowning, and verbatim theatre, this course will simultaneously consider issues of nationality, race, and gender. Playwrights include Tomson Highway, Margaret Atwood, Djanet Sears, and Guillermo Verdecchia. Credit will be granted for only one of ENGL 338 or ENGL 366. Prerequisite: 9 credits ENGL. Three credits. Not offered 2015-2016.

347 **Literature of Africa and the African Diaspora**  
A study of the literature of sub-Saharan Africa and/or the African Diaspora, including African-Canadian, African-American, Afro-Caribbean, and Black British literatures. Topics will vary from year to year. Prerequisite: 9 credits of ENGL. Three credits. Not offered 2015-2016.

355 **Restoration and 18th-Century Drama and Prose**  
A study of several major plays and selected prose works from 1660 to the mid-18th century. Prerequisite: 9 credits ENGL. Three credits. Not offered 2015-2016.

356 **18th-Century Novel and Poetry**  
A study of selected novels and poetry from the major writers of the ‘long’ 18th-century. Prerequisite: 9 credits ENGL. Three credits. Not offered 2015-2016.

366 **Canadian Poetry**  
A study of Canadian verse in English with selected examples of French verse in translation, since colonial days, with emphasis on the period since 1920. Prerequisite: 9 credits ENGL. Six credits.

370 **English Romantic Literature**  
A detailed survey of the literature of the major Romantic poets, this course emphasizes close readings of poetry and prose and the historical and philosophical contexts of the Romantic Movement. Prerequisite: 9 credits ENGL. Six credits. Not offered 2015-2016.

371 **Victorian Literature, 1832-1867**  
A study of early- to mid-Victorian literature encompassing the poetry of Emily Brontë, Alfred Lord Tennyson, Elizabeth Barrett Browning, Robert Browning, and Matthew Arnold; the prose of Thomas Carlyle, Charles Darwin, and John Stuart Mill; and a novel by Charles Dickens or one of the Brontë sisters. Credit will be granted for only one of ENGL 371 or ENGL 375. Prerequisite: 9 credits ENGL. Three credits. Not offered 2015-2016.

372 **Victorian Literature, 1867-1901**  
A study of mid-to late-Victorian literature encompassing essays by Walter Pater, John Ruskin, and Matthew Arnold; poetry by Gerard Manley Hopkins, George Meredith, William Morris, Christina and D. G. Rossetti, Algernon Swinburne, and Oscar Wilde; plays by Wilde and George Bernard Shaw; stories by Vernon Lee and Rudyard Kipling; and a novel by George Eliot. Credit will be granted for only one of ENGL 372 or ENGL 375. Prerequisite: 9 credits ENGL. Three credits. Not offered 2015-2016.

379 **American Literature**  
This course will examine 20th- and 21st-century American prose, focused around a particular literary school or movement. The focus for 2015-2016 examines the very recent interest in happiness studies. We’ll think about how happiness entails and the difficulties involved in its achievement. Looking at a set of current novels – Jonathan Franzen’s *Freedom*, Jeffrey Eugenides’ *The Marriage Plot*, Jennifer Egan’s *Visit from the Goon Squad* and Meg Wolitzer’s *The Interestings* – in combination with readings from philosophy, psychology and art, we’ll consider issues including: sex, money, occupation, marriage, music, family and authenticity. Prerequisite: 9 credits ENGL. Three credits.

388 **Heroic Literature of the Middle Ages**  
A study of medieval texts which reflect the heroic, aristocratic, and military literature of the Middle Ages, which may include Beowulf (in translation), Thomas Malory’s *Le Morte Darthur* various romances, including Arthurian texts like Sir Gawain and the *Green Knight*, and selections from medieval historical chronicles. This year: “England Before England” looks at England’s Anglo-Saxon inheritance through the Findern Manuscript (including Beowulf), the Anglo-Saxon Chronicle, and early vernacular versions of biblical story. Anglo-Saxon readings will be done in modern English. Prerequisite: 9 credits ENGL. Three credits.

389 **Chaucer’s Contemporaries**  
Prerequisite: 9 credits ENGL. Three credits. Not offered 2015-2016.

398 **Selected Topics in Literature II**  
Prerequisite: 9 credits ENGL. Three credits. Not offered 2015-2016.

Notes: Normally students enrolling in an honours seminar will have third-year standing and have taken a minimum of 15 credits in English. Priority will be given to honours and advanced major students in English.

400 **Honours Thesis**  
Honours students write a thesis under the supervision of a faculty thesis director. Students must meet the thesis director in March of the junior year to prepare a topic. Honours students must register for the thesis as a six-credit course in their senior year. The thesis must be submitted no later than March 31 of the senior year. See chapter 4. Six credits.

**SENIOR SEMINARS**

491 **Selected Topics I**  
The topic for 2015-2016 is Afrofutures, Speculative Past and Contemporary Fiction from Africa and the African Diaspora. This course will set contemporary works of fiction from Africa and the African diaspora that combine speculative fiction with realism alongside works more typically classed as genre fiction in order to explore the literary-historical and cultural-political import of blurring these formal boundaries in fiction that is grappling with the contemporary legacies of colonial histories in Africa and in the Americas. Prerequisites: third-year standing and 15 credits ENGL. Three credits.

492 **Selected Topics II**  
The topic for 2015-2016 is Shakespeare and the Bible. This course will study the relationship between two of the most influential works in the history of writing: the Bible and Shakespeare’s First Folio (selected plays). The course will assume that students may be familiar with either Shakespeare or the Bible, but not necessarily both. The course will explore biblical patterns and allusions in order to study their impact on Shakespeare’s plays. Five to six plays of different genres will be studied. Prerequisites: third-year standing and 15 credits ENGL. Three credits.

497 **Advanced Major Thesis**  
Advanced major students write a thesis as part of the senior seminar. See chapter 4. No credit.

499 **Directed Study**  
In consultation with the department and with approval of the chair, students may undertake a directed study program in an approved area of interest, which is not available through other course offerings. See section 3.5. Three or six credits.
Environmental sciences is a four-year advanced major or honours program leading to a B.Sc. in one of four different concentrations. Each concentration offers an integrated approach to understanding the interaction of biological, chemical and physical systems and processes in the environment and their sensitivities to human activities.

The B.Sc. in Environmental Sciences is designed to prepare students to become researchers or practitioners in environmental sciences. Students following this degree stream will be well prepared to continue to graduate programs in a variety of fields, and for careers in the government and private sector. The program requires a strong interdisciplinary, science-based education as this approach to solving current environmental problems is increasingly required in academia, government and the private sector.

Students apply for specific programs in year two. Typical course patterns are listed below. Other course options may be available. Further information can be obtained from the department chairs of biology, chemistry, earth sciences, mathematics and physics.

### B.Sc. Advanced Major in Environmental Sciences Biology

**Year 1**  
Biol 111, 112; Chem 100; Math 111, 112; 6 credits arts electives

**Year 2**  
Biol 201, 202, 203; Chem 225, 255; ESCI 271; Math 287; Stat 231; 6 credits arts electives

**Year 3**  
Biol 202, 315, 345; Chem 265; ESCI 272, 305; Phys 100; 6 credits arts electives

**Year 4**  
24 credits from Biol 311, 312, 321, 384, 407, 470, 472, 474 or Chem 361; ENSC 491 (non-credit); ESCI 366, 3 credits open electives.

### B.Sc. Honours in Environmental Sciences Biology

**Year 1**  
Biol 111, 112; Chem 100; Math 171, 172; Math 111, 112; 6 credits arts electives

**Year 2**  
Biol 201, 202, 203; Chem 225, 255; ESCI 271; Math 287; Stat 231; 6 credits arts electives

**Year 3**  
Biol 202, 315, 345; Chem 265; ESCI 272, 305; Phys 100; 6 credits arts electives

**Year 4**  
21 credits from Biol 311, 312, 321, 384, 407, 470, 472, 474, or Chem 361; ENSC 491 (non-credit), 493; ESCI 366, 3 credits open electives.

### B.Sc. Advanced Major in Environmental Sciences Chemistry

**Year 1**  
Biol 111, 112; Chem 100 or 120; Math 171, 172; Math 111, 112; 6 credits arts electives

**Year 2**  
Biol 203; Chem 220, 245, 265; Phys 120; Stat 231; 6 credits arts electives

**Year 3**  
Chem 231, 232, 325, 361, 362, 391 (non-credit); ESCI 272, 305, 366; 6 credits of Math 253, 254, 267, 367

**Year 4**  
Biol 202 and 6 credits from Biol 201, 373, 470; Chem 255, 341, 342; ENSC 491 (non-credit); 3 credits from ENSC 406, 471, 465, 472; 6 credits arts electives

### B.Sc. Honours in Environmental Sciences Chemistry

**Year 1**  
Biol 111, 112; Chem 100 or 120; Math 171, 172; Math 111, 112; 6 credits arts electives

**Year 2**  
Biol 203; Chem 220, 245, 265; ESCI 272; Phys 120; 6 credits arts electives

**Year 3**  
Biol 202; Chem 231, 232, 325, 361, 362, 391 (non-credit); ESCI 305, 366; 3 credits of Math 253, 254, 267, 367; Stat 231

**Year 4**  
Chem 255, 331, 332, 341, 342, 420; ENSC 491 (non-credit), 493; 6 credits arts electives

### B.Sc. Advanced Major in Environmental Sciences Biogeochecmistry

**Year 1**  
Chem 100 or 120; ENSC 171, 172; Math 111, 112; Phys 100 or 120; 6 credits arts electives

**Year 2**  
Biol 111, 112; Chem 225 or 245, 265; ENSC 246, 271, 272; 3 approved ESCI credits; Stat 231; 3 credits open electives

**Year 3**  
Biol 203, 384; Chem 361, 362; ESCI 305, 366, 386, 3 approved ESCI credits; 6 credits arts electives

**Year 4**  
Biol 472 or 474; ENSC 491 (non-credit); ENSC 406, 465, 472, 9 credits open electives

### B.Sc. Honours in Environmental Sciences Biogeochecmistry

**Year 1**  
Chem 100 or 120; ENSC 171, 172; Math 111, 112; Phys 100 or 120; 6 credits arts electives

**Year 2**  
Biol 111, 112; Chem 225 or 245, 265; ENSC 246, 271, 272; 3 additional ESCI credits; Stat 231; 3 credits open electives

**Year 3**  
Biol 203, 384; Chem 361, 362; ESCI 305, 366, 386; 3 additional ESCI credits; 6 credits arts electives

**Year 4**  
Biol 472 or 474; ENSC 491 (non-credit); ENSC 406, 465, 472, 499, 3 additional ESCI credits; 6 credits arts electives; 3 credits open electives

### B.Sc. Advanced Major in Environmental Sciences Climate and Water

**Year 1**  
Chem 100 or 120; ENSC 171, 172; Math 111, 112; Phys 120; 6 credits arts electives

**Year 2**  
Biol 111, 112; ENSC 246, 271, 272; Math 267; Stat 231; 3 credits approved science electives; 6 credits arts electives

**Year 3**  
Chem 265; ESCI 305, 366, 386, 475; Math 253; 6 credits approved science electives; 6 credits arts electives

**Year 4**  
Biol 203; ENSC 491 (non-credit); ENSC 406, 465, 472; 9 credits approved science electives; 9 credits open electives

### B.Sc. Honours in Environmental Sciences Climate and Water

**Year 1**  
Chem 100 or 120; ENSC 171, 172; Math 111, 112; Phys 120; 6 credits arts electives

**Year 2**  
Biol 111, 112; ENSC 246, 271, 272; Math 267; Stat 231; 3 credits approved science electives; 6 credits arts electives

**Year 3**  
Chem 265; ESCI 305, 366, 386, 475; Math 253; 6 credits approved science electives; 6 credits arts electives

**Year 4**  
Biol 203; ENSC 491 (non-credit); ENSC 406, 465, 472, 499; 6 credits approved science electives; 6 credits open electives

### 491 Senior Seminar in Environmental Sciences

Seminars on topics of interest in the Environmental Sciences are presented during the year by visiting scientists and faculty. Required for all environmental sciences students in the final year of study. No credit.

### 493 Honours Thesis

Required for honours students. Three credits.

**» FRENCH** see 9.27 Modern Languages

**» GERMAN** see 9.27 Modern Languages

### 9.21 HISTORY

Curiosity inspires every generation to study the lives and societies of people who lived before them. The discipline of history has been developed to help us do this in a systematic, rigorous and critical way. The history program offers a wide-range of fascinating courses, from global history and the history of western civilization to more focused courses about nations, social groups and special topics. As well, its program equips students to develop the critical tools necessary to investigate the past effectively and to express their findings with clarity, vigour and intelligence. Students can take history courses as electives or pairs, or to complete a minor, major, joint major, advanced major, joint advanced major, honours or honours with subsidiary program.
Department Requirements
Students must follow the degree regulations found in chapter 4 and must consult with the department chair to plan their specific program and have it approved. The fundamental requirements of each program are outlined below. Departures from these regulations require the permission of the department chair and/or the Dean of Arts. Students following the major degree programs strive to balance specialization with breadth in their selection of courses. They must have some degree of specialization in one of the three designated areas of concentration: (1) Canadian, (2) European, or, (3) American/Latin American/Asian history.

Transfer credit limitations: Of the 36 credits required for a history major or advanced major, normally at least 24 must be obtained from StFX; of the 60 credits required for a history honours, normally at least 42 must be obtained from StFX; of the 48 credits required for a history honours with subsidiary, normally at least 36 must be obtained from StFX. The seminar and thesis requirements must be completed through StFX.

Note: HIST 100 or HIST 110 is required as a foundation for all first- and second-year students taking further history courses but this requirement is normally waived for third- and fourth-year students seeking a first course in history.

Minor or Subsidiary in History
a) HIST 100 or 110 (6 credits)
b) 18 additional credits above the 100 level
c) Total: 24 history credits with at least 6 credits at the 300/400 level

Major Program
a) HIST 100 or 110 (6 credits)
b) HIST 213 and 215*
c) Total of 18 credits in a chosen concentration
d) Total of 12 credits from areas outside the chosen concentration
e) Total: 36 history credits with at least 15 credits at the 300/400 level

Joint Major Program
Same history requirements as major above.

Advanced Major Program
a) HIST 100 or 110 (6 credits)
b) HIST 213 and 215*
c) HIST 445 (counts outside the chosen concentration)
d) A senior seminar (counts in the chosen concentration; requires senior advanced major essay)
e) Total of 18 credits in a chosen concentration
f) Total of 12 credits from areas outside the chosen concentration
g) Total: 36 history credits with at least 15 credits at the 300/400 level.

Joint Advanced Major Program
Same history requirements as advanced major above. However, students are not required to do a senior advanced major essay if they choose history as their major subject B.

Honours Program
a) HIST 100 or 110 (6 credits)
b) HIST 213 and 215*
c) HIST 445 (counts outside the chosen concentration)
d) A seminar (counts in the chosen concentration)
e) Total of 33 credits in a chosen concentration (includes HIST 490)
f) Total of 21 credits from areas outside the chosen concentration
g) HIST 490 (Thesis, 6 credits) with a faculty member
h) Total: 60 history credits with at least 24 credits at the 300/400 level.

Honours with a Subsidiary Subject
a) HIST 100 or 110 (6 credits)
b) HIST 213 and 215*
c) HIST 445 (counts outside the chosen concentration)
d) A seminar (counts in the chosen concentration)
e) Total of 27 credits in a chosen concentration (includes HIST 490)
f) Total of 15 credits from areas outside the concentration

Joint Honours Program
a) HIST 100 or 110 (6 credits)
b) HIST 213 and 215*
c) HIST 445 (counts outside the chosen concentration)
d) A seminar (counts in the chosen concentration)
e) Total of 27 credits in a chosen concentration (includes HIST 490)
f) Total of 15 credits from areas outside the concentration
g) HIST 490 (Thesis, 6 credits) with a faculty member
h) Total: 48 history credits with at least 18 credits at the 300/400 level.

*These required courses count in the Canadian concentration. For any other concentration, they count outside of it.

Recognized Courses
Subject to the restrictions stated below, students may count the following courses for credit in the Department of History: Celtic Studies - CELT 131/132 and 331/332; Religious Studies - RELS 383 (RELS 100, 110 or 120 prerequisite); Art- ART 251, 252, 371, 372 and 373 (HIST 100 or 110 prerequisite) and ART 435 (ART 371, 372 and 373 or permission of instructor prerequisite) and Economics- ECON 232 and 332 (ECON 101/102 prerequisite). Students completing a minor, major, advanced major, joint advanced major or honours in history are permitted to count no more than twelve credits of the aforementioned courses as history courses; similarly, no more than six credits of these courses may be taken from any one department. For a history pair, students are permitted no more than six credits of these recognized courses.

Humanities Colloquium
This course explores the varied history of our modern world from early complex societies to the Wars of Religion in the 17th century. From the ziggurats of ancient Mesopotamia, to the fracturing of “Christendom” during the Reformation, this class explores the events that shaped the world we live in today. The course provides an introduction to the practices of history. Lectures are supplemented by discussions, exercises and assignments about how historian find and use sources. Credit will be granted for only one of HIST 101 and HIST 100. Three credits.

101 Western Civilization: Earliest Civilizations to the War of Religion
This course explores the history of Western Civilization from the discovery of the so called “New World” to decolonization. From Jesuit and Franciscan missionaries to the liberal and sexual revolutions, this class explores the events that shaped the world we live in today. The course provides an introduction to the practice of history. Thus, our tour of Western civilizations will be supplemented by discussions, exercises and assignments about how historian find and use sources. Credit will be granted for only one of HIST 102 and HIST 100. Three credits.

100 Western Civilization
Traces the development of Western ideas and institutions. Covers classical Greek civilization, Roman political behaviour, the medieval centuries and the nation-state; early modern Europe and its Renaissance, Reformation, and Enlightenment; the French, Industrial, and liberal revolutions; the growth of nationalism, communism, and fascism, and the world wars. Normally restricted to 1st and 2nd year students; it is not normally required for third and fourth-year students seeking a first history course. Students are advised not to take both HIST 100 and 110 since only one will count towards a major or minor and the other will qualify as an elective. Credit will be granted for only one of HIST 100 and HIST 101/102. Six credits.

110 Global History Since 1300
Explores selected topics in global history from 1300 to now, including Mongol expansion, the Black Death, the age of exploration, the rise of capitalism and class society, struggles between Europeans and colonized peoples, slavery, political revolutions, and nationalism. Political, social, intellectual, and cultural history are combined to provide a broad examination of the key non-Western and Western civilizations and their interactions. Normally restricted to 1st and 2nd year students; it is not required for third and fourth year students seeking a first history course. Students are advised not to take both HIST 100 and 110 since only one will count towards a major or minor and the other will qualify as an elective. Credit will be granted for only one of HIST 110 and HIST 111/112. Six credits.

111 Introduction to Global History 1300-1795
By the 1300s technology allowed sea trade to supplant overland trade between western and eastern Asia. More closely connected societies became culturally distinct, while growing economies allowed for political stability. This three-credit survey traces the growing interconnectedness of human society and historical processes that have shaped institutions and ideas from the 14th century to the end of the 18th century. Credit will be granted for only one of HIST 111 and HIST 110. Three credits.

112 Introduction to Global History from 1789
We are all connected in this global world. The ideas that sparked the French Revolution were in part the result of earlier exploration and they generated change throughout the Atlantic world and as far away from Europe as south Asia. The world has remained interconnected ever since. This course examines how this is the case by investigating human society and the historical processes that have shaped institutions and ideas since the 18th century. Credit will be granted for only one of HIST 112 and HIST 110. Three credits.
209 The Maritime Provinces, 1500-1950
Maritime Canada has been home to seafarers and suffragettes, miners and merchants, bards and basket weavers, and poets and politicians. Whether you are “from down home” or “from away”, this survey course will offer you a glimpse into the diverse political, social, cultural and economic history of Nova Scotia, New Brunswick and Prince Edward Island from the early 16th century to the mid-20th century. Six credits.

213 A History of Canada: Pre-Confederation
This survey course examines the main political, economic and socio-cultural themes in Canadian history from pre-contact Aboriginal societies to Confederation in 1867. Against a backdrop of mingling peoples, clashing empires, and evolving regional and national cultures, students will discuss Aboriginal-European encounters, French-English relations, the legacies of colonization, trends in pre-1867 thought and action, immigration, the experience of the land, and the economic and political transformation of the British North American colonies. Credit will be granted for only one of HIST 213 or HIST 200. Three credits.

215 A History of Canada: Post-Confederation
This story of Canada’s fascinating journey from its founding describes and interprets Canadian women and men responding to momentous challenges - natural disasters, social inequities, wars, and depressions - while also enjoying great advantages and opportunities - rich natural resources, spectacular geography and occasions to overcome deep gender, class, regional and ethnic divides. Debating issues, Canadian history, students will learn to interpret primary source documents and to participate in focused class discussions of selected topics. Credit will be granted for only one of HIST 215 or HIST 200. Three credits.

216 Modern France, 1789 to the Present
Explores French history from the end of the old regime to the present. Topics include the 1789 revolution and its aftermath, Napoleon, the July Monarchy, the Second Empire, class and gender in 19th-century France, the Third Republic, the Dreyfus Affair, the “Hollow Years” of the interwar era, the defeat of 1940 and the authoritarian Vichy Regime, decolonization and the rise of De Gaulle, and the role of feminism/memory/multiculturalism in post-war France with concentration on social, intellectual, cultural trends, and politics. Prerequisite: HIST 100 or 110 or permission of the instructor. Three credits. Not offered 2015-2016.

221 Medieval Russia
Topics include the origins of the Slavs; their adoption of Christianity; the establishment and development of the Kievan state; the coming of the Mongols and the Mongol “yoke”; the slow emergence of Muscovy; Ivan the Terrible and the Time of Troubles. Three credits. Not offered 2015-2016.

222 Imperial Russia
Topics include 17th-century Muscovy: the Romanovs, serfdom, schism, and territorial expansion; the 18th century: Peter the Great, Catherine II, and Westernization; and the 19th century: autocracy, culture, the abolition of serfdom, industrialization, the revolutionary movement, foreign policy, World War I and the collapse of tsarism; the revolution of 1917. Three credits.

231 Martyrs, Monks & Marauders: Piety & Violence in Early Medieval Europe (300-1050 CE)
The history of the Early Middle Ages has been much debated in recent years. Did Rome fall as Germanic warlords poured over its borders or were the Germanic migrations peaceful? Did Vikings only seek to pillage and destroy or to trade goods and share knowledge? What were the social, political and military roles of early Christian martyrs and monks? This course will answer such questions, while providing an overview of the history of Europe between 300 and 1050 CE. Credit will be granted for only one of HIST 231 or HIST 230. Three credits. Not offered 2015-2016.

232 Surviving Chivalry & the Four Horsemen: Europe’s High & Late Middle Ages (1050-1521 CE)
In 1050, Europe embarked on a long period of economic, intellectual and cultural growth. This was the time of the Crusades, chivalry and scholasticism. Beginning in 1300, however, Europe faced new crises characterized by some as the horsemen of the Apocalypse: famine, plague, war and death. Yet out of this disastrous period of history, new intellectual and artistic growth occurred, leading to the Renaissance. This course traces the history of medieval Europe through the highs and lows discussed above. Credit will be granted for only one of HIST 232 or HIST 230. Three credits. Not offered 2015-2016.

233 French Imperialism
This course examines the history of French Imperialism during the 19th and 20th centuries in the Maghreb, Africa, Asia, and the Pacific. It explores various themes associated with colonial politics, society, economy, and culture, including the historiography of French imperialism, the construction and maintenance of the colonial governing system, the gendered nature of colonial discourse and practice, the social impact of religious customs in various locations within the empire, racial hierarchies and concomitant administrative repression, colonial representations in metropolitan French culture, and nationalist movements and revolts before and during the era of decolonization. Prerequisite: HIST 100 or 110 or permission of the instructor. Three credits. Not offered 2015-2016.

235 Introduction to South Asian History
The Indian sub-continent has been a crossroads of people and cultures throughout human history and its diasporas provide working communities, successful business models, rich history and beautiful culture from yoga to Freddy Mercury. South Asia is of central geopolitical, economic and cultural importance in the modern period. This course begins with the arrival of the Mughals in the 16th century and ends with decolonization and partition in 1947. Three credits. Not offered 2015-2016.

242 The United States Before 1865
Survey of the US from colonial times to the Civil War, with emphasis on aboriginal beginnings and civilizations; colonization; the rise of slavery and racism in British North America; the place of the colonies in the British Empire; the War of Independence; territorial expansion; the beginning of industrialization and its effects on the Jeffersonian notions of republicanism; the “problem” of slavery and growing sectionalism; and the road to Civil War and disunion. Three credits. Not offered 2015-2016.

244 The United States After 1865
Topics emphasized are the Civil War as a black freedom movement; the federal government’s brief and grudging commitment to black citizenship during Reconstruction; the abandonment of Reconstruction and the imposition of segregation in the late 19th century; industrialization and age of fabulous robber barons and desperate immigrants; the Depression and the coming of the New Deal; the civil rights movement and Vietnam and its sequels. Three credits. Not offered 2015-2016.

247 Crusades and Their Cultures
This class explores history of the medieval religious wars that are now known as the crusades. Although often treated collectively, these wars differed greatly in character; from penitential crusades to the holy land to disciplinary crusades against the Cathars and Hussites, to the economic war of aggression that was the Fourth Crusade. Organized as a brief chronological survey of the crusades from 1096 to 1430. This course will also examine various themes in recent crusade historiography. Three credits. Not offered 2015-2016.

250 A Survey of German History from 1648 to the Present
This survey of German history emphasizes the 19th and 20th centuries. It includes topics such as the rise of Brandenburg-Prussia; German nationalism; Bismarck and the unification of Germany; the industrial revolution and organized labour; the coming of the war in 1914; the revolution of 1918; the trials of democracy in the Weimar Republic; Hitler and Nazism; and Germany in a divided world. Six credits. Not offered 2015-2016.

255 History of Colonial Latin America
Surveys Spanish and Portuguese America, 15th to the 19th centuries. Themes include the indigenous, African and Iberian heritages of Latin America; the clash of civilizations and conquest in the Americas; the interaction of diverse cultures and the creation of new societies; the social, economic and cultural evolution of colonial Latin America; the age of piracy and challenges to the Spanish and Portuguese empires; the rise of hierarchies and inequalities based on gender, sexuality, ethnicity and class; and the struggle for independence. Three credits. Not offered 2015-2016.

256 History of Modern Latin America
Introduces the political, social, economic and cultural history of Latin America from independence to the present. Themes include the struggles for independence; the creation of new nations and cultures in the 19th century; the abolition of slavery; the struggles of indigenous peoples to preserve their culture; modernization in the late 19th century; the evolution of social classes and ideas about ethnicity, gender, and sexuality; economic dependency and neocolonialism; nationalization and revolution; foreign intervention in Latin America; and the contemporary impact of democratization and globalization. Three credits.

261 Europe in the 19th Century
A survey of the European “long” 19th century from the French Revolution until the Great War. The course covers a variety of political, economic, social, cultural, and intellectual themes, including: Revolutionary/Napoleonic France, the Industrial Revolution, the age of ideologies (liberalism, conservatism, nationalism, socialism), bourgeois and working class society and culture, Italian/German unification, the evolution of gender roles, the rise of consumerism/material culture, scientific/technological/intellectual trends, the “new” Imperialism, and the origins of the Great War. Three credits. Not offered 2015-2016.
262 Europe in the 20th-Century
A survey of the European "short" 20th century from the Great War to the collapse of the USSR. The course covers a variety of political, economic, social, cultural, and intellectual themes, including: the Great War/Russian Revolution, European society and culture during the "roaring 1920s", the Great Depression, interwar dictatorships (Fascist Italy, Nazi Germany, Stalin's Russia), World War II/the Holocaust, the Cold War, Decolonization, post-1945 economic prosperity and social change, intellectual/cultural trends and protest during the 1960s, and the fall of the Soviet Union. Credit will be granted for only one of HIST 262 or HIST 260. Three credits.

282 British History Since 1707
This course surveys the political, social and economic history of Great Britain from the Acts of Union until the present. Over this period Britain shifted from an agrarian society ruled by aristocratic landowners to an industrialized nation comprised of distinct but complicated classes with compelling interests. It also became an imperial power with possessions circling the globe. By the mid-20th century empire ended formally but this past continues to shape the social and political climate of Britain. Three credits. Not offered 2015-2016.

283 The British Empire
Britain was the world's first modern superpower. From the late 18th century it dominated the world. This course will examine both the measurable of imperial domination, but also the intangibles; Britons themselves came to believe that they exemplified national characteristics that denoted imperial rulers. What led to this mindset, and how was it viewed by subject populations. Regional studies enable us to understand relationships between the metropole and the settlers, administrators and people of British colonies. Three credits.

300 A Cultural and Intellectual History of Canada
From long houses to skyscrapers, from oral legends to action comics, from petroglyphs to abstract paintings, Canada's architects, writers and painters have shaped and reflected Canada's cultural and intellectual development. This survey course, covering the period from pre-Contact to 1967, demonstrates how literature, art and architecture offer multi-dimensional and fresh perspectives on Canadian history. Cross-listed as ART 300. Six credits.

303 The Working Class in Early Canadian Society
This course considers the emergence and reconstitution of a working class in Canada between 1800-1910. The course examines three spheres of working-class life: the conditions that gave rise to permanent wage-labour in industry; the changing nature of the working-class household, and; the social and cultural dimensions of working-class communities and the challenges posed by moral reformers and mass commercial culture. The course attempts to determine the extent of working-class identity that has emerged in Canada and how it has changed. Credit will be granted for only one of HIST 303 or HIST 309. Three credits. Not offered 2015-2016.

304 The Working Class in Modern Canada
A continuation of HIST 303, this course considers the emergence and reconstitution of a working class in Canada from 1910-2010. The course attempts to determine the extent of working-class identity that has emerged in Canada and how it has changed into the contemporary era of the 21st century. Credit will be granted for only one of HIST 304 or HIST 309. Three credits. Not offered 2015-2016.

314 Canada and the Cold War Era
Examines Canada's response to the atomic/nuclear age and divisions between the two superpowers from 1945-1991. Students will learn how the Cold War affected Canada and the West through a study of selected themes: political and cultural dimensions of the Red Scare; Canadian diplomacy during the Cold War; Canada's role in the Vietnam War, and participation in NATO and NORAD; the influence of the Cold War on gender, business, labour, and popular culture. Three credits. Not offered 2015-2016.

317 Canadian Women's and Gender History: From Colony to Nation
This course introduces students to major themes in the field of Canadian women's and gender history. Covering the period from the late 16th century to the late 19th century, the course examines the historical development of women's roles, experiences, identities and gender relations. Particular attention is given to the intersection of gender, race, economic/class status, and Indigenous/non-Indigenous status in shaping women's work, family roles, sexuality, political engagement and activism. Credit will be granted for only one of HIST 317 or HIST 308. Cross-listed as WMGS 317. Three credits. Not offered 2015-2016.

318 Canadian Women's & Gender History: Modernity
This course introduces students to major themes in the field of Canadian women's and gender history. Covering the period from the late 19th century to the late 20th century, the course examines the historical development of women's roles, experiences, identities and gender relations. Particular attention is given to the intersection of gender, race, economic/class status, and Indigenous/non-Indigenous status in shaping women's work, family roles, sexuality, political engagement and activism. Credit will be granted for only one of HIST 318 or HIST 308. Cross-listed as WMGS 318. Three credits. Not offered 2015-2016.

319 Myth and Memory in Canadian History
What is told? How is it told? Why is it told? And, who is telling the story? By examining a variety of events, hero figures, communities, regions and time periods, students will look critically at how Canadians have used myth and memory to create their pasts and to construct group identities and national narratives. Three credits. Not offered 2015-2016.

320 The USSR, 1917-1991
Examines the fall of the tsarist regime; the ideological roots of the Bolshevik Revolution; the economic, social, cultural, and political developments of the Soviet Union, from Lenin to Gorbachev; the failure of Soviet communism. Six credits. Not offered 2015-2016.

325 Eastern Europe, 1848-1995
Covers the Ottoman, Austro-Hungarian, Russian, and German empires; modernization and nationalism; World War I and the emergence of new states; World War II; the people's democracies and the coming to power of the communists; the imposition of a Stalinist model of economic, cultural, political, and social development; the resistance to sovietization in Yugoslavia, Hungary, Czechoslovakia, and Poland; the revolutions of 1989; the dismantlement of Yugoslavia and Czechoslovakia. Six credits. Not offered 2015-2016.

326 History of Cuba from Independence to the Revolution
This course examines Cuban history from the early 19th century to the present. This includes the late stage of Spanish colonialism and the slave economy based on sugar, coffee and tobacco; the struggle for abolition and national independence; the Spanish-American War of 1898 and U.S. domination in the 20th century; the 1933 revolution and armed struggle against the Batista dictatorship; Fidel Castro, Che Guevara and the socialist experiment; the Cold War and Cuba's role in Latin America; and Cuban society in a post-Soviet world. The course will also address Afro-Cuban culture, gender and sexuality, and human rights. Prerequisite: HIST 255 or 256 recommended. Three credits.

332 The Medieval Body
This class explores late medieval conceptions of the physical body, which were always essential to identity in the Middle Ages. Medieval discussions of the practice of reading, clothing and fashion and even spiritual union with God, often involved depicting metaphors upon the physical body. Through an exploration of primary and secondary texts along with seminar discussions, the class will explore the interconnectedness of late medieval ideas of corporeality, identity, spirituality and sexuality. Cross-listed as WMGS 333. Three credits. Not offered 2015-2016.

333 The Individual in Medieval Society
Common scholarly discourse posits that individualism developed in the wake of the "civilizing process" of the early modern period and the 18th-century Enlightenment. Yet many medieval scholars decry this chronology, citing examples of medieval people who seem to satisfy the requirements for modern individualism and exploring medieval theories of identity that permit the development of something like modern individualism. This course will explore and take part in this intense debate both by reading the scholarly literature on the subject and by reading primary sources that describe the experiences of medieval people. Credit will be granted for only one of HIST 333 or HIST 330. Three credits. Not offered 2015-2016.

334 Society and Ritual in the High Middle Ages
Like people living in the modern West, medieval individuals marked significant rites of passage such as birth, marriage and death with rituals. In the medieval West, these rituals usually revolved around the Catholic Church. This class will explore the major rites of passage through which medieval peasants, townspeople and nobles alike marked their lives, exploring not only the meaning and purpose of the rituals, but the rich social lives of those individuals participating in them. Credit will be granted for only one of HIST 334 or HIST 330. Three credits. Not offered 2015-2016.

337 History of Modern Mexico
This course examines the history of modern Mexico from independence to the present. This includes the independence war of 1810-1821; civil war, rebellion, and banditry in the 19th century; indigenous peoples' struggles to preserve their culture in the 19th and 20th centuries; foreign intervention and Mexican relations with North America and Europe. Special attention is paid to the Mexican Revolution of 1910. The course follows developments in the post-revolutionary era to explore
popular culture, gender and sexuality, modernization, democracy and social justice. Prerequisite: HIST 255 or 256 recommended. Three credits.

341 A History of Canadian-American Relations
A study of Canadian-American relations from the American Revolution to the modern era. Topics include the founding of separate American and provincial societies; the tensions of continental and nationalist identities; the evolution of a North American economy and culture; policy making and bilateral relations in NATO and the UN; post-9/11 security arrangements; complementary and conflicting national interests in political, military, economic, social, and cultural issues. Three credits. Not offered 2015-2016.

343 The Place of Race in the United States
Explores the enduring importance of race in America. Survey of African American history includes slavery; white-black relations; abolition; the Civil War and Reconstruction; Jim Crow segregation; the Harlem Renaissance and the great migration; black nationalism; the long civil-rights movement; and conservative backlash to affirmative action. Three credits. Not offered 2015-2016.

346 American Social Movements, 1865-1945
Examines the triumphs and failures of social movements from the post-Civil War era to the New Deal. Explores the nature of protest and its effectiveness in the era. Topics include radical Reconstruction; populism; women's suffrage; radical pacifism; industrial unionism; and the unemployed people's councils of the Great Depression. Three credits. Not offered 2015-2016.

347 American Social Movements, 1945-Present
Examines the triumphs and failures of social movements from New Deal era to the present. Students will study the tactics and achievements, as well as failures, of grassroots social movements. The nature of civil disobedience in the second half of the 20th century will be studied through topical case studies. Movements covered include industrial unionism; anti-nuclear activism; McCarthyism; black civil rights; gay rights; and the conservative backlash of groups such as Moral Majority. Three credits. Not offered 2015-2016.

351 United States Immigration and Ethnicity
Explores the history of immigration to the U.S. and the role of ethnicity in American social, cultural and political life. Topics include immigrant images of status and success; migration and return migration; American acculturation; bi-nationalism, and the persistence of ethnic identities; anti-immigrant xenophobia; and the construction of immigrants’ “white” identities. Three credits. Not offered 2015-2016.

353 Explorers and Exploration before Columbus
Though tradition credits Christopher Columbus with beginning an age of exploration, Columbus himself knew that he drew from a long tradition of explorers who came before him including peoples as diverse as Islamic scholars, Venetian merchants, Basque fishermen and Viking sailors. He knew about the multicultural cities of Jerusalem and Karakorum where individuals from all over Eurasia traded knowledge and goods. This course will examine the science, technology, literature and history of exploration that so inspired Columbus and the extent to which the different cultures of the premodern world were interconnected by trade, pilgrimage and exploration. Three credits.

355 The Sixties: A Social History
Examines the tumultuous 1960s and situates the Canadian experience within the international context - primarily the USA and Western Europe. Connections will be made between civil rights movements, anti-colonialism, environmentalism, "second-wave" feminism, Québécois nationalism, the New Left, student activism, and the importance of the counter-culture. The course will retain a historical perspective but draw upon interdisciplinary scholarship. The decade's lasting significance and its current invocation as a cultural and political artefact will be debated. Three credits. Not offered 2015-2016.

360 European Women's History
This course examines major issues in the history of women in Europe from the pre-industrial era to the present. Themes to be covered include gender as a tool for historical analysis; the changing participation of women in the work force and in revolutionary and in reform movements; transformations in the domestic sphere; widening educational opportunities; and women in imperialism and global movements. Gender roles are dynamic and are the outcome of particular historical processes; students in this course will learn how historians untangle implications about a myriad and gendered identities based on the evidence of historical records. Cross-listed as WMGS 370. Three credits. Not offered 2015-2016.

362 European Fascism
This course will explore the history of fascism from its late 19th-century origins to the present day. Topics include the political and doctrinal origins of fascism and its crystallization during the Great War; the fascistization of politics, economy and society in Mussolini’s Italy and Hitler’s Germany; anti-Semitism; the appeal of fascism in interwar Europe; and its subsequent apogee during World War II and the Holocaust. Prerequisite: HIST 100 or 110 or permission of the instructor. Three credits. Not offered 2015-2016.

363 Reformation Europe
Topics include the Catholic Church on the eve of the Reformation, Renaissance humanism, Martin Luther and Lutheranism, John Calvin and Calvinism, Henry VIII and Anglicanism, radical reformers, women and witchcraft, the Jesuits and the Council of Trent, the wars of religion within the Holy Roman German Empire and in France, Philip II and his Grand Project, the rivalry between Spain and England, the Thirty Years’ War (1618-48), and the historiography of the Reformation. Three credits. Not offered 2015-2016.

364 The Holocaust
Explores the history and legacy of the destruction of the Jews in Europe during World War II. Topics include historical anti-Semitism; the rise of the Nazis; euthanasia; the ghettos; the death camps; the actions of collaborationist regimes; Jewish and non-Jewish resistance; the role of ordinary Germans; the establishment of Israel; and post-war trials and controversies. Three credits.

372 Imperial China
Topics include: Confucianism; the dynastic cycles; the fall of the Ming dynasty; the Manchus; the intrusion of the West: the missionaries, the Canton System, the opium wars and the unequal treaties; the Taiping Rebellion; the failed attempts at modernization; the Boxer uprising; the revolution of 1911. Credit will be granted for only one of HIST 372 and HIST 370. Three credits. Not offered 2015-2016.

374 20th-Century China
Covers the revolution of 1911; warlordism; World War I and the May Fourth Movement; Sun Yat-sen, Chiang Kai-shek and the Guomindang; Mao Zedong and the Chinese Communist Party; World War II (1937-45); the civil war (1945-49); the profound economic, social, cultural and political transformations of Communist China under Mao Zedong and Deng Xiaoping. Credit will be granted for only one of HIST 374 and HIST 370. Three credits. Not offered 2015-2016.

383 Victorian Britain
The long 19th century was understood by Britons as ‘theirs’. An industrial powerhouse, grown on science and credit, Britain gained access to raw materials worldwide. Politically dynamic, British democracy went global, and a stable monarchy allowed for seemingly unparalleled Progress. Not everyone experienced this change in the same manner, however. It will explore how broad historical trends - changing ideals of citizenship and democracy, industrial growth, urbanism and the challenge of racial diversity - were experienced in this era. Three credits. Not offered 2015-2016.

384 Britain in the 20th Century
Britain began the 20th century as a leading world power. By the end of the century this was much less the case, but the country had become one of the foremost welfare states. During this transformation, Britain faced important challenges in the two world wars, the ending of empire, and the Irish Question. This course deals with these and other challenges and the responses to them. Three credits.

386 Tudor England
Beginning with the foundation of Tudor rule in 1485, the course will explore the Reformation under Henry VIII and the statecraft of Elizabeth I. Students will explore the social, economic, political, religious, and diplomatic developments during this period. Three credits.

390 World War I
This course an in-depth study of the major aspects-social, cultural, economic, political, and military-of the Great War. Six credits.

394 Selected Topics
The topic for 2015-2016 is Canadian Social Policy in Historical Perspective. This course explores the history of social welfare policy in Canada. Beginning with charitable welfare provision in the late 19th century, it examines the political, economic, and social contexts of the development of the 20th century welfare state. Particular attention is given to understanding the making of social policy through the lenses of gender, class, and race. This class considers what it has meant to be a ‘social citizen’ in Canadian society. Three credits.

395 Selected Topics
The topic for 2015-2016 is American Civil Rights. This course will look at the struggles of African Americans for racial justice in the U.S. through recent scholarly literature and a rich record of documentary film. We will consider major events, organizations, and figures that highlighted the most famous periods of “The Movement” particularly between the 1930s and the 1960s. Three credits.
398  Themes in the History of Sexuality
A comparative study of the history of sexuality during the modern period from the eighteenth through the twentieth centuries. Following a broadly chronological and thematic approach to a diverse history of sexualities, the course will explore in particular the changing meanings of and interconnections between sexuality, race, class and gender. Topics will include: indigenous sexual cultures; sexuality and colonialism; inter-racial sexual relationships; the ‘invention of heterosexuality’; moral panics, prostitution, the regulation of sexual desire; and sexual subcultures. Cross-listed as WMGS 396. Three credits. Not offered 2015-2016.

445  Historiography
This is a seminar in theories and methods in the discipline of history, with corresponding readings in the related historiography. Combining a survey of historiography across time with writing and research projects, the seminar will introduce students to key concepts, methods, and interpretations of history. The subject matter will emphasize 20th-century historiography, including the impact that diverse approaches have had on the discipline today. This course is mandatory for all advanced major and honours students. Majors may take this course with the permission of the instructor. Three credits.

Seminar Notes:
a) Seminars are open to advanced major and honours students. Majors may take a seminar with the permission of the instructor. Advanced majors complete a senior research paper in the context of a seminar.
b) Seminars will be offered on a rotating basis depending on faculty resources and student demand, normally two per year; the department will make every effort to ensure that honours students will have the opportunity to study their chosen field of history at an advanced level.

401  Seminar in Canadian History
This course examines important themes and interpretations in Canadian history. The specific focus of the seminar will reflect the interests of the professor and the students. Three credits.

455  Seminar in Medieval European History
This course examines important themes and interpretations in Medieval European history. The specific focus of the seminar will reflect the interests of the professor and the students. Three credits. Not offered 2015-2016.

457  Seminar in American History
This course examines important themes and interpretations in American history. The specific focus of the seminar will reflect the interests of the professor and the students. Three credits. Not offered 2015-2016.

461  Seminar in Modern European History
Explores major developments in 19th- and 20th-century European history. The specific focus of the seminar will reflect the interests of the professor and the students. Three credits.

462  Seminar in Latin American History
This course examines important themes and interpretations in Latin American history. The specific focus of the seminar will reflect the interests of the professor and the students. Three credits.

490  Thesis
Each student works under the supervision of a chosen professor who guides the selection of a thesis topic, use of resources, methodological component, quality of analysis and execution, and literary calibre of the final version. Required for all honours students. Six credits.

499  Directed Study
Under the direction of a faculty member, students may pursue an individual program of study in an area of history not available in the course offerings. For eligibility, see section 3.5. Three or six credits.

9.22  HUMAN KINETICS

J. Boucher, Ph.D.
A. Casey, Ph.D.
M. Gallant, M.Sc.
D. Kane, Ph.D.
A. Kolen, Ph.D.
M. Lam, Ph.D.
S. Mackenzie, Ph.D.
R. Rasmussen, Ph.D.
D. Vossen, Ph.D.
C. Weaving, Ph.D.

The Department of Human Kinetics offers a four-year arts or science degree program in the study of human movement from a humanities, social sciences or scientific perspective. Both the BA and the B.Sc. in Human Kinetics offer the student further specialization with the option to major in either the kinesiology program or the pre-education program, both of which are nationally accredited.

Selection of the major comes at the end of the second year of study and is dependent upon the student's interests and desired educational outcome. Each of the two majors consists of required and elective HKIN courses, arts/science electives, an approved and open elective, and selected activity courses.

Depending on course selection, the major in kinesiology prepares students for a variety of professional and educational options, including: professional programs such as medicine, dentistry, physiotherapy, athletic therapy, occupational therapy; and massage therapy; direct employment in the health and fitness sector; or graduate programs in sport psychology, sociology, philosophy, history, exercise physiology, biomechanics, child growth and development, health promotion and adapted physical activity/ adapted physical education. Students interested in teaching in the school system should select the pre-education major. The students in pre-education major should select at least one activity from areas: formalized games and sports; basic movement (e.g. track and field, gymnastics); dance; recreation and leisure pursuits; exercise and health related fitness. Students who plan careers in other teaching-related professions should also choose the major in pre-education. Students may consult the department chair or designated faculty advisor to ensure course selection for acceptance to B.Ed. programs. See chapter 6 for admission requirements to the StFX B.Ed. program.

Candidates must follow the degree regulations in chapters 4 and 7. For entrance requirements, see chapter 1.

The normal sequence for the two human kinetics degrees and six majors are as follows: Subject A and Science A are minors in the respective programs below.

**BA in Human Kinetics with Major in Kinesiology**

**Year 1**
HKIN 105, 115; 6 credits each of arts subjects A and B;
12 credits arts/science electives

**Year 2**
HKIN 105 or 205, 215, 236; 3 credits HKIN elective; BIOL 251, 252; 6 credits each of arts subjects A and B

**Year 3**
HKIN 301, 365, 376, 396 or 397; 6 credits HKIN electives; 12 credits arts subject A

**Year 4**
6 credits from HKIN 331, 332, 352, 353, 354, 443, 455; 12 credits HKIN electives; 6 credits each approved electives and open electives

**BA in Human Kinetics with Major in Pre-Education**

**Year 1**
HKIN 105, 115; 6 credits each of arts subjects A and B;
12 credits arts/science electives

**Year 2**
HKIN 105 or 205, 215, 236; 3 credits HKIN elective; BIOL 251, 252; 6 credits each of arts subjects A and B

**Year 3**
HKIN 365, 376, 385, and 3 activities; 6 credits HKIN electives;
12 credits arts subject A

**Year 4**
HKIN 425, 426, and 3 activities; 6 credits from HKIN 331, 332, 352, 353, 354, 443, 455; 3 credits HKIN elective; 6 credits each approved elective and open elective

Candidates must follow the degree regulations in section 4.1.

**B.Sc. in Human Kinetics with Major in Kinesiology**

**Year 1**
HKIN 105, 115; 6 credits each of science subjects A and B;
6 credits each of arts subject X and Y

**Year 2**
HKIN 105 or 205, 215, 236; 3 credits HKIN elective; BIOL 251, 252; 6 credits science A; 6 credits Arts X

**Year 3**
HKIN 301, 365, 376, 396 or 397; 6 credits HKIN electives;
12 credits science A*

**Year 4**
6 credits from HKIN 331, 332, 352, 353, 354, 443, 455;
12 credits HKIN electives; 6 credits each approved electives and open electives

*If science A is biology then 6 credits of biology must be BIOL 201 and 204 and science B is normally chemistry.

**B.Sc. in Human Kinetics with Major in Pre-Education**

**Year 1**
HKIN 105, 115; 6 credits each of science subjects A and B;
6 credits each of arts subject X and Y

**Year 2**
HKIN 105 or 205, 215, 236; 3 credits HKIN elective; BIOL 251, 252; 6 credits science A; 6 credits Arts X

**Year 3**
HKIN 365, 376, 385, and 3 activities; 6 credits HKIN electives;
12 credits science A*

**Year 4**
HKIN 425, 426, and 3 activities; 6 credits from HKIN 331, 332, 352, 353, 354, 443, 455; 3 credits HKIN elective; 6 credits each approved elective and open elective

*If science A is biology then 24 credits of biology must be BIOL 111, 112, 201, 202, 203, 204, 251, and 252. If science A is biology then science B is normally chemistry.
**B.Sc. in Human Kinetics with Major in Kinesiology and Minor in Health Sciences**

Year 1  
HKIN 105, 115; CHEM 100; BIOL 111, 112; ENGL 100; 6 credits of PSYC 100 or SOCI 100

Year 2  
HKIN 105 or 205, 215, 236; 3 credits HKIN elective; BIOL 251, 252; CHEM 220; 6 credits Arts X (ENGL, PSYC, or SOCI)

Year 3  
HKIN 301, 365, 376, 396 or 397; 9 credits HKIN electives; CHEM 255; PHYS 100

Year 4  
6 credits from HKIN 331, 332, 352, 353, 354, 443, 455; 9 credits HKIN electives; one of BIOL 201, 204 or 315; 6 credits each approved elective and open elective

**B.Sc. in Human Kinetics with Major in Kinesiology and Minor in Nutrition**

Year 1  
HKIN 105, 115; BIOL 111, 112; CHEM 100; 6 credits each of Arts subject X and Y

Year 2  
HKIN 105 or 205, 215, 236; 3 credits HKIN elective; BIOL 251, 252; 6 credits Arts X; 6 credits approved elective

Year 3  
HKIN 301, 365, 376, 396 or 397; 3 credits HKIN elective; CHEM 255; HNU 145, 261, 262

Year 4  
6 credits from HKIN 331, 332, 352, 353, 354, 443, 455; BIOL 215; HNU 363; 12 credits from HNU 146, 161, 235, 351, 365, 366, 405, 425, 467 and 475; 6 credits open elective

For completion of B.Sc. in HNU in 5th year, see required course pattern below.

**BA & B.Sc. in Human Kinetics with Advanced Major or Honours**

See chapters 4 and 7 for requirements. In addition to the major requirements, students in the kinesiology program must complete HKIN 491 and 493 (thesis). Students in the pre-education program must complete HKIN 301; 396 or 397; 491; and 493 (thesis). These additional required credits replace HKIN electives in the major pattern.

A student who fails to satisfy one or more requirements for the honours degree may be eligible for the advanced major degree.

A student who fails to satisfy one or more requirements for the advanced major degree may be eligible for the BA and B.Sc. in Human Kinetics.

**B.Sc. Joint Advanced Major in Human Kinetics & Biology**

See chapter 7 for requirements.

Note: HKIN 105, 115, and 205 are restricted to human kinetics students. Other HKIN courses are open to non-human kinetics students with permission of the professor and the department chair.

**105 & 205 Activities I and II**

Each activity is one credit. Students must take six activities over two years, normally three per year, one in each of the three blocks (Fall, Winter, Spring) in which the activity is offered. Level I activities are prerequisites for Level II activities. An activity may be taken only once.

Students enrolled in the pre-education major must choose six additional activities, three activities in each of the third and fourth years. Of the twelve required activities students must take outdoor camp, gymnastics, one dance, one team sport, and one exercise and health related fitness activity.

**Fall**

- Adapted physical activities, basketball I, contemporary dance, fitness, football I, golf, low organized games, rugby I, rugby II, soccer, squash, track and field, and weight training

**Winter**

- Badminton I, basketball I, basketball II, fitness, folk dance, hockey I, gymnastics, handball, indoor soccer, low organized games, movement education, racquetball, soccer II, social dance, squash, volleyball I, and volleyball II

**Spring**

- Badminton I, fitness, folk dance, football II, golf, gymnastics I, hockey II, indoor soccer, racquetball, squash, volleyball I, volleyball II and weight training

**TBA**

Fall (Sep 18-22; Sep 25-27) and winter outdoor education camps (additional fees will be applied), gymnastics II

**115 Principles of Human Movement**

This course provides an introduction to human kinetics. The functional and psychosocial aspects of human movement form the core components of this course. Topics include physical activity, physical fitness, healthy eating, stress, sedentary behaviour, heart health, type 2 diabetes, obesity, cancer, weight management, and behaviour change. Three credits and lab.

**215 Introduction to Motor Control and Learning**

This course will offer a comprehensive overview of the major areas of study in motor control and learning. First, students will learn about the complex process of motor control that not only involve the body but also objects and people in the environment. Then, they will learn about the fundamental processes that underlie the acquisition of motor skills. Finally, consideration will be made of how demonstration, practice structure, and feedback can optimize motor learning. Three credits and lab.

**222 Care and Prevention of Athletic Injuries**

A study of the injuries that occur in popular physical activities, including the nature, course, prevention, and non-medical management of these injuries. Prerequisite: BIOL 251. Three credits and lab.

**226 Focus on Personal Health**

This multidisciplinary course addresses personal health and lifestyle choices of university students. Topics include psychological health, nutrition, physical activity, the environment and sexuality. Three credits.

**236 Foundations of Sport and Exercise Psychology**

This course provides an understanding of the basic concepts and principles of sport and exercise psychology, and how they apply to counselling, teaching, coaching, and fitness instruction. Three credits and lab.

**250 Sport & Physical Activity in the Humanities**

Emphasizing critical thinking as the methodology of philosophers, this course serves as an introduction to the philosophical and sociocultural dimensions of human movement. Topics include the construction and deconstruction of logical arguments, the conceptualization of sport, and the relationship between sport and values. Ideas to be addressed include the nature and significance of sport, the relationship between sport, identity, health, beauty, excellence and knowledge, and ethical issues of equality and sporting conduct. Three credits.

**262 Performance-Enhancing Substances**

The drive to succeed in sports and exercise has led to the use of nutritional, chemical, pharmacological, and physiological means of performance enhancement. The purpose of this course is to provide an overview of substances used in sports and exercise, addressing their mechanisms of action, safety and efficacy in consultation with valid scientific literature. Prerequisite: HKIN 115. Three credits.

**271 Selected Topics**

Three credits.

**301 Elementary Statistics**

Cross-listed as STAT 201; see STAT 201. Three credits.

**321 Advanced Care & Prevention of Athletic Injuries**

An in-depth study of the assessment and management of athletic injuries. Students will learn proper assessment protocol, advanced a’sessment techniques, and specialized taping techniques. Prerequisites: BIOL 251; HKIN 222. Three credits.

**331 The Sociology of Sport**

This course provides students with a social interpretation of sport in Canadian society. Emphasis will be given to the culture of sport and its relationship to other societal institutions such as the mass media and education. Attention will be given to the connection between sports and socialization and to the role of sports in cultural values such as fitness, entertainment, and consumerism. Three credits.

**332 Gender in Sport and Physical Activity**

Explores the role of women and men in sport/physical activity/recreation from a historical, philosophical and sociocultural perspective. This course covers sexuality, homophobia, racism, politics of difference and identity predominately from a Canadian philosophical approach. Cross-listed as WMGS 332. Three credits.

**334 Coach Leadership and Planning**

This is a planning course designed for entry-level coaches. Completion of this course gives an accreditation in the National Certification Coaching Program, Competition A and B. Lab experience will be offered in the varsity program. Three credits and lab.
Historical Foundations of Sport and Physical Activity in Canada
An overview of the history of sport in Canada. Using the forces of class, ethnicity, race and gender as an interpretative foundation, the class will examine the context and social conditions under which Canadians have created, refined, participated in and interpreted sports. Three credits.

Sport Philosophy
This course serves as praxis-based critical inquiry into the essential nature, meaning and significance of sport. The advancement of a philosophy of existential practice represents a central feature of the curriculum. Topics include the relationship between sport, game, play and existence, the dumb jock stereotype, sport and spirituality, being in the zone and the game of real life. Three credits.

Sport Ethics
This course serves as a praxis-based critical inquiry into principles of sporting conduct. The quest for a philosophy of ethical practice represents a central feature of the curriculum. Topics include the relationship between sport, game, play, ethics and real life, fair play, cheating, sportpersonship, sporting violence and performance-enhancement. Three credits.

Exercise Physiology
Reactions and adaptations (acute and chronic) of the musculoskeletal, cardiovascular, and respiratory systems to disruptions to homeostasis due to muscular activity. Covered also: basic neurological and endocrine aspects, training for sport, and exercise in extreme environments. Prerequisites: BIOL 251, 252. Three credits and lab.

Biomechanics
Students will be exposed to the concepts of kinetic analysis of motion through the application of Newton's Laws. The course will provide the mechanical information necessary to enable the student to objectively criticize any human movement which the student may one day have to teach, coach or ergonomically evaluate. Three credits and lab.

Adapted Physical Education
Future educators learn about the philosophy of inclusion, advocacy as well as the nature of various physical, intellectual, developmental and emotional disabilities. Students are asked to translate this theoretical knowledge into practice by forming collaborative partnerships, designing individualized education plans and participating in the Motor Activities at X applied laboratory alongside people with disabilities. Credit will be granted for only one of HKIN 385 or HKIN 395. Three credits and practicum.

Exercise Metabolism
An in-depth study of the metabolic adaptations (acute and chronic) by the human body to disruptions to homeostasis caused by muscular activity. Covered also: effects of exercise on metabolic disease, metabolic bases of training monitoring and prescription and cellular physiology of exercise. Prerequisites: BIOL 251, 252; HKIN 365. Three credits and lab.

Disability, Health and Community Rehabilitation
Students learn to design, deliver, and evaluate community-based physical activity initiatives for marginalized populations. This course focuses on implementation science, evidence-based practice and clinical research design in the field of disability, health and rehabilitation. This includes the study of autism spectrum disorder; Down syndrome, intellectual disability, orthopedic impairment, aging, mental health, deafness, as well as other unique medical concerns and diagnoses. Credit will be granted for only one of HKIN 395 or HKIN 385. Three credits and 20 hours total practical experience.

Quantitative Research Methods
An overview of the scientific method of problem solving. The course covers problem identification, hypothesis testing, data collection, and analysis of research findings. A detailed examination of experimental design assists the student in conducting research, writing the proposal and the report, and critically analyzing published literature. Restricted to third- and fourth-year students; required for third-year honours students. Three credits.

Qualitative Research Methods
An overview of qualitative research methodologies, including the major theories, methods, and approaches. Problem identification, data collection, data analysis, and data presentation are the major focus of this course. Practical experience will be included. Restricted to third- and fourth-year students; required for third-year honours students. Three credits.

Selected Topics
The topic for 2015-2016 is Motor Control: Perceptual-Motor Disorders. This course will expand on students' knowledge of the processes by which the brain organizes and integrates sensory input to initiate motor output. An understanding of these processes in healthy individuals will be contrasted with individuals with perceptual-motor disorders (e.g., anarchic hand, multiple sclerosis, cerebral palsy, Parkinson's disease). These special populations provide valuable information about the functional organization and the neural substrates of the perceptual-motor system. Prerequisite: HKIN 215. Three credits.

Advanced Motor Control
The focus of this course is on the mechanisms and principles, which govern motor control as well as the research methods commonly used in motor control research. Students will gain an understanding of the current state of knowledge and its development, and an appreciation of a number of contemporary issues in motor control. Prerequisite: HKIN 215. Three credits and a lab.

Child Growth and Development
This course covers the physical growth, maturation, and development in children and adolescents. The implications of changes in structure and function as they relate to physical education, physical activity, and physical fitness will be discussed. Prerequisites: BIOL 251, 252; HKIN 365. Three credits and lab. Service learning option.

Health Education
This course introduces the basic concepts and topics associated with the physical, intellectual, social, emotional, spiritual, and environmental aspects of health. Emphasis will be placed upon the application of these concepts to the promotion of health in the school system and more broadly in the community. Three credits. Service learning option.

Psychology of Coaching
Explores current issues pertinent to psychological practice in sport, with a special emphasis on the sport psychologist-coach-participant relationships. Prerequisite: HKIN 236 or PSYC 100. Three credits. Not offered 2015-2016.

Introduction to Policy for Health-Interdisciplinary Strategies
Credit will be granted for only one of HKIN 433 and NURS 495, HKIN 495, HNU 495. Cross-listed as NURS 433; see NURS 433. Three credits.

Psychology of Motivation and Performance in Sports

Organization and Administration of Physical Activity and Sport
An analysis of research relating to the theory and practice of administration in physical activities and sports with emphasis on planning, organizing, staffing, directing, co-ordinating, and controlling. Three credits. Not offered 2015-2016.

Modern Olympic Games
This advanced seminar course is designed to provide opportunities for students to critically examine the Olympic Games and the modern Olympic Movement. Students will examine the Olympic Games from a sociocultural interdisciplinary approach. Restricted to third and fourth year HKIN students. Prerequisites: HKIN 332, 352, 353, 397 and 354 are recommended. Three credits.

Instructional Strategies in Human Kinetics
Students become familiar with both traditional and alternative teaching and learning strategies before applying this theoretical knowledge while teaching physical activity classes to diverse learners. Students will practise various instructional strategies in order to foster different levels of decision making and accommodate for individual differences and learning objectives. Three credits and practical experience.

Essentials of Personal Training
An introduction to exercise program prescription and leadership. Students will learn techniques for prescribing, following, and leading exercise programs; participate in and analyze exercise activities and programs; design and lead group, individual, and periodized exercise programs. Students will be prepared to meet national criteria for recognition as a certified personal trainer. Prerequisites: BIOL 251, 252; HKIN 365. Three credits and lab.

Rehabilitation Techniques for Sports Medicine
This course will provide human kinetic students with an interest in further pursuing therapy as a career, a comprehensive guide to designing, implementing and supervising rehabilitation programs for sports related injuries. Prerequisite: HKIN 321. Three credits.

Games, Life & Leadership
Emphasizing the relationship between sport, game, play and spiritual life practice,
this course serves as a praxis-based philosophical inquiry into the principles of existential leadership. The conceptualization of real life as a game represents a central feature of the curriculum with course content advanced as a unique synthesis of game-playing theory, embodiment theory, existential theory, value theory and leadership theory. Prerequisite: HKIN 353. Three credits.

456 Fitness Assessment and Exercise
This course is designed to provide the theory and practical experience in a wide range of exercise science-related laboratory techniques and exercise training principles. Components of this course are intended to provide students with the necessary background information to pursue personal trainer certification through the Canadian Society of Exercise Physiology. Prerequisites: HKIN 365; BIOL 251, 252. Three credits and lab.

466 Clinical Exercise Physiology
This course examines several chronic diseases prevalent in our society, which are positively influenced by regular exercise or physical activity, and include: obesity, osteoporosis, cardiovascular disease, diabetes, arthritis, certain cancers and depression. The nature of the disease, methods of assessment, the role of exercise in the possible prevention, treatment and/or rehabilitation of these diseases are considered. Restricted to fourth-year students. Prerequisites: BIOL 251, 252; HKIN 365. Three credits.

471 Selected Topics in Human Kinetics I
This course will cover a selection of current human kinetics topics such as psycho-social issues and scientific aspects of human movement. Restricted to third- and fourth-year students. Three credits.

473 Selected Topics in Human Kinetics II
This course will cover a selection of current human kinetics topics. Three credits.

474 Advanced Biomechanics
This course will further the student’s understanding of the qualitative approach to biomechanics, and provide the necessary skills for conducting a quantitative biomechanical analysis of human motion. Students will be introduced to several techniques used in biomechanics research. Emphasis will be placed on the collection and analysis of biomechanical data. Concepts will be illustrated with examples taken from areas of ergonomics, sport, and exercise. Prerequisites: HKIN 376; MATH 111 and PHYS 100 recommended. Three credits and lab.

491 Senior Seminar
In addition to classroom sessions and round table discussions, the senior seminar may include lectures by visitors, faculty, and staff on aspects of human movement. Required for all honours students. The theses of honours students form the basis of their presentations. No formal credit is given for the senior seminar; however, satisfactory attendance and seminar presentation is a requirement for the BA or B.Sc. in Human Kinetics with Honours. No credit.

493 Honours Thesis
Honours students must submit a thesis under the direction of a faculty member. The thesis will document the student’s research work. Students must meet all department deadlines and requirements, and submit an acceptable thesis to earn a BA or a B.Sc. in Human Kinetics with Honours. Restricted to honours students. Prerequisites: HKIN 301; 396 or 397. Three credits.

499 Directed Study
Designed for students with high academic standing who wish to pursue a directed, in-depth study in a selected topic. See section 3.5. Three credits.

9.23 HUMAN NUTRITION
M. English, M.Sc.
D. Gillis, Ph.D., P.Dt.
L. Gougeon, Ph.D.
J. Jamieson, Ph.D.
L.A. Wadsworth, Ph.D., P.Dt., FDC
Part Time
F. Haley, M.H.S.A., P.Dt., C.H.E.
P. Mazier, Ph.D.
L. Reid, M.Ed., P.Dt., C.D.E.

The B.Sc. in Human Nutrition is a professional program which integrates core requirements in foods, nutrition and related areas with studies in biology, chemistry, statistics, business, humanities and social sciences. Collectively, the course requirements are designed to provide graduates with the expertise needed by nutrition and dietetic professionals today. Depending upon the choice of emphasis, the Human Nutrition program prepares graduates for careers in areas such as dietetics, education, health promotion, food service management, and research and development in food and nutrition. Graduates may qualify for entrance to a Dietitians of Canada approved dietetic internship program (comprehensive practicum), or for graduate study in human nutrition, food science, and other professional programs such as pharmacy, medicine, business administration and education.

In second year, students who meet the requisite average may apply for either the advanced major program, which has a seminar requirement; or the honours program, which has a seminar requirement, a three-credit thesis course and 15 credits HNU electives (minimum 12 credits at the 400-level). Students’ selection of seminar topics will reflect the research areas of faculty members.

With the proper selection of courses (including HNU 356 and HNU 456 as HNU electives), students may meet the requirements for admission to a Dietitians of Canada approved graduate dietetic internship program or the Dietitians of Canada approved StFX Integrated Dietetic Internship Program. The StFX Integrated Dietetic Internship enables students to attain Dietitians of Canada competencies for entry-level dietetic practice. Students must normally declare their intent to apply for the StFX Dietetic Internship Program by the end of their second year at the normal time of application for the advanced major or honours program. This Internship consists of three 14-week practicum courses. Each practicum includes one or more supervised placements in dietetic practice settings. At the earliest, students may commence the first practicum after completing the three-year sequence of HNU courses. Students must have an overall average of 70 in the HNU program, a minimum overall average of 75 in HNU courses, and satisfy the criteria for acceptance. Formal submission of the full application must be made by January 31.

With an appropriate selection of courses, students may also meet the requirements for admission to a B.Ed. program. In order to qualify for a family studies teachable, students must present a core of at least 16 credits of human nutrition. These courses must be augmented by a combination of courses in other subject areas which address the field of family dynamics. In general, these courses may be drawn from biology, psychology, sociology, and business administration. Students interested in pursuing this particular option should consult with the Faculty of Education. In addition, courses such as HNU 353 and HNU 461 can be used towards a biology teachable either as a minor or as a second major. (See section 6.1.4 for more details).

See chapter 7 for information on degree patterns, applications for advanced major and honours, advancement and graduation requirements.

All third- and fourth-year human nutrition students are required to attend the presentations in HNU 491. The attendance of first- and second-year students is recommended.

Bachelor of Science in Human Nutrition
The normal sequence for the program is shown below.
Year 1 BIOL 111; CHEM 100; HNU 145, 161, 235; 6 credits humanities electives; 6 credits social sciences electives
Year 2 BIOL 215, 251, 252; BSAD 261; CHEM 225, 255; HNU 146, 261, 262; STAT 201
Year 3 HNU 351, 352, 353, 365, 385; 6 credits HNU electives; 6 credits humanities or social sciences electives for a pair; 3 credits open electives
Year 4 HNU 405, 475; 12 credits HNU electives; 12 credits open electives

B.Sc. in Human Nutrition with Advanced Major
The normal sequence for the advanced major program is identical to that of the program above, with the addition of HNU 491 in year 4.

B.Sc. in Human Nutrition with Honours
The normal sequence for the honours program is shown below.
Year 1 BIOL 111; CHEM 100; HNU 145, 161, 235; 6 credits humanities electives; 6 credits social science electives
Year 2 BIOL 215, 251, 252; BSAD 261; CHEM 225, 255; HNU 146, 261, 262; STAT 201
Year 3 HNU 351, 352, 353, 365, 385; 6 credits HNU electives; 6 credits humanities or social sciences electives for a pair; 3 credits open electives
Year 4 HNU 405, 475, 491, 493; 15 credits HNU electives (minimum 12 credits at the 400-level); 6 credits open electives

Application to the StFX Integrated Dietetic Internship and the Dietitian of Canada’s Graduate Internship
Students planning to apply for dietetic internship programs follow the normal course sequence for B.Sc. in Human Nutrition with the exception of years 3 and 4.
Year 3 HNU 351, 352, 353, 365, 385; 3 credits HNU electives; 6 credits humanities or social sciences for a pair; 3 credits open electives
Year 4 HNU 405, 456, 475; 9 credits HNU electives; 12 credits open electives
Co-operative Education Program in Human Nutrition
The Co-operative Education Program offered in conjunction with the Gerald Schwartz School of Business offers another learning alternative for HNU students. These are normally five-year programs leading to degrees with co-operative education designations. The program assists students who are interested in career options that complement the human nutrition degree. A combination of professional development training and practical work experience enables students to develop the knowledge and skills they have acquired in their degree program. The co-op education graduate with a HNU degree will be prepared to work within the food industry (product development and evaluation, food safety, etc.), public relations, consumer affairs, or marketing with various employers including not-for-profits, industry or government and other related areas of practice. See section 9.13 for further information.

B.Sc. in Human Nutrition degree in 5th year for B.Sc.

Human Kinetics students with minor in Human Nutrition
B.Sc. Human Kinetics students majoring in kinesiology and minoring in human nutrition who wish to pursue a degree in human nutrition in 5th year should follow the course pattern below. The required six credits of open electives in the HKIN degree must be BSAD 261 and HNU 146. In third year, students must take HNU 146, moving the 3 credit HKIN elective to fourth year. In fourth year, students must take HNU 161, 235, 351 and 365 as their required 12 credits of HNU electives. HKIN 366 or 397 fulfills the requirement of HNU 385 in the HNU degree program. Students must submit re-entry application.

Recommended Course Pattern
Years 1-4
HNU 145, 146, 161, 235, 261, 262, 351, 363, 365; BSAD 261
Year 5
HNU 352, 353, 405, 475, 3 credits HNU electives; 3 credits open electives
Students who select HNU 356 and 456 as HNU electives while completing year 5 are eligible to apply for the StFX Integrated and Graduate Dietetic Internship programs.

B.Sc. in Human Kinetics degree in 5th year for B.Sc.

Human Nutrition students
B.Sc. Human Nutrition students who wish to pursue a degree in human kinetics should complete the normal sequence of their HNU program and be sure to include BIOL 112 and 3 credits of HKIN electives. In year 5 students will complete a HKIN degree with the following courses: HKIN 215, 236, 365, 376, 6 credits of HNU 105, 6 credits of HKIN electives, and 2 courses from HKIN 331, 332, 352, 353, 354, 443, 455. Students must submit re-entry application.

145 Introduction to Foods
This course will introduce the physical and chemical properties of the major food groups, the extent to which these properties are altered by various types of processing, as well as issues of food quality and safety and their implications for human health. Three credits and lab.

146 Introduction to Food Science
An introduction to scientific concepts as a basis for understanding foods as a complex chemical system. A study of the properties of food components as they are affected by chemical and physical changes in foods; the foundations of various food preservation methods; and the principles of food evaluation by sensory and objective methods. Three credits and lab.

161 Food and Nutrition for Health in Society
This foundation course examines the evolving role of food and nutrition in society from historical and contemporary perspectives. Students will be introduced to local, national and global influences on societal food consumption trends and factors influencing individual food choice and behaviour. The impact of socioeconomic factors and culture, such as customs and worldviews, on food selection and dietary practices will be explored in depth. An introduction to the history and philosophy of the nutrition profession and emerging issues in human nutrition will be integrated throughout the course. Credit will be granted for only one of HNU 161 or HNU 185. Three credits.

215 Nutrition for a Healthy Lifestyle
Designed for non-science students, this course introduces nutritional science and the role that nutrition, exercise, and other lifestyle behaviours play in the promotion of health. Topics include the function of food and its role in maintaining and promoting health, vegetarianism, food safety, body weight, and healthy eating. Credit will be granted for only one of HNU 215 or HNU 261. Not acceptable for credit in the HNU, HKIN (minor in HNU) or NURS programs. Three credits.

235 Communications
This course introduces the principles of human communications and the development of interpersonal, group, and public communication skills. It enables students to understand (through lectures) and apply (through labs) the written and oral communication process and the factors that influence its effectiveness in a wide range of dietetic practice and health promotion settings. Credit will be granted for only one of HNU 235 or HNU 335. Prerequisite: HNU 161. Three credits and a lab.

253 Introductory Nutrition for Nursing
Designed for nursing students, this course introduces the fundamentals of the science of nutrition with emphasis on macronutrients (carbohydrates, lipids, protein, water) and micronutrients (vitamins, minerals) and their functions, dietary sources and how the body handles them from digestion through excretion. Topics include recommended nutrient intakes and guidelines for healthy eating. Credit will be granted for only one of HNU 253 or HNU 261. Prerequisites: BIOL 105 and CHEM 150. Three credits.

261 Introduction to Nutrition
Students will learn the fundamentals of the science of nutrition with emphasis on energy nutrients, minerals and vitamins, their functions, their dietary sources, and how the body handles them from ingestion through excretion. Topics include the recommended nutrient intakes and guidelines for healthy eating. Credit will be granted for only one of HNU 261 or HNU 215. Prerequisites: CHEM 100 or 150; BIOL 111 or 105. Three credits.

262 Principles of Nutrition in Human Metabolism
Building on HNU 261, students will apply the principles of nutrition with an emphasis on nutrient functions and metabolism while drawing on foundational knowledge in biology and chemistry. Topics will include: energy metabolism, weight management, and nutritional concerns across the life course and the emerging role of nutritional genomics. Credit will be granted for only one of HNU 262 or HNU 263. Prerequisites: HNU 261; BIOL 251, 252, completed or concurrent; CHEM 225, 255, completed or concurrent. Three credits.

263 Applied Nutrition Principles in Nursing Practice
Expanding on the principles of nutrition learned in HNU 253, this course will explore the role of nutrition in promoting health and preventing illness across the life cycle. Weight management, nutritional assessment, intervention and support, as well as the role of nutrition in chronic disease prevention and management will also be introduced. Credit will be granted for only one of HNU 263 or HNU 262. Not acceptable for credit in the HNU program. Prerequisites: HNU 253; BIOL 105, 251, 252, completed or concurrent. Three credits.

351 Nutritional Assessment
This course addresses the principles and methods in nutritional assessment of individuals and populations with consideration for variations in health status and stages across the life course. It provides the theoretical foundation for nutritional assessment in the nutritional care process. Methods for dietary, anthropometric, biochemical, ecological and clinical evaluations of individuals and populations are examined, along with the development and appropriate use of the Dietary Reference Intakes. Prerequisites: HNU 262; CHEM 225, 255; BIOL 251, 252. Three credits and a lab.

352 Nutrition in Chronic Disease Prevention & Management
This course provides a solid foundation to the nutrition care process as it relates to chronic disease prevention and management including a review of medical terminology, charting, nutrition counselling techniques, cultural competency, and ethics in nutrition practice. Application of nutrition care will be made in the context of the prevention and management of the chronic diseases of relevance in the Canadian context including, but not limited to, weight management, cardiovascular diseases, diabetes mellitus, and renal disease. Credit will be granted for only one of HNU 352 or HNU 361. Prerequisite: HNU 351, completed or concurrent. Three credits.

353 Nutritional Management of Human Disease
This course examines the etiology, pathophysiology, and nutritional management (including conventional feeding, enteral and parenteral nutrition therapy) of specific clinical conditions related to the upper and lower gastrointestinal tract, the liver and pancreas, the pulmonary system, neoplastic disease, HIV/AIDS, and metabolic stress. The Nutrition Care Process and drug-nutrient interactions permeate the content. Case studies provide an opportunity to apply the knowledge from lectures. Credit will be granted for only one of HNU 353 or HNU 362. Prerequisite: HNU 352. Three credits.

356 Introduction to Food Service & Quantity Food Production
In this introduction to food service management and quantity food production, principles, policies, and practices applied to the successful management of quantity food service systems are examined. Topics include food safety (including HACCP); menu management, quantity recipe standardization and costing; procurement,
production and service of quality food; marketing; staff scheduling; equipment and furnishings; and environmental management. Prerequisite: HNU 262. Three credits and a lab.

363 Sport Nutrition
This course involves identification of the specific nutrient needs of the individuals engaged in vigorous physical activity, with a focus on the role of nutrients in energy metabolism as a means to support exercise performance. Students will demonstrate an understanding of energy, nutrient and fluid guidelines appropriate for power, endurance and team sports and apply the guidelines to food choices for training and competition. Skills in evaluating scientific evidence in the field of sports nutrition will be emphasized. Prerequisite: HNU 262. Three credits.

365 Community Nutrition
An introduction to the field of community nutrition and its role in health and health care, which assumes students’ familiarity with the theories and principles of normal nutrition. Students will explore the role of the community nutritionist in determining the needs of specific population groups; factors that influence eating behaviour; processes available for planning, delivering, and evaluating community nutrition services; and necessary tools, skills and techniques for practice. Prerequisite: HNU 262. Three credits.

366 Maternal and Child Nutrition
This class takes a life-course approach to examine the role of nutrition within the context of normal human development from pre-conception to adolescence. Emphasis is placed on nutritional concerns and recommended dietary practices during pregnancy, lactation, and early childhood. The management of common childhood and adolescent dietary concerns is also discussed. Prerequisites: BIOL 252; HNU 262 or 263. Three credits.

385 Research Methods
An introduction to the research process for human nutrition. Students will complete a research project of their choice, encompassing the major components of research activity, including literature review, hypothesis generation, data collection and analysis, and discussion. Prerequisites: STAT 201 and credit for all courses in the first two years of the human nutrition program sequence. Three credits and a computer lab.

405 Food Availability
An examination of the vital issues that surround our national and global food supply from production to consumption. The course will explore interdependency of the many factors underlying the science of food and feeding of people, including the relation of nutrition to health and social policy decisions, the food supply, and access to food, food security, food technology, and domestic and global food distribution. Open to students in all faculties. Three credits.

433 Introduction to Policy for Health-Interdisciplinary Strategies
Credit will be granted for only one of HNU 433 and NURS 495, HKIN 495, HNU 495. Crosslisted as NURS 433; see NURS 433. Three credits.

425 Nutrition in Aging
A study of nutrition related to older adults. Emphasis is on nutritional concerns and dietary recommendations for the older adult population. Topics covered include healthy aging, attitudes and demographic trends around aging in Canada. Dietary management of common concerns in older adulthood (including dementia and osteoporosis) is discussed. Prerequisites: HNU 262 or 263; BIOL 251, 252. Three credits.

445 Advanced Food Study
A study of the physical and chemical properties of foods and the changes which occur during food processing, storage and handling. Topics also include food safety (introduction to risk management, microbial contaminations, marine toxins, anti-nutritional food components) as well as research methods and objective safety (introduction to risk management, microbial contaminations, marine toxins, anti-nutritional food components) as well as research methods and objective safety (introduction to risk management, microbial contaminations, marine toxins, anti-nutritional food components) as well as research methods and objective safety (introduction to risk management, microbial contaminations, marine toxins, anti-nutritional food components) as well as research methods and objective safety (introduction to risk management, microbial contaminations, marine toxins, anti-nutritional food components) as well as research methods and objective safety (introduction to risk management, microbial contaminations, marine toxins, anti-nutritional food components) as well as research methods and objective safety (introduction to risk management, microbial contaminations, marine toxins, anti-nutritional food components) as well as research methods and objective safety (introduction to risk management, microbial contaminations, marine toxins, anti-nutritional food components) as well as research methods and objective safety (introduction to risk management, microbial contaminations, marine toxins, anti-nutritional food components) as well as research methods and objective safety (introduction to risk management, microbial contaminations, marine toxins, anti-nutritional food components) as well as research methods and objective

456 Food Service System Management
Building on material introduced in HNU 356, this course focuses on managerial decision-making relevant to human resource and financial management of food service systems in a range of settings in the public and private sectors. Using a problem-based learning approach, students working in small groups on problems assigned by the professor will examine current issues in food service practice and learn to apply quality assurance mechanisms in their management. Prerequisites: HNU 356; BSAD 261. Three credits.

461 Nutrition in Metabolic Disease
This course examines the etiology and pathophysiology of nutrition-related metabolic diseases, with a focus on the evidence leading to clinical practice guidelines for these disorders. Topics will include rheumatic disorders, autoimmune diseases and select inherited metabolic diseases in nutrient metabolism including phenylketonuria, hemochromatosis, glycogen storage diseases, and thalassemias. Skills in evaluating clinical research evidence will be emphasized. Prerequisite: HNU 353. Three credits.

467 Advanced Nutrition
An in-depth study of energy metabolism in human beings, with emphasis on integration and regulation. The application of current research and the rationale for current dietary guidelines will be emphasized. Prerequisites: HNU 262; BIOL 251, 252; CHEM 225, 255. Three credits.

471 Entrepreneurial Practices for Nutrition Professionals
This course examines the relationship of a variety of factors for entrepreneurial behaviours both in the workplace and in new venture development. Creativity and self-awareness are emphasized while basic business skills and planning processes are developed as the necessary tools for bringing goals and ideas to reality. Guest speakers from nutrition-related enterprises and business support agencies will augment the learning and creative experience in the classroom. Prerequisites: BSAD 261; HNU 261, 262, completed or concurrent. Restricted to HNU students. Three credits.

475 Effecting Change
This capstone course focuses on the study of change, particularly as it relates to promoting and supporting healthy eating and nutritional health among individuals and population groups. Students will learn about various theories of change and their applications to effecting individual and social change for the purpose of enhancing nutritional aspects of health and wellness. Prerequisites: HNU 365 and credit for all courses in first two year of the HNU program sequence. Three credits.

481 Internship Practicum I
A 14-week practicum course which prepares students to meet the entrance requirements for Dietitians of Canada. Students work with preceptors in institutional and community settings to develop their assessment and communication skills; learn to plan; learn the basis of nutritional care; and choose a practice-based research project. Prerequisites: HNU 145, 146, 161, 235, 351, 352, 353, 356, 385; an overall average of 70 in the HNU program and an overall average of 75 in HNU courses; acceptance into the IDI program. Six credits. Graded as pass/fail.

482 Internship Practicum II
A second 14-week (minimum) practicum course which provides opportunities to integrate theory and practice in a preceptor-supported environment, and to acquire the competencies required by Dietitians of Canada for entry-level practice. Interns will improve their skills in communicating, assessing, and implementing nutritional care, and complete a practice-based research project. Prerequisites: completion of the HNU program with an overall average of 70 and an overall average of 75 in HNU courses; HNU 481. Six credits. Graded as pass/fail.

483 Internship Practicum III
The final 14-week (minimum) practice course of the IDI program provides an opportunity to integrate theory with practice in a preceptor-supported setting of the IDI program. Students will develop their communication, assessment, implementation, and evaluation skills through participation in nutrition care activities. Completion of HNU 483 is equivalent to completion of entry-level requirements for the Dietitians of Canada examination for certification for practice. Prerequisite: HNU 482. Six credits. Graded as pass/fail.

486 Qualitative Research Methods
An introduction to qualitative research methodologies, highlighting the major approaches, theories and methods. Emphasis is on preparation of research questions, sampling procedures, data collection techniques, and data analysis. Limited enrolment. Prerequisite: HNU 385. Three credits.

491 Advanced Major and Honours Seminar
A critical study of current research in areas related to human nutrition. No credit.

493 Senior Thesis (Honours)
A full-year program of research in nutrition. An acceptable thesis based on original research must be submitted by the deadline to satisfy department requirements for a BSc HNU honours degree. Three credits.

496 Selected Topics
The topic for 2015-2016 is Functional Foods. This course will introduce students to the growing global food industry trend of functional foods and their relationship to health and disease. Bioactive components of functional foods, their sources, chemistry, efficacy, safety, and metabolism will be examined. Evaluation of aspects of marketing and the regulatory environment related to health claims for functional
foods will focus on consumer perceptions and roles of health professionals. Prerequisites: HNU 145, 146, 262. Three credits and a lab.

497 Selected Topics
The topic for 2015-2016 is Nutrition in Global Health. This course explores current nutrition issues and interventions within the context of global health. It addresses the contemporary complexities of ‘nutrition transition’ and examines policies and practices applied in addressing global health burdens, such as micronutrient deficiencies and diet-related chronic disease. Prerequisites: HNU 351, 365. Three credits.

499 Directed Study
Designed for students with high academic standing who wish to explore, in depth, some aspect of human nutrition not available in other course offerings. See section 3.5. Three credits.

9.24 INFORMATION SYSTEMS

H. Abolghasem, Ph.D.
T. Boyle, Ph.D.
N. Foshay, Ph.D.
H. Marzi, Ph.D., P.Eng.
R. Palanisamy, Ph.D.
Part-time
B. Liengme, Ph.D.

The Bachelor of Information Systems (BIS) degree prepares students to play an integral role on teams that imagine, specify, design, justify, build, implement, manage, and use computer information systems. Through innovative classes, students gain an understanding of the technical, management, and human issues involved in the efficient and effective development, management, and use of computer information systems in an organizational context.

Careers in the information systems area are growing rapidly due to the impact of information technology on every aspect of human activity. BIS graduates are sought after to: design usable information systems for a myriad of applications in business, health and social welfare, manufacturing, and government organizations; advise business and government organizations how to improve their efficiency and effectiveness through the application of information systems; apply their knowledge of project management and their general professional competencies in a wide variety of contexts with the aim of creating business value; and attend leading graduate schools to become the next generation of researchers and technology policy makers.

Information systems students receive hands-on exposure to the latest technologies used to manage organizations and improve business performance. Example systems include state-of-the-art database management systems such as Oracle and SQL Server; and SAP, a leading multi-million dollar cross-enterprise system for large organizations.

The Department of Information Systems offers a variety of degrees and courses to meet the needs of students interested in the study of information systems. All degrees closely follow the curriculum recommendations of the Association of Computer Machinery, the Association for Information Systems, and the Association for Information Technology Professionals. The following degree programs are offered by the Department of Information Systems:

Bachelor of Information Systems General
Bachelor of Information Systems with Major or Honours in Enterprise Systems
Bachelor of Information Systems with Major or Honours in IT Management

An enterprise system is a single, integrated enterprise computing system designed to carry out the most common business activities, including logistics, accounting, finance, and human resource management, at the operational, tactical, and strategic levels of the organization. The Department of Information Systems, by partnering with SAP, has established itself as a leader in enterprise system education in Canada. The department offers students the opportunity to obtain specialized knowledge in the design, implementation, and management of enterprise systems through a major or honours degree in enterprise systems.

The BIS Major or Honours in IT Management is designed to provide students with both depth and breadth regarding the management issues facing information systems in organizations.

See chapter 5 for information on the degree patterns, declarations of major, advanced major and honours, advancement and graduation requirements.

Bachelor of Information Systems General Degree

The normal sequence for the general degree is shown below.

Year 1
BSAD 101, 102; ECON 101, 102; INFO 101, 102; 12 credits art/science electives

Year 2
BSAD 221, 223, 261; INFO 245, 255, 256, 275; MATH 205; STAT 201; 3 credits open electives

Year 3
BSAD 231, 381; INFO 225, 355; 6 credits INFO elective; 12 credits arts/science electives

Year 4
INFO 415, 416, 425, 465, 482; 6 credits INFO electives at the 300/400 level; 6 credits arts/science electives; 3 credits open electives

The sequence above is the normal course pattern, and not mandatory. Years three and four offer flexibility in course selection. However, students should keep in mind that many courses have prerequisites and that most courses are not offered in both semesters. For more information, consult the department chair.

BIS with Major

The BIS program offers majors in enterprise systems and IT management.

Students who do not meet the grade and average requirements for the BIS major program after their third or fourth year qualify for a BIS General degree by completing the BIS General degree pattern outlined above.

BIS with Major Course Pattern

The course patterns for the two majors are the same as for the BIS General degree, except that students make replacements for each major as follows:

Major in Enterprise Systems
Replace 12 credits INFO or open electives with INFO 346, 348, 448 and 496.

Major in IT Management
Replace 3 credits INFO elective with INFO 496.

BIS with Honours

The BIS with Honours degree is designed to equip students for graduate studies and research in information systems and business administration. Students work closely with IS faculty to explore classic IS work and recent IS research, as well as research statistics and methods commonly used to report them. Students will apply their research skills and explore a topic of interest in depth through the preparation and defense of a thesis.

Students who do not meet the grade and average requirements for the BIS with Honours program after their third or fourth year may qualify for a BIS with major or the general degree by completing one of the BIS course patterns outlined above.

BIS with Honours Course Pattern

The course patterns for the two honours degrees are the same as for the BIS with major degree, except that students make replacements for each as follows:

Honours in Enterprise Systems
Replace 3 credits INFO or open electives and INFO 496 with INFO 397 and 498.

Honours in IT Management
Replace 3 credits INFO or open electives and INFO 496 with INFO 397 and 498.

BIS for University Graduates

Students who have completed a StFX degree can usually complete a BIS degree in one or two additional years of study. Transfer students must complete a minimum of 60 credits taken at StFX to earn a StFX degree. Students are encouraged to contact the information systems department chair for additional information regarding this program.

Co-operative Education Program in Information Systems

This optional academic program offers BIS students the opportunity to gain 12 months of professional, paid work experience in a range of opportunities in industry, government and not-for-profit across Canada. Students can gain valuable technical and professional experience in areas including (but not limited to) various programming languages and systems analysis to reinforce classroom-based instruction. The Information Systems Co-op Program is accredited by the Canadian Association for Co-operative Education (CAFCE). See section 9.13 for further information.

101 Introduction to Information Systems I

This course covers the organizational use of information technology. Topics include IS hardware, software, data; telecommunication networks; the Internet; and information technology infrastructure. Technical segment includes word processing; spreadsheets; presentation software; database management systems software; Internet search tools; and web page publishing. Applications of these tools and knowledge will be oriented towards business problems. Credit will be granted for only one of INFO 101, CSCI 100, CSCI 235. Three credits.

102 Introduction to Information Systems II

This course introduces the conceptual foundations of information systems, focusing on organizational use with emphasis on information management. Topics include the impact of IS upon organizations and society; decision-making in a digital age;
business process integration; enterprise systems; supply chain management; e-commerce; types of information systems; information resource management; knowledge-based IS; analysis and design of information systems. Prerequisite: INFO 101. Three credits.

225 Information Systems Hardware and Software
This course covers the fundamentals of computer hardware, software, and data at the system (operating system and lower) level. The material is designed for students who will be IS professionals and must understand the components of computing in order to make knowledgeable decisions about hardware and software systems. Credit will be granted for only one of INFO 225, CSCI 263, CSCI 365. Prerequisite: INFO 256. Three credits.

245 Introduction to Enterprise Resource Planning
This course introduces enterprise resource planning (ERP) and its role in achieving effective business process integration (BPI). The course will discuss ERP theory and systems, the limitations of conventional information systems, the challenges and business value of effective integration across departments along the supply chain. Prerequisites: INFO 102, BSAD 102. Three credits.

255 Introduction to Object-Oriented Programming
This course introduces the principles of software engineering and procedural programming including data types, input/output, control structures, functions, arrays, pointers, strings, and stream input and output. The course elaborates on object-oriented concepts and studies data abstraction with classes, objects and operator overloading. Restricted to BIS students. Three credits and three-hour lab.

256 Data Structures with Object-Oriented Design
This course examines object-oriented concepts including inheritance, polymorphism, and exception handling. File processing and dynamic data structures such as linked lists, queues, stacks and binary trees, and sorting and searching techniques will also be reviewed. C++ will be used to illustrate course concepts. Prerequisite: INFO 255. Three credits and three-hour lab.

275 Database Management Systems
Introduces relational database management systems including the database environment, the relational model, relational languages (QBE and SQL), techniques and methodologies of database analysis and design. Current micro-computer DBMS software is reviewed and compared. Students will complete a DBMS project. Credit will be granted for only one of INFO 275 or CSCI 275. Prerequisite: INFO 102. Three credits.

346 ABAP Programming Language
This course will introduce the fundamentals of the ABAP programming language including the ABAP programming workbench. The basics of the ABAP programming language will be covered and students will use ABAP to apply concepts. Elementary report and dialogue programming will be examined. Students will code their own programs in tutorials. Prerequisite: INFO 255. Three credits.

348 Advanced Enterprise Resource Planning Using SAP
This is an advanced ERP course designed to provide students with a detailed knowledge of SAP and expand on the topics covered in INFO 245. Topics addressed in this course include SAP navigation, SAP’s modeling ontology, ERP administration, business warehouse and customer relationship management systems. The SAP system will be used to illustrate course concepts. Prerequisite: INFO 245. Three credits.

355 Advanced Object-Oriented Programming Using JAVA
Java as an object-oriented programming language will be described and used for application development. Concepts of exception handling, graphical user interface (GUI), Java applets, and multithreading will be studied. Concepts of remote communication, remote method invocation for creating a remote distributed system and implementing remote interface will be emphasized for enterprise systems, internetworking, client/server, and peer-to-peer application development. Credit will be granted for only one of INFO 355 or CSCI 483. Prerequisite: INFO 256. Three credits and three-hour lab.

374 Geographic Information Systems
Cross-listed as ESCI 374; see ESCI 374. Three credits.

397 Information Systems Research Methods
This course covers the basic concepts in conducting research: forming questions; defining conceptual and observable variables; selecting and implementing the research design; collecting and analyzing data; and reporting research. Quantitative and qualitative research methods will be discussed. Prerequisites: INFO 102; STAT 201; restricted to students in BIS honours; open to others with permission of the department chair. Three credits.

415 Systems Analysis
Covers systems analysis as an IT discipline and describes the role of the systems analyst in the development of computer-based information systems. The course introduces system development methodologies and key systems analysis tools and techniques, including requirements discovery methods, data and process modelling, Computer-Aided Software Engineering (CASE) tools, and feasibility analysis. Prerequisite: INFO 275. Three credits.

416 Project Management and Practice
This course covers the factors necessary for successful management of system development or enhancement projects. Technical and behavioural aspects of project management are discussed. Cross-listed as BSAD 416. Prerequisite: INFO 102. Three credits.

418 Topics in Information Systems
This course will explore in detail a current topic or issue in information systems. Content will vary from year to year. Cross-listed as BSAD 418. Prerequisite: INFO 102. Three credits.

425 Systems Design
Building upon INFO 415, this course provides students with the background necessary to create functional and successful information systems. The course emphasizes design tools and objectives; hardware/software evaluation and selection; productivity and quality in development, implementation, maintenance and post-implementation review. Students will use a computer-aided systems engineering (CASE) tool and examine case studies. Prerequisite: INFO 415. Three credits.

446 Electronic Business
Business is increasingly conducted through electronic means, often on the Internet. This presents many challenges, including technological, marketing, strategic, operations, and systems issues. This course explores the current state of electronic commerce, relevant issues, and their relative importance to the success of a business venture. Students will read case studies and analyze existing business ventures on the Internet. Cross-listed as BSAD 415. Three credits.

448 Implementation, Configuration, and Use of an Enterprise Resource Planning System (ERP)
Provides a practical understanding of ERP configuration with reference to SAP. The course familiarizes students with SAP implementation methodologies and tools. Students will learn to configure the financial and materials management functionality enabling a company to do basic procurement, inventory management, and financial accounting activities. The implementation will be expanded to enable the capturing of costs (controlling) and manufacturing (production) functionality. Prerequisite: INFO 348. Three credits.

465 Business Data Communication Systems and Networks
Topics include communication systems; environments and components; common carrier services; network control, design, and management; distributed and local networks. Credit will be granted for only one of INFO 465, CSCI 368, CSCI 465. Prerequisite: INFO 225 or CSCI 263 or 365. Three credits.

482 Managing Information Technology
This course provides an overview of how to effectively manage information technology (IT) resources within organizational settings. This course takes a Chief Information Officer (CIO) (top down) perspective on managing information technology. It is a strategic resource given that most of an organization’s important activities rely so heavily on technology that they cannot operate without them. Technology enables firms to offer new products, create new customer channels and dramatically improve the efficiency of their supply chains. As such, an organization’s IT resources require thoughtful planning and management. Cross-listed as BSAD 419. Three credits.

498 Honours Thesis
Honours students are required to prepare and submit a thesis under the direction of a faculty member. Students will develop and present draft proposals as part of INFO 397, then complete the proposal, conduct the fieldwork, present, and defend their theses as part of this course. Classroom meetings are held periodically to discuss the thesis process and make presentations. Prerequisite: INFO 397. Three credits over the full academic year.
499 Directed Study
This course permits students of exceptional ability and motivation to pursue, on a
tutorial basis, an individualized program of study on some aspect of information
systems not available in other course offerings. Restricted to senior BIS students.
Three credits.

9.25 INTERDISCIPLINARY STUDIES

Service Learning Program
A. Bigelow, Ph.D., Co-ordinator
M. Gaudet, M.Ad.Ed., Program Manager

Service learning is an innovative way to integrate experiential learning, academic
study, and community service. It is an opportunity for students to apply what they
learn in the classroom in a community setting. The goal is to blend service and
learning so that the service reinforces, improves, and strengthens learning. Service
learning is possible in many disciplines and in a broad range of courses and service
experiences. Third and fourth year students can also enrol in the independent course, IDS 306.

Course-Based Service Learning
Course-based service learning is a form of experiential education where students
work with community members on community problems and where academically
rigorous assignments are designed to explicitly link those experiences to specific
learning outcomes. Students complete a service experience in the local community,
the nature and length of which will be determined by the professor. Students prepare
a final report for the professor which determines the grade on this assignment. For
information on courses offering a service learning component, see www.mystfx.
cad/academic/servicelearning and click on information for students.

Immersion Service Learning
Students become involved in intense service experiences in communities, including
inner-city settings and international locations. Guided by faculty, students will
explore community issues and dynamics in a development context. Students can
participate in immersion as a personal (non-credit) experience or may integrate an
immersion experience into their chosen course of study through optional course
credit with the approval of the professor or through IDS 305. Students must apply
for admission. The deadline is mid-October; for more information, contact
servicelearning@stfx.ca

305 Immersion Service Learning
Designed for third- and fourth-year students who have applied and been accepted
to participate in the immersion service learning program during the winter term.
Under faculty supervision, students will develop their information retrieval, term
paper writing, and presentation skills through completion of an academic paper
connected with the immersion service learning experience. Students must apply
to the service learning office for admission to the immersion program as well as
registering on-line for this course. Oral presentation component. This course can be
used as part of DEVS requirement or as an elective in any program. Three credits.

306 Service Learning: Theory and Practice
At the core of this course, students will spend 30 hours working with a community
organization. In seminar style classes, students will explore theories about service
learning, experiential learning, volunteerism, social justice and community-university
relationships. Students will reflect on, question and discuss how these ideas relate
to their service learning experiences. The course encourages a deep understanding
of education and community engagement. This course can be used as part of DEVS
requirement or as an elective in any program. Three credits.

9.26 MATHEMATICS, STATISTICS, AND
COMPUTER SCIENCE

J. Apaloo, Ph.D.
K. DeBell, Ph.D.
S. Finbow, Ph.D.
I. Gondra, Ph.D.
M. Lin, Ph.D.
R. Lukeman, Ph.D.
W. MacCaul, Ph.D.
T. Taylor, Ph.D.
M. van Bommel, Ph.D.
R. van den Hoogen, Ph.D.
P. Wang, Ph.D.
X. Wang, Ph.D.
L. Yang, Ph.D.
P. Zhou, Ph.D.
Professor Emeritus
S. Aalto, Ph.D.
J. Quinn, Ph.D.

The scope of mathematics ranges from computer science to philosophy, from
physics to finance, from biology to art. Mathematics emphasizes precision and
logic, but also creativity, elegance and problem-solving. While mathematics is a
subject with a rich history (some techniques, results and open problems go back
thousands of years), it is also a subject that is very much alive, with new theories
and applications continually arising. While mathematical and statistical models
and methods form the basis of scientific and engineering fields, they are also
used in such diverse areas as modern communication, cryptography, animation,
banking and finance, policy development and consultation, public health care,
and architecture. With an undergraduate degree in mathematics and statistics,
students often go on to pursue an education degree to become a teacher or a
graduate degree to become a researcher. However, the career options are much
broader. Students with a strong background in mathematics and statistics develop
problem-solving skills, logical thinking, and creativity, which serve them well for
any career path.

Statistics is the science of data and is a useful tool for research in virtually
all areas of human endeavor. It involves collecting, organizing, summarizing,
and analyzing information in order to draw conclusions. The practice of statistics
takes into account the notion of uncertainty (variability), which leads to error when
estimating something, predicting something, or making a decision. It is important,
therefore, to measure and, if possible, control error. The framework for quantifying
uncertainty is probability, which is a mathematical theory used to describe and
analyze chance events. For this reason, probability is the foundation of statistics.
Statistics is used in many different fields: medical studies, economics, GNP growth,
forecasting, stock market valuations, futures pricing, sociological studies, social
policy, marketing research, opinion polls, political polls, industrial processes,
environmental processes, and ecological processes and issues.

The Department of Mathematics, Statistics, and Computer Science offers
degrees in both the Faculty of Science and the Faculty of Arts. Because of the
diversity of programs offered, students are encouraged to consider their academic
goals at an early stage in their studies, and to consult the chair and other members
of the department regarding course selection.

Degrees Offered
BA with Major, Advanced Major, and Honours
BA Honours with subsidiary subject programs are available with the departments
of economics and English
B.Sc. with Major, Advanced Major, and Honours
B.Sc. with Advanced Major in Mathematics with Business Administration
Joint B.Sc. programs are available with the departments of biology, chemistry,
earth sciences and physics
Students interested in these programs should consult with the relevant department
chairs. General requirements for these degrees are in chapters 4 and 7.

Streams
It is evident from descriptions of computer science given in section 9.12 and
mathematics and statistics given in this section, that there are diverse career paths
possible within the mathematical sciences. Streams for students planning to pursue
a career in secondary teaching or statistics are given in this section. Information
on streams for other possible career paths within the mathematical sciences are
available from the department chair.

Department Regulations
The following pairs or groups are considered so similar that a student may not
receive credit for both: MATH 111 and 121; MATH 112 and 122; STAT 201, 231
and 224; MATH 221 and 367; MATH 222 and 267, MATH 223 and 253; CSCI 125,
161, ENGR 144 and INFO 155(255); CSCI 162, and INFO 156(256); CSCI 275
and INFO 275; CSCI 465 and INFO 465; CSCI 483 and INFO 355.
MATH 100, 205; CSCI 100, 235 may be available only as approved or open
electives.

The senior seminar, MATH 491, is required for all major, advanced major and
honours candidates. In addition, MATH 493 is required for all honours students.

COMPUTER SCIENCE
Requirements for the BA and B.Sc. in computer science are listed in section 9.12.

MATHEMATICS
All students who want to pursue a major, advanced major, or honours degree in
mathematics must take the following core courses: MATH 111, 112, 253, 267, 277,
491; STAT 231 (201 if the degree is in the Faculty of Arts); and CSCI 161 (CSCI
162 is also recommended).

Major in Mathematics

Major courses in mathematics, STAT, and CSCI to meet the requirements of the
Faculty.

Typical BA Major in Mathematics Pattern

Year 1
MATH 111, 112; 6 credits minor subject B; 6 credits subject C; 6
credits subject D; 6 credits open electives

Year 2
MATH 253, 267, 277; STAT 201; CSCI 161; 6 credits minor
subject B; 6 credits subject C; 3 credits subject D
This optional academic program offers mathematics students the opportunity to specialize in mathematics as listed above. In years 3 and 4, nine of the 15 credits of MATH/STAT/CSCI must be chosen from MATH 254, 347, 371, 387, STAT 333. Second teachable may be chosen from any subject category identified in section 6.1.4. Candidates must follow the degree regulations in the sections 4.1 or 7.1.

**BA or BSc Major in Mathematics (Pre-Education Stream)**

Students wishing to pursue the pre-education stream should follow the applicable major in mathematics as listed above. In years 3 and 4, 15 credits of MATH/STAT/CSCI must be chosen from MATH 254, 347, 371, 387, STAT 333. Second teachable may be chosen from any subject category identified in section 6.1.4. Candidates must follow the degree regulations in the sections 4.1 or 7.1.

**Typical BSc Major in Mathematics Pattern**

**Year 1**
- MATH 111, 112; 6 credits science subject B; 6 credits science subject C; 6 credits arts X (humanities); 6 credits arts Y (social science)

**Year 2**
- MATH 253, 267, 277; STAT 231; CSCI 161; 6 credits science subject B; 6 credits arts X; 3 credits open electives

**Year 3**
- 9 credits from MATH/STAT/CSCI; 6 credits science electives; 6 credits arts Z; 9 credits open electives

**Year 4**
- MATH 491; 6 credits from MATH/STAT/CSCI; 6 credits arts Y; 18 credits open electives

**BA or BSc Major in Mathematics (Statistics Stream)**

Students wishing to pursue the statistics stream should follow the applicable major in mathematics as listed above. In years 3 and 4, nine of the 15 credits of MATH/STAT/CSCI must be STAT 311, 331, 333.

**Advanced Major and Honours Programs**

Advanced major and honours students in mathematics may count CSCI 161 and 162 only as approved or open electives in their program. Students in mathematics may specialize in mathematics or statistics. Descriptions for each specialization may be obtained from the department chair, but the following rules apply.

**Advanced Major in Mathematics**

In addition to core courses, MATH 254 and one of 354 or 366 are required. Additional courses must include nine credits of MATH or STAT courses at the 300 or 400 level, and an additional three credits (nine for B.Sc. students), which may be chosen from MATH, STAT or CSCI; MATH 493 or STAT 493 is optional.

**Typical Advanced Major Pattern:**

**Year 1**
- MATH 111, 112; CSCI 161, 162

**Year 2**
- MATH 253, 254, 267, 277; STAT 231 or 201

**Year 3**
- MATH 354 or 366; additional MATH, STAT or CSCI courses

**Year 4**
- MATH 491; additional MATH, STAT or CSCI courses

**BA or BSc Advanced Major in Mathematics (Statistics Stream)**

Students wishing to pursue the statistics stream should follow the applicable advanced major in mathematics as listed above. In years 3 and 4, 12 credits of MATH/STAT/CSCI must be STAT 311, 331, 333, 334.

**B.Sc. Advanced Major in Mathematics and Business**

In addition to the requirements for an Advanced Major in Mathematics, students take CSCI 235, plus 36 credits in Business and Economics. Details of the program can be obtained from the department chair.

**Honours in Mathematics**

In addition to core courses, MATH 254, 354, 366, 367, 493 or STAT 493 for statistics stream, CSCI 162 and one of MATH 454, 466, or STAT 435 are required. Additional courses must include at least twelve credits in MATH or STAT credits at the 300 or 400 level, with no fewer than three credits at the 400 level, plus 12 credits which may be chosen from MATH, STAT, or CSCI.

**Typical Honours Pattern:**

**Year 1**
- MATH 111, 112; CSCI 161, 162

**Year 2**
- MATH 253, 254, 267, 277; STAT 231 or 201

**Year 3**
- MATH 354, 366, 367; additional MATH, STAT, and CSCI courses

**Year 4**
- MATH 454, 466 or STAT 435; MATH 491, 493 or STAT 491, 493 for statistic stream; additional MATH, STAT, and CSCI courses

**BA or BSc Honours in Mathematics (Statistics Stream)**

Students wishing to pursue the statistics stream should follow the applicable honours in mathematics as listed above. In years 3 and 4, 15 credits of MATH/STAT/CSCI must be STAT 311, 331, 333, 334, 435, and STAT 493.

**Co-operative Education Program in Mathematics**

This optional academic program offers mathematics students the opportunity to gain 12 months of professional, paid work experience in a range of opportunities in industry, government and not-for-profit across Canada. Students can gain valuable technical and professional experience in areas including (but not limited to) modeling, analysis and design to reinforce classroom-based instruction. See section 9.13 for further information.

**BA with Minor in Mathematics**

Students planning to pursue a career in secondary school teaching with mathematics as their second teachable should complete at least 24 credits of MATH/STAT/CSCI chosen from MATH 100, 205, 277, 347, 371, 372; STAT 201, 311; CSCI 140. Other MATH/STAT/CSCI courses could be substituted with the permission of the department chair.

**MATHEMATICS**

**101 Mathematical Concepts: Sets, Logic, and Number Theory**

This course surveys topics from diverse areas of mathematics, including problem solving, set theory, logic, historical numeration systems, and number theory. Students will solve problems using processes such as abstraction, pattern recognition, deduction and generalization. Credit will be granted for only one of MATH 101 and MATH 100. Acceptable for credit only in the Faculties of Arts and Business and the Departments of Human Kinetics, Human Nutrition and Nursing. Prerequisite: Grade 12 math or equivalent. Three credits.

**102 Mathematical Concepts II: Graphs, Functions, Geometry, and Probability**

The course surveys interesting and useful topics from diverse areas of mathematics, including problem solving, algebra, graphs and functions, geometry, counting methods, and probability. Students will solve problems using processes such as abstraction, pattern recognition, deduction and generalization. Credit will be granted for only one of MATH 102 and MATH 100. Acceptable for credit only in the Faculties of Arts and Business and the Departments of Human Kinetics, Human Nutrition and Nursing. Prerequisite: Grade 12 math or equivalent. Three credits.

**111 Calculus I**

An introduction to differential calculus of a single variable, with applications to the physical, life, and social sciences. Topics include limits, differentiation of polynomial, exponential, logarithmic, and trigonometric functions, inverse functions and their derivatives, implicit differentiation, curve sketching, and applied max-min problems. Credit will be granted for only one of MATH 111 or ENGR 121. Prerequisite: grade 12 pre-calculus or equivalent. Three credits and a one-hour lab.

**112 Calculus II**

An introduction to integral calculus for functions of one variable. Topics include definite and indefinite integrals; the fundamental theorem of calculus; methods of integration; numerical approximation of definite integrals; applications to area and volume; probability density functions and distributions; differential equations; and Taylor polynomials. Credit will be granted for only one of MATH 112 or ENGR 122. Prerequisite: MATH 111. Three credits and a one-hour lab.

**121 Calculus I for Engineers**

This course examines the main idea of calculus of a single variable. It covers functions, limits, continuity; differentiation and integration of polynomial, exponential, logarithmic, and trigonometric functions; product, quotient, and chain rules; applications of differentiation to graphing; maximum-minimum problems, and related rate problems; definite and indefinite integrals, and the fundamental theorem of calculus. Credit will be granted for only one of MATH 121 or MATH 111. Cross-listed as ENGR 121. Prerequisite: grade 12 pre-calculus or equivalent. Three credits and a one-hour lab and one-hour problem session.

**122 Calculus II for Engineers**

A continuation of ENGR 121, this course covers the applications of integration, including areas, volumes, moments, pressure, and work; techniques of integration; numerical integration; length of curves; surfaces of revolution; parametric equations; polar co-ordinates; sequences and series; and Taylor series. Credit will be granted for only one of MATH 122 or MATH 112. Cross-listed as ENGR 122. Prerequisite: MATH 121. Three credits and one-hour lab and one-hour problem session.

**205 Business Mathematics**

A presentation of mathematics applicable to business, including functions, modelling, linear programming, matrix algebra, interest, and annuities. Use of spreadsheets will be a fundamental part of this course. Acceptable for credit in the Faculties of Arts and Business only. Three credits.

**221 Differential Equations for Engineers**

Covers first order linear and non-linear ordinary differential equations; ordinary differential equations of higher order with constant coefficients; applications
to engineering problems; power series solutions; Laplace transforms; periodic functions; applications of Laplace transforms to linear systems; Fourier series. Credit will be granted for only one of MATH 221 or MATH 367. Cross-listed as ENGR 221. Prerequisite: MATH 122. Three credits and two-hour problem session.

222 Calculus III for Engineers
Extends the ideas introduced in MATH 121 to the calculus of several variables, and covers space curves, arclength, curvature; partial derivatives; implicit functions; constrained and unconstrained extrema; multiple integrals; line, surface, and volume integrals; change of variables in multiple integrals; scalar and vectors fields; gradient, divergence, and curl; Stokes theorem. Credit will be granted for only one of MATH 222 or MATH 267. Cross-listed as ENGR 222. Prerequisite: MATH 122. Three credits and two-hour problem session.

223 Linear Algebra for Engineers
Covers geometric vectors in three dimensions; dot product; cross product; lines and planes; complex numbers; systems of linear equations; matrix algebra; matrix inverse; determinants; Cramer’s rule; introduction to vector spaces; linear independence and bases; rank; linear transformations; orthogonality and applications; Gram-Schmidt algorithm; eigenvalues and eigenvectors. Credit will be granted for only one of MATH 223 or MATH 253. Cross-listed as ENGR 123. Prerequisites: MATH 122. Three credits and two-hour problem session.

253 Matrix Algebra
An introduction to solution of linear systems, algebra of matrices, determinants, two- and three-dimensional vector spaces, and the matrix eigenvalue problem. Credit will be granted for only one of MATH 253 or MATH 223. Prerequisite: MATH 112 or 122. Three credits.

254 Linear Algebra
An introduction to abstract vector spaces, including discussion of bases, dimension and homomorphisms of vector spaces; linear transformations, including invariant subspaces; matrix representations and diagonalization procedures. Prerequisite: MATH 253. Three credits.

267 Calculus III
Topics include the Taylor polynomial theorem; indeterminate forms and l'Hôpital's rule; improper integrals; infinite and power series and tests of convergence; parametric equations; partial differentiation; and selected concepts from multivariate differential calculus, and multiple integration. Credit will be granted for only one of MATH 267 or MATH 222. Prerequisite: MATH 112 or 122. Three credits.

277 Discrete Structures
An introduction to sets, binary relations and operations; induction and recursion; partially ordered sets; simple combinations; truth tables; Boolean algebras and elementary group theory, with applications to logic networks, trees and languages; binary coding theory and finite-state machines. Prerequisite: MATH 100 or 112 or 122. Three credits.

287 Natural Resource Modelling
The course covers formulating real-world problems from renewable natural resources; using software to solve mathematical models; formulating and testing policies for managing dynamic systems; and developing communication skills through report writing. Prerequisite: MATH 112. Three credits. Offered 2015-2016 and in alternate years.

347 Combinatorics
The course covers the principle of inclusion and exclusion; generating functions; recurrence relations; rings and modular arithmetic; finite state machines; group and coding theory; Pólya's method of enumeration, finite field and combinatorial design; graph theory. Prerequisite: MATH 277. Three credits. Not offered 2015-2016; next offered 2016-2017.

354 Modern Algebra I
This course introduces algebraic systems and the fundamental algebraic concepts. Applications to diverse areas such as coding theory, crystallography, circuits, logic, geometry, and graph theory will be considered. Prerequisites: MATH 254, 277. Three credits.

361 Advanced Vector Calculus
Topics include vectors; vector differentiation including gradient, divergence, and curl; vector integration including the Gauss and Stokes theorems. Prerequisites: MATH 222 or 267 and 223 or 253. Three credits.

366 Real Analysis I
This course considers rigorous development of the real number system; numerical sequences and series; properties of continuous functions; metric spaces; sequences and series of functions. Prerequisites: MATH 254, 267 and 277. Three credits.
unsupervised learning (clustering). The supervised learning methods include Recursive Partitioning Tree, Random Forest, Linear Discriminant and Quadratic Discriminant Analysis, Neural Network, Support Vector Machine. The unsupervised learning methods include Hierarchical Clustering, K-means, K-nearest-neighbour, model-based clustering methods. Furthermore, the course also covers the dimensional reduction techniques such as LASSO and Ridge Regression, and model checking criteria. Prerequisites: CSCI 161, STAT 333 or permission of instructor. Three credits. Not offered 2015-2016; next offered 2016-2017.

4.72 Topics in Statistics
This course will cover a selection of current statistical topics, such as sampling theory, time-series analysis, stochastic processes, design and analysis of experiments, bootstrap methods, and multivariate analysis. Prerequisite: STAT 231 or 333. Three credits. See http://sites.stfx.ca/mscs/stats_courses for more information.

4.91 Senior Seminar
Cross-listed as CSCI 491 and MATH 491. The purpose of this non-credit course is to assist students in carrying out senior paper research, composition, and oral presentation. Students will present their research topic in the fall term and their completed research in the spring. Attendance at Departmental seminars is mandatory. No credit.

4.93 Senior Thesis
Students will prepare a thesis based on original research conducted under the supervision of a faculty member. Required for honours students; permitted for advanced major students. Three credits.

9.27 MODERN LANGUAGES
M. Arpin, Ph.D. U. Fabijanic, Doc. ille cycle
V. Kokay, Ph.D. E. Langille, D és L. R. LeBlanc, Ph.D.
M. Paz, MA W. Tokarz, Ph.D. Part Time
L. Nordquist, MA M. Lade, M.Ed.

Placement of Students
Students registering for a French course for the first time at StFX should note that the Department of Modern Languages offers several courses to first-time registrants in French, depending on their background. Please note:

a) First-time registrants in French at StFX must complete the online placement test prior to registering. This test is to assist in registering in the appropriate section (FREN 110, FREN 115 or FREN 215). The link to the on-line placement test is http://moodle.stfx.ca, search French Placement Test.

b) First-time registrants who have not completed high school French or its equivalent should enrol in FREN 110.

c) Results on the placement test are a determining factor in the enrolment for first-time registrants.

d) Students with native proficiency may register in any 200-level course.

e) The department reserves the right to place students.

Recommendations
Candidates for the major, advanced major orhonours degrees in French are strongly encouraged to spend at least one summer (five weeks) in a French-speaking environment through an immersion program or one year in the junior year abroad program. Please see below for details.

Students hoping to pursue masters or doctoral studies in the humanities or social sciences are reminded that these programs often carry language requirements.

Minor or Subsidiary Program
A minor or subsidiary in French requires at least 6 credits at the 300- or 400-level. The minor or subsidiary in Spanish includes required courses: SPAN 306 and 334.

Major Program
Major in French
A student may take a major in French by completing 36 credits in FREN (excluding FREN 110), including FREN 215 and at least 18 credits at the 300- or 400-level. A thesis is not required.

Major in Spanish
The Department of Modern Languages offers a major in Spanish (language and literature) for students who have completed a minimum of one semester in a Hispanic country. Students completing the major requirement abroad will have to complete their course work at the 300- or 400-level, or equivalent, excluding courses already completed at StFX. Students who wish to apply for the major degree must
seek permission from the department chair and submit relevant course descriptions of work to be done abroad to the dean’s office for approval.

**Joint Major in French and Spanish**
A student may do a joint major in French and Spanish. The requirements for each subject are the same as for a major in French and a major in Spanish.

**Advanced Major Program**
A student may take an advanced major in French by completing 36 credits in FREN (excluding FREN 110), including FREN 215 and at least 24 other credits at the 300- or 400-level. Students registered in the advanced major program in French are required to do FREN 492, a three credit senior seminar comprising a thesis in French of approximately 4,000 words.

**Honours Program**
A student may take an honours degree in French by completing 60 credits in FREN (excluding FREN 110), including FREN 215 and at least 36 other credits at the 300 or 400 level. The department will reward the student with an honours degree. It may be used toward a minor, or subsidiary in French, as part of a pair (with FREN 115) or as an elective.

**Certificate of Proficiency in French**
This certificate is awarded to students who wish to have their proficiency in French officially acknowledged by a distinction appearing on their transcript. It is not necessary to do a major in French in order to take the test, although certain requirements must be met. Students who wish to sit for the exams should make their intentions known by 15 December. The exams will take place during the last week of classes.

Requirements:

a) At least 18 credits beyond the 100 level, including FREN 215, and at least 6 credits at the 300 or 400 level.

b) A minimum grade of 70 is required in each FREN course.

c) Written and oral examinations with a minimum of 70 on each part (exam may be repeated after one year). The structure of the exam includes:

   i) An exam covering grammar and usage (2 hours), specifically on the following points: verb conjugations (all tenses and moods), relative pronouns, object pronouns, prepositions, agreement of adjectives, plural of nouns and adjectives, complex sentence structures.

   ii) A composition on a subject prompt provided (1 hour)

   iii) An oral exam: 45 minutes to read a text provided, and 15 minutes to present its content and answer questions from three professors (1 hour).

**Transfer Credit for French Immersion Courses**
Students may request a maximum of six transfer credits for a successfully completed immersion course. The following guidelines apply:

a) Newly admitted students may request transfer credit in French only for courses taken after completing grade 12 French. Normally, transfer credit will not be granted for courses taken five years prior to admission.

b) Students must obtain a letter of permission from their dean prior to enrolling in an immersion course if credit is sought.

c) Students are strongly encouraged to take their immersion course in French. If students are not able to take their immersion course in French, it must be taken in a related field with department permission. Other immersion courses will be assessed on an individual basis.

**Summer Language Bursary Program**
Official Languages Programs
To promote the study of Canada’s official languages, the Council of Ministers of Education, Canada (CMEC), in co-operation with the provinces and territories, administers Accent (formerly OLMP, part-time), Odyssey (formerly OLMP, full-time), Explore (formerly SLBP), and CMEC also co-ordinates official-language activities related to agreements between the federal and provincial/territorial governments.

For information on the summer language bursary program contact the provincial co-ordinator, French language bursaries, Department of Education, Box 578, Trade Mart Building, Halifax, NS, B3J 2S9, 902-424-5283, or visit the following websites: EXPLORE: www.myexplore.ca

For information on immersion courses in France during the summer contact the French Consulate, 777 rue Main Suite 800, Moncton, NB, E1C 1E9, 506-857-4191. Program information is also available from the department chair.

**Junior Year Abroad Program**
The department encourages students in a four-year program to spend their junior year in a French-speaking environment. To this end, a study abroad program has been put into place allowing students to spend their third year at the Centre International d’Etudes Francaises in Angers, France. See section 3.18. For information about this program, see the chair or designate.

**Department Requirements**
A pair or a minor must be in one language. Students who complete a minor or a major in one language may also count a pair in a second language.

**FRENCH**

**110 French Language I**
Designed for students who have not completed at least high school French, this course is a review of the basic structures of the French language. It deals primarily with simple sentence structure and verbs in the present tense, but also covers past tenses, such as the imperfect and the passé composé, as well as the use of subject and object pronouns. Emphasis is also on vocabulary acquisition and reading skills. Six credits and a lab.

Notes
a) The department reserves the right to refuse admission to this course to students whose knowledge of French is inadequate according to the department placement test.

b) FREN 110 may not be used as credit toward a major, advanced major or honours degree. It may be used toward a minor, or subsidiary in French, as part of a pair (with FREN 115) or as an elective.

c) Closed to students who have completed FREN 115 or a higher level course, as well as to students from French schools and French Immersion programs.

**115 French Language II**
Designed as a follow-up to FREN 110, this course considers more advanced grammatical and syntactical structures. It includes a review of past tenses such as the imperfect, the passé composé and the plus-que-parfait. It presents object and relative pronouns and introduces sentences in the subjunctive mood. It also introduces students to short literary texts and to the techniques of writing composition. Open to students who have passed French 110 (with a grade of at least 60) and to first time registrants in French who have completed Grade 12 Core French or French Immersion. A good result on the placement test is a determining factor for admission in this course. Six credits and a lab.

a) FREN 115 may be used as a credit toward a major, advanced major, or honours degree.

b) Closed to students who have credit for FREN 200 level or higher.

**215 French Language III**
This course focuses on complex sentence structure and writing techniques. It covers the use of past tenses such as the passé simple and the passé antérieur, as well as use of the conditional and the subjunctive mood. Special emphasis is placed on the techniques used for the expression of thought and sentiment as well as on the acquisition of reading skills and literary usage. Required for the major, advanced major, and honours degrees. Open to students who have completed French 115 or with permission of the department chair. This course is also open to first time registrants in French who have completed French School, or have obtained an exceptional result on the placement test. Six credits.

**216 Survey of French Literature**
A study in historical context and sequence of the most important works written in French from the year 1000 to the present. Strongly recommended for all majors, advanced majors, and honours students in French. Prerequisite: FREN 115, completed or concurrent or permission of the department chair. Six credits.

**220 Language and Culture**
A study of different texts and issues relating to the francophone world, including selections from literary works, newspapers and periodicals. Emphasis is on vocabulary acquisition, text comprehension, and class participation. Prerequisite: FREN 115, completed or concurrent. Six credits. Not offered 2015-2016.

**225 (Français des affaires I) Business French I**
An introduction to the language in which the French-speaking world conducts business. Students will acquire solid communication skills, including knowledge of specialized vocabulary. Practical drill in the language lab will familiarize students with commercial correspondence and professional telephone etiquette. Prerequisite: FREN 115 or permission of the department chair. Three credits.

**314 Selected Topics in French Studies**

**318 Classical French Theatre**
This class offers an introduction to 17th-century French literature with a primary focus on representative works by three major dramatists: Corneille, Molière and Racine. It explores their vision of humanity and assesses their contribution to French literature and the history of ideas. Credit will be granted for only one of FREN 318 or FREN 316. Prerequisite: FREN 215 or 216 or 220 or permission of the department chair. Three credits. Not offered 2015-2016.
319 Literary Works of the grand siècle (Les Moralistes)
This course studies a selection of primarily prose and poetry works from the classical period that was 17th-century France. It includes a study of works by Pascal, Descartes, La Rochefoucauld, La Fontaine, Boileau, Mme de Lafayette, and La Bruyère. Credit will be granted for only one of FREN 319 or FREN 316. Prerequisite: FREN 215 or 216 or 220 or permission of the department chair. Three credits. Not offered 2015-2016.

321 French Cinema
A study of France’s unique contribution to the seventh art, starting with the Frères Lumière’s moving pictures in 1895 and covering the history of French cinema. Emphasis will be placed on such masterpieces as _La Grande illusion_ and _Les Enfants du Paradis_. Prerequisite: FREN 115 or permission of the department chair. Three credits. Not offered 2015-2016.

322 18th-Century French Theatre
An introduction to 18th-Century French theatre. This course focuses on the evolution of the field of theater during the Enlightenment. Presented in chronological sequence, the course gives special attention to works by Lesage, Voltaire, Marivaux, Diderot and Beaumarchais. Credit will be granted for only one of FREN 322 or FREN 326. Prerequisite: FREN 215 or 216 or 220, completed or concurrent or permission of the department chair. Three credits. Not offered 2015-2016.

324 18th-Century Literature: The Novel
An introduction to the 18th-century French novel, this course gives special attention to works by Lesage, Montesquieu, Prévost, Voltaire, Marivaux, Diderot, Rousseau and Bernardin de Saint-Pierre. Credit will be granted for only one of FREN 324 or FREN 326. Prerequisite: FREN 215 or 216 or 220 or permission of the department chair. Three credits. Not offered 2015-2016.

327 French Writing I
An introduction to the techniques of composition through the study and practice of appropriate sentence structure. This course is designed to improve students’ expression of complex thought and to familiarize them with the idiomatic use of French language in a variety of contexts. The course combines vocabulary enrichment, detailed analysis of texts and a variety of writing activities: descriptions, portraits, narrations, and correspondence. Emphasis is on describing and narrating. Prerequisite: FREN 215 or 216 or 220 or permission of the department chair. Three credits.

329 Children's Literature
A critical survey of French children’s literature. Authors to be studied include La Fontaine, Perrault, Ségur, Daudet, Cendrars, Aymé, Gripari, Sempé et Goscinny, PEF, Tournier. Prerequisites: FREN 215 or 216 or 220 or permission of the department chair. Three credits.

333 20th-Century French Literature I
A close study, from historical, ideological and aesthetic perspectives, of selected works of prose, poetry and drama of the first half of the 20th century. Authors studied may include Proust, Gide, Éluard (and other Surrealists), Sartre, Camus. Prerequisite: FREN 215 or 216 or 220 or permission of the department chair. Three credits. Not offered 2015-2016.

334 20th-Century French Literature II
A study of the theatre of the absurd and the ‘nouveau roman’. Authors may include Beckett, Ionesco, Robbe-Grillet, Sarrute, Duras and Simon. Prerequisite: FREN 215 or 216 or 220 or permission of the department chair. Three credits. Not offered 2015-2016.

341 Linguistics I: Phonetics
An introduction to linguistics, this course presents the major concepts used in linguistics and outlines the phonetic structure of the French language as revealed in word formations and in sentence structures. It includes pronunciation exercises. Credit will be granted for only one of FREN 341 or FREN 340. Prerequisite: FREN 115. Three credits.

342 Linguistics II: Morphology, Syntax & Semantics
A continuation of FREN 341, this course presents the study of morphology, syntax and semantics, the major divisions in linguistics. It will therefore deal with word forms, with word groups in a sentence structure and with the meaning of word phrases. Credit will be granted for only one of FREN 342 or FREN 340. Prerequisite: FREN 215 or 341. Three credits. Not offered 2015-2016.

347 French Literature from the Romantic Period
A study of major writers from the period known as French Romanticism (early 19th century), including Mme de Staël, B. Constant, Chateaubriand, Hugo, Lamartine, Vigny, and Musset among others. Major themes of the period will be presented in a literary context as well as in the social context of the French Revolution and the subsequent Napoleonic regime. Prerequisite: FREN 215 or 216 or 220 or permission of the department chair. Three credits.

348 French Literature from Realism to Symbolism
A study of major French writers of the 19th century, from the realist movement to symbolism, including Balzac, Sand, Stendhal, Flaubert, Zola, Baudelaire, Verlaine, Rimbaud, and Mallarmé among others. Major themes of the period will be presented in a literary context as well as in the social context of the period. Credit will be granted for only one of FREN 348 or FREN 336. Prerequisite: FREN 215 or 216 or 220 or permission of the department chair. Three credits. Not offered 2015-2016.

351 Stylistic Comparison of French and English
This course develops theoretical and practical knowledge specific to the field of translation. Students will be initiated to the techniques and instruments of translation in order to reflect upon the notions of comparative stylistics and accordingly understand the fundamental differences between the English and French languages. Prerequisite: FREN 215 or 216 or 220 or permission of the department chair. Three credits. Not offered 2015-2016.

361 Acadian Literature
A critical description of the historical, socio-cultural, linguistic, and literary significance of Acadian writing. Consideration will also be given to stylistic evolution, from oral literature to poetry, novels, and short stories. Credit will be granted for only one of FREN 361 or FREN 376. Prerequisite: FREN 215 or 216 or 220 or permission of the department chair. Three credits. Not offered 2015-2016.

362 Acadian Language and Culture
This course will examine the current linguistic situation in the Acadian communities of the Atlantic provinces. Students will study the cultural, social and historical circumstances which have influenced and contributed to the distinct cultural identity of the Acadian people. Credit will be granted for only one of FREN 362 or FREN 376. Prerequisite: FREN 215 or 216 or 220 or permission of the department chair. Three credits. Not offered 2015-2016.

363 Québécois Literature I: Révolution tranquille to the Present
An introduction to the study of Québécois literature since the Quiet Revolution. Through a sampling of works representing the major literary genres, this course focuses on the role of literature in Quebec's political and social affirmation as a society. Special attention is given to the works of Marie-Claire Blais, Pierre Vallières, Michel Tremblay, Gaston Miron and Gabrielle Roy. Prerequisite: FREN 215 or 216 or 220 or permission of the department chair. Three credits. Not offered 2015-2016.

364 Québécois Literature II: Origins to the Révolution tranquille
A study of the major literary forms and authors of French Canada from the beginning of the colony to the Révolution tranquille (ca. 1960). Emphasis is placed on a structural and thematic approach to narrative, set against a background of cultural and ideological influences. Prerequisites: FREN 215 or 216 or 220 or permission of the department chair. Three credits. Not offered 2015-2016.

410 Medieval French Literature
A study of literary genres from the chanson de geste, courtly romance, and the novels of chivalry to early French poetry covering the five hundred year period from 1000-1500. Credit will be granted for only one of FREN 410 or FREN 400. Prerequisite: FREN 215 or 216 or 220 or permission of the department chair. Three credits. Not offered 2015-2016.

415 Renaissance French Literature
A study of the Renaissance period in literature and language through the works of Marot, Rabelais, Du Bellay, Ronsard, Montaigne and the poets of the baroque. The century’s concern with the French language provides a convenient introduction to the study of the development of modern French. Credit will be granted for only one of FREN 415 or FREN 400. Prerequisite: FREN 215 or 216 or 220 or permission of the department chair. Three credits. Not offered 2015-2016.

456 Literary Criticism (Roman et Société)
The objective of this course is to introduce the field of French literary criticism and to illustrate several analytical methods based on current schools of literary theory. After establishing a socio-historical background, the class will focus in detail on five major schools of textual analysis, springing from the concepts of structuralism and post-structuralism: narratologie, sémiotique, psychocritique, thématique, and sociocritique. Prerequisite: FREN 215 or 216 or 220 or permission of the department chair. Three credits. Not offered 2015-2016.

457 French Poetry from the Symbolist Movement to the Present
A study of major French poets beginning with the Symbolist Movement at the end of the 19th century and concluding with current trends in poetry. Authors include:
Stéphane Mallarmé, Paul Valéry, Guillaume Apollinaire, Pierre Reverdy, Francis Ponge, Paul Claudel, Andre Breton, Henri Michaux, Francis Jammes, Blaise Cendrars, Jules Supervielle, Paul Eluard, René Char, Jacques Reda. Prerequisite: FREN 215 or 216 or 220 or permission of the department chair. Three credits. Not offered 2015-2016.

492 Senior Seminar and Thesis
An in-depth study of an area of French or French-Canadian literature chosen by the student as the basis for his or her thesis. Working under the supervision of a chosen professor, students will research and write a thesis in French of approximately 4,000 words for an advanced major and 6,000 words for an honours student. Professor and student will meet once a month to review progress. Required for all advanced major and honours students in their final year of study. Three credits.

GERMAN

101 German for Beginners I
This course is an introductory course intended for students with no previous knowledge of the language. This course provides student with a sound basis for learning German as it is used in spoken and written communication today within the context of German-speaking culture. This course will also familiarize students with contemporary life and culture in German-speaking countries. Credit will be granted for only one of GERM 101 or GERM 100. Three credits and language lab.

102 German for Beginners II
This course is a continuation of GERM 101 and stresses progress and systematic practice in the four language skills: listening, speaking, reading and writing. This course will provide a more advanced foundation in the basic elements of grammatical and syntactical structures in the target language. It promotes understanding of the culture of German speaking countries. Credit will be granted for only one of GERM 102 or GERM 100. Prerequisite: GERM 101 or permission of department chair. Three credits and language lab.

200 German Language I
A continuation of GERM 102, this course introduces advanced grammatical patterns and structures. Emphasis is placed on the acquisition of oral and written skills. Short readings will enrich the student's vocabulary and introduce German literature. Prerequisite: GERM 102 or equivalent or permission of the department chair. Six credits and language lab.

300 German Language III
This course will develop proficiency in speaking and listening. Emphasis will be placed on advanced writing skills and grammatical structures. This course will also enhance knowledge of the German speaking world through insights into the cultural and literary life in German speaking countries. Prerequisite: GERM 200 or equivalent. Six credits. Not offered 2015-2016.

315 Selected Topics

SPANISH

101 Spanish for Beginners I
This course is intended for students with no previous knowledge of the language. Students will develop basic communicative skills in the target language, study Spanish grammar as a means to effective communication, express themselves in spoken and written Spanish, integrate their knowledge of grammatical structures and functions with thematically relevant vocabulary, and be introduced to the diversity of the Spanish-speaking world. Credit will be granted for only one of SPAN 101 or SPAN 100. Three credits and lab.

102 Spanish for Beginners II
This language course, in which communicative objectives are centred on personal life, and range from talking about family to narrating past events, focuses on past tenses, the use of indirect and direct object pronouns, and grammatical constructions with the present tense. This course continues to develop students’ writing, speaking, and comprehension skills through a variety of written, oral, and audio-visual activities that integrate cultural elements. Credit will be granted for only one of SPAN 102 or SPAN 100. Prerequisite: SPAN 101 or permission of the department chair. Three credits and lab.

221 Intermediate Spanish I
This course is an intermediate course intended for students with previous knowledge of Spanish. It combines language and cultural elements that will allow students to improve their communicative competence in Spanish, review and practice the grammatical structures studied in 100-level Spanish courses, refine their language skills in reading, writing, listening, and speaking, and learn about the cultures of the Hispanic world. Credit will be granted for only one of SPAN 221 or SPAN 200. Prerequisite: SPAN 102 or 100. Three credits and language lab.

222 Intermediate Spanish II
A continuation of SPAN 221, students will learn advanced grammatical structures and further develop skills in reading, writing, listening, and speaking in Spanish, while continuing to learn about contemporary Hispanic cultures. Credit will be granted for only one of SPAN 222 or SPAN 200. Prerequisite: SPAN 221 or SPAN 299. Three credits and language lab.

299 Selected Topics
The topic for 2015-2016 is Communications and Culture. This is an intermediate level course in Spanish. The main objectives of the course are the development of oral competency in the target language and the exploration of Hispanic cultures. Prerequisite: SPAN 102 or permission of the department chair. Three credits.

306 Advanced Spanish
A follow-up to SPAN 222, this course is an extensive review of the conventions that govern grammar and language usage in Peninsular and Latin-American Spanish. Students will improve their overall communicative proficiency in spoken and written Spanish. Representative texts from the target culture with an aim in developing the critical reading and writing skills at the upper-intermediate level will be discussed. Required course for a minor in Spanish. Credit will be granted for only one of SPAN 306 or SPAN 305. Prerequisite: SPAN 222 or permission of the department chair. Three credits.

315 Hispanic Civilization to 1800
Students completing this course can expect to be able to read and discuss advanced texts in Spanish. Reading and course material for this course will be drawn from texts on Hispanic civilization in the Iberian Peninsula and in the New World to 1800, with emphasis on the age of exploration and discovery. Credit will be granted for only one of SPAN 315 or SPAN 300. Prerequisite: SPAN 222 or permission of the department chair. Three credits. Not offered 2015-2016.

325 Hispanic Civilization, 1800 to the Present
Students completing this course can expect to be able to read and discuss advanced texts in Spanish. Reading and course material for this course will be drawn from texts on the social and cultural development of Spanish speaking countries from 1800 onward. The decline of Spain as a major cultural power is counterbalanced by the emergence of Spanish American countries. Their quest for independence in the 19th century gives this course a natural narrative. Credit will be granted for only one of SPAN 325 or SPAN 320. Prerequisite: SPAN 222 or permission of the department chair. Three credits.

327 Spanish Language Cinema
This course, for advanced students, is an introduction to Spanish language films. It studies films and their language in a cultural, historical and geographic context. Essays, readings and film analysis are the main activities for this course. Students are advised that film screenings will be in addition to scheduled class time. Prerequisite: SPAN 222 or permission of the department chair. Three credits. Not offered 2015-2016.

334 Spanish Composition
An intermediate to advanced level composition course designed for students with a working knowledge of the language. Students will improve their overall proficiency in written Spanish, be exposed to representative texts from the target culture appropriate to developing their critical reading and writing skills, attain a deeper understanding of the significant socio-cultural aspects of the Spanish-speaking world, and learn the necessary writing skills to be able to participate in higher level academic courses in Spanish. Required course for a minor in Spanish. Prerequisite: SPAN 222 or permission of the department chair. Three credits. Not offered 2015-2016.

374 Spanish American Literature from the Conquest to Modernity
This course introduces students to Spanish American literary currents. It includes a survey of the chronicles of explorers and conquistadores, narrations of colonization and of cultural resistance, and studies the emergence of national literatures of the Baroque, the Romantic and the Realist traditions. Texts studied include writings of explorers such as Colón and Cortes and works by writers such as Díaz del Castillo and Inés de La Cruz. Prerequisite: SPAN 222 or permission of the department chair. Three credits. Not offered 2015-2016.

427 Spanish and Latin-American Literature and Cinema
This course will explore films based on novels. Students will acquire an understanding of the socio-cultural factors that engendered Spanish and Latin-American novels and cinema. These socio-cultural issues pertain to, but not limited to: race, ethnicity, gender, politics, globalization and human rights. At the same time, students will acquire a critical perspective of contemporary issues addressed and incorporated in Latin-American and Spanish novels and cinema. Prerequisite: SPAN 222 or permission of the department chair. Three credits.
463 Spanish Literature from Romanticism to Postmodernism
This course is a survey of the literature and cultural context of Spain during the 19th and 20th centuries. It includes the Realist novel, Unamuno, Lorca, Goytisolo and contemporary women’s literature. It involves the reading and analysis of texts with emphasis on the application of literary theory and criticism. Prerequisite: SPAN 222 or permission of the department chair. Three credits. Not offered 2015-2016.

464 Spanish American Literature from Modernism to Postmodernism
This course is a survey of Spanish-American literary and cultural currents from modernism to the present. It considers magical realism and new realism, indigenismo and women’s literature. Writers studied include Cortazar, Fuentes, Garcia Marquez and Vargas Llosa. Classes will focus not only on specific literary texts and their authors, but will also examine the various genres and the historical and political context(s) within which the texts are situated. Prerequisite: SPAN 222 or permission of the department chair. Three credits. Not offered 2015-2016.

Degrees and Diplomas in Music
The Department of Music offers a curriculum that focuses on jazz studies and contemporary music. Degrees and diplomas are windows to graduate study and commercial applications in the field of music. In addition to academically appropriate course work, award-winning faculty stress performance and composition as part of a well-rounded program.

General Admission Requirements
In addition to the general admission requirements listed in chapter 1, candidates for admission to the music program are required to pass an audition on a major instrument or voice; see section 1.3. Re-entry students must re-audition.

Music students are initially admitted to the Bachelor of Arts in Music (Jazz Studies) or to the Diploma in Jazz Studies. Students must then apply for admission to the Bachelor of Arts in Music (Jazz Studies) with Advanced Major or Honours, or the Bachelor of Music (Jazz Studies) with Honours by March 31 of the second year of study. Students who fail to meet the admission requirements to one of these three programs may be eligible for the BA with Major in Music.

A candidate who fails to meet the requirements for the Bachelor of Music with Honours may be eligible for the Bachelor of Arts in Music with Honours; one who fails to meet the requirements for the BA in Music with Advanced Major, and one who fails to meet the requirements for the advanced major may be eligible for the BA in Music.

Listed below are the degrees and the diploma in the Department of Music and the type of pass required in the level exams.

BM, BA Mus, Dip Jazz require a Level I pass for students to continue as music majors.

Note 1: A pass with honours is required in the level II exam for students to qualify for private lessons in years three and four.

Note 2: A pass with merit in the level II exam is sufficient for students to continue in the BA in music but with no private lessons in years three and four. In lieu of private lessons and recital, students replace 395, 495 and 497 with 9 credits of other MUSI courses.

Placement Auditions
It has become the practice of the department in certain instrument areas to provide instruction in the first year of study as a group format. The decision to place students in group/private lessons will be made in accordance with placement auditions held during registration/orientation week and private instructor availability.

All courses offered by the Department of Music are available to any student who satisfies the prerequisite and audition requirements. Applied performance courses are only available to non-music majors with the permission of the instructor and the department chair.

For requirements for programs with jazz concentrations, see chapter 4.

Diploma in Jazz Studies
The Diploma in Jazz Studies is a two-year program designed for students who wish to enter the field of commercial music but do not wish to pursue the BA in Music (Jazz Studies) degree. Instruction is offered in theoretical, aural, and improvisational skills.

Students in the diploma program who subsequently wish to pursue studies towards BA in Music (Jazz Studies) with Honours or Advanced Major or Bachelor of Music (Jazz Studies) with Honours degrees must achieve the appropriate grade in the Level II exam and have no grade of less than 60 for the advanced major, or 70 for the honours, in any MUSI course.

Major in Music
Students may complete a major in music in the BA program by completing a minimum of 36 credits from the following in consultation with the chair: required 101, 165; 30 credits to be selected from 103, 106 or 107, 117, 118, 195, 201, 203, 206 or 207, 217, 265, 275, 295, 306 or 307, 315, 316.

An audition is required for admission to this degree if applied music classes are chosen as an option. See section 4.1.3 for other degree requirements. Minimum grade requirements do not apply to the major in music.

Minor in Music
No audition is required for admission to the BA with music minor. Students may complete a minor in music in the BA or BBA program by completing 24 credits from the following courses or others in consultation with the chair: MUSI 101, 103, 106 or 107, 117, 118, 165, 206 or 207, 217, 275, 276, 315, 316, 416. No audition is required for admission to a minor; see section 1.3. Minimum grade requirements in music do not apply to the minor in music.

Pair in Music
If music is chosen as a pair, the courses must be 12 credits in music history, music theory, choral ensemble, or performance ensemble.

Common Year 1 and 2
For All Degrees and for the Diploma in Jazz
Year 1  MUSI 101, 103, 106 or 107, 117, 118, 165, 190; 6 credits arts/science electives; level I
Year 2  MUSI 203, 206 or 207, 217, 265, 275, 276, 290; 6 credits arts/science electives; level II exam

Bachelor of Arts in Music (Jazz Studies) with Honours or Advanced Major
Typical Course Pattern
Year 3  MUSI 306 or 307, 315, 316, 395; 18 credits electives
Year 4  MUSI 406 or 407, 416, 495, 497; 18 credits electives

Bachelor of Music (Jazz Studies) with Honours
Typical Course Pattern
Year 3  MUSI 306 or 307, 315, 316, 325, 390; 12 credits electives
Year 4  MUSI 406 or 407, 416, 420, 465, 490, 497; 6 credits electives

The minimum grade requirement of 60 applies only to students enrolled in the degrees BA Mus (.Jazz), B.Mus (.Jazz), and BA with Advanced Major in Music.

101 Structure of Music
This course covers the fundamentals and basic concepts of music theory and notation. Three credits.

103 Jazz Theory I
The material studied in jazz theory is designed to be applied to the performance and writing of jazz. Topics include chord-scale relationships; chord construction; three-, four-, and five-part harmony; substitution and function; construction and analysis of harmonic progression. Prerequisite: MUSI 101 with a minimum grade of 60. Three credits.

106 Vocal Ensemble I
Participation in the StFX University Choral and Vocal Jazz Program provides students with an opportunity to develop vocal fundamentals and musicianship through the rehearsal and performance of high quality choral music from all periods and cultures. Vocal Jazz Ensembles provide a more advanced ground for ear-training and performance through the study of complex harmony in many jazz and popular
styles. All ensembles are open to all university students by audition during the first week of fall classes. Two sections will be offered, section 11 is for voice majors and students participating in more than one ensemble and section 12 is for non-majors participating in one ensemble. Three credits over the full academic year.

107 Instrumental Ensembles I: Includes Jazz Ensemble, Combos, and Percussion Ensembles
These courses integrate materials from Jazz Theory, Jazz Styles, Jazz History, and Applied Music courses with ensemble playing within a classroom or laboratory format. Ensembles meet weekly; supervision and coaching come from professors and advanced students. Repertoire will reflect aspects of the jazz canon. Students will be expected to rehearse outside of the classroom/laboratory setting. Assessment includes performance outside of the classroom. A concert is presented at the end of the term. Entry and placement are by audition. Concert attendance in the visiting artist series is required. Prerequisite: Successful audition. Three credits over the full academic year.

112 The Art of Listening
A survey course designed to acquaint students with the core elements of music, and musical periods, genres, and styles while developing critical listening skills. Three credits.

117 History of Popular Music

118 World Music
A survey course covering folkloric and ethnic musical traditions from around the world: Africa, Asia, North and South America, the Caribbean, Europe. Three credits.

165 Jazz Styles and Literature
An introductory course in improvisational style specifically pertaining to the Jazz Idiom from 1900 to present. Extensive viewing and listening will be required. Six credits.

190 Applied Performance I
This course provides students with instruction on a major applied instrument or voice. Functional piano skills are also covered. Restricted to music major students or may be taken with permission of the instructor. Six credits.

191 Secondary Instrument I
This course provides students with instruction on an instrument other than their major instrument. Prerequisite: permission of the chair or studio teacher. Three credits over the full academic year.

195 Applied Performance I A
This course provides students with instruction on a major applied instrument or voice. Functional piano skills are also covered. Restricted to students in the BA with Major in Music. Three credits.

198 Selected Topics
The topic for 2015-2016 is Roots of Popular Music. A survey of popular music from 1900-1955, including the history of recording and how it affected both musical performance and listening. Styles covered include early jazz, blues, swing, and R&B music. Three credits.

203 Jazz Theory and Arranging
A continuation of Jazz Theory I, this course introduces many devices used in small group arranging: writing intros, endings, background figures, voicing, and rhythm section parts. Prerequisite: MUSI 103 with a minimum grade of 60. Three credits.

206 Vocal Ensemble II
A continuation of MUSI 106. Prerequisite: Successful audition. Three credits over the full academic year.

207 Instrumental Ensembles II
These courses integrate materials from Jazz Theory, Jazz Styles, Jazz History, and Applied Music courses with ensemble playing within a classroom or laboratory format. Ensembles meet weekly; supervision and coaching come from professors and advanced students. Repertoire will reflect aspects of the jazz canon. Students will be expected to rehearse outside of the classroom/laboratory setting. Assessment includes performance outside of the classroom. A concert is presented at the end of the term. Entry and placement are by audition. Concert attendance in the visiting artist series is required. Prerequisite: Successful audition. Three credits over the full academic year.

214 History and Instrumental Techniques for Guitar
An overview of the guitar and its influence as a musical instrument in western music. Key figures, innovators, builders and performers will be studied in depth.

Students will learn the basics of the instrument from its history to actual techniques on how to play. Three credits.

217 The Beatles
The Beatles’ influence on popular music and pop culture is indelible and continuing. This course examines their lives, their music and lyrics, and their context, musically and socially, in the 1960s and beyond. Prerequisite: MUSI 117. Three credits. Not offered every year.

265 Jazz Styles and Literature: The Bebop Era
A course in the analysis of players, particularly Thelonious Monk, Miles Davis, Charlie Parker, and Dizzy Gillespie, and their innovations which brought the music to its present maturity. Three credits.

275 Songwriters and Their Songs
The course is an in-depth study of songwriters and popular songs primarily from the second half of the 20th century to present day. Songs and songwriters of different styles and periods will be explored, as well as songwriters’ approaches to lyric writing. Lyric devices, song forms, and storytelling will be explored and analyzed. Three credits.

276 Songwriting Workshop and Production
This course puts into practice the lyrical and musical devices from many great popular songwriters of different styles. Students will create a portfolio of songs and will make demo recordings of their material using music department technology. Students not enrolled in a music degree must demonstrate proficiency on an instrument or voice and submit a portfolio of their creative work in order to be admitted to the course. Prerequisite: MUSI 275. Three credits.

290 Applied Performance II
This course provides students with instruction on a major applied instrument or voice. Functional piano skills are covered. Restricted to music major students or may be taken with permission of the instructor. Six credits.

291 Secondary Instrument II
This course provides students with instruction on an instrument other than their major instrument. Prerequisite: permission of the chair or studio teacher. Three credits over the full academic year.

295 Applied Performance II A
This course provides students with instruction on a major applied instrument or voice. Functional piano skills are also covered. Restricted to students in the BA with Major in Music. Three credits.

306 Vocal Ensemble III
A continuation of MUSI 206. Prerequisite: Successful audition. Three credits over the full academic year.

307 Instrumental Ensembles III
These courses integrate materials from Jazz Theory, Jazz Styles, Jazz History, and Applied Music courses with ensemble playing within a classroom or laboratory format. Ensembles meet weekly; supervision and coaching come from professors and advanced students. Repertoire will reflect aspects of the jazz canon. Students will be expected to rehearse outside of the classroom/laboratory setting. Assessment includes performance outside of the classroom. A concert is presented at the end of the term. Entry and placement are by audition. Concert attendance in the visiting artist series is required. Prerequisite: Successful audition. Three credits over the full academic year.

315 History of Music I
An overview of musical styles and forms from the Middle Ages to the 19th century. This course addresses the broad spectrum of musical contributions that allowed for the development of Western music. Three credits.

316 History of Music II
A survey of the techniques employed in 19th- and early 20th-century music. This includes analysis of the form and harmonic content of selected works. Special consideration will be given to works and events that lead to the transformation of musical language into 20th-century models. Prerequisite: MUSI 315 with a minimum grade of 60. Three credits.

325 Jazz Composition
Designed to provide a foundation in the techniques of jazz composition with an in-depth study of modal harmony and its applications. Prerequisite: MUSI 203. Restricted to bachelor of music honours students or may be taken with permission of the instructor. Three credits.

385 Selected Topics I
The topic for 2015-2016 is Women and Popular Music. A survey and examination of women and their work through eras of popular music; pop singers and entertainers...
will be examined from different periods including early 20th century (pre/post jazz age), post-swing, rock, singer-songwriter and R&B. Through investigating artists and styles, the course explores themes of gender, sexuality, artistry, celebrity and image. Three credits.

386 Selected Topics II
Three credits.

390 Applied Performance III
This course provides students with instruction on a major applied instrument or voice. Students in the B.Mus. degree program will write a thesis as a component of this course. Restricted to bachelor of music honours students. Six credits.

391 Secondary Instrument III
This course provides students with instruction on an instrument other than their major instrument. Prerequisite: permission of the chair or studio teacher. Three credits over the full academic year.

395 Applied Performance III A
This course provides students with instruction on a major applied instrument or voice. Functional piano skills are also covered. Restricted to bachelor of arts in music students. Three credits over the full academic year.

406 Vocal Ensemble IV
A continuation of MUSI 306. Prerequisite: Successful audition. Three credits over the full academic year.

407 Instrumental Ensembles IV
These courses integrate materials from Jazz Theory, Jazz Styles, Jazz History, and Applied Music courses with ensemble playing within a classroom or laboratory format. Ensembles meet weekly; supervision and coaching come from professors and advanced students. Repertoire will reflect aspects of the jazz canon. Students will be expected to rehearse outside of the classroom/laboratory setting. Assessment includes performance outside of the classroom. A concert is presented at the end of the term. Entry and placement are by audition. Concert attendance in the visiting artist series is required. Prerequisite: Successful audition. Three credits over the full academic year.

416 History of Music III
A study of modern composition techniques, including analysis of selected contemporary music. Prerequisite: MUSI 316 with a minimum grade of 60. Three credits.

420 Advanced Arranging/Orchestration
Combines analysis of contemporary composers with orchestration for ensembles. Restricted to bachelor of music honours students or may be taken with permission of the instructor. Six credits.

465 Jazz Styles and Literature
An examination of the E.C.M. explosion of the 1960s, 70s, and 80s, and modern European influences. Three credits.

490 Applied Performance IV
Provides students with instruction on a major applied instrument or voice. A final recital is required. Restricted to bachelor of music honours students. Six credits.

491 Secondary Instrument IV
This course provides students with instruction on an instrument other than their major instrument. Prerequisite: permission of the chair or studio teacher. Three credits over the full academic year.

495 Applied Performance IV A
This course provides students with instruction on a major applied instrument or voice. A final recital is required. Restricted to bachelor of arts in music students. Three credits over the full academic year.

497 Honours Recital - Thesis
Students work under the supervision of their private studio instructor to produce a one-hour concert performance on their major instrument/voice. The thesis option is available to all honours students, in which case their supervisor would be chosen in accordance with the given topic. Prerequisite: fourth year honours BA Music or Bachelor of Music. Three credits.

499 Directed Study
In consultation with the department, students may undertake a directed study in an approved area of interest. See section 3.5. Six credits.

The School of Nursing offers to qualified high school graduates, transfer students, post-degree students, and registered nurses, a program of study leading to the Bachelor of Science in Nursing. The traditional program is four academic years in length with two intersessions for a total of 126 credits; 24-month post degree for students who have already completed a degree (not offered every year); accelerated option (not offered every year), and the part time post RN option. The program also offers a Co-op non-credit opportunity for third year students. Currently licensed LPN students (diploma received post 2008) may receive credit for NURS 126/127 and three credits elective. Applicants will be assessed on an individual basis.

Nursing is a unique health profession: both an art and a science. It is the professional practice of caring. Nursing is an essential service which provides health care to individuals, families, groups and communities.

The nursing curriculum is a blend of biological and social sciences, humanities, and professional nursing courses. The emphasis in the program is on understanding the personal, family, group, and community dimensions of health and illness. The curriculum combines academic and professional theory with nursing practice, fostering scholarly inquiry, creativity, critical thinking, moral reasoning, self-directedness and a commitment to lifelong learning. Personal growth is encouraged through reflection and introspection, positive interpersonal relationships, critical inquiry and a sensitive response to human values in a climate of academic and professional excellence.

Professional Conduct
In all nursing practice situations students are expected to be safe, ethical practitioners. They must perform in accordance with the legal, ethical, moral and professional standards set out in the profession’s Code of Ethics for Registered Nurses (2008), the Entry-Level Competencies for Registered Nurses (CRNNS, 2013), the Standards of Practice for Registered Nurses (CRNNS, 2012), becoming a Registered Nurse in Nova Scotia: Requisite Skills & Abilities (2009) and the StFX nursing program objectives. Student nurses are expected to act in a manner comparable to the average prudent student nurse. Behaviour that endangers public health or safety may warrant nursing practice alert or failure, which may result in dismissal from the program. Prospective students are advised that the College of Registered Nurses of Nova Scotia (CRNNS), the licensure body for nurses, requires disclosure of criminal records prior to consideration for registration. Those considered a risk to others may not be considered for registration by the CRNNS. The StFX School of Nursing requires disclosure of criminal records and reserves the right to deny entry to the program based on criminal record. Failure to provide requested documentation may prevent entry to, or dismissal from, the program. The results of students’ criminal records checks and child abuse registry screens are assessed on an individual basis. In the event of a problematic result, a student may not be permitted to enter or continue in the nursing program. New graduates must be registered in the same province as their educational program prior to registering elsewhere.

Costs
In addition to the university fees listed in section 2.1, expenses include room and board for off-campus placements during intersession and other consolidated experiences: fees for field trips, practice experiences, uniforms, nursing books, stethoscopes, first aid and HCP (CPR) certification and re-certification; the RN examination fees; other external exam fees; and travel costs to and from practice areas while in the program.

School Requirements
a) All first-year nursing courses must be successfully completed prior to registration in second year nursing courses. Subsequently, all second year courses must be successfully completed prior to registration in third-year nursing courses.

b) NURS 310, 305, 315, 345, 355, 350 or 336 and 493 must be successfully completed prior to progression to fourth year nursing courses.

c) Students must be prepared to participate in nursing practice rotations in sites other than their location of residence.
d) Students will be expected to participate in nursing practice rotations scheduled at various times including evenings, nights, and weekends.
e) Students who fail a nursing course with a lab or clinical component are not permitted to progress in the program and are not permitted to take any other nursing course with a lab or clinical component. Students wishing to resume taking nursing courses must contact the Chair, School of Nursing prior by May 30.
f) Students are required to make up missed nursing practice time. Extended absences for nursing practice are evaluated by the Chair, School of Nursing.
g) When a student failure is due to a nursing practice failure (clinical failure) in one course only, the student will be removed from the B.Sc. Nursing program following the failure. Re-admission for the next academic year will be at the discretion of the School of Nursing Committee on Clinical Reintegration. Students re-admitted following a nursing practice failure will return with a nursing practice alert status. Re-admitted students who receive a subsequent nursing practice alert or nursing practice failure will be removed from the B.Sc. Nursing program and are ineligible for re-admission.
h) Students who fail two core nursing courses (the same course twice, or two different courses including when the course failure is due to a nursing practice failure), are removed from the program and are ineligible for re-admission to the program. Core nursing courses are: NURS 105, 115, 126, 127, 205, 235, 245, 248, 275, 251, 252, 305, 310, 315, 345, 355, 405, 416, 455, 493 and 491.
i) Current certification in standard first aid and HCP (CPR) is required for entrance into the program; see 1.3.g. Students in the nursing program are responsible for re-certification as necessary.
j) Students must be screened through the child abuse registry of Nova Scotia during the fall semester of first year. Documentation is required; see 1.3.g. Students are required to disclose to the Chair, School of Nursing, any criminal record, including child abuse that has occurred subsequent to admission.
k) No nursing student will be permitted to transfer to the accelerated option if they have received a course failure or a nursing practice alert.

Bachelor of Science in Nursing

The B.Sc. in Nursing program options vary in the time frames for completion. The four levels, from 1 to 4, correspond to the courses and course numbers at the 100 to 400 levels. Aboriginal students are encouraged to self-identify on the admissions application.

The normal sequence of courses for the four-year option is listed below. See chapter 7 for program requirements.

**Year 1**
- BIOL 105, 115
- CHEM 150
- NURS 105, 115, 126, 127
- Intersession (May)
- PSYC 100
- PHIL 100 or RELS 120

**Year 2**
- BIOL 251, 252
- HNU 253, 263
- NURS 205, 235, 245, 248, 251, 275
- NURS 252
- (May-June)

**Year 3**
- NURS 305, 310, 315, 345, 355, 330 or 336
- 3 credits arts/science electives

**Year 4**
- NURS 405, 416, 455, 491
- 6 credits open electives
- 6 credits arts/science electives
- (all on campus electives must be completed first semester due to scheduling of consolidated nursing practice)

B.Sc. in Nursing for Post-Degree Students

Students who hold an undergraduate degree earned in the last 10 years and have a minimum 70% grade average in their final year of study, and who have successfully completed the courses outlined in section 1.7 may be eligible to enter the 24-month post degree option. Students missing one or more of these prerequisite courses are required to complete them prior to entering the nursing program.

The nursing courses offered in the post-degree program are equivalent to the courses in the regular stream but some are scheduled to run in an accelerated fashion and during the summer following completion of NURS 252 and completion of third year courses. Nursing courses include: 105, 115, 126, 127, 205, 235, 245, 248, 251, 252, 275, 305, 310, 315, 330 or 336, 345, 355, 405, 416, 455, 491, 493.

Students in the regular nursing program, who were admitted following the completion of all or most of another degree, and who have grades of 75% or higher, no history of nursing practice alert or failure, and have completed all electives, may apply to be considered to accelerate in their senior year and graduate in the December convocation. Admission to this option is competitive and subject to the availability of seats. Application to this option follows completion of all second-year level nursing courses and the decision reserved until successful completion of the third-year nursing program.

Certificate in Gerontological Nursing

A 12-credit certificate program in nursing gerontology is offered by distance education to graduates of nursing diploma programs. Applicants must have a minimum two years RN experience. The required courses are NURS 115, 245, 425, 488.

For information on this limited-enrolment program, write Distance Nursing, Continuing Education, StFX University, Antigonish, NS, B2G 2W5 or phone 902-867-5190 or 1-800-565-4371.

Certificate in Continuing Care

A 12-credit course certificate program in continuing care is offered by distance education to graduates of nursing diploma programs. The required courses are NURS 115, 135, 205, 425.

For information on this limited-enrolment program, write Distance Nursing, Continuing Education, StFX University, Antigonish, NS, B2G 2W5 or phone 902-867-5190 or 1-800-565-4371.

105 Introduction to Professional Nursing

Focuses on nursing as a profession and its historical evolution to the present. Theoretical and philosophical bases of nursing are explored. The role of the professional nurse is examined. Factors that influence contemporary nursing, such as legal and ethical issues, health care reform, and changing health care priorities, are discussed. This course introduces the philosophy and framework for nursing at StFX. Prerequisite: Documentation for program entry. Three credits.

115 Health Promotion and Learning

In this course, students explore the concepts of health and wellness along with aspects of the socio-cultural and economic environment that influence lifestyle and in turn determine health. An emphasis is placed on the nurse’s role in health promotion using principles of teaching and learning and Orem’s educative-supportive system of nursing. A major health education project provides students with an opportunity to implement the nursing process, apply theory to practice, and develop interviewing and assessment skills. Prerequisites: NURS 105, 126. Three credits.

126 Introduction to Clinical Nursing Practice

This course provides a foundation for nursing practice with an introduction to the theory and practice of nursing skills and techniques. The nursing process and Orem’s theory of self-care are used as organizing frameworks for the course. The focus of this course is on selected skills appropriate to meet the needs of individuals with self-care deficits. Classroom instruction and supervised lab practice are integral components of this skills-based course. Crisis Prevention Intervention (CPI) is a mandatory certification for students in their first year. This six-hour certification is delivered as part of this course. Three credits.

127 Introduction to Therapeutic Interpersonal Skills and Clinical Practice

This course is a non-credit course that offers an opportunity for students to learn therapeutic communication skills for professional nursing interaction with others. Students will have the opportunity to apply communication techniques along with other foundational nursing skills learned in NURS 126, during a two-week supervised practice. Weekly therapeutic communication labs and clinical practice in a long-term care setting are integral components of this practice-based course. Prerequisites: NURS 105, 126; documentation for program entry, see section 1.3(g).

205 Community Health Nursing

This course explores community health nursing practice in the context of a health care system that is undergoing change. The major themes of this course are
community assessment; population-focused nursing practice; and population health, including epidemiology and the determinants of health. Clinical component. Pass of 60% in the theory component. Prerequisites: NURS 105, 115, 126, 127. Three credits.

235 Introduction to Pharmacology
This course provides an overview of the basic principles of pharmacology from a nursing perspective. It focuses on the application of the nursing process as it relates to drug therapy, with particular emphasis on safe drug administration and client education. It also considers a variety of legal, professional, and contemporary issues related to drug therapy. The course provides the opportunity for practice in dosage calculations as well as laboratory practice in the administration of medications, specifically oral, topical, inhalation, ear, nose and eye. Students must successfully complete a medication dosing calculation test. Students must achieve a minimum of 80% on the medication calculation portion of the final exam (which is offered separately, with one chance to retake if 80% was not achieved initially). Prerequisites: NURS 105, 115, 126, 127. Three credits.

245 Healthy Aging
This course addresses issues of health and wellness important to an increasingly aging population. Many psychological, social and physical factors affect one's health potential. Students will examine the impact these factors have in making the older adult who he or she is today. Through interaction with a senior in the community, the student will learn how the older adult defines and promotes his or her own health. Clinical component. Pass of 60% of course theory component. Prerequisites: NURS 105, 115, 126, 127. Three credits.

248 Basic Concepts in Pathophysiology
This course will help students understand the basic concepts of pathophysiology. The science addresses alterations in function as well as the mechanisms underlying disease. Students will understand the link between the sciences (such as biology, microbiology, chemistry) and clinical nursing practice, in particular the disease process from the cellular level. Learning these concepts will enhance the understanding of the mechanisms which manifest in signs and symptoms of disease, thereby helping one make the best decisions in providing care for your clients. Credit will be granted for only one of NURS 248 and NURS 473. Prerequisites: NURS 105, 115, 126, 127. Three credits.

251 Nursing of Adults I: Theory Component
This course focuses on the integration of theory and nursing practice. Structured around the nursing process framework and Orem's theory, the course enables second year nursing students to explore, understand, and practice comprehensive nursing care of adults in the acute care institutional setting. Students delve into concepts and nursing care related to a variety of acute disease processes with an emphasis on pre/intra/post-operative nursing. Prerequisites: NURS 205, 235 245, 248, 275. Three credits.

252 Nursing of Adults I: Practice Component
An intersession course (May-June) with practice experience in selected clinical settings. Prerequisites: NURS 105, 115, 126, 127. Three credits.

275 Comprehensive Health Assessment
This course provides an introduction to the research process and to quantitative and qualitative research methods used in appraising nursing and health-related literature. Topics include: the language and culture of research; the context within which research research is conducted; research design, implementation, analysis, and interpretation; and evidence based practice. Credit will be granted for only one of NURS 310 or NURS 300. Six credits.

315 Nursing of Children
This course is based on the philosophy and principles of family-centred care, promotion of self-care for child-bearing families, and family empowerment. Students will explore the ways in which families cope with illness in childhood and adolescence, and what nursing interventions children and families find helpful. Clinical component. Three credits.

330 Legal and Ethical Issues in Nursing Care
Cross-listed as RELS 300; see RELS 300. Six credits.

336 Ethics in Health and Medicine
Cross-listed as PHIL 336; see PHIL 336. Prerequisite: junior standing or PHIL 100. Six credits.

345 Mental Health Nursing
In this course, students engage in a comprehensive study of the mental health aspects of nursing. Included among them: anxiety, depression, dementia, and psychosis; eating disorders, trauma, and substance and gambling dependency. Students explore the principles of social justice and ethical and legal aspects of mental health care from socio-cultural, political, economic, historical, and bio-physical perspectives. Clinical component. Three credits.

355 Perinatal Nursing
This course is based on the philosophy and principles of family-centred health care, promotion of self-care for child-bearing families, and family empowerment. Students will explore the philosophical, cultural, physiological, psychological, and spiritual dimensions of childbirth, post-partum adaptation, lactation, and infant care. Clinical component. Three credits.

364 Social Justice and Health
Examines the relationship between injustice and health outcomes nationally and globally. Core social justice issues are analyzed, including the cycle of oppression, distinctions between equality and equity, and achievement of human rights as an ethical imperative. Modern and historical contexts are explored in key justice related areas: corporatization of health care; policy-created poverty; worldwide water crisis; links between planetary health and human health; and global conflict as a key driver of injustice. Learning includes analysis of selected award winning films. Cross listed with WMGS 364. Three credits.

365 Gender and Health
This course examines theoretical concepts relevant to gender and health. The broad determinants of health, sexuality, reproductive health and fertility, common diseases, substance abuse, violence and culture are examined from a gender perspective. Strategies for promoting holistic health and preventing disease will be examined. Cross-listed as WMGS 365. Three credits.

399 Co-operative Learning Experience
This elective, independent nursing practice course is designed for third-year students. In an institution where registered nurses practice, students will apply their psycho-motor nursing skills, acquire confidence and independence, and gain valuable experience working as a member of a health care team. No credit.

Note: Fourth-year courses focus on trends and developments in the health field, the role of the professional nurse, and the application of research to the practice of nursing.

405 Nursing of Adults III
A theory and practice course designed to provide the senior nursing student with opportunities to render comprehensive care for adults who are experiencing, or who are at risk for, selected complex health problems. Students participate in the selection of nursing practice experiences that enable them to apply knowledge and critical thinking in the application of the nursing process in acute care, community, and home settings. Clinical component. Three credits.

416 Nursing of Adults IV
A theory and practice course, which provide students with opportunities to render comprehensive care to individuals experiencing common health problems. Students will examine current research; develop leadership and management skills; plan, implement, and evaluate an independent experience of their choice in any setting or country that meets requirements; and participate in a consolidated nursing practice experience. Prerequisite: NURS 405. Clinical component. Six credits in second semester.

433 Introduction to Policy for Health-Interdisciplinary Strategies
Designed to create an interdisciplinary learning experience for nursing, human nutrition and human kinetics students, this seminar course is an introduction to public policy change for health. The objective is to develop a basic understanding of healthy public policy development, analysis, and change from interdisciplinary and social justice perspectives. Issues such as healthy public policy, social determinants of health, social justice, health equity, and interdisciplinary/cross-sectoral and citizen lead policy action are explored. This course would be beneficial for students pursuing professions in the health care field. Credit will be granted for only one of
A full-year seminar devoted to the theoretical, methodological, and presentation issues involved in preparing an honours thesis. Three credits.

495 Selected Topics
Three credits.

496 Senior Honours Seminar
A full-year seminar devoted to the theoretical, methodological, and presentation issues involved in preparing an honours thesis. No credit.

497 Nursing Informatics
Teaches the knowledge and skills necessary to ensure that computers have a positive impact on the nursing environment and delivery of patient care. Students learn computer concepts and terms, and examine ways computers can enhance nursing practice, education, administration, and research. Trends and issues related to the use of computers in nursing are explored. Three credits. Not offered every year.

498 Honours Thesis
The honours thesis provides an opportunity for students to document the steps performed in carrying out an empirical research investigation. To satisfy department requirements for the B.Sc.Nursing with Honours, an acceptable thesis based on the research project must be submitted before the conclusion of classes for the academic year. Three credits.

499 Advanced Major Study & Practice
This course provides an overview of theories, current practices, and relevant issues in the field of palliative care, with a focus on the nurse’s role. In line with the philosophy of nursing at StFX, students will explore concepts of self-care and health promotion as they relate to quality of life issues. Restricted to third- and fourth-year nursing and post-RN students. Three credits.

DISTANCE NURSING PROGRAM OPTION

Patsy MacDonald, M.Ad.Ed., RN  Program Director

Bachelor of Science in Nursing for Registered Nurses
See chapter 7 for program requirements. All courses are offered through the distance-delivery format. Most distance nursing and science courses are restricted to post-RN students. Distance science courses may be taken by students outside the post-RN program with permission of the Dean of Science. Science labs and tutorials are incorporated into the course content.

Note: Students must complete NURS 115 and NURS 135 before enrolling in any other distance nursing course.

115 Health Teaching and Learning
In contrast to health protection and illness prevention, health promotion is a broad and holistic concept. This course explores the concept of health promotion; the nurse’s role in health promotion; the teaching-learning process; population health; social action and justice; the socio-cultural, economic, and political factors that influence health and behaviour. Three credits.

135 Contemporary Issues in Nursing
The foundation for all subsequent nursing courses, this class explores the evolution of nursing as a profession, including its theoretical and philosophical bases. Topics include Orem’s self-care theory; legal and ethical issues; health care reform; the image of professional nursing; changing health care priorities. Three credits.

201 Community Mental Health Nursing I
This required theoretical course provides a comprehensive introduction to community mental health nursing. The course focuses on changes in community health nursing and the shift away from the acute care setting to the community. Emphasis is placed on prevention and health promotion in improving mental health outcomes. This course explores the foundations of mental health nursing practice and prepares the student for further study in mental health. Three credits. Practice component. Three credits.

202 Community Mental Health Nursing II
Examines the theory of and concepts in mental illness, treatment regimens, and nursing interventions. Students will apply mental health nursing principles to specific clinical disorders, building on the foundations of practice explored in NURS 201. Prerequisite: NURS 201. Three credits.

205 Community Health Nursing
Explores community health nursing practice from a Canadian perspective and the role of the community health nurse in the context of a changing health care system. Topics include population health; community assessment; epidemiology; and communicable disease control. Three credits. Offered in on-line delivery format.

245 Aging and the Older Adult
This course covers the process of growing older with reference to theories on universal aging. Students will learn to improve the function, quality of life, and self-care abilities of the elderly well, to assist them in maintaining independence. Topics include aging-related changes; the role of the family and other aggregates; how elderly adults define and promote their health; the use of community resources. Three credits.

300 Research Methods
Introduces students to research methods used in nursing science. Topics include conducting and appraising research; concepts of research design, implementation, analysis, and interpretation; descriptive and inferential statistics; quantitative and qualitative research design; research ethics and bias. Six credits.
330 Legal and Ethical Issues in Nursing
Examines the moral and ethical implications of various practices in the field of health care as they affect human life and the basic dignity of the person. Also treats the moral, ethical, legal and theological issues raised by recent developments in the life sciences. Six credits.

405 Nursing of Adults I
A theory- and practice-based course exploring chronic health issues related to violence, immune system dysfunction, cancer, and other selected conditions. In a primary, secondary or tertiary setting, students will deliver comprehensive medical or surgical nursing care to adults at risk for or experiencing a complex health problem. Three credits. Offered in on-line delivery format.

415 Nursing of Adults II
A theoretical and practice-based course exploring chronic health issues related to diseases of the nervous, endocrine, and sensory systems, among others. In a primary, secondary or tertiary setting, students will deliver comprehensive medical or surgical nursing care to adults at risk for or experiencing a complex health problem. Leadership practice component. Three credits.

425 Comprehensive Health Assessment
This theory and practice course focuses on a systematic assessment of the well adult. Students will incorporate health history and physical examination of body systems in identifying self-care requisites for a diverse population. Three credits.

473 Basic Concepts of Pathophysiology
This course provides the student with an understanding of the basic concepts of pathophysiology, and builds upon a foundational knowledge of anatomy and physiology to meet the challenges presented in the study of disease process mechanisms. Credit will be granted for only one of NURS 473 and NURS 248. Prerequisites: BIOL 105, 115, 251, 252; CHEM 150 recommended. Three credits. Offered in on-line delivery format.

483 Hospice Palliative Care Nursing
Provides an overview of theories, current practices, and relevant issues in the field of palliative care, with a focus on the nurse’s role. In line with the philosophy of nursing at SFX, students will explore concepts of self-care and health promotion as they relate to quality of life issues. Restricted to third- and fourth-year B.Sc.Nursing students and post-RN students. Three credits. Offered in on-line delivery format.

488 Challenges in Aging
Using nursing and sociological perspectives on aging, students will explore holistic care of the older client, including current gerontological issues and trends, and their implications for nursing. This course may be used as an open or NURS elective by third- or fourth-year B.Sc.Nursing students. Three credits. Offered in on-line delivery format.

490 Forensic Nursing
Forensic nursing refers to the application of nursing science and knowledge to legal proceedings. This course will examine the application of nursing science to the investigation and treatment of trauma, death, violent or criminal activity, and traumatic accidents within the clinical or community institution. Patient populations to be considered include: victims of sexual assault; elder, child and spousal abuse; unexplained or accidental death; trauma and assault; as well as the perpetrators of these and other criminal activity. This course may be used as an open or NURS elective by third- or fourth-year B.Sc.Nursing students. Six credits. Offered in on-line delivery format.

494 Leadership and Management in Nursing
Examines nursing leadership theories and management models, and their relationship to client care. The course explores the changing roles and expectations for registered nurses as leaders in the health care system. Three credits.

497 Nursing Informatics
Teaches the knowledge and skills necessary to ensure that computers have a positive impact on the nursing environment and delivery of patient care. Students learn computer concepts and terms, and examine ways computers can enhance nursing practice, education, administration, and research. Trends and issues related to the use of computers in nursing are explored. Three credits. Offered in on-line delivery format.

499 Independent Study and Practice
This nursing elective is designed to give registered nurses credit for a hospital-based course or program. Courses are evaluated for credit on an individual basis by the distance nursing education committee. Three credits.

9.30 PHILOSOPHY
D. Al-Maini, Ph.D.
S. Baldner, Ph.D.
C. Byrne, Ph.D.
L. Groarke, Ph.D.
W. Sweet, D.Ph.

What is the purpose of our existence? How do we discover the principles which ought to guide our actions? Can we prove that God exists? Philosophy is the reasoned study of these and other questions of fundamental importance. The study of philosophy also introduces students to the main currents of intellectual history, provides a basis for critically understanding their own ideas, and develops analytical reasoning skills.

Students planning the major, advanced major, honours or honours with subsidiary degree in this field are required to consult the department chair about their program of study. Degree requirements are outlined below and at the department's webpage at www.mystfx.ca/academic/philosophy.

Major Program
Of the 36 credits of philosophy required for the major, a minimum of 12 credits must be in the history of philosophy, with at least 6 credits from the ancient or medieval periods and at least 6 credits from the modern or contemporary periods. A minimum of 12 credits in the major must be at the 300/400 level.

Advanced Major Program
Of the 36 credits of philosophy required for the advanced major, a minimum of 12 credits must be in the history of philosophy, with at least 6 credits from the ancient or medieval periods and at least 6 credits from the modern or contemporary periods. A minimum of 18 credits in the major must be at the 300/400 level, including 6 credits of 400-level senior seminar coursework. Advanced major students are also required to complete a senior research paper. In the case of a joint advanced major in which philosophy is subject B, the senior research paper is completed only in subject A.

Honours Program
Of the 60 credits of philosophy required for the honours program, a minimum of 18 credits must be in the history of philosophy, with at least 6 credits from the ancient or medieval periods and at least 6 credits from the modern or contemporary periods. A minimum of 33 credits in the honours courses must be at the 300/400 level, including 6 credits of 400-level senior seminar coursework and the honours thesis.

Honours with Subsidiary Program
When philosophy is the honours subject: Of the 48 credits of philosophy required for the honours program, a minimum of 18 credits must be in the history of philosophy, with at least 6 credits from the ancient or medieval periods and at least 6 credits from the modern or contemporary periods. A minimum of 27 credits in the honours courses must be at the 300/400 level, including 6 credits of 400-level senior seminar coursework and the honours thesis.

When philosophy is the subsidiary subject: Of the 24 credits of philosophy required for the subsidiary, a minimum of 12 credits must be in the history of philosophy, with at least 6 credits from the ancient or medieval periods and at least 6 credits from the modern or contemporary periods. A minimum of 27 credits in the honours courses must be at the 300/400 level, including 6 credits of 400-level senior seminar coursework and the honours thesis.

When religious studies is the honours or the subsidiary subject with philosophy, PHIL 240 will normally be included in the course pattern.

Humanities Colloquium
The humanities colloquium is an optional and interdisciplinary way of studying three first-year courses, usually ENGL 100, HIST 100, and PHIL 100. See section 4.4 for further information.

Note: PHIL 100 is normally a prerequisite for advanced courses; exceptions are PHIL 210, 251, 331 and 336.

100 Introductory Philosophy
An introduction to the study of philosophy that looks at major thinkers in the history of western philosophy as well as the fundamental and enduring questions they raised. Among the philosophers considered are Socrates, Plato, Aristotle, Aquinas, Descartes, and Hume. The questions raised by these thinkers include: What is it to think rationally and critically? Can we demonstrate the existence and nature of God? Can we discover any ethical principles that should guide our actions? What are the limits of human knowledge? Six credits.

213 Philosophy of Science
Examines the methodology of the natural and social sciences, including the logic of scientific discovery and experimental testing, the confirmation of hypotheses,
and the nature of scientific explanation. Credit will be granted for only one of PHIL 213 and PHIL 210. Three credits.

230 Philosophy of Human Nature
A philosophical examination of what it means to be human. Topics may include: whether we possess free will; how the mind and the body are related; the nature of death and the possibility of survival/imortality; the nature of personal identity; skepticism and the reliability of our cognitive faculties; the limits of human knowledge; the function of art and its relation to human existence; egoism and the possibility of altruism; and the ‘meaning of life.’ Prerequisite: PHIL 100 or permission of the instructor. Six credits.

245 Philosophy of Religion
Explores the philosophy of religion, including different concepts of God with emphasis on the Judeo-Christian tradition; arguments for the existence of God; classical and modern challenges to belief in God. Issues such as ‘life after death’, miracles, religious experience, and the concept of prayer may also be discussed. Cross-listed as RELS 246. Credit will be granted for only one of PHIL 245 and PHIL 240. Prerequisite: PHIL 100 or RELS 100 or 110 or permission of the instructor. Three credits.

251 Critical Thinking
What is an argument? How do arguments work? What makes some arguments better than others? This course will equip students to recognize and analyze arguments as they occur in a variety of contexts such as media editorials, speeches, textbooks, argumentative essays, and philosophical texts. To accomplish this, we will study the components of good arguments and techniques for criticizing and constructing arguments. Students will also be introduced to propositional logic. Prerequisite: normally at least one semester of successful university study. Three credits.

281 Aesthetics
Is beauty in the eye of the beholder? Is it necessary or possible to define art? What is the nature of aesthetic experience? This course will examine several classical and modern theories of art and beauty selected from such writers as Plato, Aristotle, Hume, Kant, Hegel, Maritain, Dewey, Goodman, Danto, Foucault. It will also draw from the writings of some of the major figures in these Platonic schools. Three credits. Next offered 2016-2017.

331 Introduction to Ethics
This course introduces students to several major ethical theories, including utilitarianism, virtue-based ethics, natural law theory and deontology. It addresses such questions as: Is there an objective moral standard? Is there a common good? Do we have duties to others? What does morality have to do with personal happiness? Credit will be granted for only one of PHIL 331, PHIL 334, PHIL 336. Prerequisite: PHIL 100 or third-year standing or permission of the department chair. Three credits.

332 Contemporary Moral and Social Issues
Building on PHIL 331, this course examines contemporary moral and social issues such as freedom of speech and censorship; equality and affirmative action; legalization of non-medical drug use; the duty to alleviate suffering; assisted suicide and euthanasia; justifications for punishment and capital punishment. Credit will be granted for only one of PHIL 332, PHIL 334, PHIL 336. Prerequisite: PHIL 331. Three credits.

333 Environmental Ethics
This course examines the ethical relationship between humans and the natural environment. It begins with the theoretical principles that help determine human conduct within the natural world. Once these beliefs about nature have been examined, it assesses different normative models that might govern our behavior regarding the environment. Prerequisite: PHIL 331. Three credits. Not offered 2015-2016.

336 Ethics in Health and Medicine
This course introduces students to ethical theories and values, and to the critical examination of contemporary issues arising in health care and medicine. Issues to be discussed may include: the concept of health; the ethical responsibilities of professionals and professional integrity; freedom, autonomy, and consent; death, dying, and euthanasia; abortion; infanticide; research involving human subjects; the allocation of scarce medical resources; confidentiality and privacy; reproductive technologies and rights; medical and non-medical drug use. Credit will be granted for only one of PHIL 336, PHIL 331, PHIL 334. Cross-listed as NURS 336. Prerequisite: junior standing or PHIL 100 or permission of the instructor. Six credits.

342 Logic
A course in formal logic. Presupposing a familiarity with propositional logic, it focuses on first order predicate logic (with identity) and metalogic. Topics to be covered include translating sentences from English into symbolic notation, the semantics of predicate logic, deductions, soundness and completeness. Prerequisite: PHIL 251. Three credits.

351 Socrates and Plato
Topics include the nature of Socratic dialectic, Socrates’ response to the pre-Socratic philosophers, and Plato’s contributions to ethics, political philosophy, metaphysics, and epistemology. Three credits. Next offered 2016-2017.

352 Aristotle
Topics include Aristotle’s contributions to metaphysics, natural philosophy, and epistemology; his response to Plato and the pre-Socratic philosophers; and the development of Greek philosophy in the subsequent Stoic, Epicurean, and Neo-Platonic schools. Three credits. Next offered 2016-2017.

361 Early Medieval Philosophy
A study of the Christian and Neo-Platonic influence on philosophy from the 4th- to the 12th-centuries. Principal thinkers: Augustine, Boethius, Anselm, and Abelard. Principal problems: faith and reason; knowledge; evil; providence; free will; immortality of the soul; universals; ethical principles. The course ends with an introduction to important medieval Islamic and Jewish thinkers: Averroës, Maimonides. Prerequisite: PHIL 100. Three credits.

362 Philosophy in the High Middle Ages
A study of the influence of Christian theology and Aristotelian philosophy on thinkers of the 13th- and 14th-centuries. Principal figures: Bonaventure, Thomas Aquinas, John Duns Scotus, William of Ockham. Principal problems: faith and reason; knowledge; evil; providence; free will; immortality of the soul; universals; and ethical principles. Prerequisite: PHIL 100. Three credits.

365 Modern Philosophy I
A review of the intellectual developments of the Renaissance relevant to philosophy is followed by a study of Descartes and his rationalist successors, such as Spinoza and Leibniz. Prerequisite: PHIL 360 or permission of the instructor. Three credits. Next offered 2016-2017.

366 Modern Philosophy II
British philosophy of the late 17th and 18th century is traced through a study of the writings of Locke, Berkeley, and Hume. Works by Kant may also be studied. Prerequisite: PHIL 365 or permission of the instructor. Three credits. Next offered 2016-2017.

367 Philosophy from Kant to Hegel
In the 19th century, German philosophy found expression in the idealist movement. Major figures such as Kant, Fichte, Schelling, and Hegel united in the belief that reality, and the categories we use to understand it, had a common origin and development. Out of this belief came new conceptions of science, history, theology, and politics. Prerequisite: PHIL 360 or permission of the instructor. Three credits. Not offered 2015-2016.

371 Social and Political Philosophy
Examines fundamental issues in social and political philosophy through a discussion of such questions as: What would an ideal society be like? Should there be limits on human freedom? Do human beings have rights that everyone should respect? Is it ever morally acceptable to disobey or rebel against the state? Texts will be selected from the classical, medieval, modern, and contemporary periods, but topics will focus on issues of current interest. Prerequisite: PHIL 100. Three credits. Not offered 2015-2016.

372 Philosophy of Law
Examines fundamental issues in legal philosophy through a discussion of such questions as: What is the nature and function of law? What is the relation between law and morality? What is the character of legal reasoning and judicial decision-making? What are the justifications and aims of punishment? Texts will be selected from the classical, medieval, modern, and contemporary periods, including works on liberal, libertarian, Marxist, and feminist thought. Three credits.

381 Existentialism and Phenomenology
Examines 19th- and early 20th-century philosophical ideas in continental Europe. A look at the philosophical antecedents of existentialism and phenomenology will be followed by an discussion of the writings of some of the major figures in these movements: Kierkegaard, Sartre, Beauvoir, Marcel, Merleau-Ponty, Husserl, Arendt, and Heidegger. Prerequisite: PHIL 100 or permission of the instructor. Three credits.

391 Anglo-American Philosophy to 1950
Presents some of the major currents of philosophy in the English-speaking world in the 20th century, up to 1950. The course includes a brief account of 19th-century empiricism, pragmatism, and idealism, before turning to ‘common sense analysis’ (e.g., G.E. Moore), early discussions of logical positivism and the place of metaphysics, ethics, and aesthetics (e.g., Bertrand Russell, A.N. Whitehead,
Philosophy / Physics

Ludwig Wittgenstein, A. J. Ayer, and Karl Popper), and the beginnings of ‘ordinary language’ philosophy. Prerequisite: PHIL 100 or permission of the instructor; junior standing strongly recommended. Three credits. Next offered 2016-2017.

451 Seminar in Ethics, Political Philosophy, and the Philosophy of Law I
A seminar course that focuses on questions of ethics, political philosophy, and the philosophy of law. Topics to be addressed may include: the state and society, rights and duties, justice and equality, freedom and punishment, the moral basis of political obligation, and the concept of law. Prerequisite: junior standing in philosophy or permission of the instructor. Three credits. Next offered 2016-2017.

452 Seminar in Ethics, Political Philosophy, and the Philosophy of Law II
A seminar course that focuses on questions of ethics, political philosophy, and the philosophy of law, not discussed in PHIL 451. Content varies from year to year. The course will include both classical and contemporary authors. Prerequisite: junior standing in philosophy or permission of the instructor. Three credits. Next offered 2016-2017.

461 Seminar in Metaphysics and Epistemology I
A seminar course that focuses on issues in classical and contemporary epistemology and metaphysics. Topics to be considered may include: an investigation of the ultimate structure of reality as a whole: the nature of material things; the existence of the immaterial; the meaning of being; what can and cannot be known of reality; whether there is a First Cause. Prerequisite: junior standing in philosophy or permission of the instructor. Three credits.

462 Seminar in Metaphysics and Epistemology II
A seminar course that focuses on issues in metaphysics and epistemology not discussed in PHIL 461. Content varies from year to year. The course will include both classical and contemporary authors. Prerequisite: junior standing in philosophy or permission of the instructor. Three credits.

489 Honours Thesis
Each student works under the supervision of a professor who guides the selection of a thesis topic, the use of resources, the methodological component, and the quality of analysis. Restricted to honours students. Three credits over full year.

9.31 PHYSICS

C. Adams, Ph.D.  Professor Emeritus
K. LeBris, Ph.D.
K. Marzlin, Ph.D.
P. Poole, Ph.D.
M. Steinitz, Ph.D.
B. van Zyl, Ph.D.
D. Hunter, Ph.D.
N. Jan, Ph.D.
Senior Research Professor
D. Pink, Ph.D.

Physics deals with the fundamental properties of matter and energy. Physicists explore phenomena both in analytical detail and through statistical or average results, to create precise descriptions of the way in which systems behave. Physics courses stress analytical thinking and problem solving, while trying to communicate the excitement of discovery and the beauty of physics. The physics program prepares students for graduate study in physical and related sciences, engineering, meteorology, oceanography, and business administration; for professional programs such as medicine, dentistry, law and education; and for careers in science, business, and industry.

The physics department offers honours, advanced major, and major programs; joint advanced major and honours programs combining physics with mathematics (mathematics or computer science concentration), earth science, chemistry, or biology; and an advanced major in physics with business administration. Students interested in these programs, or in combining a physics degree with the engineering diploma, should consult the relevant department chairs. Since physics depends upon mathematics, most of the programs described below require at least four mathematics courses.

See chapter 7 for information on the degree patterns, declarations of major, advanced major and honours, advancement and graduation requirements. First-year students considering a physics program should consult the department chair before registration. See the department website at physics.stfx.ca

Major Program
The typical program outlined below may be varied with approval of the department chair.

Year 1  PHYS 120; MATH 111, 112 or 121, 122; CHEM 120 or 100; 6 credits arts electives; 6 credits open electives
Year 2  PHYS 201, 221, 241, 242; MATH 221, 267; 6 credits arts electives; 6 credits open electives

Advanced Major Program
The typical program outlined below may be varied with approval of the chair.

Year 1  Same as major program
Year 2  PHYS 201, 221, 241, 242; MATH 221, 253, 254, 267; CSCI 125 or 161; 3 credits approved elective
Year 3  PHYS 302, 322, 323, 325; MATH 361; 6 credits arts electives; 6 credits open electives; 3 credits approved elective
Year 4  PHYS 343, 344, 491 (no credit); 6 credits PHYS electives; 6 credits arts electives; 12 credits open electives; advanced major paper (consult the department chair).

Honours Program
The typical program outlined below may be varied with approval of the chair.

Year 1  Same as major program
Year 2  PHYS 201, 221, 241, 242; MATH 221, 253, 254, 267; CSCI 125 or 161; 3 credits approved electives
Year 3  PHYS 302, 322, 323, 325, 343, 344; MATH 361; one of MATH 462 and 481; 6 credits arts electives
Year 4  PHYS 422, 443, 491 (no credit); 493; four of 223, 303, 342, 425*, 444*, 473, 475*, 476* (*choice must include at least 2 marked); MATH 481 or 462, 6 credits arts electives.

Honours students of superior academic standing will be encouraged to enrich their programs by taking up to one additional course each year.

100 General Physics
An introduction to mechanics, electricity, magnetism, waves, optics, and modern physics. The course includes applications of physics to biological problems. Recommended for students in the life sciences program. However, any student expecting to take additional physics courses should take PHYS 120. Credit will be granted for only one of PHYS 100 or PHYS 120. Six credits and lab.

120 General Physics
An introduction to physics (mechanics, electricity and magnetism), this course is suitable for science students seeking a firm understanding of how the world works, e.g., from the flight of a golf ball to the orbit of a planet, or from the nature of an electron to how a generator works. Recommended for those considering further study in the physical sciences, engineering, mathematics and computer science. MATH 111/112 or 121/122 should be taken concurrently, as this course uses concepts developed in the calculus course. Credit will be granted for only one of PHYS 120 or PHYS 100. Six credits and lab.

171 Introduction to Astronomy I
This course provides an introduction to astronomy for students who have no background in mathematics or science. Topics include observing the night sky with and without optical aid, the development of astronomy and related sciences, time and calendars, the evolution of the solar system, sun, planets, comets, and meteors. Observing sessions will be arranged. This course is intended for non-science students, but may be taken by science students as an elective. PHYS 271 is recommended for science students. Credit will be granted for only one of PHYS 171 or PHYS 271. Three credits.

172 Introduction to Astronomy II
This course provides an introduction to astronomy for students who have no background in mathematics or science. Topics include stellar systems, galaxies, quasars, black holes, dark matter, dark energy, cosmology, cosmogony and life in the universe. Observing sessions will be arranged. This course is intended for non-science students, but may be taken by science students as an elective. PHYS 272 is recommended for science students. Credit will be granted for only one of PHYS 172 or PHYS 272. Three credits.

201 Modern Physics: Introduction to Relativity and Quantum Physics
Topics include Einstein’s special relativity; wave description of matter; early atomic quantum theory; introduction to nuclear and particle physics; Schrödinger’s quantum mechanics. Prerequisite: PHYS 120 or PHYS 100 with permission of the department chair; concurrently with MATH 112 or ENGR 122/MATH 122. Three credits and lab.

221 Electric Circuits Theory
Topics include introductory concepts; resistive networks; response to linear circuits with energy storage; exponential excitation functions; steady-state AC circuits; analysis; network analysis; systems. Cross-listed as ENGR 237. Prerequisites:
PHYS 120 or PHYS 100 with permission of the department chair; concurrently with ENGR 221/MATH 221. Three credits and lab.

### 223 Digital Electronics

This hands-on, practical course introduces digital electronics with applications to computer hardware and micro-computer peripherals. Topics include the families of digital electronic technology; combinational and sequential logic; digital device characteristics; micro-computer interfacing; data acquisition; instrument control; data transmission. Labs provide an opportunity to design and test practical digital devices. Cross-listed as ENGR 238. Prerequisite: PHYS 120 or PHYS 100 with permission of the department chair. Three credits and lab.

### 241 Mathematical Physics: Oscillations and Waves

An introduction to complex numbers, treatment of experimental uncertainties, ordinary differential equations, partial differential operators, partial differential equations and Fourier series for dealing with the physics of oscillating systems and waves. Simple, damped, forced, and coupled oscillators are treated in detail. The one-dimensional wave equation is derived and solved. Fourier series are introduced in order to satisfy the initial conditions. Prerequisites: PHYS 120 or PHYS 100 with permission of the department chair; concurrently with MATH 112 or ENGR 122/MATH 122. Three credits.

### 242 Classical Dynamics I

The course covers conservative systems and potential energy; non-inertial frames; multi-particle systems; calculus of variations; Lagrangian mechanics; the connection between symmetries and conservation laws; central force problems; orbital mechanics; coupled oscillators and normal modes; Hamilton's equations of motion. Concurrent prerequisites: PHYS 241; ENGR 221/MATH 221 or MATH 367. Three credits.

### 271 Astronomy: The Solar System

This course provides a quantitative and more detailed treatment of the topics covered in PHYS 171. These topics include the evolution of the solar system, sun, planets, comets, meteors, and solar wind. Observing sessions will be arranged. Credit will be granted for only one of PHYS 271 or PHYS 171. Prerequisites: PHYS 100 or 120; MATH 112. Three credits. Not offered 2015-2016.

### 272 Astronomy: The Stellar System

This course provides a quantitative and more detailed treatment of the topics covered in PHYS 172. These topics include stellar evolution, supernovae, quasars, pulsars, neutron stars, black holes, the universe, our galaxy, and cosmology. Observing sessions will be arranged. Credit will be granted for only one of PHYS 272 or PHYS 172. Prerequisites: PHYS 100 or 120; MATH 112; PHYS 271 recommended. Three credits. Offered 2015-2016 and in alternate years.

### 278 Introduction to Atmospheric Physics

This course aims at developing an understanding of the physical processes that influence our climate. It is suitable for science students interested by atmospheric sciences, climate and air quality issues. Topics include introduction to radiation, atmospheric composition, planetary atmospheres, introduction to molecular spectroscopy and photochemistry, radiation balance - natural variability and anthropogenic effects, greenhouse effect, ozone depletion, clouds, methods of sounding atmospheric constituents, instrumentation, introduction to climate modeling. Cross-listed as ESCI 278. Prerequisites: MATH 112 or 122, CHEM 100 or 120, PHYS 100 or 120. Three credits.

### 302 Modern Physics: Properties of Matter

This course considers the properties of matter in its various states of greater and lesser order. Topics include classical thermodynamic treatment of phase transitions; an introduction to fluid mechanics; crystallographic order in crystals; elasticity; magnetic order; electrons in metals; and electrical resistance. Prerequisites: PHYS 201, 241. Three credits and lab.

### 303 Modern Physics: Subatomic Physics and Cosmology

Topics include nuclei; elementary particles; concepts of general relativity; cosmology. Prerequisite: PHYS 201. Three credits.

### 322 Electromagnetic Theory I

This course presents a comprehensive study of electrostatics in the presence of conductors and dielectrics. Particular attention is paid to developing and solving the differential equations that describe the electric field and scalar potential. Topics include vector fields; Coulomb's Law; Gauss's Law; Poisson's/Laplace's equation; Green's function; multiple expansion; method of images; polarization of materials; the displacement field; introduction to magnetostatics. Prerequisites: PHYS 120 or PHYS 100 with permission of the department chair; MATH 267 or ENGR 222/MATH 222; PHYS 241 or MATH 361. Three credits.

### 323 Electronics

An introduction to electronic devices and circuits. Devices and topics discussed include equivalent circuits, diodes, bipolar junction transistors, field effect transistors, linear models, single-stage amplifiers, operational amplifiers, and digital circuits. Prerequisites: PHYS 221/ENGR 237; ENGR 221/MATH 221 or MATH 367. Three credits and lab.

### 325 Optics

Topics include the nature of light; geometric optics, aberrations, optical instruments; Maxwell's equations, vector nature of light, polarization; coherence and interference; Fourier transform spectroscopy and interferometry; Fraunhofer diffraction, Fresnel diffraction; optics of solids. Prerequisites: PHYS 201, 241; ENGR 221/MATH 221 or MATH 367. Three credits and lab.

### 342 Classical Dynamics II

Topics include calculus of variations; Hamilton's principle and equations; non-linear dynamic equations; van der Pol's equation; orbits; limit cycles; graphical analysis; fixed and periodic orbits; bifurcations; the transition of chaos; symbolic dynamics; chaos; Sarkovski's theorem; Newton's method; fractals; the Julia and Mandelbrot sets. Prerequisite: PHYS 242. Three credits.

### 343 Quantum Mechanics I

Covers states as vectors, measurable quantities as operators in a linear vector space, eigenstates and eigenvalues; the process of measurement, superposition of eigenstates; Schrödinger's equation, applications; orbital and spin angular momentum, application; time-independent perturbation theory, applications. Prerequisites: PHYS 201, 242, MATH 254, 267 or ENGR/MATH 223; PHYS 325 is strongly recommended. Three credits.

### 344 Thermal Physics

This course introduces the statistical nature of physical systems from an energetic perspective. Topics covered: laws of thermodynamics; ideal gases and Einstein solids; entropy and its relation with temperature, pressure, and chemical potential; engines and refrigerators; Helmholtz and Gibbs free energy; chemical thermodynamics; Boltzmann statistics; partition functions; Maxwell distribution; Gibbs factors and quantum statistics; Fermi-Dirac and Bose-Einstein distributions; degenerate electron gases; blackbody radiation and Planck's distribution; Debye theory of solids. Prerequisites: PHYS 242; CSCI 161 or ENGR 144. Three credits and lab.

### 415 Special Topics in Physics

This course will introduce one or more current topics in physics research. The topics will vary from year to year depending upon the availability of faculty and their interests. Three credits.

### 422 Electromagnetic Theory II

This course, a continuation of PHYS 322, covers magnetic fields in magnetic and non-magnetic materials, electromagnetic induction, the electric and magnetic fields of moving electric charges; Maxwell's equations; and the propagation and radiation of electromagnetic waves in various media. Prerequisites: PHYS 322; ENGR 221/MATH 221 or MATH 367; MATH 361. Three credits.

### 425 Lasers and Modern Optics

An introduction to the theory, operation, and applications of lasers. Topics include the principles of optical coherence; optical resonators; operating principles and the most important laser types; holography; wave mixing; harmonic generation; the optical Kerr effect; stimulated Raman scattering and fiber optics. Prerequisites: PHYS 301, 325, 343. Three credits and lab.

### 443 Quantum Mechanics II

Topics include function space analysis; state vectors, pure and non-pure states described by density operators; unitary and antiunitary transformations, symmetries and group theory in quantum mechanics; Schrödinger, Heisenberg, and interaction pictures; angular momentum coupling, tensor operators, the Wigner-Eckart theorem; time-dependent perturbation theory, variational approach; scattering theory with applications to modern physics. Prerequisite: PHYS 343. Three credits.

### 444 Statistical Mechanics

This advanced course explores thermodynamics and its relationship to statistical mechanics. Topics include review of the thermodynamic postulates and conditions for equilibrium; extensive and intensive quantities; entropy and entropic formulation; Euler equation and Gibbs-Duhem relation; Legendre-transformed representations; response functions and Maxwell relations; stability; first-order phase transitions; van der Waals fluid; critical point and second-order phase transitions; Ising model of magnetic systems; connection to statistical mechanics through numerical models. Prerequisite: PHYS 344. Three credits and lab.

### 473 Soft Materials and Biophysics

Examples of soft materials are familiar from everyday life: glues, paints, soaps,
plastics, and foods. These materials are neither simple liquids nor crystalline solids. Topics will be chosen from: the physical properties of colloids, polymers, and liquid crystals; the self-assembly properties of block co-polymers; amphiphiles and bio-polymers (DNA and proteins) in solution; and interfaces such as bio-membranes and bacterial cell walls. Prerequisites: PHYS 302, 344, concurrently with PHYS 444. Three credits.

474 Computational Physics
This course covers computational modeling of a variety of systems relevant to physics, physical chemistry, and engineering. Topics will include: deterministic and stochastic methods; drawing connections among different phenomena from underlying similarities revealed through the modeling process; implementing simulations and analyzing the results; numerical integration of neural networks and spin glasses. Prerequisites: PHYS 241; ENGR 221/MATH 221 or MATH 367, CSI 161 or ENGR 144. Three credits and lab.

475 Atomic and Molecular Physics
Covers the development of atomic physics; one-electron and multi-electron atoms; fine and hyperfine structure; radiation and radiative transitions; the Pauli principle and atomic shell structure; atomic spectroscopy. Also covers a selection of current areas of research in the field such as lasers, laser cooling, and quantum computing. Prerequisite: PHYS 343. Three credits and lab.

476 Solid-State Physics
An introduction to the theory of solids and important experimental results. Topics include crystal structure; diffraction methods; lattice vibrations; specific heat of solids; thermal conductivity; the behaviour of electrons in metals and semiconductors; magnetism; superconductivity. Prerequisites: PHYS 201, 302, 344, concurrently with PHYS 343. Three credits and lab.

491 Physics Seminar
All students in the fourth year of a physics program are required to attend department seminars as scheduled. No credit.

493 Honours Thesis
Students will prepare and present a thesis based on original research they have performed under the supervision of a faculty member. Required for honours students. Open to advance major students who have demonstrated aptitude in physics research with permission of the department chair. Three credits.

9.32 POLITICAL SCIENCE
J. Bickerton, Ph.D.
D. Brown, Ph.D.
Y. Cho, Ph.D.
P. Clancy, Ph.D.
S. Dosse, Ph.D.
Y. Grenier, Ph.D.
S.K. Holloway, Ph.D.
C. Schaler, Ph.D.
L. Stan, Ph.D.

Department Regulations
Normally, all courses above the 100 level, except PSCI 240, require PSCI 100 as a prerequisite. Students who wish to register in courses at the 300 level or above should have 12 credits in PSCI or permission of the instructor.

See chapter 4 for information on the degree patterns, declarations of major, advanced major and honours, advancement and graduation requirements. There are four areas within the discipline: Canadian Politics; Political Theory/Philosophy; Comparative Politics; and World Politics/International Relations. Students will normally concentrate in two of those areas.

Major and Joint Major Programs
Candidates for the major degree should choose their courses in consultation with a member of the political science department, and they must have their major form approved by the department chair. Students will normally concentrate in two areas within the discipline, and have a minimum of 15 credits at the 300 level or above. Majors are encouraged to include PSCI 399 and/or a fourth year seminar in their course pattern.

Advanced Major and Joint Advanced Major Programs
Candidates for a degree with advanced major in political science must choose their courses in consultation with the chair. All students will take PSCI 100, 399, at least two three-credit seminar courses and a senior research paper as part of their program. Students will normally concentrate in two areas within the discipline, and have at least 15 credits at the 300 level or above, including PSCI 399 and two three-credit seminars. Joint advanced major candidates must complete all of the above requirements, including the senior paper if political science is the primary subject (major 1).

Honours Program
Candidates for the degree with honours in political science require credit for PSCI 100; 200; 399, 490; a minimum of 6 credits from the following: 211, 212, 221, 222, 240, 250; two three-credit seminars; a thesis; and 27 other PSCI credits. Non-Canadian students may, with permission of the department, substitute another 6 credits for PSCI 221/222 or 240. Students will normally have at least 24 credits at the 300 level or above, including PSCI 399, 490 and two seminars.

Honours with a Subsidiary Subject
See section 4.1 for program requirements.

Note: Not all courses are offered every year. Most 300-level courses are offered in alternate years. To confirm course offerings students should check the SFX timetable prior to registration.

100 Introduction to Political Science
An introduction to the nature, variety, and use of political power in contemporary society and the state, especially Canada. This course will introduce students to the four areas of the discipline. Six credits.

200 History of Political Thought
An introductory survey of the Western tradition of political thought as it reflects persistent concern with questions of justice, political obligation, the origin of law and the purpose of government. Thinkers to be studied include Plato, Aristotle, Augustine, Thomas Aquinas, Niccolo Machiavelli, Thomas Hobbes, John Locke, Jean-Jacques Rousseau, Edmund Burke, and Karl Marx. Six credits.

211 Comparative Politics I
This course provides an introduction to comparative politics and/or regional politics as a field of study, and prepares students for upper level courses in the field. It will present the basic methodological and theoretical tools in the field and take a close look at countries whose history, political institutions, political culture, political processes and political outcomes are similar or closely related to Canada’s: Great Britain, France and the United States among others. Credit will be granted for only one of PSCI 211 or PSCI 210. Three credits.

212 Comparative Politics II
This course provides an introduction to comparative politics and/or regional politics as a field of study, and prepares students for upper level courses in the field. It examines the evolution and diversity of governments in countries whose history, political institutions, political culture, political processes, and political outcomes differ from Canada’s. These countries may include Russia, China, Brazil, Japan, Iran, India or Nigeria, among others. Credit will be granted for only one of PSCI 212 or PSCI 210. Prerequisite: PSCI 211 recommended. Three credits.

215 Comparative Politics of Latin America
This course offers a comparative analysis of Latin American governments. It focuses on political institutions and governance in countries such as Argentina, Brazil, Chile, Costa Rica, Cuba, El Salvador, Guatemala, Mexico, Peru and Venezuela. It also examines political forces, interest groups and social movements in the region. Credit will be granted for only one of PSCI 215 or PSCI 390. Three credits.

221 Canadian Politics I
This course covers the key political structures and institutions of the Canadian state (the Constitution, the political executive, parliament, federalism, intergovernmental relations, the public service and the courts) which constrain, shape and give impetus to Canadian politics, governance and decision-making. Credit will be granted for only one of PSCI 221 or PSCI 220. Three credits.

222 Canadian Politics II
This course will cover the cultural and regional how citizens interact with the Canadian state. Topics covered include political parties, elections, advocacy groups, and other forms of political participation, the role of the media, and the implications for the political process of key social divisions such as gender, language and race. Language politics, multicultural groups, the women’s movement and aboriginal peoples will receive attention. The course concludes with a discussion of Canada’s place in the world. Credit will be granted for only one of PSCI 222 or 220. Three credits.

231 United States Politics
This course introduces U.S. government with a focus on the historical development of American political institutions. It examines the U.S. federal system and constitutional development, as well as executive, legislative, and judicial powers with particular attention to the founding and its enduring legacy in American political culture. Credit will be granted for only one of PSCI 231 or PSCI 230. Three credits.
240  Business and Government
This course examines the historical roots and the current contours of the business-government relationship. While the focus is on Canada, conditions in other advanced capitalist states are also considered. Topics include the mechanisms of business power; state intervention in the modern economy; the micro-politics of business; and state policies affecting business interests. Six credits.

247  Environmental Social Sciences I: Problems and Paradigms
Cross-listed as SOCI 247; see SOCI 247. Three credits.

248  Environmental Social Sciences II: Power & Change
Cross-listed as SOCI 248; see SOCI 248. Three credits.

250  World Politics
Examines the nature of the international state system. The course explores the political, military, cultural, economic, and ideological factors affecting the behaviour of states and international organizations in world politics. Six credits.

291  Violence, Conflict, and Politics
An introduction to the comparative study of types of collective political violence: war, terrorism, ethnic or identity-based conflicts, coup d'état, revolution, civil war, and genocide. Specific case studies are examined along with the main theoretical approaches in the field. Three credits.

292  Selected Topics
This course introduces current topics and problems in political science. Course content may change yearly, depending on faculty availability. Students should consult the department chair for the current topic. Three credits.

295  Religion and Politics
An examination of the impact of religion on politics and politics on religion. Students will consider the relationship between religion and politics in the Middle East, Northern Ireland, India and Pakistan, Eastern Europe and North America. Case studies will demonstrate interactions between the state and Christianity, Islam, Hinduism, and Judaism, as well as the influence of religion on citizenship, education, the party system, and social issues. Cross-listed as RELS 295. Three credits.

301  Liberalism and Its Critics

302  Marx and the Marxists
A study of the socialist and/or communist critique of industrial capitalism, encompassing ethical, historical, economic, and revolutionary perspectives. The course examines the works of Karl Marx, and their adoption by revolutionaries and critics of liberalism. Prerequisite: PSCI 200 recommended. Three credits.

303  Contemporary Political Arguments
Critical study of the principal cultural/ethical issues in current liberal politics. Main themes: war, mass murder, terror, torture, evil, feminism, racism and secularism. Thinkers considered in this context: Arendt, Kant, Freud, Susan Sontag, Kelly Oliver, Michael Walzer among others. Prerequisite: PSCI 200 recommended. Three credits.

304  Dirty Hands: Moral Dilemmas in Politics
What is the relationship between moral and political life? This course considers the problem known as “dirty hands.” This dilemma arises when moral and political demands conflict, compelling politicians to choose between unacceptable alternatives in the service of the public good. Authors include Machiavelli, Walzer, Plato, Sartre, Camus, Arendt, Le Guin, Thoreau, King, Gandhi and others. Topics include terrorism, torture, just/unjust war, genocide, intervention, civil disobedience. Prerequisite: PSCI 200 or 291 recommended. Three credits.

305  Sex, Power and Political Thought
This course explores feminist criticism of the canon of political thought with attention to how sex and power comingle. The canon has been criticized for rampant misogyny, as it has been mined for liberating insights and resources. This course explores ancient, modern, and contemporary perspectives including Plato, Aristotle, Aristophanes, Epicureans, Locke, Wollstonecraft, HT & JMS, Beauvoir, Marx & Engels, Charles Taylor, Susan Okin, Carole Pateman, Jennifer Scaf, and others. Prerequisite: 12 credits of PSCI or WMGS 100. Three credits.

311  The European Union
This course examines European integration since World War II, with emphasis on the European Community (EC) and the European Union (EU), their institutions and policy processes, and the consequences of European unity for the political process in European societies. Prerequisite: PSCI 210 or 211 recommended. Three credits.

312  Art and Politics
This course introduces students to what modern artists have to say about politics and what governments do and say about art. It provides some of the historical and theoretical tools needed to analyze the political role of art in our time. Students will examine literary works, painting, music, and architecture, and discuss specific policies on art. Cross-listed as ART 312. Three credits.

313  West European Politics
This course surveys governmental institutions and political processes in major Western European states like the United Kingdom, France, Germany, Italy, and Sweden. Among these cases we will compare systematically general historical patterns of social, economic, and religious conflict; structures of citizen representation in interest groups and political parties; electoral systems; constitutional relationships between executive, legislature, and judiciary; outlines of economic and foreign policies; and current problems of national identity. Credit will be granted for only one of PSCI 313 or PSCI 310. Three credits.

314  Topics in European Politics
This course examines themes and issues relevant to European politics and societies, ranging from political institutional arrangements, state-society relations, and the role of civil society and social capital to public policy, immigration, church-state relations, security, the EU Eastern enlargement, and the EU Neighborhood Policy. By examining different European countries, Europe as a whole and the European Union, students are encouraged to develop their own project to understand politics in that part of the world. Credit will be granted for only one of PSCI 314 or PSCI 310. Three credits.

315  Democratization around the World
This course investigates the problems facing countries from different parts of the world that have sought to move from non-democratic political systems to democracy. Students will learn the social-cultural and economic conditions necessary for the process of democratization; analyze the institutional structures and constitutional designs most conducive to the transition from authoritarianism to democracy; and consider the consequences of democratization for development. Prerequisite: PSCI 211 or 212 recommended. Three credits.

321  Federalism
This course examines the theory and practice of federalism, with a focus on Canadian federalism. Topics include theories of federalism, comparative federal systems, inter-governmental relations, fiscal arrangements, federal-provincial diplomacy, and constitutional reform. Prerequisite: PSCI 220 or 221 and 240 or 249 recommended. Three credits.

322  Atlantic Canada
A course on modern government and politics in the four Atlantic provinces. Regional development and dependence are the themes within which students will explore federal-provincial relations, fiscal and administrative changes, development policies, political culture, and party systems. Prerequisite: PSCI 220 or 221 and 240 or 249 recommended. Three credits.

323  Parties and Elections
This course is concerned with parties and elections in Canada. Topics include party and electoral systems; intra-party politics and political personnel; party financing; representation and policy development; the political marketing, campaigns and voting behaviour. Prerequisite: PSCI 221; PSCI 222 recommended. Three credits.

324  Provincial Politics
A comparative study of the differing political cultures, institutions, behaviour, and public policies of the Canadian provinces. Students will seek explanations for similarities and differences in the social and economic structures and political histories of the provinces. Prerequisite: PSCI 220 or 221 and 222 or 240 recommended. Three credits. Offered in alternate years; not offered 2015-2016.

331  Comparative Nationalism
An analysis of the historical origins of nationalism and of its central concepts and justifications. Both Western and non-Western nationalism (focusing on four or five cases) will be examined in a comparative context. Evidence for the recent decline of the nation state will be explored. Credit will be granted for only one of PSCI 331 or PSCI 330. Prerequisite: PSCI 210 or 250 recommended. Three credits.

335  Human Rights and International Justice
Human rights and international justice are important components of politics. This course examines the theoretical and practical concerns shaping the study and protection of human rights today. Using a variety of material and case studies, we examine the debate over whether rights are universal; the institutions and organizations enforcing human rights; and the role states play in protecting human rights. A strong component of this class is state responses to massive human rights
341 Canadian Public Administration
The focus of this course is Canadian public administration. Topics include organizational theory applied to the public sector; the origins and social function of bureaucratic institutions in Canada; cabinet organization; federal-provincial administrative relations; budgeting; and human resource management. Prerequisite: PSCI 221, 222, or 220 or 240 recommended. Three credits.

342 Canadian Public Policy
An examination of contemporary public policy process and issues in Canada, including economic, social and other policy fields (e.g. environment, security and cultural). Emphasis will be on policy analysis and decision-making process. Prerequisites: PSCI 221, 222, or 220 or 240 recommended. Three credits.

343 Law and Politics
This course explores the role of the courts in politics, particularly in Canada. Possible Topics include recent constitutional developments; the impact of the Charter of Rights; the judicialization of politics; philosophy of law; and strategic litigation. Prerequisite: PSCI 221, 222, or 220 or 240 recommended. Three credits.

344 Citizenship and Identity
This course examines various aspects of Canadian citizenship and identity. Topics include citizenship theory; the evolution of the Canadian citizenship regime; processes of citizenship, majority and minority nationalisms; Aboriginal citizenship and multiculturalism. Prerequisite: PSCI 221, 222, or 220. Three credits.

345 Women and Politics
An introduction to the study of women and politics, this course has three parts: feminist political thought and the women's movement; political participation and representation; and public policy. Topics include feminist political thought in the Western political tradition; the evolution and politics of the women's movement; political parties and legislatures; women and work; and women and the welfare state. Prerequisite: PSCI 100 or WMGS 100. Cross-listed as WMGS 345. Three credits.

346 The Politics of Resource Management
This course examines the power relations arising from attempts to exploit and manage natural resources. The commodities in question range from wildlife and fish to agriculture, forests, and minerals. Topics will include: preservation and conservation strategies; crown rights and systems; co-management regimes; environmental assessment techniques; commodity-marketing schemes and sustainable-development policies. Three credits.

347 Politics of the Environment
Environmental factors have increasingly become important components of political decisions. This class examines how environmental issues arise and the different ways they are framed, argued, and dealt with politically in that context. It will also explore the theoretical assumptions, questions and ethical frameworks that have been developed to guide and analyze environmental policy-making. Prerequisites: PSCI 247, 248. Three credits.

351 Canadian Foreign Policy
This course is designed as a general historical survey of Canadian external interests, external policy-making processes, and contemporary themes and issues. Prerequisite: PSCI 250 recommended. Three credits.

352 American Foreign Policy
This course examines the major foreign policy interests in the United States from the late 19th century to the present. Emphasis is placed on the ideologies and personalities of key decision-makers. The effect of the domestic socio-economic structure on policy decisions, and America's position in the international system. Prerequisite: PSCI 250 recommended. Three credits.

353 International Organizations
A study of the development and role of international organizations in world politics. Topics include the history and evolution of the United Nations, the effects of international law on state behaviour, and the extent to which international cooperation has been effective in resolving global problems. Prerequisite: PSCI 250 recommended. Three credits.

354 International Political Economy
This course examines the politics of international economic relations: international trade, the international monetary system, multinational corporations and international development. Cross-listed as DEV 354. Prerequisite: PSCI 250 recommended. Three credits.

355 Global Issues
This course examines the state's supremacy and its capacity to manage such global issues as: transnational flows of goods, services, money, and ideas; the continuing problem of poverty in the developing world; the phenomenon of failed states in the post-Cold War period; global environmental issues; international concerns with human rights; weapons proliferation; terrorism and other forms of transnational crime; and the rise of trans-national social activist groups. Prerequisite: PSCI 250 recommended. Cross-listed as DEV 355. Three credits.

356 War and Peace in the Middle East
The first part of this course will survey the major explanations of war and conflict among states and within states. The second part will apply these theories to conflict in the past half century in the Middle East, including the Arab-Israeli wars, the Yemen and Lebanon civil wars, the Iran-Iraq and Iraq-Kuwait wars, and the two Palestinian Intifadas. Finally the prospects for conflict resolution will be discussed. Prerequisite: PSCI 250 recommended. Three credits.

361 East European Politics
A comparative study of government and politics in Central and Eastern Europe during communist and post-communist times. Topics include parties and elections, political representation, opposition and dissent, political police and citizen surveillance, nationalism and ethnic conflict, the cult of personality and political succession. Prerequisite: PSCI 211, 212 or 210 recommended. Three credits.

362 Contemporary China
This course examines the domestic politics and foreign policy of a dynamic, rising power. From its birth in 1949, the People's Republic of China will be examined with emphasis on the changing roles of the Communist Party, the central bureaucracy, local governments, the military, the emerging business class and the overseas Chinese community. Prerequisite: PSCI 250 recommended. Three credits.

363 Politics in East Asia
An examination of politics in and among major regional actors in East Asia. Topics include the historical context of politics in the region since the late 19th century, the political economy of East Asian industrialization, economic regionalism, and regional security. Prerequisite: PSCI 250 recommended. Three credits.

365 Russian Politics
This course explores the reasons for the collapse and the pursuit of political and economic alternatives to state socialism in the Russian Federation. Students are encouraged to develop their own project, examining the manner in which forms of ownership, constitutional developments, party formation, political personalities, and domestic and international pressure influence events in Russia's developing system. Credit will be granted for only one of PSCI 365 or PSCI 360. Three credits.

366 Topics in Russian Politics
This course explores the reasons for the collapse and the pursuit of political and economic alternatives to state socialism in the Russian Federation. Students are encouraged to develop their own project, examining the manner in which forms of ownership, constitutional developments, party formation, political personalities, and domestic and international pressure influence events in Russia's developing system. Credit will be granted for only one of PSCI 365 or PSCI 360. Prerequisite: PSCI 100. Three credits.

370 Third World/South-North Politics
A critical study of the politics of new nations. The course will focus on the impact of colonization; theories of development and dependency; the role of the state; the debt crisis and the IMF; north-south dialogue; and prospects for democracy in the Third World. Two case studies drawn from Asia, the Middle East, and Africa will be considered in detail. Cross-listed as DEV 370. Six credits.

372 Iran and the Muslim World
A critical study of Iranian politics since the 1979 Revolution with particular focus on the role of Shi'ite Islam and Iranian culture in shaping the Iranian state, its internal dynamics, and its political influence in Lebanon and Iraq. This course will also consider Iranian relations with the West and Israel. Students will be introduced to the basic tenets of Islam. Prerequisite: PSCI 211; PSCI 212 recommended. Three credits.

380 African Politics and Society
A critical exploration of the history, politics and culture of sub-Saharan African states, in the context of Africa's place in global politics and the world economy. Topics will include: the colonial legacies, development strategy, state and national formation, economic autonomy, the impact of AIDS, the IMF and World Bank policies. Several case studies, drawn from Southern, Central and East Africa, will be the focus of intensive study each year. Prerequisite: 12 credits PSCI or permission of the instructor. Six credits.

391 Democratization and Development in Latin America
This course examines issues related to the challenges of development and democracy in the region. It provides historical background as well as discussions of theoretical approaches and specific public policies. Credit will be granted for only
one of PSCI 391 or PSCI 390. Prerequisites: PSCI 211, 212 or 215 recommended. Three credits.

392 Selected Topics
Three credits.

395 Mexican Politics
This course looks at Mexico’s distinct political tradition. It presents and discusses Mexico’s main political actors (political parties, groups, social movements) and institutions (democratic, republican, federal, presidential), and examines the political challenges of democratization and liberalization. Prerequisite: PSCI 215 recommended. Three credits.

399 Research Methods and Statistics
Covers research methods and controversies in the field of political science today. Students learn to use statistics and computers in political science research, broadening their employment opportunities and introducing them to post-graduate research methods. Mathematical or computer skills not required. Three credits.

401 Political Theory I (Seminar)
This seminar will involve an advanced, in-depth analysis of selected concepts, problems, themes and controversies in Western classical, medieval and early modern political theory, and their current relevance to the discipline of political science and politics. Prerequisite: PSCI 200 recommended. Three credits.

402 Political Theory II (Seminar)
This seminar will critically analyze selected themes, issues and controversies in contemporary political theory, as well consider non-western political thought and its relevance to Western political science and politics. Prerequisite: PSCI 200 recommended. Three credits.

421 Canadian Politics I (Seminar)
This seminar will consider theoretical perspectives on Canadian politics and the Canadian state, followed by an examination of Canadian political institutions and their setting. Prerequisites: PSCI 220 or 221 and 222 or 240 recommended. Three credits.

422 Canadian Politics II (Seminar)
This seminar deals with the analysis of power in Canada, through the study of selected policy fields and cases. Prerequisite: PSCI 220 or 221 and 222 or 240 recommended. Three credits.

442 Public Policy (Seminar)
This seminar explores the analysis and evaluation of public policy, with applications to policy issues in different political systems. Policy sectors may include the environment, fiscal policy, health, energy and natural resources. Prerequisite: PSCI 342 recommended. Three credits.

451 International Politics (Seminar)
This seminar seeks to introduce the student to the advanced theories and great works of International Relations. Prerequisite: PSCI 250 or permission of instructor. Three credits.

452 Comparative Politics (Seminar)
This seminar discusses major issues in comparative politics and examines the advanced theories, methods, and concepts in the field. Prerequisite: PSCI 211 or 212 recommended. Three credits.

490 Thesis
Six credits.

499 Directed Study
See section 3.5. Six credits.

9.33 PSYCHOLOGY

BA and BSc Major Program
Candidates must follow the degree regulations in chapters 4 and 7 and complete:

a) PSYC 100;

b) PSYC 290 (291, 292); one of PSYC 210, 220, 225 or 230;

c) 12 PSYC credits at the 300 or 400 level; and,

d) 6 additional PSYC credits.

Students contemplating pursuing an advanced major or honours degree are strongly recommended to complete PSYC 290 (291, 292) in their second year.

BA and B.Sc. Advanced Major Program
Candidates must follow the degree regulations in chapters 4 and 7 and complete:

a) PSYC 100, 290 (291, 292); at least 6 PSYC credits at the 400 level;

b) PSYC 391, 491 (non-credit);

c) a senior research paper; and,

d) a total of 36 PSYC credits for BA; total of 42 credits for B.Sc.

BA and B.Sc. Honours Program
Candidates must follow the degree regulations in chapter 4 and 7 and complete:

a) PSYC 100; one of PSYC 210, 220, 225 or 230; PSYC 290 (291, 292), 301, 302, 394;

b) 6 credits at the 400 level;

c) PSYC 391, 491 (non-credit) and PSYC 490, the honours thesis; and

d) a total of 60 PSYC credits.

Psychology as a Subsidiary Subject
If psychology is selected as a subsidiary subject by an honours student in the BA program, 24 PSYC credits are required. These credits must include PSYC 301, 302.

B.Sc. Programs
Candidates must follow the degree regulations in chapter 7 and should note the following:

a) PSYC courses are considered science courses only when they are taken as part of a major, advanced major or honours subject in the B.Sc. program;

b) B.Sc. major program must include BIOL 111, 112; MATH 111, 112 and 12 additional credits in science courses (excluding PSYC);

c) B.Sc. advanced major and honours degree programs must include BIOC 111, 112; CHEM 100; MATH 111, 112; and 6 additional credits in science courses (excluding PSYC);

d) For the B.Sc. advanced major and honours programs, the 18 credits of electives approved by the department must consist of courses in PSYC or in other science subjects.

B.Sc. with Joint Honours
Students enrolled in joint honours programs in which psychology is one of the two honours subjects must take PSYC 230.

Note: PSYC 100 is a prerequisite for all other courses except PSYC 290 (291, 292) and 394.

Concentration in Forensic Psychology
Students enrolled in the Bachelor of Arts may apply in their sophomore year to concentrate their psychology degree in forensic psychology. In the second year, applicants must take PSYC 290 (291, 292) and 6 additional credits from the following: PSYC 210, 220, 225, 230. Candidates must complete PSYC 356, 357, 376, 378, 379, 380 and one of the following: PSYC 364, 365, 367, 368.

Applications are submitted to the Co-ordinator of the Forensic Psychology program (please see co-ordinator for additional information on the program).

Not offered 2015-2016.

Health Studies Colloquium
The Health Studies Colloquium is an optional, interdisciplinary, interfaculty opportunity that will bring together a small group of first-year students in both the Faculty of Arts and the Faculty of Science to study three academic subjects: biology, psychology and sociology. See section 4.3 for further information.

100 Introduction to Psychology
A survey of the major topics of psychology and an introduction to the methodology of psychological research. Students are normally expected to be involved with on-going research in the department by participating in experiments during the course of the academic year. Six credits.

210 Learning
A review of research on animal and human learning, and a consideration of the major issues that have shaped the study of learning. Topics include general principles of learning; classical conditioning; operant conditioning; radical behaviourism and its limitations; biological constraints on learning and social-cognitive learning.
Recommended for students considering graduate work in clinical psychology. Prerequisite: PSYC 100. Lab component. Six credits.

220 Cognitive Psychology
This course deals with the basic cognitive processes: perception, attention, memory, language, thinking, and problem-solving. Prerequisite: PSYC 100. Lab component. Six credits.

225 Sensation and Perception
An examination of how the physical structure of sensory systems and the psychological interpretation of sensory information influence what is perceived. Major sensory systems will be covered. Theoretical and empirical work will be explored. Prerequisite: PSYC 100. Lab component. Six credits.

230 Brain and Behaviour
An introduction to behavioural neuroscience, including analysis of the anatomical, physiological, and biochemical mechanisms underlying behaviour. Recommended for students considering graduate work in clinical psychology. Prerequisite: PSYC 100. Lab component. Six credits.

240 Social Psychology
This course covers relationships among individuals and the effect of those relationships on behaviour and personality. Topics may include: aggression, altruism, conformity, attributions, and attitudes. Lab component. Prerequisite: PSYC 100. Six credits.

260 Developmental Psychology
The study of major environmental and maturational influences and their relationship to the growing person. Credit will be granted for only one of PSYC 260 or PSYC 354. Lab component. Prerequisite: PSYC 100. Six credits.

290 Research Methods in Psychology
An introduction to methods used to collect and analyze data in psychology. Topics include: measurement; correlation and experimental design; research ethics; descriptive statistics; hypothesis testing; inferential statistics including correlation and regression, z-tests and t-tests, basic analysis of variance. Students will use statistical software. Credit will be granted for only one of PSYC 290 (291/292) and STAT 201, 224, 231. Prerequisite: PSYC 100. Lab component. Six credits.

301 History & Theory of Psychology I: From Ancient Times to the Renaissance
An examination of psychology’s evolution, including the theoretical issues that underlie past and present debates about the discipline’s subject matter and methodology. Approaches to historiography within the history of the sciences will also be discussed. Credit will be granted for only one of PSYC 301 or PSYC 300. Prerequisites: 12 credits of PSYC. Three credits.

302 History & Theory of Psychology II: From the Renaissance to the Present
An examination of psychology’s evolution, including the theoretical issues that underlie past and present debates about the discipline’s subject matter and methodology. Approaches to historiography within the history of the sciences will also be discussed. Credit will be granted for only one of PSYC 302 or PSYC 300. Prerequisites: 12 credits of PSYC. Three credits.

313 Health Psychology
This course provides an introduction to key issues in Health Psychology. In adopting a bio-psycho-social approach, the course will examine the ways in which biological, psychological, and social factors interact to affect health. Credit will be granted for only one of PSYC 313 or PSYC 310. Prerequisites: 12 credits PSYC. Three credits.

327 The Psychology of Pain
Contrary to popular belief, the experience of pain is not necessarily linked to bodily injury or detection of intense energy. Pain can be caused by various factors, including: tissue injury, visibility of wound or noxious stimulus, attential state, expectation, mood, previous pain experience, conditioned responses, etc. This course provides a basic understanding of pain perception and of the physical and psychological means of modulating pain. Credit will be granted for only one of PSYC 327 or PSYC 325. Prerequisites: 12 credits PSYC. Three credits.

328 Neural Mechanisms of Pain and Analgesia
This course examines the neurophysiological mechanisms of pain perception and related analgesic treatments. It provides a basic understanding of the neural activities underlying pain perception and the mechanisms that underlie pain-related neuroplasticity and various means of modulating pain. Credit will be granted for only one of PSYC 328 or PSYC 325. Prerequisites: 12 credits PSYC. Three credits.

341 The Self
This course explores contemporary perspectives and research on the self as it relates to social behaviour. The nature and function of the self and the ways in which the self is both influenced by and influences other people will be examined from a social-psychological perspective. Topics will include: knowledge of the self, self-motivation, self-esteem, self-regulation, self-prediction, the self in the context of relationships with others, and the influence of culture on views of the self. Prerequisite: 12 credits PSYC. Three credits.

347 Communication and Language
This course explores the social psychology of language and communication. Topics include basic concepts in language; language attitudes; language variation; bilingualism and multiculturalism; language and culture; discourse analysis; the relationship between language and social identity. This seminar will consist largely of student presentations. Credit will be granted for only one of PSYC 347 and PSYC 345. Prerequisites: 12 credits PSYC. Three credits.

353 Psychology of Personality
The purpose of this course is to explore the diverse body of contemporary research and theory on personality psychology. Although the course will also present some sense of history of personality psychology, the focus will be on the most recent empirical research. The course may involve small group research projects and/or an APA-style research proposal. Credit will be granted for only one of PSYC 353 or PSYC 350. Prerequisites: 12 credits PSYC. Three credits.

354 Lifespan Developmental Psychology for the Health Sciences I (Childhood & Adolescence)
This course presents an introduction to key issues in Health Psychology. In adopting a bio-psycho-social approach, the course will examine the ways in which biological, psychological, and social factors interact to affect health. Credit will be granted for only one of PSYC 354 or PSYC 260. Prerequisite: PSYC 100. Three credits.

355 Lifespan Developmental Psychology for the Health Sciences II (Adulthood & Aging)
Lifespan development is an exploration of the biological, cognitive, and psychosocial changes that occur across different periods of life. This course will provide a basic understanding of human development from conception through adolescence in relation to environmental influences, cultural expectations, maturational processes, and individual development. Credit will be granted for only one of PSYC 354 or PSYC 260. Prerequisite: PSYC 100. Three credits.

356 Forensic Practicum I
Students in this concentration will be required to complete two practica in approved forensic-related settings; one practicum in each year of the program. The minimum number of hours per practicum will be 40 hours. Students will be encouraged to explore options and opportunities for doing a placement in their home communities. Restricted to BA students in the forensic concentration. Three credits.

357 Forensic Practicum II
Students in this concentration will be required to complete two practica in approved forensic-related settings; one practicum in each year of the program. The minimum number of hours per practicum will be 40 hours. Students will be encouraged to explore options and opportunities for doing a placement in their home communities. Restricted to BA students in the forensic concentration. Three credits.

362 Applications of Psychology to the Health Sciences
This is a lecture and seminar course in which contemporary applications of psychology to the health sciences will be considered. The psychological issues related to the design and implementation of technologies to improve the well-being and functioning of individuals with disabilities will be covered. Credit will be granted for only one of PSYC 362 and PSYC 375. Prerequisites: 12 credits PSYC. Three credits.

363 Applications of Psychology to Society
This is a lecture course in which applications of psychology to society will be considered. This course provides students with an in-depth understanding of the tools of persuasion (e.g., consistency, reciprocity, liking, social proof, persuasive language, non-verbal cues), how to use these tools in an ethical manner, and apply them to solving everyday life and real-world problems. Credit will be granted for only one of PSYC 363 and PSYC 375. Prerequisites: 12 credits PSYC. Three credits.

364 Psychology of Gender
This course will review theories and research regarding gender in psychological development, social roles, and personality. Topics to be covered will include the history of research in gender; issues to consider in conducting gender research; gender role development and the socialization of gender; gender as a social variable in education and the workplace. Credit will be granted for only one of
379 Introduction to Clinical Psychology
This course provides an introduction to the theory, research and practice of clinical psychology. It assumes an evidence-based approach to assessment and treatment of psychological disorders, and examination of relevant ethical, professional, and theoretical issues. This course will be of interest to students intending to pursue graduate or professional studies in mental health or human services (e.g., clinical psychology, social work, counseling, nursing, law, medicine, corrections). Prerequisites: 12 credits of PSYC, including PSYC 370 or 376. Three credits.

380 Forensic Psychology
This course will focus on the relationship between psychology and law. Course content will include the history of the relationship between psychology and law; basic concepts in criminal justice and the study of crime; and the nature of offending from a psychological perspective. Prerequisite: 12 credits PSYC, including PSYC 370 or 376. Field trip component. Six credits.

386 Selected Topics
Prerequisite: 12 credits PSYC. Three credits.

387 Selected Topics
Prerequisite: 12 credits PSYC. Six credits.

389 Selected Topics
Prerequisite: 12 credits PSYC. Three credits.

391 Junior Seminar
The purpose of this non-credit course is to assist students in carrying out their thesis or senior paper research, choosing a career, and gaining admission to graduate or professional school. Attendance at colloquia and guest lectures relevant to psychology is mandatory. Prerequisite: junior standing in an advanced major or honours program in psychology.

394 Advanced Statistics for Psychological Research
An examination of intermediate and advanced statistical procedures for the psychology researcher, with emphasis on the use of statistical software packages. Lectures and lab sessions cover topics such as factorial analysis of variance; mixed designs; contrasts and comparisons; power; multiple regression and correlation; the MRC approach to factorial and mixed designs; and multivariate analysis. Credit will be granted for only one of PSYC 365 or PSYC 360. Cross-listed as WMGS 343. Prerequisite: 12 credits PSYC. Six credits.

407 Cross-cultural Psychology
This course will focus on the relationship between psychology and law. Course content will include the history of the relationship between psychology and law; basic concepts in criminal justice and the study of crime; and the nature of offending from a psychological perspective. Prerequisite: 12 credits PSYC, including PSYC 370 or 376. Field trip component. Six credits.

412 Advanced Topics in Cognition
This seminar and laboratory course will examine current topics in cognition. Topics considered may include attention, memory, decision-making, consciousness, pattern recognition and artificial intelligence. Credit will be granted for only one of PSYC 421 and PSYC 420. Prerequisite: PSYC 220 or 225; advanced major or honours standing or permission of the chair. Lab component. Three credits.

422 Advanced Topics in Perception
This seminar and laboratory course will examine current topics in perception. Topics considered may include multisensory integration, attention and action, sensory impairments, brain plasticity, visual perception, and haptic perception. Credit will be granted for only one of PSYC 422 and PSYC 420. Prerequisites: PSYC 220 or 225; advanced major or honours standing or permission of the chair. Lab component. Three credits.

431 Advanced Topics in Behavioural Neuroscience I: Neurobiology of Psychological Disorders
Topics in the field of behavioural neuroscience will be considered. The precise topics covered in the seminar will change from year to year, however the focus of the course content will be on various aspects of the behavioural neuroscience, including, but not limited to the etiology, diagnosis and treatment of psychological disorders, broadly defined. Credit will be granted for only one of PSYC 431 or PSYC 430. Restricted to advanced major and honours students. Cross-listed as BIOL 453. Prerequisite: PSYC 230 or permission of the department chair. Lab component. Three credits.

432 Advanced Topics in Behavioural Neuroscience II: Contemporary Issues
This is a seminar course in which current topics in the field of behavioural neuroscience are considered. Credit will be granted for only one of PSYC 432 or PSYC 430. Restricted to advanced major and honours students. Cross-listed as BIOL 454. Prerequisite: PSYC 230 or permission of the chair. Three credits.

441 Advanced Social Psychology
An examination of selected topics in experimental social psychology. The specific topics in this course will vary depending on the instructor. Topics include self-compassion, sexuality, and relationships. Credit will be granted for only one of PSYC 441 or PSYC 440. Restricted to advanced major and honours students. Prerequisites: PSYC 240 or 350 or 353 or permission of the chair. Lab component. Three credits.
442 Advanced Social and Personality Psychology
An examination of selected topics in experimental social psychology and consideration of the overlap between social psychology and personality psychology. The specific topics will vary depending on the instructor. Topics include self-esteem, interpersonal rejection, and prejudice and stereotyping. Credit will be granted for only one of PSYC 442 or PSYC 440. Restricted to advanced major and honours students. Prerequisite: PSYC 240 or 350 or 353 or permission of the department chair. Lab component. Three credits.

461 Advanced Developmental Psychology: Social & Emotional Development
This course will examine from an empirical standpoint specialized topics in developmental psychology with a focus on social/emotional development. Topics can include the development of emotional understanding, the development of typical and atypical attachment relationships, attachment across the life span, parent child interaction, and peer relationships. Credit will be granted for only one of PSYC 461 or PSYC 460. Restricted to honours and advanced major students. Prerequisite: PSYC 260 or PSYC 354 or permission of the department chair. Lab component. Three credits.

462 Advanced Developmental Psychology: Perceptual & Cognitive Development
This course will examine from an empirical standpoint specialized topics in developmental psychology with a focus on perceptual and cognitive development. Topics can include the development of intentionality, understanding self and others, language, and memory. Credit will be granted for only one of PSYC 461 or PSYC 460. Restricted to honours and advanced major students. Prerequisite: PSYC 260 or permission of the chair. Restricted to honours and advanced major students. Lab component. Three credits.

490 Honours Thesis
Prerequisites: PSYC 394, completed or concurrent; honours standing in psychology. Six credits.

491 Senior Seminar
The purpose of this non-credit course is to assist students in carrying out thesis or senior paper research, choosing a career, and gaining admission to graduate or professional school. Students will present their thesis proposal orally in the fall term and their completed research in the spring. Attendance at colloquia and guest lectures relevant to psychology is mandatory. Prerequisite: senior standing in an advanced major or honours program in psychology. No credit.

499 Directed Study I and II
These are reading or laboratory courses in which the student pursues an individual program of study under the direction of a faculty member. See section 3.5. Three credits each.

9.34 RELIGIOUS STUDIES
B. Appleby, Th.D.
L. Darwish, Ph.D.
R. Kennedy, Ph.D.
K. Penner, Ph.D.
A. Sandness, Ph.D.
Senior Research Professor
B. MacDonald, Ph.D.

Religious studies grew out of the field of theology in North America during the 1950s and 1960s in response to religious pluralism, ecumenism, and secularization. Students will be introduced to the religions of the world as well as to new religious groups. Recognizing its place in a university that has been shaped by the Catholic tradition, the department’s course offerings are weighted towards the Christian tradition, paying close attention to Roman Catholicism. Although students are able to complete a major, advanced major or honours degree in religious studies, the courses are intended for a broad range of undergraduate students who wish to examine the religious answers to the major questions about human existence.

Students planning a major, advanced major, or honours degree in religious studies must consult the department chair. The department offers an honours degree with other departments as a subsidiary subject. See chapter 4 for regulations. Further information is available in the department handbook.

100 Introduction to Christianity
This course examines the place of Christianity among world religions, in particular its relationship to Judaism and Islam. Students will explore the Bible, the history of Christianity, Christian beliefs and practices. Topics will include: Catholicism, Protestantism, Orthodoxy, various forms of modern Christianity, and contemporary issues such as social justice, women’s leadership, evangelicism, apocalypticism, and spiritual renewal. Credit will be granted for only one of RELS 100 and RELS 110 or RELS 120. Six credits.

110 An Introduction to World Religions
An introduction to the study of religion will be followed by a detailed consideration of the history, sacred literature, beliefs, practices, institutions, and contemporary situation of a number of religious traditions: Hinduism, Buddhism, Taoism and Confucianism, Shinto, Judaism, Christianity, and Islam. Credit will be granted for only one of RELS 110 and RELS 100 or RELS 120. Six credits.

120 Religion, Spirituality, and Health
This is an introductory course which provides a thematic focus on spirituality, healing and well-being in selected Eastern and Western religious traditions. Each unit of study will include an introduction to the tradition; explore spiritual paths pursued by its practitioners; examine characteristics of illness, healing and well-being in the tradition; and explore one or more specific contemporary health concerns and healing practices which arise from within each religious tradition. Credit will be granted for only one of RELS 120 and RELS 100 or RELS 110. Six credits.

200 Introduction to Religious Ethics

210 The Bible and Film
This course examines the impact of the Bible on film, and introduces major biblical themes in films with, and films without, explicit religious content. Students will learn how biblical knowledge can enrich our understanding of modern culture and important human issues, such as creation, redemption, election, messiah-ship, charisma, and tradition. Prerequisite: RELS 100 or 110 or 120. Three credits.

215 Sociology of Religion
An introduction to the sociological study of religion. Topics include social factors that influence religion at individual and communal levels; religion as agent of social cohesion and social conflict; religion and power structures; the impact of pluralism and globalization on religion today. Prerequisite: RELS 100, 110, or 120. Three credits.

219 Celtic Paganism
Cross-listed as CELT 220; see CELT 220. Three credits.

225 Cults and New Religious Movements
A study of cults in the context of 20th-century North American society, beginning with defining cults in relation to sects and churches. Topics include neo-paganism; Hare Krishna; the theosophical tradition; the Unification Church; tragic endings to cults such as the Branch Davidians and Heaven’s Gate; why people join cults; and the religio-cultural significance of cults today. Prerequisite: RELS 100, 110, or 120. Three credits.

229 Celtic Christianity
Cross-listed as CELT 230; see CELT 230. Three credits.

246 Philosophy of Religion
Cross-listed as PHIL 245; see PHIL 245. Three credits.

253 Introduction to the Hebrew Bible or Old Testament
Designed for students who wish to begin a systematic study of the Hebrew Bible or Old Testament. Each biblical book will be placed in its historical, theological, and literary context, and will be augmented by archaeological data, historical background, and contemporary scholarship. Prerequisite: RELS 100 or RELS 110 or RELS 120. Three credits. Not offered 2015-2016.

254 Classical Islamic Tradition
This course surveys the origins of Islam and development of Islamic thought and practice throughout the classical period. Using a combination of secondary and primary sources, we examine the life and mission of Muhammad within his historical context, the emergence of the Qur’an and its teachings, the contributions and scholarly critique of hadith sources, distinctive elements of Shi’ism, and the fundamental elements of Islamic thought and practice, including law, theology, ritual, and mysticism. Credit will be granted for only one of RELS 254 or RELS 370. Prerequisite: RELS 100 or 110 or 120. Three credits.

255 Introduction to the New Testament
This course is designed for students who wish to begin a systematic study of the New Testament. Each biblical book will be placed in its historical, theological, and literary context, and will be augmented by archaeological data, historical background, and contemporary scholarship. Prerequisite: RELS 100 or RELS 110 or RELS 120. Three credits. Next offered 2018-2019.
265 Introduction to the Gospels
In this course, students will employ source, form, and redaction criticism to explore the four canonical gospels, and to examine ideas about the kingdom of God, the parables, and the quest for the historical Jesus. Prerequisite: RELS 100 or 110 or 120. Three credits.

275 Introduction to Paul's Letters
The course will consist of a literary and historical study of the letters ascribed to Paul in the New Testament. Attention will be given to recent research on Paul and Judaism; Paul and the Law; the Pauline churches. Prerequisite: RELS 100 or 110 or 120. Three credits.

295 Religion and Politics
Cross-listed as PSCI 295, see PSCI 295. Three credits.

300 Health Care Ethics
This course examines the role of ethical theory in the development of bio-medical ethics. Topics will be analyzed from the perspective of the health care professional as well as the patient, and will include end-of-life care, genetics, reproductive technologies, and medical research. Cross-listed as NURS 330. Six credits.

310 Religion in Modern India
This course will explore continuity and change in modern Indian religion. After an introduction to contemporary Indian secular democracy, we will explore traditional Indian religion as a living phenomenon and review basic elements of traditional Hinduism. As well, examine the contribution of various change-makers to the evolution of Indian religious tradition and traditional Indian responses to the challenges created by Buddhism, Islam, British colonization, the partition of India, and Indian secular democracy itself. Through this examination, consideration of the influence of important modern Indian thinkers and modern Indian religious movements including India's experience of fundamentalism. Prerequisite: RELS 110 or permission of the instructor. Six credits.

315 Gender in Hinduism and Buddhism
This course examines diverse images of the feminine, both human and divine, in the philosophy, mythology and experience of women in Hinduism and the Buddhism of India and Tibet. It concentrates on the roles of Hindu and Buddhist women by means of historical and phenomenological approaches, and it promotes reflection on the interaction of gender, culture and religious identity in these societies as well as in our own. Prerequisite: RELS 110 or 100 or WMGS 100. Cross-listed as WMGS 397. Three credits. Next offered 2016-2017.

323 Mary and the Identity of Women
An examination of Mary in the New Testament and the development of ideas concerning her status as Mother of God. Students will explore depictions of Mary in art and literature, and examine the ways in these images have both shaped and reflected ideas about women. The continuing devotion to Mary in the modern world including on-going interest in Marian shrines, apparitions, and movements will be discussed. Cross-listed as WMGS 323. Three credits.

325 Early Christian Women
This course investigates women's participation in early Christian groups from the time of Jesus' ministry to the 6th century. Christian women's lives will be compared to those of women in Jewish and Greco-Roman societies. Students will analyze New Testament and other early Christian writings, read feminist scholarship, and examine such issues as women's leadership and violence against women. Cross-listed as WMGS 325. Three credits. Next offered 2018-2019.

326 Classical Hindu Traditions
This course examines the development of the Hindu worldview established in Indian tradition. It studies ancient Indian thought and explores the deities and myths of classical Hindu India. It presents elements of the classical schools of Hindu philosophies, such as Samkhya and Vedanta, and gives voice to the poets of the medieval Hindu devotional tradition. Together it will explore concepts of the human, the world, devotion, the divine and freedom in Hindu religious thought. Prerequisite: RELS 110. Three credits. Not offered 2015-2016.

327 Classical Buddhist Traditions
This course examines doctrinal, practice and historical developments of the Buddhist traditions of India and Tibet. It presents the ancient Indian world view, the life of the Buddha and early teachings of the tradition. It considers the thought of early philosophical schools, and, in particular, ideas of the nature of perception. It studies the doctrine, practice and narrative of Mahayana Buddhist tradition, the history of the movement of Mahayana Buddhism into Tibet and the evolution of Vajrayana tradition within and outside the Tibetan world. Prerequisite: RELS 110. Three credits.

353 Iconography of Christian Art: The Life of Christ
Cross-listed as ART 356; see ART 356. Three credits.

354 Iconography of Christian Art: The Saints
Cross-listed as ART 357; see ART 357. Three credits.

355 Current Issues in Biblical Archaeology
While many histories of Israel and Judah depend on biblical narratives, contemporary scholars question the use of the Bible as the principal source for understanding the social world of ancient Israel, and look instead to other Near Eastern texts and documents, and to archaeology, anthropology, and sociology. This course will examine current debates on the place of biblical narratives, other ancient texts, and archaeology in the study of ancient Israel and Judah. Cross-listed as ANTH 356. Three credits. Not offered 2015-2016.

356 Religion and Ecology
The course explores the two most prevalent ways that religion intersects with ecology: as a significant resource containing rich and varied myths, symbols and teachings about our earth home that promotes ecopraxis and, in an opposite manner as a conserving force that does not wish to challenge "global militaristic capitalism". The course looks at each of the major religious traditions and their approaches to these issues. Prerequisites: RELS 100 or 110 and 6 credits in RELS at the 200-level. Six credits. Not offered 2015-2016.

363 The First Christians
Examines the development of Christianity from its beginnings in the 1st century to its acceptance as the official religion of the Roman Empire in the 4th century. Students will learn about early Christian beliefs and practices, and explore the challenges faced by the first Christians. Topics include community organization, persecution, martyrdom, Gnosticism, and women in the church. Prerequisite: RELS 100 or 110 or 120. Three credits. Not offered 2015-2016.

365 Spirituality in Medieval Christianity
This course will focus on the spirituality of the formative years in the development of Christian thought, beginning with the legalization of Christianity in 313 CE and ending with the Reformation. Students will see how some of the most searching and intelligent men and women in both the Western and Eastern churches have wrestled with the question of how it is possible to know God. Three credits. Next offered 2016-2017.

374 Islam in the Modern World
This course examines issues and debates in modern and contemporary Islamic discourse from a broad spectrum of perspectives from reactionary to progressive. Assuming the fundamental principle that Islam is not a monolith and that Muslims are not a homogeneous population, the course introduces students to a plurality of voices, both Sunni and Shi'ite. Controversies around Islam and the state, 9/11, and gender are given special attention. The course uses both secondary and primary sources in translation. Prerequisite: RELS 254. Three credits. Next offered 2015-2016.

375 Islam in North America
Focusing primarily on the Canadian context, this course explores the variety of Muslim identities in North American society. After a brief historical survey of Islam and Muslims in North America, including immigrant and African-American Islam, the course examines the diverse perspectives of North American Muslim and non-Muslim scholars on questions and debates around integration, identity, authority, youth, education, gender, shariah in Canada (Muslim religious arbitration in civil law), media representation, discrimination, and surveillance post-9/11. Cross-listed as SOCI 374. Three credits.

401 Religious Approaches to Sexuality
Human sexuality is explored from two main perspectives: first, the teachings and practices of various religious traditions; and second, contemporary developments in sexual and reproductive health and rights. Among the issues to be considered are sexuality and gender roles, contraception and abortion, marriage and family. Cross-listed as WMGS 411. Prerequisite: RELS 100 or 110 or 120 or WMGS 100. Three credits. Not offered 2015-2016.

402 Religious Approaches to Sexual Diversity
This course will focus on religious teachings and traditions on sexual diversity within the broader context of human rights associated with sexual orientation and sexual differences. In particular, we will look at the experiences of gay, lesbian, bisexual, intersexual and transgendered persons within religious communities. Cross-listed as WMGS 412. Prerequisite: RELS 110 or WMGS 100. Three credits.

414 Ancient Indian Myth and Ritual
Ancient Indian thought assumes that there is a fundamental wholeness to our lives and to our world which only appears at times to be fragmented. The myth, ritual and philosophy of ancient India are, in many respects, a contemplation on this basic wholeness and its composite elements. Exploration of ancient Indian thought with its ideas of humans and demons, ancestors and gods, and our place in the
natural world in light of this reflection on "the parts and the whole" will be discussed. Prerequisite: RELS 110. Three credits. Next offered 2017-2018.

426 The Jewish World of Jesus
This course examines the history and literature of the Jewish people from the period of the Maccabean Revolt in the 2nd century BCE to the Bar Kokhba Revolt in the 2nd century CE. The literary sources for the study of the Jewish world at the turn of the era include the Dead Sea Scrolls, the Bible, and the Mishnah. This course serves as an introduction to the religious and social environment of the historical Jesus. Credit will be granted for only one RELS 426 or RELS 440. Prerequisite: RELS 100 or 110 or 120. Three credits. Next offered 2016-2017.

427 Jesus the Christ
Building upon RELS 426, this course begins with an examination of aspects of the life of the historical Jesus, including his teaching, ministry, and the events leading to his crucifixion. The four canonical Gospels and Letters of Paul will be analyzed as students probe the question of why Jesus came to be understood as the Messiah by the first Christians. Credit will be granted for only one RELS 427 or RELS 440. Prerequisite: RELS 426 or permission of the instructor. Three credits. Next offered 2016-2017.

490 Honours Thesis
Each student works under the supervision of a chosen professor who guides the selection of a thesis topic, use of resources, methodological component, quality of analysis and execution, and literary calibre of the student's work. Required for all honours students. Six credits.

499 Directed Study
Under the direction of a faculty member, students may pursue an individual program of study in an area of religious studies not available in the course offerings. For eligibility, see section 3.5. Three or six credits.

The Department of Sociology offers honours, advanced major and major programs. Second year sociology courses (200 level) require SOCI 100 as a prerequisite. 300- and 400-level courses require at least twelve credits in sociology below the 300 level as a prerequisite, or the permission of the instructor. SOCI 100 counts as one of these credits.

BA Major in Sociology
Candidates must follow the degree requirements of the Faculty of Arts and complete 36 SOCI credits which include:

a) SOCI 100;
b) SOCI 202 and at least 3 additional credits at the 200 level;
c) SOCI 301 and SOCI 302;
d) at least 12 additional SOCI credits at the 300 or 400 level.

BA Advanced Major in Sociology
Candidates must follow the degree requirements of the Faculty of Arts and complete 36 SOCI credits which include:

a) SOCI 100;
b) SOCI 202 and at least 3 additional credits at the 200 level;
c) SOCI 301 and SOCI 302 and at least 3 credits in methods: SOCI 300 or 307;
d) at least 6 additional SOCI credits at the 300 or 400 level;
e) a senior research paper.

BA Honours in Sociology
Candidates must follow the degree requirements of the Faculty of Arts and complete 60 SOCI credits which include:

a) SOCI 100;
b) SOCI 202 and at least 3 additional credits at the 200 level;
c) SOCI 301 and SOCI 302 and at least 3 credits in methods: SOCI 300 or 307;
d) at least 6 additional SOCI credits at the 300 level;
e) SOCI 400 (thesis), SOCI 491, plus at least 6 credits at the 400 level;
SOCI 391 is highly recommended.

Honours with a Subsidiary Subject
If sociology is selected as a subsidiary subject by an honours student in the BA program, 24 SOCI credits are required, with at least 6 of those credits at the 300 level.

Health Science Colloquium
The Health Studies Colloquium is an optional, interdisciplinary, interfaculty opportunity that will bring together a small group of first-year students in both the Faculty of Arts and the Faculty of Science to study three academic subjects: biology, psychology and sociology. See section 4.3 for further information.

100 Introduction to Sociology
Sociology provides tools for understanding a wide range of human experience and action, from the search for identity, to struggles against exploitation, to the making of a new 'global' world order. This course introduces the basic concepts and methods of sociology; helps students make sense of the social world; and explores the extent and limits of our capacity to change the social world. SOCI 100 is a prerequisite for all other sociology courses. Six credits.

201 Traditions in Social Thought
This course is an introduction to the dominant traditions of social thought. It establishes how the sociological tradition explores questions about social life and social organization. More specifically the course explores the variety of perspectives that have shaped sociological discourse: positivism, marxism, structuralism, symbolic interactionism, functionalism, feminism and postmodernism. Three credits.

202 Research Principles and Practices
This course addresses how various philosophic assumptions shape the aims and practices of research in sociology. It provides students with empirical research design principles and an introduction to methods of collecting and recording data, assessing reliability and validity, and conducting data analysis. Different research strategies are introduced. The ethical implications of research will be discussed. Three credits.

Note: SOCI 202 is a prerequisite for entry into higher level methods courses (except SOCI 305 and NURS 310).

210 Sociology of Marriage and the Family
This course analyzes the institution of the family from a sociological perspective. Attention is given to macro and micro levels of analysis. Statistical profiles of family patterns are employed to illuminate change in family structure over the past century. Topics include marriage, fertility, parenting, family violence, divorce, and family policy. Cross-listed as WMGS 210. Six credits.

212 Social Dissent
Social dissent has been a persistent, perhaps necessary, feature of modern (capitalist, bureaucratic, technocratic, patriarchal) societies. Students will explore ways in which dissent has been voiced and alternatives have been envisioned in the 20th century, including new organizational forms and tactics of dissent, and new technologies and international networks. Students may use the course as a basis for advanced social scientific research. Three credits.

215 Race, Class, Gender, and Sex
This course discusses the interconnected realities of race, class, gender and sex from various sociological perspectives. Substantive topics will include the socially constructed nature of these concepts in places like media, and the experiences of classism, sexism and racism in the workplace, schools, and everyday life. Cross-listed as WMGS 215. Six credits.

247 Environmental Social Science I: Problems and Paradigms
This course introduces students to the major environmental challenges of the 21st century from a social science perspective. Modern societies that have sought to conquer natural limits have now conjured up unanticipated "environmental" consequences. Students will explore how human understandings of environmental "problems" as well as action towards environmental solutions are shaped by ways of thinking, social contexts and institutional power relations. Cross-listed as PSCI 247. Three credits.

248 Environmental Social Science II: Power and Change
A continuation of SOCI 247, this course addresses the same conceptual problems but focuses more on understanding the societal and political response to environmental issues. Students will critically examine both proposed ecological futures, as well as means of environmental problem solving and societal change: state policy, intergovernmental treaties, environmental movements, and market solutions. Cross-listed as PSCI 248. Prerequisite: SOCI 247 or PSCI 247. Three credits.
250 Deviance and Social Control
This course introduces students to the processes of deviance and social control by critically examining the social category of deviance and its use in social institutions and daily social practices. Topics include mental illness, drug and alcohol use, alternative sexualities, social violence, business crime, the normalization of disability, and forms of social control such as the judicial system, law, medicine, education, and social interaction. Six credits.

298 Selected Topics
The topic for 2015-2016 is Cultures and Societies. As cultural theorist Raymond Williams tells us, culture is one of the most difficult words to define. Richard Hoggart points out that sociological methods are needed in order to understand culture. Some argue that culture is filled with dupes, others argue that active agents shape and participate in culture. This course will explore how society shapes culture and culture shapes society. Drawing on local, national and global practices of culture, students will learn how meaning-making is critical to understanding everyday life.
Three credits.

290 Social Inequality
Explores the distribution of social, political, and economic resources in Canadian society, and the unequal access to these resources based on social class, race, ethnicity, gender, age, and region. Using a central theme based upon the concepts of class and power, the course examines specific issues such as the socio-economic bases of social inequality, ascription, and the consequences of poverty in Canada. Six credits.

Note: 300- and 400-level courses require at least 12 credits in sociology below the 300 level as a prerequisite, or the permission of the instructor. SOCI 100 counts as six of these credits.

300 Research Methods
This course covers the many phases of the research enterprise, from designing studies, to analyzing data with an SPSS computer program, to writing up the final research. Students will test theories used in nursing and related disciplines, paying special attention to the transition from theoretical statement to testable hypothesis. Credit will be granted for only one of SOCI 300 or SOCI 305. Cross-listed as NURS 300. Prerequisite: SOCI 202. 70 average is recommended for entry. Six credits and lab.

301 Classical Social Theory
Explores the development and diversity of sociology's foundational perspectives through the study of selected original works by such authors as Karl Marx, Emile Durkheim and Max Weber. Restricted to major, advanced major and honours students. Three credits.

302 Topics in Contemporary Theory
This seminar course on contemporary theory varies from year to year. While a survey approach to contemporary theory may be part of the course, it is probable that the professor will choose specific interests for in-depth analysis. Potential perspectives include feminist theory, anti-racist theory, postmodernism, and neo-Marxist theory. Restricted to major, advanced major and honours students. Three credits.

303 Early Modern Social Thought
This course examines early modern ways of thinking about the social world. These include theories of social contract, liberalism, political economy, positivistic science, evolution and progressive history. Students will discuss these intellectual influences in terms of how they either provided assumptions and authority for the emergence of the discipline of sociology in the 19th century or were questioned and challenged by sociologists. Three credits.

307 Qualitative Research Methods
The course introduces students to the qualitative research methods used by sociologists. The course introduces the philosophical, theoretical, and ethical aspects of qualitative research as well as qualitative approaches to data collection, data analysis, presentation of results, and methods of evaluating qualitative research. The various aspects of qualitative research are illustrated with classical and contemporary studies. Prerequisite: SOCI 202. 70 average recommended. Three credits.

310 Gender
The course will examine the origin and persistence of gender-based inequalities in our society and their impact on personal lives. Biological, psychological, economic, and cultural analyses of male-female social relations will be considered. Cross-listed as WMGS 310. Six credits.

312 Social Movements
This course provides students with the tools for analyzing popular movements for social change. Students will survey the best examples of social movement analysis in the neo-Marxist, new social movement, social constructionist, and resource mobilization traditions. Movements covered may include: labour, environmental, student, peace, anti-racist, women's. Prerequisite: SOCI 212. Three credits.

321 Sociology of Atlantic Canada
Treats the Atlantic provinces as a distinctive region of Canada. The three areas of investigation are: the progress of various ethnic and religious groups who settled the region; the socio-economic development of the Maritimes and Newfoundland (from pioneer settlement through industrialization); and the strategies employed in the ongoing recovery from a century of regional disparity within Canada. Three credits.

322 The Antigonish Movement as Change and Development
Explores both social change and economic development through the history, philosophy, and practice of the Antigonish Movement as experienced at home and abroad. This movement will be used to examine political systems, labour relations, class conflict, education, co-operative strategies, religion, and ethnicity in the context of social transformation. Cross-listed as DEVS 322. Three credits.

325 Sociology of Mass Media
This course explores the various forms of media and their function in society. Students will be expected to critique the use of media in communications and the social construction of popular culture as portrayed in mass media. Six credits.

330 Sociology of First Peoples
Examines how the contemporary situation of First Peoples in Canada is related to historical interactions among Aboriginal and non-Aboriginal societies and indigenous cultural traditions. Attention will be paid to the intersection of race, class and gender and the relevance of existing theoretical perspectives in explaining the experiences of First Peoples. Six credits. Not offered 2015-2016.

360 Social Policy
The aim of this course is to explain social service systems in Canada and other industrial nations. The course will address historical and contemporary trends in federal and provincial social policies, and the effects of these programs (e.g., unemployment insurance, welfare) on the state, social institutions, and groups. Six credits.

364 Food and Society
This course emphasizes linkages between food production and consumption in the changing global political economy. The social organisation of food production and consumption will be assessed from the standpoint of comparative research on global food chains and recent insights surrounding the social construction of food risks and benefits. Case studies will change on an annual basis but will always involve some consideration of the interrelations between countries from the 'North' and the 'South'. Three credits.

366 Coastal Communities
This course introduces students to social research on coastal communities. Emphasis is given to the social transformation of common property fisheries, the rise of industrial aquaculture, demographic transitions in coastal communities and recent moves towards integrated coastal resource management. Comparative case materials from North Atlantic coastal communities in Atlantic Canada, Britain, Ireland, and the Nordic Countries will be used in this course. Three credits.

370 Sociology of Work
What is the meaning of work in pre-modern and capitalist societies? How is globalization influencing the experience of work, labour, and unemployment in Canada and internationally? The course introduces the theory and research on how labour markets, work organizations, industrial relations, and economic restructuring influence patterns of employment and the subjective experience of work, labour and unemployment. Six credits.

373 Irish Society
This course emphasizes the major factors that contributed to the making of modern Ireland. The topics to be covered include: the role of the Great Famine in altering both the social structure of Ireland and claims to Irish identity, the Irish diaspora and Irish emigrants to Atlantic Canada, social and political changes in the Republic of Ireland from independence to the ‘Celtic Tiger’ phenomenon and continuity and change in the conflict in Northern Ireland. Three credits.

374 Islam in North America
Cross-listed as RELS 375; see RELS 374. Three credits.

391 Junior Seminar
This seminar will assist honours students in their third-year and their thesis planning and provide an environment in which to learn with senior students working on their thesis. Students will choose an advisor with whom they will develop a proposal, collect materials, and consider methodological and ethical issues relevant to their research. Students are expected to attend colloquia, guest lectures and public
talks relevant to the discipline. Highly recommended for and restricted to honours students. Three credits.

397 Selected Topics
The topic for 2015-2016 is Sociology of First Peoples. This course examines how the contemporary situation of Canadian First Peoples, Inuit, and Métis is related to historical interactions among Aboriginal and non-Aboriginal societies and indigenous cultural traditions. Attention will be paid to the intersection of race, class, and gender and the relevance of existing theoretical perspectives including Marxism, post-colonialism and post-modern theories. Credit will be granted for only one of SOCI 397 and SOCI 330. Three credits.

398 Selected Topics
The topic for 2015-2016 is Urban Sociology. The course deals with major debates in urban social science: the Chicago School, Political Economy and Post-Modern perspectives. From there with: the industrial city of the early and mid-20th century and the attendant social problems of industrialization and the rise of inner-city slums, urban planning models dedicated to suburban development and social housing, the intersection of class, gender and racial forms of inequality in cities, the impact of urbanization upon sustainable development, and finally, case studies on globalization and the city. This includes separate lectures on: ‘global cities’ in the Global North, and globalization and urban development in the Global South. Three credits.

400 Honours Thesis Research
A required course for all senior honours students. Six credits.

417 Social Difference: Race, Ethnicity, Gender, Class, Sex, and Disability
Explores current theories of social difference and the personal, social, economic, and political effects of these differences in Canadian, western, and international contexts. Topics include oppression, resistance, identity politics, and discourse theory. Starting with the question, “What differences do some differences make?” Students will examine how issues of difference become relations of dominance. Prerequisite: SOCI 215. Cross-listed as WMGS 417. Three credits.

421 Ancestry, Society, and Personal Identity
This course attempts to locate personal biography in the context of social history. Students’ genealogies provide the starting point for explorations of family, social history, and personal identity. Students will apply sociological ideas to the historical periods that helped shape their personal and family histories. Three credits.

424 Women and Work
This course will focus on feminist analyses of women’s paid and unpaid work in 20th-century Canada, though historical and cross-cultural perspectives will be considered. Topics include race, class, and ability; pay equity, affirmative action, sexual harassment; women in family enterprises; domestic labour, the division of labour in the home, and mother work. Cross-listed as WMGS 424. Prerequisite: SOCI 310 recommended. Three credits.

427 Sociology of Friendship
Is friendship only personal and private, or does it have broader public, social, and political significance? This seminar addresses contemporary scholarship on the sociology of friendship as well as classic accounts of friendship by philosophers and social theorists. Through studying beliefs and practices of friendship we will address themes such as the self and personhood, gifts and exchange, trust and intimacy, sexuality and gender, social capital and networks, and the relationship of friends to strangers and enemies. Three credits.

433 Advanced Problems in Environment and Society
The course allows students to pursue issues raised in SOCI 247 and 248 in greater depth. It also exposes them to new developments in social theory. Each year will have a different thematic focus which could include: the ways in which social conceptions of “natural” and “unnatural” have changed over time; the social implications of new biotechnologies; the global environmental movement; or ideals of an ecological future. Prerequisites: SOCI 247, 248 or PSCI 247, 248. Three credits.

435 Sociology of Surveillance and Social Control
This course explores the significance of contemporary surveillance practices in information-based societies such as Canada. It begins with a focus on relevant historic developments concerning state formation, governance and social control. Students will then consider surveillance in relation to such issues as public attitudes to privacy, the ‘security state’, popular culture, the workplace, and consumerism. Three credits.

436 Sociology of Fear, Identity and Politics
This course will examine the significance of fear in shaping and organising everyday life. More than simply a psychological situation, it will develop an understanding of the complexity of fear and its relationship to social order and meaning. In particular, it will pay attention to the relationship between fear and identity formation as well as how we define and interact with others. It will also examine how fear is employed as a socio-political instrument. Three credits.

451 Selected Topics in Social and Criminal Justice
This course examines current theoretical and research issues in crime and social justice. Using qualitative, quantitative, and historical methodologies, students will explore topics such as gender, class, minorities, and criminal justice; police-community relations; carceral and non-carceral forms of punishment; criminal and regulatory legal procedures. Prerequisite: SOCI 350 or 352. Three credits.

491 Senior Seminar
A forum in which students gain scholarly experience by presenting and discussing their research; and taking part in colloquia, guest lectures, and public talks relevant to sociology. Required for honours students in their senior year. No credit.

499 Directed Study
Under the direction of a professor, students will work in an area of sociology not available in other course offerings. Students must consult with the faculty member by March 31 of the academic year in which they wish to take the course. See section 3.5. Three or six credits.

C. Weaver, Ph.D. Human Kinetics

Department

Program Requirements
Students may choose a BA with Advanced Major or Major or a BA with Joint Advanced Major or Major in women’s and gender studies and a Faculty of Arts subject. See chapter 4. Arts and science students may fulfill requirements for a pair in women’s studies and gender.

Students interested in women’s and gender studies should consult with the co-ordinator as early as possible.

Major in Women’s and Gender Studies
a) 12 credits of WMGS 100, 205 and 303, and,

b) 24 credits WMGS including cross-listed courses.

No more than 12 credits of cross-listed courses may be from a single department. None of the cross-listed courses may be in the student’s declared minor subject.

Joint Major in Women’s and Gender Studies and a Faculty of Arts Discipline

a) 36 credits in WMGS (subject A) and 36 credits in another Faculty of Arts department (subject B). The program or department requirements for majors are applicable in both subjects. Students must complete the following:

i) 12 credits of WMGS 100, 205 and 303, and,

ii) 24 credits WMGS including cross-listed courses.

No more than 12 credits of cross-listed courses may be from a single department. None of the cross-listed courses may be in the student’s declared subject B.
b) Course Pattern: see section 4.1.3

Advanced Major in Women's and Gender Studies
a) 18 credits of WMGS 100, 205, 303 and 400;
b) 18 credits WMGS including cross-listed courses; and
c) A senior paper. Guidelines for the senior paper are available from the co-
ordinator or the course instructor for WMGS 400. The senior paper is written in
conjunction with WMGS 400. No more than 12 credits of cross-listed courses
may be from a single department. None of the cross-listed courses may be in
the student's declared minor subject.

Joint Advanced Major in Women's and Gender Studies and a Faculty of Arts Discipline
a) 36 credits in WMGS (subject A) and 36 credits in another Faculty of Arts
department (subject B) or 36 credits in a Faculty of Arts department (subject
A) and 36 credits in WMGS (subject B). The program and department
requirements for advanced majors are applicable in both subjects. Students
must complete the following:
i) 18 credits of WMGS 100, 205, 303 and 400;
ii) 18 credits WMGS including cross-listed courses.
No more than 12 credits of cross-listed courses may be from a single
department. When WMGS is subject A, none of the cross-listed courses may
be in the student's declared subject B. When WMGS is subject B, none of
the cross-listed courses may be in the student's declared subject A.

Subsidiary in Women's and Gender Studies
a) 24 credits in WMGS and 48-60 credits in the honours subject. Students are
encouraged to include an additional six credits of WMGS cross-listed courses.
No more than 6 credits of WMGS cross-listed courses may be from a single
department. None of the cross-listed courses may be in the student's declared
honours subject.
   i) 12 credits of WMGS 100, 205 and 303
   ii) 12 credits WMGS including cross-listed courses.

Minor in Women's and Gender Studies
a) WMGS 100; and,
b) 18 credits in women's and gender studies, which may include WMGS 205 and/or
303 in addition to cross-listed courses. No more than six credits of cross-listed
courses may be from a single department. None of the cross-listed courses may
be in the student's declared major subject.

Pair
a) WMGS 100 (6 credits); and
b) 6 credits in women's and gender studies, which may include WMGS 205 and/
or 303 or cross-listed course(s).

Social Justice Colloquium
The Social Justice Colloquium is a first-year option for Bachelor of Arts students.
Participants are enrolled in dedicated sections of anthropology, global history and
women's and gender studies. See section 4.5 for further information.

100 Introduction to Women's and Gender Studies
This course will offer an overview of women's and gender studies from an
interdisciplinary perspective. Students will study the development of feminist
movements and will examine how concepts of race, class, sexuality and ability
intersect in shaping colonialism, sexual and reproductive health, violence, family
relations, paid and unpaid labour, political systems and poverty. The course will
consider the relationship between the local and the global through discussion of
such topics as popular culture, consumerism and environmentalism. Credit will be
granted for only one of WMGS 100 or WMNS 200. Six credits.

205 Gender, Sexuality and the Body
This course focuses on the ways that all bodies are sexualized and gendered in
Western philosophical thought, biomedicine and science. Topics include Western
binaries (man/woman, form/matter, mind/body), the sociocultural processes through
which bodies are sexualized, the biological/medical sciences and objectivity, a
critique of the dual sex model from the perspective of transfeminist theory and bodily
transformations and normalizations (including cosmetic surgery, monstrosity and
disability, and the feminist debate about female genital surgeries). Three credits.

210 Sociology of Marriage and the Family
Cross-listed as SOCI 210; see SOCI 210. Six credits.

215 Race, Class, Gender, and Sex
Cross-listed as SOCI 215; see SOCI 215. Six credits.

232 Gender and Popular Culture
This course will introduce a range of topics within the broad field of gender
and popular culture as well as how to study and critique genres of popular culture.
Beginning with the questions, "What is cultural studies?" and "Why is it important
to study popular culture?" we move on to study a range of pop culture media,
including music, television, film, video games and graphic novels/memoirs through
this methodological and theoretical lens. Three credits.

299 Selected Topics in Women's and Gender Studies I
Three credits.

303 Feminist Theory
This course examines various directions feminists have taken in studying women's
experiences and the construction of gender. Students will learn how these theoretical
approaches have influenced feminist research and critical practice. The course will
include early feminist thought as well as contemporary feminist theory. Prerequisite:
WMGS 100 or permission of the instructor or co-ordinator. Three credits.

305 Sex, Power and Political Thought
Cross-listed as PSCI 305; see PSCI 305. Three credits.

310 Gender
Cross-listed as SOCI 310; see SOCI 310. Six credits.

311 Men and Masculinities
Cross-listed as SOCI 311; see SOCI 311. Three credits.

317 Canadian Women's and Gender History: From Colony to Nation
Cross-listed as HIST 317; see HIST 317. Credit will be granted for only one of
WMGS 317 or WMGS 308. Three credits.

318 Canadian Women's and Gender History: Modernity
Cross-listed as HIST 318; see HIST 318. Credit will be granted for only one of
WMGS 318 or WMGS 308. Three credits.

323 Mary and the Identity of Women
Cross-listed as ANTH 324; see ANTH 324. Three credits.

324 Anthropology of Gender
Cross-listed as ANTH 324; see ANTH 324. Three credits.

325 Early Christian Women
Cross-listed as ANTH 325; see ANTH 325. Three credits.

326 Issues in the Anthropology of Kinship
Cross-listed as ANTH 326; see ANTH 326. Three credits.

329 Studies in Women Writers: Feminisms and Their Literature
Cross-listed as ENGL 329; see ENGL 329. Three credits.

330 Studies in Women Writers: Genres, Cultures, and Contexts
Cross-listed as ENGL 330; see ENGL 330. Three credits.

332 Gender in Sport and Physical Activity
Cross-listed as HKN 332; see HKN 332. Three credits.

333 The Medieval Body
Cross-listed as HIST 333; see HIST 333. Three credits.

343 Psychology of Gender
Credit will be granted for only one of WMGS 343 or WMGS 360. Cross-listed as
PSYC 343; see PSYC 343. Three credits.

344 Developmental Social Psychology of Gender
Credit will be granted for only one of WMGS 344 or WMGS 360. Cross-listed as
PSYC 365; see PSYC 365. Three credits.

345 Women and Politics
Cross-listed as PSCI 345; see PSCI 345. Three credits.

346 Critical Race & Sexuality Studies in Canada
This seminar course offers students a survey of feminist approaches to
contemporary critical race theory and sexuality studies in Canada, with a particular focus on the values of ‘multiculturalism’ and ‘tolerance.’ The course will consider the intersections of gender with such topics as colonialism, racism and immigration, whiteness, as well as homophobia and homonationalism. Credit will be granted for only one of WMGS 346 and WMGS 399. Prerequisite: WMGS 100. Three credits.

364 Social Justice and Health
Cross-listed as NURS 364; see NURS 364. Three credits.

365 Gender and Health
Cross-listed as NURS 365; see NURS 365. Three credits.

367 Gender and Management
Cross-listed as BSAD 367; see BSAD 367. Three credits.

370 European Women's History
Cross-listed as HIST 360; see HIST 360. Three credits.

378 Human Sexuality
Cross-listed as PSYC 378; see PSYC 378. Three credits.

395 Selected Topics in Women's and Gender Studies I
Course content changes from year to year and may reflect faculty involvement in a specific area of research. Three credits.

397 Women in Hinduism and Buddhism
Cross-listed as RELS 315; see RELS 315. Three credits.

398 Themes in the History of Sexuality
Cross-listed as HIST 398; see HIST 398. Three credits.

399 Selected Topics in Women's and Gender Studies II
Prerequisite: WMGS 100. Three credits.

400 Research Methods Seminar
This course focuses on understanding inequality from an academic perspective, and seeks to do so through understanding grass-roots activism and movements for social change. This course is designed to combine feminist theories with feminist activist work, allowing students to learn from how feminism looks as gender challenges are enacted in homes, workplaces and political spaces. Students will examine research regarding social change through a feminist lens, and will gain field-based knowledge through placement with an organization, community group or service. Six credits.

411 Religious Approached to Sexuality
Cross-listed as RELS 401; see RELS 401. Three credits.

412 Religious Approached to Sexual Diversity
Cross-listed as RELS 402; see RELS 402. Three credits.

417 Social Difference: Race, Ethnicity, Gender, Class, Sex, and Disability
Cross-listed as SOCI 417; see SOCI 417. Three credits.

424 Women and Work
Cross-listed as SOCI 424; see SOCI 424. Three credits.

Other courses may be considered WMGS cross-listed courses after consultation with the women’s and gender studies co-ordinator.

Coach, Women’s Basketball Auyg Jones, M.Ed.
Coach, Women’s Hockey Ben Berthiaume, B.Ed.
Coach, Men’s Football Gary Waterman, B.Sc.P.E.

Co-operative Education Program
Manager Jane MacDonald, MLIS, M.Ad.Ed., M.Ed., CCC

Facilities Management
Director Leon MacLellan, M.Eng., P.Eng.
Maintenance Manager Shaun Chisholm, BBA
Manager, Custodial Services Peter MacDonald
Budget Analyst Dave MacNeil, BBA
Project Manager Brian Doiron, P.Eng.

Project Manager Tim Handforth, CET
Project Manager Sandy MacDonald, P.Eng.
Project Co-ordinator Candice Finbow, BA
Manager, Safety & Security Robert Proctor, BA, B.Ed.

Office of the Registrar
Registrar & Director of Enrollment Tara Buksaitis, BA, MLIS
Associate Registrar Shannon Morell, B.Ed.
Financial Aid Officer Rachel MacFarlane, BA
Research Analyst Aimee Lyons, BIS, HRM

Service Learning
Program Co-ordinator Ann Bigelow Ph.D.
Program Manager Marla Gaudet, M.Ad.Ed.

Student Services
Vice-President, Recruitment & Student Experience TBA
Director, Residence Services & Interim Director, Student Life Bob Hale, BBA
Director of Health, Counselling & Accessible Learning Margaret McKinnon, MA, R. Psych
Manager of Athletics & Recreation Leo MacPherson, MBA
Manager, Accommodations, Residence Services Alison Sampson, BBA
Manager, Student Career Centre Jane MacDonald, MLIS, M.Ad.Ed., M.Ed.
Manager, Student Life Shannon Travers, BA
Student Conduct Co-ordinator Tyson Ball, BA
Centre Accessible Learning, Co-ordinator Elizabeth Keil, M.Ad.Ed.
Students of African Descent Advisor Michael Fisher, MA
International Students Advisor Brenda Berthiaume, BA
Human Rights & Equity Advisor Marie Brunelle, LLM
Aboriginal Students Advisor Terena Francis, BA
LGBTQ Students Advisors Chris Frazer, Ph.D.

Technology Support Group
Director John DeLorey, B.Sc.
IT Manager TBA
GLOSSARY

Academic Calendar (also known as the Calendar)
The university’s official publication which outlines admission requirements, fees, grading systems, academic regulations, course offerings, and other information. Students admitted in a particular year are bound by the regulations described in the Academic Calendar for that year.

Academic Year
The regular academic year at StFX runs from September to April. The first term lasts from early September to mid-December and the second term, from early January to late April. See also spring and summer sessions.

Advanced Standing
Students may enter a higher level of courses in a subject when they have mastered the lower, usually introductory, level. This is normally permitted after completion of international baccalaureate (IB) or advanced placement (AP) courses. See section 1.3. This can be done only with the permission of the professor who teaches the course. Advanced standing does not reduce the number of credits required for a degree.

Audit
To take a course without receiving academic credit. A student may audit any course with the permission of the professor who teaches it. A student may attend and participate in the course and may, in agreement with the instructor, choose to receive feedback from submitted course work and/or exams, but will not receive a grade and will not be given credit for the course. The fee for a course taken for audit is normally one-half of the normal course fee.

Bachelor’s or Baccalaureate Degree
The degree usually awarded after three or four years of study and successful completion of course and program requirements. A bachelor’s degree may be awarded in arts (BA), science (B.Sc.), business administration (BBA), education (B.Ed.) or information systems (BIS); some may be earned with honours, with advanced major, or with major. See page 3 for more information on bachelor’s degrees at StFX.

Bursary
A monetary award based on financial need and reasonable academic standing.

Chair
The head of an academic department, for example, the chair of the Department of Celtic Studies.

Convocation
The graduation ceremony held every spring and fall at which degrees and diplomas are awarded.

Credit
The value assigned to a course. A course with three or more contact hours per week for the academic year has a value of six credits and is called a full course. A course taught for three hours a week for one term has a value of three credits and is called a half course. When students successfully complete a course, they are said to have credit for the course.

Dean
At StFX, there are four deans: The Dean of Arts, the Dean of Business, the Dean of Education and the Dean of Science.

Dean’s List
An academic honour granted to students who achieve high grades while enrolled in at least 24 credits. See 3.19.

Decile
The student decile ranking in a course (10 high, 1 low) recorded for courses with 15 or more registrants.

Diploma
An earned document which follows a program of study typically lasting two years or less.

Distinction
A designation awarded to students whose general average over their final three years of study is 80 or higher. Minimum averages each year may also apply. See 3.20.

Electives
Courses which are not specified in a degree program. Electives may be open, that is, chosen by the student, or approved. Approved electives require permission from either the chair of the department of the student’s major, or the chair of the department in which the student wishes to take a course. Arts/science electives do not include professional program courses such as aquatic resources, business administration, education, engineering, human kinetics, human nutrition, information systems or nursing.

Faculty
A grouping of departments which give academic instruction in related subjects. At StFX, there are four faculties: the Faculty of Arts, the Faculty of Business, the Faculty of Education and the Faculty of Science. The Faculty of Arts is comprised of subjects in the humanities and social sciences. Within the Faculty of Business are the business administration and information systems subjects. The Faculty of Education includes education courses at the undergraduate, graduate and doctoral level. The Faculty of Science contains the life, earth and physical sciences, as well as engineering, human kinetics, human nutrition, nursing and mathematics, statistics, and computer science. The faculty is also used to describe members of the teaching staff of the university.

Full Time/Part Time
There are several definitions of full time/part time. Normally a student carries 30 credits for an academic year. Only students carrying at least 30 credits are considered for in-course scholarships. For the purpose of billing students, the business office considers a student carrying 24 or more credits to be full time. For the purpose of student loans 18 to 24 credits, or 60 percent to 80 percent of the normal load, may be considered full time by agencies which administer loan programs. For purposes of reporting to Statistics Canada full time is defined as 18 credits or more.

Grade Appeal
The process by which a student appeals his or her final grade for a course. See 3.13.

Graduate Degree
Master’s or doctoral (Ph.D.) degrees require completion of an undergraduate degree first.

Honours
A degree which requires not only depth and breadth of subject study, but also superior academic achievement.

Humanities
The study of human thought which includes literature, philosophy, history, religion, languages, and the fine arts.

Invigilator
A person who, in the absence of the professor, administers and oversees examinations.

Junior
A third-year student.

Levels
Course Level
Courses are numbered and referred to according to the normal year of study in which a student would complete them, as in 100-level (first year), 200-level (second year), 300-level (third year) and 400-level (fourth year) courses.

Student Level
A student’s level corresponds to the level of their degree program. The most common student levels at StFX are UG (Undergraduate), ED (Bachelor of Education) and GR (Graduate).

Year of Study
Most four-year degree programs require the completion of 120 credits, normally at 30 credits per year for four years. Students’ year of study is based on the number of credits they have earned towards their current degree. Students are “promoted” to the next year of study when they are within six of the required number of credits for that year. For example, a student who has earned 54 credits is considered to be a third year (junior) student.

Major
A student’s primary subject. StFX also offers joint majors, studying a combination of two subjects. While StFX does not have programs with double majors, there are opportunities for students to have the equivalent of double majors.

Mature Student
A candidate who has not fulfilled the normal admission requirements and has been out of school for at least three years.
Minor
The secondary subject or area of study, normally at least 24 credits in one subject.

Non-Degree Student
A student who is not registered in a degree program but is enrolled in courses either part time or full time.

Orientation
A program for new students providing an academic and social introduction to university life prior to the beginning of classes in September.

Pair
Twelve credits in one subject, with six credits at the 200-level or higher. As exceptions, language pairs in French, Celtic Studies and Classics may be composed of 12 credits at the 100-level. A student may complete only one pair from a department, and may not complete a pair in the major or minor subject. A pair may not be completed in any of the professional or applied program disciplines: AQUA, BSAD, ENGR, HKIN, HNU, INFO or NURS.

Passing Grade
The passing grade for all undergraduate courses is 50. See chapter 3. For education, see chapter 4. For graduate studies, see chapter 8.

Pattern
The recommended or suggested series of courses a student takes in order to fulfill degree requirements.

Placement Test
Incoming students who wish to study music or modern languages must take placement tests to determine their eligibility for, and appropriate level of, study. See department guidelines, chapter 9.

Plagiarism
A form of cheating in which a student attempts to pass off as his or her work the words or ideas of another person or another writer. See 3.8.

Prerequisite
A course which must be completed before taking another course.

Program
An approved set of courses, requirements and study pattern, leading to a degree, diploma or certificate.

Rank
The student's rank in his/her group and year of study. Ranking is not recorded for students enrolled in less than 24 credits or for those who withdraw during an academic year.

Registrar
The university officer responsible for managing academic information and processes and enforcing the regulations contained in the Academic Calendar as they pertain to students' academic performance.

Registration
The process of formally enrolling in courses.

Repeated Course
When a student repeats a course, the original grade remains on the transcript and in the student's average. However, the credits originally earned are removed from the student's transcript.

Scholarship
A monetary award based on academic merit or excellence.

Senior
A fourth-year student.

Service Learning
Service learning is an innovative way to integrate experiential learning, academic study and community service. It is an opportunity for students to apply what they are learning in the classroom in a community setting. The goal is to blend service and learning so that the service reinforces, improves and strengthens learning. Service learning is possible in many academic disciplines and through a broad range of courses and service experience.

Social Sciences
The systematic study of human behaviour, including anthropology, development studies, economics, political science, psychology, sociology and women's and gender studies.

Sophomore
A second-year student.

Special Needs Student
A student with a physical or learning disability. See 1.1.

Spring Session
An eight-week term from early May to late-June.

Student Loan
A sum of money which must be repaid. Loans to university students are obtained through the Canada Student Loan Plan.

Study Abroad
The opportunity for a student enrolled in a four-year program to study at another accredited university as part of a degree from StFX. See 3.18.

Subject Abbreviations
The abbreviations below are used throughout the Calendar and on transcripts:

- ADED Adult Education
- ANTH Anthropology
- AQUA Aquatic Resources
- ART Art
- BIOL Biology
- BSAD Business Administration
- CATH Catholic Studies
- CELT Celtic Studies
- CHEM Chemistry
- CLAS Classical Studies
- CSCI Computer Science
- COOP Co-operative Education
- DEV5 Development Studies
- ECON Economics
- ESCI Earth Sciences
- EDUC Education
- ENGR Engineering
- ENGL English
- ENSC Environmental Sciences
- FREN French
- GERM German
- HIST History
- HKIN Human Kinetics
- HNU Human Nutrition
- IDS Interdisciplinary Studies
- INFO Information Systems
- MATH Mathematics
- MNST Ministry
- MUSI Music
- NURS Nursing
- PHIL Philosophy
- PHYS Physics
- PSCI Political Science
- PSYC Psychology
- RELS Religious Studies
- SOCI Sociology
- SPAN Spanish
- STAT Statistics
- WMGS Women’s and Gender Studies

Subsidiary Subject
When the study of two subjects is combined such that one is subordinate to the other, the second is considered a subsidiary to the first. Within the BA Honours and a subsidiary program, the subjects in which an honours is possible are those in which one may complete a single honours, with the added exception of development studies. A subsidiary is possible in those fields in which one may complete at least a major with the added exception of art history.

Summer Session
A six-week term scheduled from early July to mid-August.

Thesis
The lengthy paper required for an honours or graduate degree.
The record of a student’s program of study, courses taken, and grades achieved. See section 3.15 for information on academic records.

Courses taken at another university or college are given equivalent StFX course numbers and credit value for transfer credit.

A first degree completed at a university or college. At StFX, the first degree is the baccalaureate degree which takes four years of full-time study to complete.
